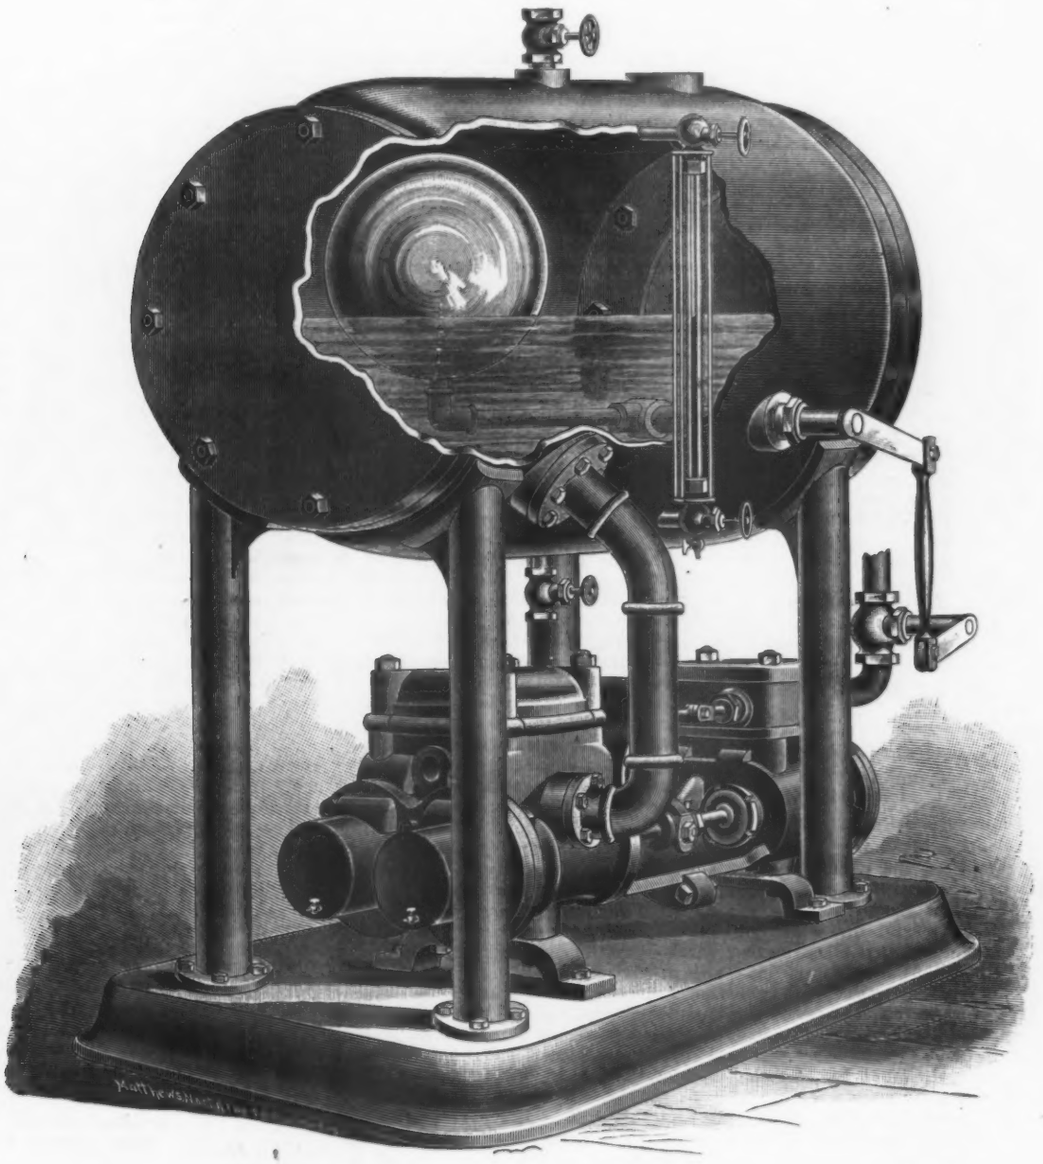
THE IRON AGE

THURSDAY, SEPTEMBER 27, 1888.

Duplex Pump with Receiving Tank.

We show on this page a duplex pump with receiving tank built by the Volker & Felthousen Mfg. Company, of Buffalo, N. Y., and designed for use in draining radiators, heaters, steam jackets, &c., and feeding the water of condensation direct to the steam boiler. It does away with the expense and annoyance of traps and returns the condensed steam to the boiler as fast as it accumulates in the receiver above the pump. The variation of the steam pressure does not affect it, and it stops the usual water hammer in pipes. The pump and receiver, moreover, serve a good purpose in regulating brine circulating in refrigerating machinery and other similar uses. The water cannot accumulate in any quantity, as it lifts a float which opens the steam-valve to the pump, thereby starting the pump, which forces it to the point desired. The details of the arrangement are clearly shown in the illustration.



DUPLEX PUMP WITH RECEIVING TANK AND AUTOMATIC ATTACHMENT, BUILT BY THE VOLKER & FELTHOUSEN MFG. COMPANY, BUFFALO, N. Y.

The Priestman Petroleum Engine in the United States.

Those of our readers who have more attentively followed the developments in connection with engines other than steam will be interested to know that arrangements are being made for the sale of the patents in the United States of the Priestman petroleum engine, which at present is performing very satisfactorily in England. Through the courtesy of Mr. Robert O. Ritchie, who represents the English syndicate now controlling the American patents, we were favored last week with an exhibition of two of the engines in actual working condition at 106 Washington street, New York.

One of the engines shown is rated at four and the other at one horse-power, and both strikingly illustrate the advantages of motors of their class, such as simplicity, ease of management and ready adaptation to any locality, great economy of oil, moreover, being a prominent claim made for the Priestman engine. So far as the mechanical details of the engine are concerned, we would refer our readers to a description published in our issue of June 14. We will briefly repeat here, however, that the engine is single-acting, with an explosion at every second revolution, the charge being lighted by a spark from an induction coil worked by a single large cell. A supply of oil sufficient for a day's work is held in a tank in the engine base, and from there is conducted through a spray-pipe to a vaporizer, which, when starting, is heated by a small lamp, but afterward by the exhaust. A suitable supply of air also is admitted to the vaporizer, the proportion of air to petroleum being adjustable, so as to insure a proper explosive mixture. The charge is taken into the cylinder at the outstroke of the piston and compressed at the next instroke. At the following outstroke it is fired, and the exhaust takes place during

the fourth stroke. The action in this respect is similar to that of the Otto gas engine. A valve in the inlet-pipe prevents the propagation of the explosion back into the vaporizer. There is no slide-valve, properly speaking, but simply an exhaust-valve, which is worked by an eccentric. To the eccentric rod is attached, by means of an insulating handle, a metal knob, which describes a path somewhat resembling an ellipse, and is so placed that once in every revolution of the eccentric—that is to say, once in every second revolution of the crank, it bridges two metal springs which are insulated from each other and from the framework of the engine, and which form the terminals of the primary circuit of the induction coil. By this means once every second revolution the induction coil is set going and the charge fired at the right moment. It is claimed that no lubrication is required for the cylinder, the petroleum vapor serving to keep the surfaces in good condition.

Any of the refined varieties of petroleum can be successfully used, and crude oil has also been used with the best results. As to the actual oil consumption, we have before us a report of a test made a few months ago by Sir William Thomson. The figures, which he obtained with an engine loaded by means of a brake, with slightly more than six horse-power, showed a consumption of 1.71 pints per hour per brake horse-power. The whole of the oil is consumed and not only the lighter portions, so that there is no useless residuum. In view of the fact that the engine is said to show great regularity of running, it would appear to be well adapted to electric lighting purposes aside from its general utility in other directions, and in fact we are told that this is one of the uses to which it has been put with eminent success. With an early sale of the patents, it is not unlikely that the manufacture of the engine will soon be carried on here, a result to which small power users will, no doubt, look forward with interest.

The Loomis Fuel Gas Plant at Tacony.

The Loomis Gas Machinery Company have nearly completed the plant built by them under the patents of Burdett Loomis, of Hartford, Conn., at Tacony, Pa., in connection with the saw and file works of Henry Disston & Sons, at that place, a suburb of Philadelphia. While this particular plant is housed in a corrugated iron building, 40 feet by 98 feet, a works of the same capacity would only require a structure of 22 feet by 60 feet. Among the numerous systems designed to meet the growing demand for gaseous fuel for domestic and factory use that of Mr. Loomis, has occupied a prominent place. For three years a Loomis plant for manufacturing illuminating gas has been in operation at Cottage City, Mass., while the first fuel gas plant has been running regularly for over a year at the works of the John Russell Cutlery Company, at Turner's Falls. The works at Tacony have been in partial operation for some time past, while a large fuel plant is being built in connection with the Addyston Pipe and Foundry Company, at Addyston, Ohio, near Cincinnati. A contract has been closed lately for a large plant for manufacturing gas for factory and city use for Akron, Ohio, an illuminating works for Kenosha, Wis., and a fuel plant for the Waltham Watch Company, at Waltham, Mass., to furnish gas for all their boilers, or forging, crucibles, annealing furnaces, soldering, tempering, &c.

The leading point in which the Loomis system differs from other methods of manufacturing water gas is that the generator is run by down draft during the period when the coal is being brought to incandescence to decompose the steam passed through it in an opposite direction to manufacture water gas. The process therefore consists of two distinct periods, producing two products—one, generator gas made during the period of "blasting" when air is drawn through a column of fuel downward by an exhauster; second, water gas, produced by allowing steam to enter from below into the column of incandescent fuel, being carried off by a series of tuyeres in the generator above the fuel line. The advantages claimed for the down-draft system are that when the coal is being made hot during the blasting period, preliminary to the manufacture of water gas proper, the volatile gases passing down through the hot coal are fixed. In other words, the troublesome tars, &c., are decomposed. The down-draft system, it is claimed, tends also to reduce clinkering, there is no poking from the top, and the coal is charged during the blasting whereever spots of fire begin to show.

The Tacony plant consists of four generators, having a 9-foot outside diameter, 6-foot diameter fire-box, and 14-foot hight, with a fire-brick grate and an air-tight charging hopper. Connected with the ash-pit is a vertical cooler, 2 feet in diameter and 18 feet high, the generator gas being drawn through its 30 tubes by a No. 3 Root's exhauster, the office of the cooler being to reduce the temperature of the generator gas made during the blasting period to 500 to 600 degrees. In this manner the injurious effects upon the exhauster of sudden and great fluctuations in temperature are avoided. The water in the cooler is used to feed the boilers, so that the heat is not wasted. The rest of the plant consists of a Heine boiler, set to be run with generator gas, which furnishes steam for two 9 x 12 engines, made by the Phœnix Iron Works, to drive the four exhausters, one engine being used for the day turn, and the other for the night shift. There was being built, too, at the time of our visit a set of retorts of special design for manufacturing illuminating gas with the water gas as a basis, the foundations for the purifier being completed while the last touches were being put to two holders, one of 20,000 cubic feet capacity for water gas, and one of 30,000 cubic feet capacity to be used for illuminating gas. Now it is being employed to measure the quantity of generator gas comsumed and made. We may mention that the company have laid over a mile of pipe in the village of Tacony, and that a number of houses have their connections completed for fuel gas. The company have fitted up a room with stoves, lamps, &c., to show the domestic applications of the gas.

Turning now to the results obtained, it is stated that the relative proportions of generator and water gas show a production of 130,000 to 140,000 cubic feet of the former and from 40,000 to 50,000 cubic feet of the latter, according to the character of the coal used. Any kind of bituminous or semi-bituminous slack coal may be employed. So far as the employment of anthracite culm is concerned, we are advised that since the Tacony plant was built specially for bituminous coal it has not been determined how far it is possible to go with it as a part of the mixture. Thus far the maximum has been two-thirds of anthracite culm and one-third of bituminous coal. The 6-foot generators at Tacony each have a capacity for gasifying 8 tons of coal per 24 hours, and it is estimated that the size now contemplated for subsequent plants, 7 foot diameter of fire-box, will convert 10 tons daily into gas. When running on generator gas alone as large an amount of steam is introduced into the generator as is consistent with a continuous run, so that the product is a gas which practically is intermediate between the ordinary Siemens producer gas and pure water gas. The Tacony plant, which was built under the supervision of Mr. S. T. Williams, general manager of the steel works of Messrs. Disston & Sons, has been used for some time past to test the value of fuel gas in its application to the different departments of these works.

At the time of our visit the striking differences in the convenience of using solid and gaseous fuel were well illustrated in the forge and hardening shops of the works. In the file forging shop a number of the gas and coal forges were at work, though the latter are being taken out as rapidly as possible. The contrast in cleanliness, ease of supervision, comfort to the men and uniformity of heating was remarkable, and even though the comparative cost has not yet been ascertained, these incidental important advantages would insure the employment of gas even if there were a balance against it. In the saw hardening department one furnace has been remodeled to use gas, and others are following. There, too, the same features are striking, being coupled besides with a decided gain in the amount of work one man can do and with the advantage that the entire handling of coal and of ashes is dispensed with, and that it becomes possible to economize considerably in floor space. For some time past Loomis generator gas has been used in a Siemens reheating furnace with a 7 x 12 foot hearth, used in connection with an 18-inch bar mill. According to the superintendent, its superiority over ordinary Siemens producer gas has been well shown in the smaller consumption of gas and in the more rapid and better working of the furnace. Permanent connections are now being made with the main mill, and within a week fuel gas will be used exclusively. Gas flues are being laid to connect with all boilers in the steel works, and in a few weeks they, too, will be fired with generator gas. Thus far the latter only has been employed. Later on a practical demonstration is to be made with the use of pure water gas in a Siemens furnace. It is claimed that the saving of labor in running these Loomis generators on generator gas over the Siemens producers is very large, one man doing the work of three; and the gas is made under pressure and can be carried to any number of furnaces, direct, without use of stack draft and the flow regulated perfectly.

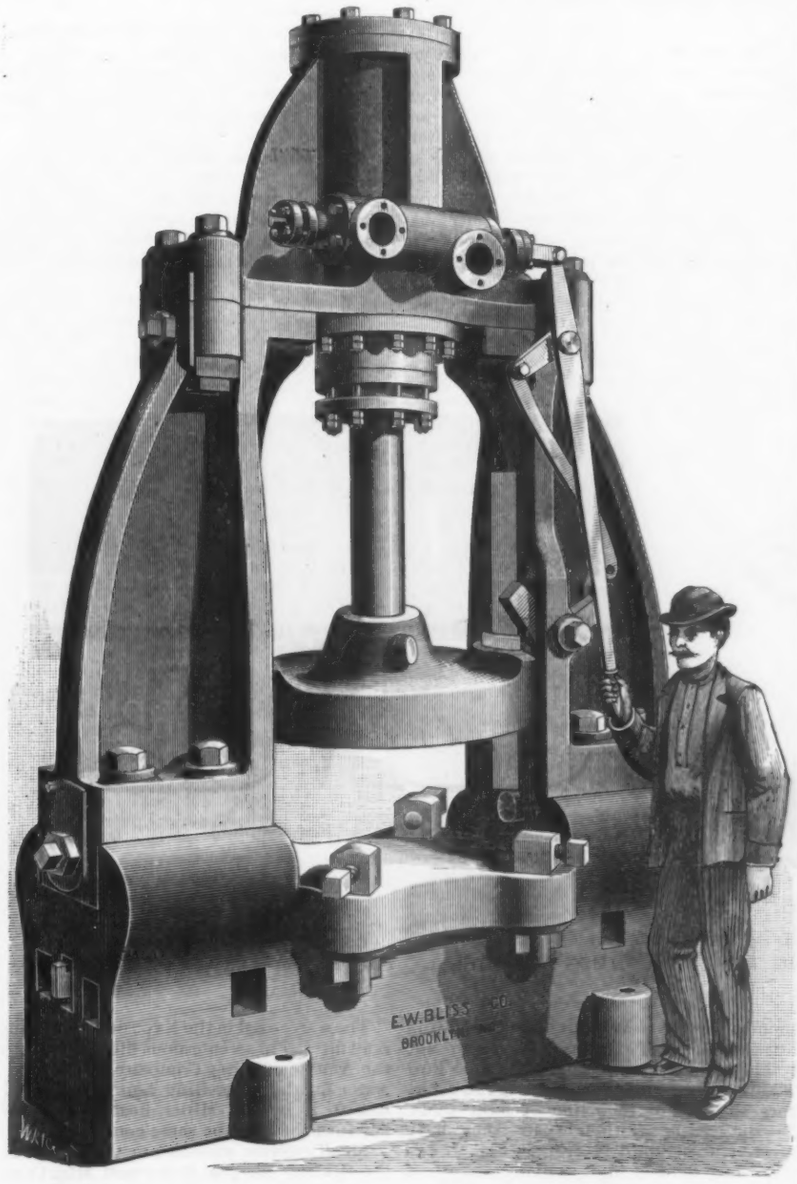
Southern Pig Iron Freights.—The Southern Railway and Steamship Association, under date of the 18th inst., have issued a new schedule of freight rates, to take effect on October 1st, the following being the principal rates, all per ton of 2268 pounds:

	Birmingham.	Chattanooga.	Sheffield and Florence.
Chicago, Detroit, Hegewisch, Grand Crossing, Peoria, Pullman, South Bend	$4.15	$3.90	$3.90
Allegheny, Bellaire, Pittsburgh, Steubenville, Wheeling	4.80	4.30	4.55
Cincinnati	2.90	2.40	2.65
Columbus, Dayton	3.65	3.15	3.40
East St. Louis, Belleville, St. Louis	3.40	3.15	2.95
Indianapolis, Terre Haute	3.40	3.15	3.15
Kansas City, Leavenworth, St. Joseph, Atchison	5.98	5.98	5.53
Louisville, East Cairo	2.65	2.40	2.40
Springfield, Ill., Bloomington	4.40	4.15	4.15

The Queen and Crescent route have issued a circular announcing an advance of 15 cents a ton over their tariff No. 7, dated August 1, 1888, to go into effect October 1.

New Steam Drop Press.

We illustrate on this page a drop press recently built by the E. W. Bliss Company, of Brooklyn, N. Y., for heavy stamping purposes. The requirements of the case for which it was designed called for a hammer, which, together with the soft metal force to be attached, should weigh 6000 pounds, and that a clear space of 48 inches between guides should be had. The excessive weight to be lifted rendered the use of any of the mechanical appliances ordinarily used for the purpose of catching the rebound and lifting the hammer too uncertain and too easily subject to derangement from constant shock to be considered available and recourse was had to direct steam pressure.



NEW STEAM DROP PRESS, BUILT BY THE E. W. BLISS COMPANY, BROOKLYN, N. Y.

The cylinder at the top is 16 inches bore by 24 inches effective stroke and is single acting. Steam is admitted at the lower end for lifting the hammer, but there is no pressure on top of the piston, except back pressure from the exhaust for the purpose of cushioning, as will be explained. The piston and piston-rod are forged from a single steel billet and the lower end of the rod, which is 7 inches in diameter, is turned slightly tapered and keyed into the forged iron hammer head. The piston has two grooves turned into it, in which are inserted four tool steel packing rings, as rings made of any other material would not stand the jar to which they are subjected. The piston, piston-rod and hammer weigh together 3000 pounds, and in operation an additional weight of 3000 pounds of soft metal may be attached. The port at the upper end of the cylinder enters 4 inches below the head, leaving this amount of space for cushioning on the up stroke. As the machine is operated with 100 pounds of steam, it was thought necessary to provide additional security against striking the head, especially as when the rings became a little leaky (and in this class of machinery it is impossible to keep it absolutely tight) the cushion pressure would be lost to some extent. To accomplish this the valve, which is of the piston type, and also fitted with tool steel packing rings, is so arranged that when steam is admitted to lift the piston the upper end of the cylinder is open to the exhaust through a port opening of only one one-thousandth of the area of the piston. This creates a back pressure on the up stroke which, when the piston reaches the point of passing the port, amounts to about 80 per cent. of the initial steam pressure. By this back pressure not only is the piston greatly retarded in its upward stroke, but, when cushioning occurs, it commences upon nearly full steam pressure, instead of upon atmospheric, and a leak would need be very serious and the upward tendency of the piston very persistent to neutralize this powerful persuader against further motion. When the valve is reversed, so as to exhaust the steam below and allow the hammer to fall freely, the upper port is open its full area and escaping steam enters from below the upper end of the cylinder.

The housings, which carry the cylinder and furnish a guide for the hammer, are secured to the bed by four bolts passing down through the bed to pockets, in which are the nuts, kept from jarring loose by rubber washers. The screws, by means of which they are adjusted laterally, to compensate for wear on the hammer, pass through wrought-iron poppets, let into the bed in the same manner as the four poppet screws shown in the cut for holding the die. The cylinder is secured to the housings in a similar manner. In order to prevent the hammer from descending when steam is turned off a latch is provided in the right-hand housing, as shown, which is so connected with the hand lever, which operates the valve, as to be moved out of the way when the hammer is allowed to fall. When steam is on no such support is necessary. The other general details are: Extreme width of bed, 7½ feet; weight of bed, 25,000 pounds; width between housings, 48 inches; extreme hight, 12 feet. Total weight, 45,000 pounds.

The Forty-Mile Limit for Pittsburgh Coal.—Several months ago the different railroads leading from Pittsburgh agreed to a rate of 90 cents per ton on all coal shipped within a radius of 40 miles of Pittsburgh to the lake ports. For some time past the Pittsburgh operators have claimed that firms outside the 40-mile limit are securing the benefits of the 90-cent rate, and these, it is said, can have coal mined at from 25 to 30 cents per ton cheaper than operators nearer Pittsburgh. At the last meeting of the Pittsburgh Railroad Coal Association a committee was appointed to protest against the abuse. The new scale of 79 cents per ton to be paid the miners goes into effect November 1, as per agreement of the Interstate convention of miners and operators held in this city the first of the year. It will be an advance of 5 cents per ton over the present rate.

A press dispatch dated St. Louis, September 18, reads as follows: On October 1 a general strike of the coal miners in the St. Louis district will be inaugurated, and unless the operators back down from the position taken to-day, 40 mines will be shut down. All the mines are located in Illinois, and Belleville is the center of the district. The mines are nearly all controlled by a trust called the Consolidated Coal Company. At a convention of the miners held Saturday, in East St. Louis, a demand for an advance of ½ cent per bushel was made. This meant an increase of 50 cents a day. To-day a committee waited on the trust, presented the demand, and met with a flat refusal. Then the committee gave notice of the strike.

Ground was broken in Pullman, Ill., on the 18th inst., for the construction of the Pullman electric railway. A complete circuit of the town will be made. The Van de Poele system will be used. The cars will be of the finest pattern made by the Pullman Palace Car Company. They will be about 30 feet long, and will contain smoking rooms, toilet apartments and other conveniences.

The Snow Belt Fastener.

We show on this page several modifications of a belt fastener, known as the Snow fastener, and put on the market by the Common Sense Belt Fastener Company, 176 Superior street, Cleveland, Ohio. The principle of the device is at once apparent from the engravings and requires little explanation.

Fig. 1 shows the simplest form, the pegs being driven through the ends of the belt, these being put on a block and clinched. By using a wooden block all danger of breaking the fiber of the belt is avoided. Fig. 2 represents a detachable tooth fastener made of Bessemer steel. The plate is case hardened so as not to bend or bruise in removing the teeth, the latter being annealed to bend and not break. The teeth are adjusted to the plate and riveted with a rivet punch or hammer, requiring only a slight head so as to be easily driven out with a steel punch. For light single belts single teeth fasteners are recommended, while for heavy or double leather belts two rows of teeth or double fasteners are desirable.

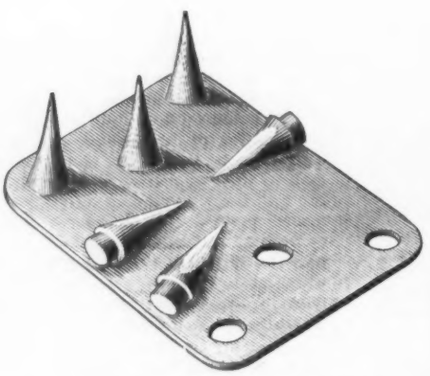


Fig. 2.—Detachable Tooth Fastener.

Fig. 1.—Common Sense Fastener.

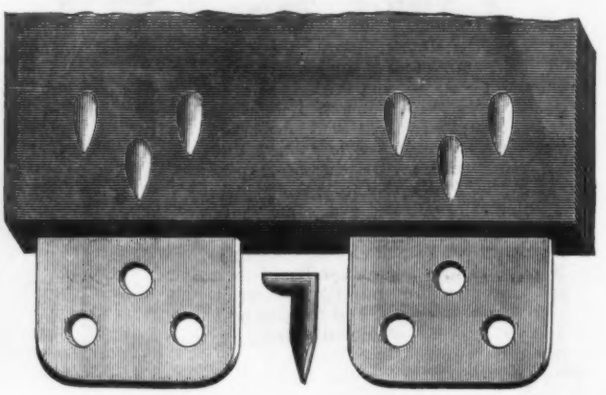

Fig. 3.—Steel Belt Coupling.

THE SNOW BELT FASTENERS, MADE BY THE COMMON SENSE BELT FASTENER CO., CLEVELAND, OHIO.

In Fig. 3 we show a coupling of special type applied to one end of a double thickness belt. The method of application is similar to that used in connection with the fastening illustrated in Fig. 2, hook rivets, however, being employed. In using this coupling the pegs of the belt are opened with a suitable tool, and the fastener plate is inserted to the proper depth. Points are then marked and holes punctured with a pegging awl. The hook rivets are then driven and clinched as already described.

Clark, Raffer & Co., of Chicago, who have for many years conducted an architectural iron business under the name of the Ætna Iron Works, have filed a bill against J. Louis Pfau of the same city, manager and secretary of the Ætna Iron and Steel Works, organized in 1886 to engage in a similar class of work. The complainants claim that the latter company, through the name they have adopted, have been receiving orders intended for the former, and that their business is thus being seriously interfered with. The court is asked to restrain the defendants from using a name so similar to that under which the complainants have long been known, and to compel an accounting and payment of damages. The Ætna Iron and Steel Works, however, have a charter of incorporation under that name, while Clark, Raffer & Co. were not incorporated under the name Ætna Iron Works, but merely adopted that to designate their establishment. The conflicting claims arising under this peculiar complication of affairs will give the courts a little trouble to solve, with exact justice to the interests involved.

Chicago Interstate Industrial Exposition.

The entries at the Chicago Exposition this year are not so rich in machinery and mechanical appliances as those of previous years. A few machines are shown in motion, but the great bulk of the exhibitors evidently preferred to make a display of actual products rather than illustrate how they were made. It is a rich collection, however, in almost every line of mechanical industry, comparing very favorably in that respect with its predecessors, and demontrating the possibility of keeping up an attractive array of exhibits from year to year.

The Iowa Farming Tool Company, Fort Madison, Iowa, have made a very satisfactory showing of their line of farm tools. In the center of their space they have erected a pyramid 8 feet square at the base and 30 feet high, which is covered with red cloth and hung from top to bottom with fancifully arranged samples of their hoes, forks, grain cradles, ox-bows, &c. A very handsome specimen of their tool rack, for use in displaying samples in stores, occupies a conspicuous position as part of the exhibit.

The Wheeler Reflector Company, Boston, Mass., have a neatly arranged pavilion hung with various kinds of lamps to show the different styles of reflectors manufactured by them. From the ceiling are suspended large reflectors with glass pendants, while the walls are filled with a great variety of lamps and reflectors intended for almost every use.

The Meriden Britannia Company, Meriden, Conn., have a very handsome pavilion, with a blue arched roof, black and gold posts, large plate glass windows, covering every side, and polished Tennessee marble panels in the base. The specimens of their work shown embrace the most artistic specimens of table-ware, worthy of the very effective manner in which they have been displayed to attract attention.

Brown Bros. Mfg. Company, of Waterbury, Conn., have a unique exhibit of vault and sidewalk lights. In the center of their section they have placed a framework of iron, 12 feet square and 2 feet high, studded with sidewalk lights. On this as a pedestal they have placed a pyramid of iron framework, about 4 feet high, with its faces also composed of sidewalk lights. Samples of vault covers, coal-hole covers and similar work are grouped about the central attraction.

Schenck's Adjustable Fireback Company, Chicago, Ill., have a large display of Westphal's revolving screw, bolt and shot cases, and revolving self-draining flower stands. These are shown in a number of sizes, and form a very striking exhibit.

The American Well Works, Aurora, Ill., have a well rig in place to show their method of sinking wells. They also exhibit samples of their well-boring appliances. A windmill of their latest pattern is a conspicuous part of the display.

The water used in the Exposition Building is all filtered in an enormous filter erected by the American Filter Company. The feed-water for the exposition boilers is heated to 210° F by the Miller heater and purifier furnished by the same company.

Small electric motors are displayed by the Belding Electric Motor and Mfg. Company, of Chicago, and the C. & C. Electric Motor Company, of New York. The Belding Company have a number of their motors operating fans, sewing machines, &c., as a special exhibit. The motors shown range from ⅛ to 1 horse-power. The C. & C. Company have their motors distributed among the operators on sewing machines engaged in turning out fancy work in several pavilions.

The Chapman Valve Mfg. Company, Indian Orchard, Mass., make a decidedly attractive display of their valves. They have them handsomely painted, and the central feature of the section is a stand having four semi-circular shelves, tapering in size from the bottom to the top, each filled with valves of corresponding size. Groups of valves of various patterns are placed around the base of the stand.

The Machinists' Supply Company, Chicago, have an entire section filled with lathes, drills, portable forges, and show cases with small tools under cover.

Borden, Selleck & Co., of Chicago, exhibit one of Harrison's conveyers for automatically handling coal, ore, grain, &c.

F. Hainsworth & Son, proprietors of the Unique Wrought-Iron Works, show a large number of samples of ornamental railing of peculiar pattern manufactured under their patents. A great deal of the iron is crimped throughout, even the small circles, scrolls and bends being formed of crimped strip iron. Their work also comprises frames for grates, grate guards and irons, ornamental arbors and other articles in highly ornamental designs.

The F. P. Smith Wire and Iron Works exhibit a great varicty of wire goods, illustrating the almost endless uses to which wire can be adapted in the hands of the ingenious workman.

The Expanded Metal Company, of Chicago, make a good display of their special product. They have inclosed their space with a fence and gates made of expanded metal and have hung in a conspicious position a card bearing in large letters the notice: "This is not wire." In addition to fencing they exhibit arbors, tree boxes, mats, lawn furniture, &c., made of their metal.

The exhibit of the Marinette Iron Works Company, Marinette, Wis., is quite extensive, as their line embraces such a variety of articles. Among other things shown by them are the Hutson Giant Fire King, which is a one-man chemical engine, mounted on two wheels, with hose reel, &c., complete; the Michigan Lubricator Company's improved sight feed lubricator; the Montgomery automatic and compound grease cup; Brock's patent chain-pipe wrench; the Penberthy improved automatic injector; brass and iron valves, pipe fittings, &c.

The Nye Steam Vacuum Pump Company, of Chicago, exhibit a large number of their pumps, intended for mining, irrigation and wrecking purposes, and for pumping sand and gravel. Some of them are shown in active operation, discharging immense quantities of water and demonstrating their undoubted efficiency.

The steam engines used in operating the machinery of the Exposition, running electric lights dynamos, &c., are the Buckeye and the Russell engines.

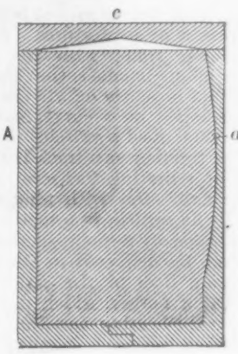
The Union Indurated Fibre Company, New York, make a very fine exhibit of the ware manufactured by them from wood fibre. Pails, liquid and dry measures, wash-basins, water-coolers, tubs, keelers, milk pans, &c., are shown in great variety, and they are arranged in a way to attract the notice and excite the interest of those who come within range of it. The remarks made by visitors concerning it show that this ware is still a matter of great curiosity to a considerable portion of the population of the country.

Exhibitors of other goods of interest to our readers are as follows: David Bradley Mfg. Company, agricultural implements; Clive Mfg. Company, hardware specialties; Cornell Engine Company, gas engines; Clinton Wire Cloth Company, Clinton, Mass., wire cloth; Chemical Fire Extinguisher Company; Corrugated Elbow Company, Cincinnati, Ohio, stove pipe; Copeland Engine Company, Camden, N. J.; Harden Hand Grenade and Fire Extinguisher Company, New York; Charles Kaestner & Co., Chicago, brick machinery; C. Sidney Shepard & Company, Buffalo, N. Y., tinware; Jenney & Graham Gun Company, guns. Stoves are also well represented by a number of the leading manufacturers.

The fifty-second meeting of the American Institute of Mining Engineers will be held at Buffalo, N. Y., beginning on Tuesday evening, October 2, 1888. Dr. Julius Pohlman, director of the Museum of the Society of Natural Sciences, is secretary of the Local Committee, and correspondence concerning the local arrangements, hotel accommodations, &c., should be addressed to him.

The Disston Steel Works.

Operations are being actively pushed to rebuild that portion of the steel works—a part of the file and saw manufacturing plant—of Disston & Co. which was destroyed by fire some time since. The crucible steel department and the sheet rolling mill was the property partly destroyed by the fire. The disaster has been seized as the opportunity for extensions and improvements. The hight of the building has been increased by 8 feet, and the Scheffler Bridge Works are completing a handsome iron roof of two spans, one 105 feet and the other 93 feet 10 inches, the former being over the rolling department. The new building is 198 feet 10 inches wide by 305 feet long. The crucible steel works have three 24-pot furnaces, while the sheet-rolling department contains four trains. The 28-inch plate train is driven by a 28 x 60 inch I. P. Morris engine, while a 22 x 48 inch engine from the same maker drives one of the two 16-inch trains of the mill. The second 16-inch and a 20-inch train are driven by a vertical 28 x



Mold for Solid Steel Ingots.

44 inch engine. A good deal of this machinery suffered heavily from the fire, and important parts of it had to be rebuilt. The mill is equipped with the necessary complement of shears and punches, and the heating furnaces, whose waste heat is utilized by Haselton boilers. In addition to them a 600 horse-power Heine boiler is being put in.

The bar mill is a later enterprise of the Disstons. It contains an 18-inch mill, three-high, with five stands of rolls, and a 9-inch train, just completed; also with five stands of rolls. Each of these is driven direct by a separate Porter-Allen engine. Steam is furnished by two batteries of 300 horse-power Heine boilers. This mill, being covered with an iron roof, was not injured by the fire. At the time of our visit one train of rolls in the sheet mill and two melting furnaces were running under temporary roofs, and in a few weeks the largely remodeled mill will be in operation.

A new water works is also being erected at Tacony, the plant consisting of a compound condensing Worthington pump of 2,000,000 gallons capacity, to supply both the factory and the village with water.

From a technical point of view, one of the most interesting features in connection with the Disston Steel Works is

THE WILLIAMS PROCESS OF MAKING SOLID INGOTS,

which has been in use for a considerable period. The process was patented by Mr. S. T. Williams, on December 8, 1885, and at the time of the fire 19 presses were in operation, while 12 more were being built, the percentage of split saws having been reduced to a minimum as the result of their use. Piped saw plate ingots rolled into saw plate and manufactured into saws do not show their defects until the last stages of manufacturing large circular saws are reached, the unsound ingot showing its defect in the splitting of the saw plate. The loss, of course, is heavy, since the final stage of manufacture is reached before the defect is detected, and the article must wander into the scrap heap. Mr. Williams casts the steel into a mold hollowed out in the manner shown in the accompanying illustration.

Into a mold of the above character the melted metal is poured, and as quickly as possible thereafter a hot cover or plug, *c*, is placed on the top of it. The cover may be made of any suitable material; but a refractory material is the best. The cover is either put on in such a position as to leave a small space between it and the metal in the central portion of the top of the casting, or the bottom of the cover may be hollowed or dished out to form a cavity, as may be deemed best in practice. As soon as the metal in the mold has set sufficiently to hold the molecules together, the mold is opened on the side or sides next to the belly or bellies (for the mold may be hollowed out on both sides instead of one only), and a pressure-plate is inserted with its flat side against the belly and its convex side opposite the hollowed-out portion of the mold, and the hollowed-out portion of the mold put in plane and pressure applied. The metal composing the belly portion of the ingot is thus forced inwardly, and the more movable portion of the ingot located at its central part is thereby forced upwardly or outwardly into the space or chamber beneath the hot cover, filling the same, and thus forming a head of metal kept in a soft or liquid form by the heated cover, and ready to feed into any pipe or cavity which may form in the ingot as it cools. After sufficient pressure has been applied to fill the head cavity the pressure is more gently continued for some minutes, to hold the metal well together, in order to prevent the pipe or cavity which is being fed from the head from becoming any larger than can be avoided.

The pressure-plate, it will be observed, is constructed with one side convex and the other plane. The convex side is preferably of such shape and size as to just fill the hollowed-out portion of the mold, and the ingot, when cooled, will thus have a plane face on the side where it originally bulged out; or, if it is not necessary that the ingot should have a plane surface, an ordinary plane-faced mold can be advantageously employed and the pressure-plate inserted with its convex side toward the ingot. The head for supplying the pipe is kept hot by the hot cover and remains in a liquid state sufficiently long to feed the pipe until the metal ingot has become cooled and set to the very top. It is the better plan to put a slight pressure on the top of the plug to hold it in place; but this is not necessary if the pressure on the pressure-plate be applied very evenly and gently.

The pressure is applied with the aid of a hydraulic press of special design. We are informed that the result of the introduction of the method has been not only to avoid the dangers growing out of piped ingots, already alluded to, but that the quantity of steel cut from the heads of ingots has been reduced to 5 per cent., or practically to what is needed to trim them before rolling.

The Ontario Mining Commission, during a recent tour on the north shore of Georgian Bay, discovered mines represented to be very rich in copper and nickel, and, 80 miles west of Port Arthur, is an iron district which promises to be among the richest in America.

Those Exported Boiler Tubes.

Some time since considerable capital was made out of the fact that a Boston boiler tube maker had exported a small lot of boiler tubes for one of the foreign manufactories of the Babcock & Wilcox Company. Writing from Haarlem, Holland, Mr. George H. Babcock, of the firm, gives the facts and comments on them in a letter, from which we quote the following:

I was surprised to see that that transaction was instanced as an evidence that the American system of protection to home industry was a failure and that the boiler tube manufacturers would be better off under free trade. Now, while boiler tubes are our "raw material," and, in common with other manufacturers, it would be for our interest to have our raw material duty free, provided the duty was retained upon boilers, our manufactured product, yet I fail to see how the fact quoted is evidence of the approach of that desired condition. It is true that we did order a bill of steel boiler tubes to be shipped from Boston and delivered at a slightly less price than we could buy the same quality of tubes in Glasgow. But this is not so strange when we consider that the price in Glasgow is abnormally high, owing to a combination among manufacturers, and represents a very large profit on the cost of production.

The Boston house, getting its stock at foreign prices, plus 10 per cent. duty, found it could in this case afford to realize enough less profit than the foreign manufacturers were demanding to balance the extra cost of labor, duty on material and freight. Were the makers of Scotch tubes so disposed they could undersell the price paid the Boston house by probably 40 per cent. and still make as much profit as the Boston makers did on this transaction. In proof of this we are buying in Glasgow certain tubes which do not come into the combination rates at prices which would soon bankrupt any American manufacturer.

I note your remark that "without the 45 per cent. that must be paid on the same steel when used for goods sold in this country they could be sold so much cheaper here, the quantity made would increase, more labor would be employed, and every one would be benefited—in short, the exactly opposite effect would be secured from that produced by a 'protective tariff.'" That is, assuming the duty to be taken off the "steel skelps," the tubemakers' "raw material," and retained on the tubes, his "finished product." The same might be true, possibly, of every manufacturer, provided it did not at the same time act reversely and to a counterbalancing extent on some other product. In the case supposed, would not the labor thrown out of use in providing the "skelps" more than equal any additional labor employed in making more tubes? But the steel rolling mills thus stopped would decrease the demand for boilers and boiler tubes, and so would there not be fewer made rather than more? and so labor would suffer while no one is benefited.

My experience of 20 years shows that that amount of reduction would not cause any perceptible increase in the demand either for tubes or boilers. The Babcock & Wilcox Company are probably the largest user of boiler tubes in the world. Their sales in June last alone in Europe and America required the use of 1,000,000 feet of 4-inch tubes. These we buy in the United States, Scotland, Germany and France, as we have occasion, and, of course, buy as cheaply as anybody. Now, though the American maker pays twice as much for his labor and much more for his materiel, he sells within 10 to 20 per cent. of the price in free trade countries, notwithstanding the fact that he is "protected" by a tariff amounting to about 100 per cent. on the cost of production. This means that he makes less profits than the man who manufactures under free trade, while the entire benefit of "protection" is reaped by the laborer. It means another thing also—that there is no truth in the often-repeated statement that a tariff increases the cost to the consumer equal to the amount of the duty. Tubes have been sold in New York within the last five years at a price less than the amount of the duty on the same tubes if imported, and they can be bought to-day at a small advance upon that figure. The effect "produced by a protective tariff" is "the exact opposite" of that commonly attributed to it by the advocates of free trade or a "tariff for revenue only." It seems, in practice, to reduce the cost to the consumer of most articles of necessity, and many of luxury, while it enhances the rewards of labor and reduces the profits of manufacture.

The New Edgar Thomson Rail Train.

Since the completion of the new rail train, the Edgar Thomson Steel Works, Braddock, has become the Mecca of rolling-mill men. Lately a representative of *The Iron Age* paid a hasty visit to that plant, which served to give at least a general impression of its features. From the old blooming train, with its adjacent bloom chipping hammer, the blooms are delivered on a series of driven rollers, which, arranged on a curve, carry it to what may be termed a switch. They then reach a car running on a track back of the long line of reheating furnaces, of which there are five, each with nine working doors. By an endless iron rope wound on a drum driven by a small special engine the car may be delivered in front of any one charging door of the series. Every furnace has a pusher, which delivers the bloom into the heating furnace. In front of the heating furnace is a similar arrangement for drawing the heated blooms. A special engine runs an endless wire rope, to which is attached a car. Upon the latter the drawing apparatus, with an ingenious grip, deposits the bloom. The latter is conveyed to the driven rolls, which run the bloom upon the table of the first train.

Practically Capt. W.R. Jones has divided the ordinary three-high rail train into three, the first five passes being made in one train, the second five in a second train to which the first delivers directly, and the last finishing pass being made in a third train. A crane commands the latter, so that the finishing rolls can be rapidly changed. Each train is driven by its own independent engine, and is practically automatic, one man handling the levers which lift the tables, turn the bloomer, &c. From the table of the first train the billet goes to the second; from there by driven rollers to the finishing train. From the latter the rail is carried along by driven rollers to the hot saws, the metal traveling in all these operations along the axis of one long building. The hot beds are located in a wing at right angles to it, and then are taken back in the direction of their length into the drilling and pressing building, which is parallel to the rolling mill building, they traveling then in a direction opposite to that in the latter. The finished rails are pushed sideways out of this building to the cars on which they are shipped. The boiler house has two batteries of 12 boilers each, and we noticed particularly that along one entire side of the rolling mill proper is a bench upon which lie the rolls. The whole arrangement is a radical departure from all former types, and it needs only a glance at the never ceasing procession of blooms entering at one end and of finished rails passing the saws to appreciate the enormous capacity of the plant. It is rated at 1000 tons of finished rails a day. Its record even now is 962 tons, and there is probably no exaggeration in the remark made by the engineer of one of the leading Eastern mills whom we happened to meet just after he had, for the first time, seen the plant, that it would not be a matter of surprise to him if the new mill would arrive at a record of 1500 tons a day. The mill is certainly an enormous stride in advance, and being practically automatic would seem to represent the possible climax of labor-saving in that direction. The impression is created by an inspection of it that this new rail mill overbalances in capacity the other parts of the plant, that one or more new blast furnaces, an enlargement of the Bessemer steel department, and notably an addition to the blooming capacity would become necessary in the not distant future. We repeat that this is merely an impression, and that the idea is thrown out without any accurate knowledge of the relative capacity of the different parts of the plant.

Few changes have been made in the other departments. At the blast furnaces one metal mixer is in use and a second one is being built. On both sides of the Bessemer steel works a hydraulic pusher has been put up, to push the ingots out of the molds, no effort being now made to strip in the pit.

Industrial Jubilee at Louisville.

On the 5th inst. the people of Louisville held a grand demonstration to commemorate the industrial and commercial progress made by the city within the past decade. The business of the city and its enterprising suburbs has grown so rapidly of late years that the citizens may well take pride in the success of their endeavors to put the metropolis of Kentucky high on the roll of the progressive cities of the country. To emphasize the forward movement they have made, and to let the outside world understand something of its importance, this industrial jubilee was planned by the citizens who have taken the most active interest in stimulating the city's growth in manufacturing industries. The active agencies with which they are identified are the Commercial Club and the Board of Trade. These bodies have done so much toward building up the trade of Louisville that they can properly be mentioned as examples of energy and enterprise worthy of emulation by similar organizations in other cities. The growth of Louisville's business is shown by the last annual report of the Commercial Club, which enumerates 65 manufacturing establishments, 27 wholesale commercial houses, and 291 retail commercial establishments added to the business interests of the city in the previous 12 months. Quite a number of these are directly traceable to the influence of the two organizations mentioned. Since 1880 the annual volume of business is estimated to have increased $150,000,000.

The industrial demonstration which took place on the 5th inst. is reported by observers to have been a magnificent spectacle, far superior to the usual advertising pageants which so often masquerade under that name. The various business interests of the city entered with spirit into the proper observance of the real purpose of the display, and originality was manifested with most striking effect where it was least expected. The Louisville dailies, particularly the *Courier-Journal*, contained glowing reports on the following day of the magnificent success which had been scored by those who originated and managed the great jubilee. Special editions were issued, calling the attention of visitors and of the outside world to the advantages of Louisville, and to the great natural wealth

of the State of Kentucky to which it virtually holds the key. The success of this celebration will stimulate the efforts of the business men of Louisville still further to push forward their plans for greater growth and wider influence, even though it may not directly attract capital and increase investments.

The manufacturers of Louisville anticipate a decided increase in the business of their city with the advent of cheap fuel, which is promised by the projectors of natural gas-pipe lines from wells in Meade County, 25 miles southwest of Louisville in an air line, but 30 miles distant by the route surveyed. The wells now flowing produce 16,000,000 feet of gas daily, and the supply can be largely increased whenever it is demanded. It is announced that one company has already arranged to lay pipes between its wells and the city, making its operations an assured fact. The supply of natural gas at low cost in unlimited quantity would be a great boon to Louisville, although it is located within easy reach of Kentucky coal fields, and also receives large supplies of coal from the upper courses of the Ohio River. With such a fuel Louisville would take greater strides than ever toward industrial greatness, and its jubilees of future years would totally eclipse the glory of the recent celebration.

Notes from Providence, R. I.

Charles Frederick Herreshoff, whose funeral took place in Bristol recently, was father of one of the best known families in Rhode Island. The late octogenarian was born in Providence and removed to Bristol from the old farm in 1856. A graduate of Brown University, he was, with the exception of Bishop Howe, the only survivor of the class of 1828. He was deeply interested in boats and boating—a characteristic that was inherited by two of his sons, John B. and Nathaniel G. of the Herreshoff Mfg Company, which has given Bristol celebrity as the town which furnishes the best and fastest steamers in the world. When the Company was in its early days the deceased helped model some of the fastest boats built at the Herreshoff shipyard, and in connection with the death of this well-known citizen a short account of the industry bearing his name may be of interest.

The president of the company, John B. Herreshoff, is one of the remarkable men of the country. For years he has been blind, but the misfortune of loss of sight has not impaired his capacity for practical work, and as president and treasurer of the company he is as active and efficient as though he has the keenest eyes. An instance of this was recently mentioned in the New York *Sun*. About ten years ago he received a telegram from one of the South American consuls in New York, asking him to come to his office down town at a certain hour. He went and found several representatives of the South American Government. They wanted three torpedo boats of a novel design built, and they wanted them built in sections, so that they could be shipped to their destination and there put together. They wanted several odd conditions in the boats, and then they wanted to know for how much Herreshoff would build them.

"I must have time to think it over," he said.

"How long a time?"

"Oh, 20 minutes."

Twenty minutes for a blind man to consider the plans and specifications for these topedo boats—to consider them without pencil or paper—to perforce roll them over carefully and minutely in his head! But he did it. In 20 minutes he had made a mental estimate of what they would cost; he got the contract, and they were at a specified time packed and ready for shipment. That was a remarkable incident, but John Herreshoff is a remarkable man, and he has built some remarkable boats.

The Herreshoff children took to boats, and it isn't strange, therefore, that John Herreshoff began whittling out boats as soon as he was old enough to manage a jack knife. In his fifteenth year he built a good sized craft for sailing on the bay. About this time he lost his sight; gradually a film came over his eyes, but he went on building boats just the same, but instead of studying the grace and strength of lines by his eye, the matter became to Herreshoff at once a more abstract study, a mental calculation. He had the task before him of carrying in his mind the models he worked upon. The objects he had seen with his eyes in the first 15 years of his life he could summon up into his mind again. Under the enforced habit of mental activity, without the interruption and suggestion of outside objects, his mind grew to be one of remarkable concentration and acuteness. He became able, for instance, to set up before himself, from a careful description, a piece of machinery, and to explain its workings and it faults. His sense of touch developed to a wonderful sensitiveness, too. He learned to recognize the power of lines by rubbing his fingers slowly over them, and how well he succeeded in finding the good and discarding the bad has been shown by many a craft built in the early days of his business, which made a record on the Narragansett like the old Qui Vive, for several years the fastest boat on the coast, and the Sadie, a 52-foot sloop, which was sold to Mr. Burgess.

But this was when Herreshoff was building only sailing vessels. It was not until after 1873, when Nathaniel Herreshoff became interested with his brother, that the Herreshoff steam vessels made their appearance. Mr. John Herreshoff had been thinking over the coil boiler idea for some time, and when it was applied to steam craft it was so successful that the building of sailing vessels was at once abandoned. The industry at once jumped into prominence, and the shops were used for making every part of the vessel. John B. Herreshoff became the president and treasurer of the company, Nathanial Herreshoff the general superintendent and designer, Charles Young the secretary, and Albert Almy chief of construction.

There is no doubt that in the public mind there is a partial misapprehension of the part the third Herreshoff takes in the construction of boats in the shops of the company. The average individual who has heard of Herreshoff would very likely expect to find him industriously at work upon a model or laying down the lines in some ingenious way for a new boat. But there are a big boiler shop, engine shop, boat shop, repairing shop and docks, all with their quota of men, whom John B. Herreshoff, as the president and head of the company, controls.

Mr. Nathaniel G. Herreshoff, who is not blind, like John and others in his family, is the designer. He works out the models, makes the calculations, &c.

The Narragansett Electric Lighting Company have begun the construction of a new station at the foot of Elm street, on the river front, where a lot of land 200 x 300 feet, has been bought, with a wharf frontage of 200 feet. The contracts are not all concluded yet, but the foundations are in for the dynamo-room, 60 x 200 feet, a single-story structure, to be built of brick, with brown-stone trimmings and an iron roof. The pile foundations are also down for the (tack, which will be a 14-foot flue, octagon in section and 200 feet high. The boiler-room will be in a separate building, across a driveway, and coal pockets will be built over the boiler-house, into which coal may be delivered from vessels with but a single handling. The premises are arranged so as to allow of duplication of both the power and dynamo houses if necessary, and the lot will afford opportunity for the establishment of one of the largest stations in the country.

The Armington & Sims Engine Company, of this city, are making a number of engines for the Navy Department, the engines to be coupled direct to the dynamo. But a small space is required for their double engine, and the weight of the whole plant is very moderate. The company report great success in the use of this engine.

The summer travel on all the railways reaching town has been noticeably heavy. The Old Colony trains have been run with full seats, and the August mileage on the New York, Providence and Boston Road was 7000 miles in excess of the record.

The new steel yacht Valleymena, building by the Herreshoff Mfg. Company for George S. Brown, of Baltimore, is receiving her machinery and will soon be launched. She is 148 feet in length, with an 18-foot breadth of beam and a 7-foot draft. Her engines, also built by the Herreshoffs, are of a quadruple expansion type and are beauties of simplicity and strength, capable of 800 horse-power. The woodwork is of highly polished quartered oak, and there are five water-tank bulkheads. She will cost Mr. Brown about $70,000 as she comes from the Herreshoffs hands.

LEONIDAS.

Tests of Steel Eye-Bars.—The Edge Moor Iron Company have lately made a number of tests of steel eye-bars manufactured by Carnegie, Phipps & Co., of Pittsburgh. The diameter of the eye in all was 12½ inches, while the diameter of the pin-hole was 4.96 inches. The first two 15 feet long and the second two 18 feet:

	1.	2.	3.	4.
Per cent. excess, Eye A	59.6	56.8	56.1	62.5
Per cent. excess, Eye B	55.0	59.7	56.6	56.2
Size of bar	5 x 1 5-16	5 x 1⅞	5 x 1⅛	5 x 1
Length, back to back, of holes	ft. in. 16 11	ft. in. 16 11	ft. in. 29 11⅛	ft. in. 32 6¼
Elastic limit, pounds	36,520	36,700	36,740	39,550
Elongation of hole, A	0.35	0.54	0.75	0.74
Elongation of hole, B	0.40	0.76	0.56	0.57
Elongation 8 inches, per cent	41.2	39.2	39.6	37.5
Elongation total length, per cent	In 15 feet. 13.1	15.3	In 28 feet. 10.4	11.4
Reduction of area, per cent.	51.5	49.0	46.7	43.3
Ultimate strength	64,030	64,680	66,140	63,700

The fracture of the first two eye-bars was capped and silky, while that of the second two was 45 per cent. silky. In the first the fracture took place 3 feet 11 inches from the back of pin-hole B; in the second, 3 feet 3 inches; in the third, 16¼ inches from pin-hole A, and in the fourth, 2 feet 9 3/16 inches from pin-hole B.

The International Fair at Buffalo has given birth to an extraordinary newspaper sheet called the Buffalo *Express Extra*, comprising 60 pages, printed in a choice style of typography, and illustrating in its descriptions a large number of the business concerns in the city, stove manufacturers, engine builders, &c., as well as presenting photographic reproductions of a life-like character of several score of representative business men in all departments. Altogether, as a souvenir it is of no mean order, even in its historical features, which are duly set forth with maps, diagrams and reminiscences of early days, not omitting a portrait of Red Jacket, the Seneca Chief and orator.

Waterhouse Dynamo and Regulator.

In order to explain a new method of regulation in electric lighting for which patents have just been allowed, we illustrate on this page the system adopted by the Waterhouse Electric and Mfg. Company, of Hartford, Conn.

In Fig. 2 we show a Waterhouse dynamo with a closed circuit armature, A. On the commutator C are three brushes; *a* and *b* are the main circuit brushes and *c* the auxiliary brush. From the positive brush *a* the current passes to the conductor around the field magnets F to the resistance R. The current from the auxiliary brush *c* passes directly to the resistance R, leaving the field magnets out of circuit. The current from both circuits (field and local) joins at R and passes to the lamps, the current on the lamp line being the sum of the two. The amount of current in the field and local circuits is in proportion to the resistance R in each. The brushes have a fixed position.

There is in every dynamo a point of maximum commutation on the armature which changes with the resistance on the lamp line, moving with the rotation (toward brush *c*)when the resistance decreases and back when it increases. This affects the current in the local and field circuits as follows: When lights are turned out the line resistance is decreased and the maximum point moves forward and forces more current out of brush *c* and less out of brush *a*. This reduces the current in the field magnets and the E. M. F. in the circuit and consequently the power required to operate the dynamo. But the current on the lamp line remains constant, because the local circuit is increased proportional to the decrease of the field circuit. The remaining lamps therefore retain their full brilliancy, while the current cannot increase and destroy the apparatus. Thus the very tendency of the machine is to perfect regulation without the aid of a mechanism, but when to this is added the simple regulator, which makes the regulation instantaneous by assisting the current to pass out at brush *c* and opposing its passage around the field magnets by way of brush *a* when lights are cut out, and forcing it out at brush *a* around the field magnets by opposing its passage out at brush *c* when lights are put in the circuit, the efficiency of the method can be appreciated.

The regulator is illustrated by a slide in Fig. 2, controlled by a solenoid. Any tendency of the current to increase raises the contact, and the result is a decrease of resistance in the local circuit and an increase of the resistance in the field circuit. More current will therefore flow through the local circuit and less through the field circuit. The generating capacity of the dynamo is instantly reduced and any tendency to produce a current above the standard is overcome. Should the tendency of the current be to decrease, say by a reduction of the speed of the armature, the slide lowers, increasing the resistance in the local and reducing it in the field circuit. More current will then flow around the field magnets and less out on the local circuit. The generating capacity of the dynamo will therefore increase to maintain the current at standard. It should be stated that the use of resistance for balancing the field and local circuits is a small amount compared to that used by the lamps, and is not interposed, as can be seen, for the purpose of compensating for lamps turned off. The Waterhouse regulator varies the E. M. F. directly with the resistance of the lamp line, producing self-regulation and maintaining on the lamp line the standard current, whether one lamp or the full number are burning. By this method, as the lamps are cut out the current is reduced in the dynamo. Fig. 1 represents the complete machine, to which this method of regulation is attached, and plants are manufactured from three arc lights and up. The light produced is very steady, and entirely satisfactory for inside or outside illumination, and it is now in use in a large number of the representative mills of the country.

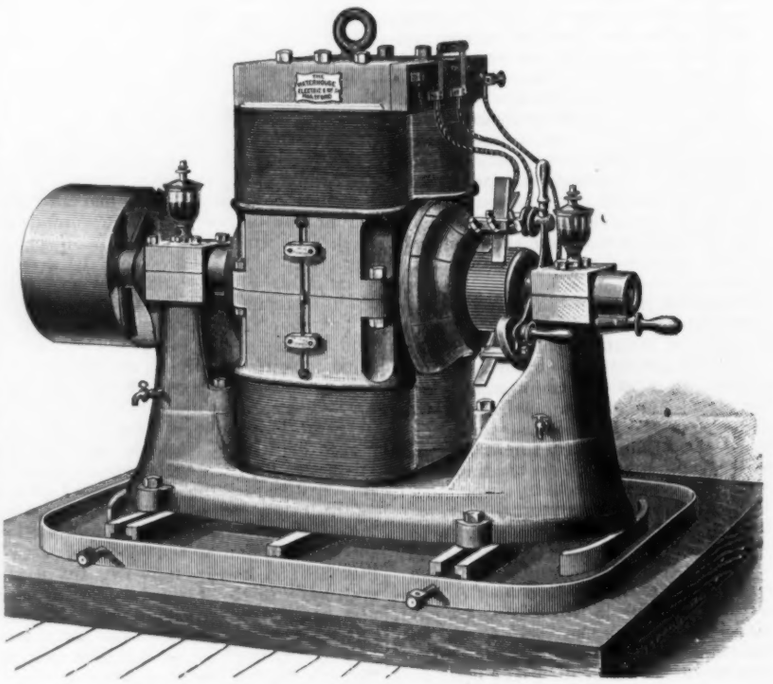


Fig. 1.—General View of Dynamo.

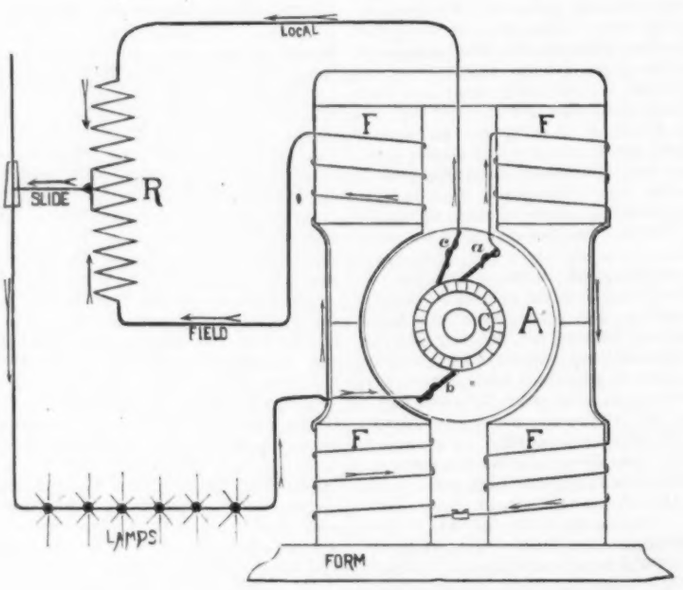

Fig. 2.—Details of Regulating System.

THE WATERHOUSE SYSTEM OF DYNAMO REGULATION.

The Dynamite Cruiser.—The dynamite cruiser Vesuvius is being finished, both below and on deck, and little remains to be done but to complete the apparatus for firing the pneumatic guns. The engines have been tested by dock trial and gave very satisfactory results at 220 revolutions per minute. This will doubtless be the fastest vessel ever built by Cramps. Her hull is of beautiful design and all the power possible has been put in her. She is 246 feet long, 26 feet 5 inches beam, 14 feet deep; mean draft, 9 feet; displacement, 725 tons. Her motive power consists of two triple-expansion twin-screw engines, developing about 3200 indicated horse-power. There are four cylinders to each engine, the high-pressure is 21½ inches diameter, the intermediate 31, and the two lower pressure cylinders 34 inches diameter. The engines are 20 inches stroke. There are four locomotive boilers 9 feet in diameter by 19½ feet long. They are to carry 160 pounds steam working pressure. The vessel is guaranteed to make at least 20 knots.

A Modern Boiler Works.

The boiler works of John Mohr & Son are located at 32 Illinois street, in the heart of a large manufacturing district of Chicago, and occupy a site having a front of 143 feet and a depth of 216 feet. Mr. Mohr, the senior partner, was formerly connected with the boiler department of other works, but withdrew in 1882 to operate independently. He has six sons, all of whom have been brought up in the boiler trade and who have charge of the several departments. At these works anything is built that can be made of plate iron and steel, but special attention is given to rolling-mill and blast-furnace work, and marine and general boiler work. Within the past year expensive machinery has been added, and further improvements are in progress.

Throughout the establishment the saving of labor is carefully studied. Heavy plates are carried from one part of the works to another either by overhead tramways or by elevators running between floors on different levels. As the plates are received they pass to the drillroom, then to the bending-room, next to the riveting-room, and finally to the finishing shop. The drillroom contains a number of the usual tools, but, in addition, there is a machine which will punch holes up to 6 inches in diameter through inch plate, or it can be used for punching holes of the smallest size. Power is furnished to operate the machinery in this and adjoining departments by a Corliss engine, 12 x 36 inches, built by the Weisel & Vilter Mfg. Company, of Milwaukee. From this engine rope transmission is used to convey power 83 feet distant to a shaft at the farthest end of the building in which it is situated. Six strands of ¾-inch common manila rope are used. The rope, which is all one piece, runs noiselessly. The transmission plant was designed by T. S. Miller, of the Link Belt Machinery Company, Chicago. Iron sheaves are used.

In the bending-room are a set of rolls, a flue-welding machine and smiths' fires. The rolls, which were made by the Niles Tool Works, are claimed to be the heaviest in the country. The housings are massive; the upper roll is 24 inches in diameter and each of the two lower rolls measures 20 inches. The inside length of the rolls is 17 feet. An independent three-cylinder engine furnishes power. The flue-welding machine is intended to be used in welding short pieces of tube to the ends of tubes from which defective pieces have been cut, and does its work much better and more rapidly than it can be done by hand.

The riveting room is fitted up with a hydraulic riveting machine, built by Tweddell, of Gloucester, England. A tower, 52 feet high, extends above the riveter, in which boilers are raised and lowered vertically by hydraulic power, as well as moved laterally toward and from the machine, all operations being controlled by a workman standing on a platform by the side of the riveter. Rivets are heated in a furnace of original design, which will hold a keg at a time, heating them to a cherry red without danger of burning. The riveting machine exerts a pressure of 45 tons on the rivets and of 25 tons on the plates, forcing the latter together so closely that calking is practically superfluous. It is exceedingly interesting to watch a long boiler move vertically in front of this machine, which fastens rivets almost as rapidly as they can be put in place. A very slight pause is made after each one is flattened, sufficient to allow it to cool and retain its perfect set. The heads of boilers are riveted by hand, except when they are inserted reversed, in which case the flange is exposed and the hydraulic riveter can be used. In these works every hole in steel boilers is drilled, not punched. The substitution of steel for iron in boiler-making is demonstrated very forcibly by the fact that in these works 99 out of every 100 boilers are made of steel. Otis steel is used unless other makes are specified by the purchasers.

The flanging-room contains a heating furnace and a flanging machine. The heating furnace is a reverberatory furnace large enough to hold a 12-foot plate. A buggy is used to convey the hot plates to the flanging machine. This machine will flange plates ranging from 24 inches to 8 feet in diameter, and was built by Joseph B. Blettner, of Cincinnati. It is said to be the largest in the country. Flue holes are now flanged by hand, but a machine will shortly be in place for such work. A steam hammer is also to be added for forging irregular shapes. Among the new tools which have been ordered and will soon be set up in the works is an 18-foot plate planer being built by the Niles Tool Works.

The standard boiler made by Messrs. Mohr & Sons consists of two sheets only in the body. One sheet is used for the top and the other for the bottom, the lines of rivets running along the sides, so that no double thickness of plate is exposed to the fire. Very little work is done on boilers for stock, but nearly everything turned out is order work made under exact specifications. While a large part of their business is of local origin, the firm now enjoy a patronage extending from Pittsburgh to the Pacific coast, a great deal of boiler work now coming to Chicago from the far West which formerly went to other cities. Nearly $200,000 have been invested in this plant up to the present, and from 150 to 175 men are regularly employed, who work up an average of 3000 tons of plates yearly.

The Sioux City Corn Palace.

Unique among the usual autumnal celebrations, expositions, &c., is the Corn Palace at Sioux City, Iowa, opened on the 24th inst., and to be closed on the 6th of October. In the building of the first annual corn palace last year no definite plan was adopted, but the working out of the details of the building and the beauties of the decorations came with the discovery of the artistic possibilities of the corn plant. This year it is different. Profiting by past experience, competent architects were secured, who prepared carefully drawn plans of the framework of the structure, and, taking these plans as a guide, artists sketched and prepared outlines of the decorations. The building erected this year is 150 x 150 feet in size, and occupies every inch of a quarter block of ground. At the southwest corner or main entrance rises the main tower to a hight of 175 feet, while to the east and north are Norman towers, which support the Moorish pavilions. The roof of the main pavilion is shingled, thus insuring a dry interior. In the main tower there is a winding stairway, and from the top a view of the city can be obtained.

The great body of the outside is covered with ears of corn, sawed lengthwise through the center, and nailed with two brads with the flat or cob side next to the walls. To relieve the monotony, different colors are used, and white, red, speckled, purple and golden-yellow ears were obtained. The exterior is laid off into panels, which are plainly marked by the varied colors of the great Western product. Next to the ground is a wainscoting of corn stalks, stripped of their leaves and packed close together. The entrances, windows, &c., are also bordered with corn-stalks prepared in the same way. The railing of the towers is also covered with corn-stalks, and the long stalks of grain—wheat and oats—while the capstones of the turrets are represented by the bushy heads of millet, bearded oats and sorghum seed. The windows of all the towers are latticed with corn ears strung on wires. Some are purple, some are red, others yellow, and still others white, giving that variety of coloring which is at once the charm and novelty of the general effect. The interior of the palace is decorated with striking originality. It is lighted by electricity, and is fitted with appliances for fighting fire, and has a perfect system of sewerage. The palace is built by an incorporation known as the Sioux City Corn Palace Exposition Company, having an authorized capital of $250,000, the idea being to make the institution a permanent one. Over 50,000 bushels of corn and grain were used in its construction.

Industries of Knoxville, Tenn.

Knoxville, Tenn., does not boast of a boom, but its industrial progress is quite satisfactory to the inhabitants. The city is situated in the midst of a great agricultural country, and being near large areas of the finest timber and coal deposits it seems destined to become a very important inland city. The population has grown from 12,000 in 1880 to over 40,000 by actual count. It has few great manufactures to boast of, yet possesses ample water-power in the bold streams near by, particularly the Tennessee River. The city needs a few more railroads. Some are being built and others located. The East Tennessee, Virginia and Georgia have their construction and repair shops and general offices in Knoxville. This road is doing a heavy business, taxing the rolling stock to its limit, and necessitating heavier steel rails to be laid on part of the track. In their shops the company have built several locomotives complete, which are doing service regularly and are among the finest on the line.

The wholesale hardware trade of Knoxville is very large and important, carried on principally by George Brown, Woodward & Co., C. M. McClung & Co. and S. B. Luttrell & Co., and reaches into Virginia, the Carolinas, Georgia, Florida, Alabama and Mississippi. The marble quarries near the city are being rapidly developed, and are likely to acquire a national reputation, as the quality is excellent and the varieties of colored marble are numerous. The Knoxville Iron Company, of which Jas. R. Ogden is president and A. O. Brown is superintendent, is a well-equipped rolling mill. Mr. R. L. Ralston, of Eastern Pennsylvania, is general manager, and has instituted several improvements. The capacity of the mill is about 35 tons of finished iron per day, and they are now behind in their orders. The product is merchant bar, fish and angle plates and mine rails. The company have just had put in two Smith gas generators by Laughlin & Co., of Cleveland, which have proved successful. They are also trying the experiment of a gas generator under the boilers, the originator claiming economy of fuel and regularity in heat. Mr. Ralston uses the best grades of Virginia and Southern pig, and uses a local ore to counteract the cold short tendencies of the latter irons. The markets for their mill product are principally in the South and the States above referred to.

The programme which has just been issued for the ninth annual convention of the American Society of Mechanical Engineers to be held at Scranton, Pa., beginning on October 15, promises an enjoyable and a profitable meeting. A number of delightful excursions have been provided for and the list of papers and topical queries, as usual, is excellent.

The Iron Age

New York, Thursday, September 27, 1888.

The Business Outlook.

The improvement in the volume of business during the past two months in the many departments of the iron trade, notably in the West, has given much encouragement. For the first time in a considerable period speculation has played a part in shaping events, although thus far in a moderate degree only. Still, it has led to exaggeration and a distinct effort through the press and other channels to create the impression that a notable rise in values is to come, possibly this fall, and surely next year. It would be idle to deny that such a feeling does not exist outside of purely speculative circles. We have noticed it cropping up repeatedly among manufacturers and merchants both in the East and West. We know of cases in which owners of plants have entered into extensive contracts for improvements and enlargements, with the avowed purpose of being ready to take advantage of the rising tide. In other instances plans have been matured with a similar object in view, though their execution is held in abeyance contingent upon the happenings of the next two months. The basis of convictions leading to such preparations is the broad fact that with a growing population, and after years of retrenching, we are developing a consumptive demand of enormous proportions. Spasmodically the evidences of it have come during the past two years. It needs only one great general impulse, like good crops and fair prices for agricultural products, to cause first a rapid replenishing of stocks in the hands of middlemen, and then the scramble for increased quantities of goods, to cause a sudden rise. There are many who reason that the conditions are favorable to such a movement, and some who have already begun to set their face against any rush which may prove disastrous to legitimate interests in the long run.

As yet this feeling that we are on the eve of a "boom" is vague, but it is shared by many and is being acted on by some. From time to time some unfavorable development shakes the faith of those who are sanguine, but it is noticed that its influence is short-lived, while favorable events make a deeper and more lasting impression and make new converts while strengthening the faith of the more hopeful. It is conceded on all hands that the volume of business is unprecedented. Crops have been bountiful and promise to bring better prices than have been secured for years. The enormous coal tonnage indicates great activity in manufacturing added to increased consumption for domestic purposes. The shipments of Lake ores are heavier than was thought possible in the spring. Freight rates, while demoralized in some very important sections, show some tendency toward improvement, and with the enormous traffic handled may soon react in response to further additions to it. With a little more money in the treasury this would bring heavy purchases for new equipment and much needed renewal. In our iron and steel works, our foundries and machine shops, our mines and manufactories, we have gradually but steadily been creeping up to capacity. There is still much margin for increased output by urgent crowding, but as that point is reached the indifference of the seller grows and the raising of prices comes naturally.

Let it be conceded that enormous amounts of money were directed into permanent investment by the phenomenal railroad building of last year. It must be acknowledged that as yet the additions to mileage have been more a burden than a source of revenue to the great lines who undertook them. Yet money is plentiful in all our financial centers and there are many meritorious undertakings awaiting the time when capital will be forced to look for employment at better terms than are now generally offered. It is not to be expected that enterprise will seek new channels of activity while the minds of the majority of our citizens are largely occupied with political responsibilities, while many captains of industry earnestly and honestly believe that the outcome of the struggle now being waged almost exclusively over economical questions must seriously affect our industrial prosperity if it is adverse to their political beliefs. We may suffer serious drawbacks after that contest is decided, but even with all such contingencies to check or to reverse the incipient movement, the outlook is decidedly hopeful. The developments of the early winter must determine whether 1889 is to be a year of exceptional prosperity or not. This question, which is now agitating the minds of a few, may soon become the all-absorbing subject of thought and find more general expression in active preparation.

The pressure of heavy traffic upon the Western railroads which was predicted for the fall months is now being felt. Already such a scarcity of cars has developed that complaints are numerous among shippers. The railroads centering at Chicago are nearly all suffering on this account, and could greatly increase their business if they could get the necessary rolling stock. The railroad companies largely interested in distributing coal are doubly hampered, being pushed by the great demand for coal at this season of the year and urged to supply increased facilities for the transportation of grain to market. Eastern connections of the Western roads are being drawn upon for all the cars that can be spared for this increase in traffic, but the relief derived from that source will only be temporary, as the Eastern roads will probably soon need all their cars themselves. Many Western railroad managers foresaw this condition of railroad business several weeks since, and earnestly advised the people living along their lines to lay in their supply of coal early, as the pressure upon the facilities of the roads promised to be something enormous when the crops began to be moved. This condition of the railroads promises to be of considerable benefit to the iron trade. Large orders are pending for new cars, requiring considerable quantities of iron and steel, and others will follow as rapidly as the railroad companies find that they must increase their equipment. The expansion of railroad business will probably be of sufficient duration to also enable the companies to accumulate a fund toward the purchase of rails for renewals, now badly needed on many lines, even on some of the most important Western roads.

Our Imports of Iron and Steel.

From England and the Continent come steadily better reports of the improving condition of the iron, steel and allied trades. Americans who have returned from abroad, men who possess exceptional facilities for correctly gauging the feeling prevailing, report that the activity in the leading industrial centers is very great, indeed, and that the advancing tendency in prices is gaining. Nearly a year since *The Iron Age* pointed out that a higher level of values could only be attained after the demand from other markets had more than compensated for the falling off in shipments to this country. With the aid of English export statistics we showed months ago that that point had been reached. The latest returns emphasize this. While generally speaking the English exports show an improvement only in some lines, the shipments to other countries outside of the United States have increased. Thus we have for the first eight months:

English Exports of Iron and Steel, Eight Months, Gross Tons.

	1886.	1887.	1888.
Pig Iron:			
Total	688,532	955,922	711,358
United States	220,251	286,736	100,235
Other countries	468,281	469,186	611,123
Bar, Angle, Bolt Iron:			
Total	153,013	165,418	195,562
United States	2,284	1,869	3,274
Other countries	150,729	163,549	192,288
Railroad Iron, all sorts:			
Total	502,250	642,543	703,978
United States	21,746	112,831	39,882
Other countries	480,504	529,712	664,096
Steel Rails (included in above):			
Total	334,350	483,998	482,523
United States	21,114	110,289	38,321
Other countries	313,236	373,709	444,202
Wire:			
Total	26,892	27,748	42,961
United States	2,957	2,594	1,810
Other countries	23,935	25,154	41,151
Hoops, Plates and Sheets:			
Total	198,608	220,327	270,447
United States	13,758	21,081	28,092
Other countries	184,850	199,246	242,355
Tin Plates:			
Total	232,738	235,901	263,562
United States	186,460	179,296	196,388
Other countries	46,278	56,605	67,174
Old Iron and Steel:			
Total	94,299	205,010	100,491
United States	33,944	147,662	16,190
Other countries	60,355	57,348	84,301
Unwrought Steel:			
Total	73,641	214,708	100,372
United States	35,895	170,224	45,803
Other countries	37,746	44,484	54,569

With the exception of hoops, plates and sheets, and of tin plates, the figures of exports to the United States show a marked reduction. Nor is this confined to our imports from Great Britain, as the following import statistics of our Bureau of Statistics for the first seven months, in gross tons, clearly show:

American Imports of Iron and Steel.

	1888.	1887.
Iron ore	382,240	684,592
Pig iron	112,989	280,898
Scrap iron	31,267	219,736

Scrap steel	6,372	20,726
Bar iron	14,572	20,373
Rails	49,128	53,055
Cotton ties	7,811	6,695
Steel hoops, sheets and plates	13,244	15,437
Steel blooms, slabs, billets and bars	66,104	210,581
Sheet, plate and taggers iron	3,265	3,063
Tin plates	173,537	168,359
Wire rods	67,821	98,523
Wire and wire rope	1,969	1,449
Anvils, axles and forgings	849	861
Chains	491	442

The English figures quoted above are particularly interesting, however, as proving that, deducting the quantities sent to this country, the balance, which represents the English exports to the rest of the world, shows a notable betterment in the demand. While in some lines this has not yet compensated English iron-makers for our lessened purchases, it does prove that their position as sellers has grown more favorable This has already found expression in higher prices and in a revival of speculation for an advance. To us the importance of this fact lies in the circumstance that it raises the limit which we may reach in values before inviting heavily increased shipments. Should a rapid expansion in the demand here ultimately cause heavier buying abroad, then its addition to a good business with other countries would accelerate an already rising tendency. This is an additional circumstance which would place an upward rush here within the range of possibilities. It is a point which should be carefully considered by buyers and sellers alike if the swelling demand in this country should in the next quarter assume proportions which a few anticipate and many do not consider impossible.

Chicago and St. Paul Freight Rates.

The matter of the Chicago, St. Paul and Kansas City Railway, just decided by the Interstate Commerce Commission, has some interesting features. This railroad asked for a ruling permitting it to make higher rates to intermediate points between Chicago and St. Paul or Minneapolis than is charged upon through traffic to and from the same points. This was asked upon the ground that a rival line was quoting these low through rates, though not earning operating expenses, and that the road in question should be allowed to compete for this through business without lowering local charges to the same level, or else the C., B. and N. should be compelled to advance their supposed ruinously cheap tariffs. Neither of these points was acquiesced in by the commission. The Interstate act was passed, they say, for the protection of the public and not to help one road against another, it being supposed that the carriers would arrange their own tariff matters and protect themselves.

In our way of looking at the case, the defending railroad did not make the best possible case of its low through and locally higher rates, and perhaps the omission was partly intentional. The reason of the low rates on the C., B. and N., which caused all the trouble, is given by the traffic manager or that road as "owing to the extremely low rates prevailing by Lake Superior lines." This seems to be almost the only mention of water competition made at the hearing, and yet it is the most potent cause of the whole trouble. If the traffic concerned only the cities of St. Paul and Chicago the matter would be simple enough, but the seaboard cities and the chain of waterways must be taken into account. Minneapolis flour and grain, destined for the East or for export, will pay no more via Chicago than via Duluth or Sault Ste. Marie, and the railroads between Minneapolis and Chicago cannot, therefore, maintain for any length of time any rate much higher than the rate to Lake Superior. In the same way, the rate on return shipments from the manufactories must be correspondingly low. When the through rate from New York to St. Paul, via rail to Buffalo and lake to Duluth, is on first class but 50 cents (not including insurance), and the rate from New York to Chicago is 35 cents, it seems plain that on traffic from the East for the Northwest the C., B. and N., or any other road, cannot get 60 cents, no matter whether anything less would be a losing rate or not. The true defense, therefore, it seems to us, would have been just such competition between rail and water carriers as the Interstate Commission had already decided constituted the differing circumstances allowing differing rates. It is, of course, true that all the traffic passing north from Chicago does not originate east of that great city, and it would be interesting, for many reasons, could we know what proportion of this business is actually made up there, excluding such goods as have been sent to Chicago from New England or Pennsylvania and reshipped by jobbers or from warehouses. No doubt such reshipments constitute a very important part of the total traffic. But even of the goods manufactured in the great works of that city it can be said that they must be sold in the Northwest in competition with goods made further East, but which have had the advantage of this cheap lake carrying. So, from whichever point of view we look at the problem, the importance of the waterway is seen.

Another point in the matter is that an evident way of escape was not even mentioned and that is the making of a through rate between New York, or Boston, or Pittsburgh and the Northwest, a rate which could be less than the rate to Chicago plus the rate from Chicago to St. Paul. This would have enabled the Chicago, St. Paul and Kansas City to have collected a low rate on competitive water traffic, while charging on the business originating at Chicago a higher rate. No suggestion of such a plan was heard from the lips of any of the railroad men. This fact speaks volumes for the strength of Chicago's influence and for the alertness and enterprise of her business men. A moment's thought will show the severity of the blow such a plan would strike against her jobbing trade. As the case now stands Chicago is a basic point for rates. Tariffs are so constructed that everything manufactured in Pennsylvania or elsewhere can be shipped to Chicago, resold, and shipped to points further West without any additional charges for the break at Chicago. If now it be once admitted that this rule must on any account be broken and the rate from New York to St. Paul be lower than the rates charged to Chicago and out again, then the wholesalers of that city lose control of so much trade. As remarked before, it is most significant that railroad managers will appeal to Washington on purely technical grounds for permission to charge the small towns a high rate, but will not one of them whisper that exactly this thing can be done if only they will charge Chicago shippers as high as the local dealers, and higher than manufacturers further East. It may yet happen that these Chicago-St. Paul railroads will be forced to recognize the facts of the water competition by the lakes and meet the through competition between the seaboard and St. Paul by a through route, but this will not be done at present. The influence of Chicago is too firmly established. It was a knowledge of this fact which caused the building of the Soo line as "an anchor to windward" by the Minneapolis millers.

Our Trade With Japan.

Our domestic export to Japan has increased so much recently under the impulse of growing prosperity in that country, that an examination of the financial reforms and industrial expansion going on there may be useful. One of the greatest drawbacks with which Japan had to contend was the paper money; in 1885 specie payment was resumed after the paper money had depreciated 45 per cent. of par. Confidence was restored, and the Government finances since then took an even course. During the nine months that followed resumption, fiscal year 1885–86, the income was $56,622,173, and the outlay $56,620,275; in 1886–87 the respective figures were $74,695,415 and $74,689,014, while the budget estimate for 1887–88 fixes the revenue at $79,936,870, and the expenditure at $79,935,553. The national indebtedness is large, amounting on July 1, 1887 to $249,108,578, but with the exception of $7,522,032 it is internal, and the Nakasendo Government railroad represents $20,000,000 of it. In the budget the army figures with $12,045,994 expenses, and the navy with $12,006,052. In order to maintain her independence against China, Japan has an army whose effective strength, rank and file, is 54,388 men, and a navy ready for operations of 221 steamers, with a joint tonnage of 40,090 and 50,979 horse-power, one of them being an armored vessel. As per census of January 1, 1886, the native population at that time was 38,151,217, the area being 382,418 sq. km., and there were 7117 foreigners, 4143 being Chinese, 1423 Englishmen, 592 Americans, 343 Germans, 198 Frenchmen, and 418 of other nationalities.

Greater progress would have been made in railroad building if foreigners had been allowed to engage in it direct; for this very reason a speedy revision of the treaties with foreign nations is much to be desired. Up to last year the Government alone built the railroads, and 370 miles went into operation, a start having been made in 1868. In 1887 there were 151 miles added, 11 domestic companies being formed, with a joint capital of $32,000,000. The first lines which the Government built cost $50,000 per mile, but the present cost of construction is only $18,000. The Japanese Railroad Company paid in 1887 a 10¼ per cent. dividend, the operating expenses averaging 45 per cent. of the gross earnings. In 1885 the Government negotiated an 8 per cent. railroad loan, the one above alluded to, which was

quickly taken up. Japanese engineers made the surveys, and all of the employees are natives, yet mistakes and accidents are of rare occurence.

Marine stations for the navy are multiplying. At Kure, a few miles distant from Hiroshima, an extensive station is being constructed in connection with a lagoon, and the dock frontage is to be 1½ miles; a smaller station is in course of construction on the west coast of Kinshin, in the vicinity of Nagasaki, while the island of Tsu-Shima, in the Straits of Corea, is being strongly fortified. The large cities are fast being provided with water-works, and Yokohama has a new aqueduct, which was finished in October last. Harbor and river improvements are being actively pursued at a number of points.

Some 20 years since Japan could not boast of the existence of any native mercantile or industrial companies, the feudal system preventing their formation till then. Last year, in three cities alone—Tokio, Osaka and Kioto—no less than 111 companies were formed, with a joint capital of $21,500,000, while 13 banks increased their capital by $18,000,000. Adding thereto the $32,000,000 of the 11 new railroad companies, it appears that $71,500,000 in shares were subscribed for among the people in a single year, or about $2 per capita. The new companies alluded to built new factories, &c., chiefly for cotton and paper mills, dyeing establishments, glass factories, wood-working shops, works for the preparation of tea and silk for export, express companies, machine shops, truck farming, horticultural and fishery enterprises, china, lacquer-ware and bronze goods factories, brickyards, ice houses, manufacture of artificial manures, all leading to new enterprises. On December 31, 1886, there were in operation 22 cotton mills, containing in all 76,000 spindles, turning out 1,320,000 pounds of twist. In 1887 their number was increased by eight large mills, with 117,000 spindles. The Japanese cotton crop yielded last year 7676 tons, but this year the crop will be more bountiful, the Government having stimulated cotton culture by advancing money to small farmers. Till now Japan had to import cotton to a notable extent. It is hoped that soon there will be no necessity for it nor for importing twist from Bombay and cotton goods from Manchester. A brewery is to be built at Tokio, the share capital being $150,000; the capital of the Tokio Electric Light Company is to be increased $500,000 in a couple of months, and that of the Cattle Breeding Company $300,000. Japanese workmen are skillful and wages low.

In 1887 the foreign trade of Japan reached a total of $95,000,000, being an expansion of 86 per cent. within a decade, for in 1877 it did not exceed $51,000,000. The total trade between Japan and the United States amounted during the nine fiscal years 1870 to 1878 together to $84,059,000; during the last nine fiscal years, 1879 to 1887, it reached a total of $147,827,000, an increase of about 75 per cent. During the calendar year 1887 the American trade exhibited the figures below as compared with 1886.

	Import.	Dom. exp. to Japan.
1887	$17,742,288	$4,150,777
1886	17,072,288	2,774,622
Increase in exports to Japan		1,376,155

In the fiscal year 1887 we shipped to Japan 21,983,462 gallons of refined petroleum, and received thence 2,312,179 pounds of crude camphor, 15,993,843 pounds of rags, 2,165,329 pounds of raw silk and 39,269,448 pounds of tea. Silk production increases rapidly in Japan, and so does the manufacture of silk goods. In a couple of years, when the new railroads are in operation and tap the most fertile tea districts, together with those where mulberry trees and silk worms flourish best, Japanese progress will not unlikely become still more astonishing. With growing prosperity the Japanese will take American goods more freely, the more so as we take nearly all her tea, and year after year more silk. This is all the more gratifying since the initiative of the American nation threw Japan open to international intercourse and civilization.

OBITUARY.

J. G. BRILL.

John George Brill, president of the J. G. Brill Company, and founder of the Philadelphia Car Works, died on Saturday morning at his home in Philadelphia, after an illness of more than six months. Mr. Brill established himself with his son, T. Martin Brill, in a small way, in the business of car supplies on Chestnut street, and later on, as their means increased, gradually drifted into the building of tram cars, and afterward into the manufacture of all classes of railway cars. In 1872 they obtained the first large order of railway cars that came to this country from Mexico, and since that time have made the greater portion of all the cars ordered from that country. The demand for their cars came not only from all parts of this country, but also from Europe, Asia, Australia and Central and South America. At present 40 per cent. of orders received are for foreign account. Mr. Brill introduced many novelties in the manufacture of cars, and was a thorough and conscientious mechanic. He was prouder and more ambitious regarding the good quality of work than money getting. He considered his greatest triumph the obtaining of the highest award, a gold medal, for the best tram car at the Exposition of Railway Appliances, in Chicago, in 1883. Mr. Brill was born near Cassel, Germany, in 1817.

WILLIAM MILLER.

William Miller, one of the oldest and best known iron manufacturers in the West, and chairman of the Miller Forge Company, Limited, of Pittsburgh, died on Friday evening, the 21st inst., at his home in Allegheny City, Pa. He had been suffering from typhoid malaria for nearly three months.

William Miller was born at Duntochar, near Glasgow, July 21, 1820, and came to America in 1849, connecting himself with the West Point Foundry, at Cold Spring, on the Hudson River. In 1855 he returned to Scotland, with some intention of again permanently locating. At this time he was employed in the works of the Dennys, near Dumbarton, where the famous Clyde steamers were built. He returned to America in 1858, and, passing through Pittsburgh on a trip West, was suddenly led to a determination to settle there with J. P. Haigh, in the West Point Forge, on Water street. This was afterward merged into the Duquesne Forge, on First street and Duquesne way, in 1860, where Mr. Miller became sole proprietor in 1864. During the war some of the most important forgings used by the Government were made here. In 1882 the business was still further enlarged and a new building put up at Rankin station, on the B. and O. R. R., under the name of the Miller Forge Company. He leaves a widow and six children, four daughters and two sons, William I. Miller, vice-president of Glenwood National Bank, at Glenwood Springs, Col., and Humphries Miller, secretary and treasurer of the Miller Forge Company.

WILLIAM BAROGWANATH,

a prominent boiler manufacturer of Chicago, died on the 20th inst., aged about 70 years. He was the senior member of the firm of William Barogwanath & Son, well known throughout the Northwest.

CORRESPONDENCE.

The Life of Iron Roofs.

MARSHALLTOWN, DEL., September 17, 1888.

To the Editor.—Since the article, "The Life of Iron Roofs," appeared in *The Iron Age* I have received numerous inquiries for further particulars concerning the roofs alluded to. If it will interest your readers please say the sheathing used was made of stock boards laid as closely as possible. The under side of the metal had two good coats of paint, but was not otherwise protected, and, as far as I can observe, has not rusted. The gauge of iron used was No. 26. The cleats on the standing seams are not exposed. Mr. Caleb Marshall, who owned this property from 1837 to 1861, informs me that I made an error in my statement on August 16, in that the barn roof was put on in 1840, and not in 1846. I have about 75,000 square feet of iron roofing, which, after many years of service, has been very satisfactory.

Yours respectfully,
J. R. BRINGHURST.

The Alaska Commercial Company.—The operations of the Alaska Commercial Company receive further attention from Chester Seeber, of San Francisco, formerly United States Commissioner for Alaska, who has written a letter for the purpose of showing that the company uses the power acquired under its contract "to monopolize the whole trade of western Alaska, oppress the inhabitants and to retard the development of the country." Mr. Seeber says the geographical conditions of western Alaska render the country impenetrable, except by navigation of its vast rivers, which flow westward into Behring Sea. All the commerce of the country flows through this sea and past the seal islands of St. Paul and St. George, which are held by the Alaska Commercial Company. Revenue steamers, he says, are kept at the expense of the Government throughout the summer months, constantly in attendance about the seal islands, and any unfortunate vessel discovered in Behring Sea is searched and if found to contain any furs, no matter where or how obtained, is seized and subjected to condemnation and sale. This arbitrary action, he says, on the part of the Government practiced at the solicitation and by the procurement of the Alaska Company, renders any attempt, however lawful, of any individual to do any trading with the country perilous and in most cases results in irreparable loss. Mr. Seeber endeavors to show that the company have substantial reasons for wishing to maintain its primeval domains undisturbed.

The search for the treasure ship sunk long ago off the Delaware breakwater has been abandoned. The only trace of metal discovered was verdigris from supposed contact with copper sheathing or a gun.

Washington News.

(From Our Regular Correspondent.)

WASHINGTON, D. C., September 25, 1888.

The Sub-Committee on Finance at last submitted their tariff bill to the full committee to-day. Owing to some undetermined points as to the amount of reduction on certain articles the committee determined to withhold their schedules from publication until they could have a further consultation and also to enable them to perform the courtesy of submitting their bill to Senator Beck, who is in poor health at Fortress Monroe. A full copy of the bill was prepared and placed in a sealed packet and intrusted to a deputy sergeant-at-arms to be conveyed to Senator Beck. It is expected that the acknowledgment of the Senator will be received by Thursday, at which time the committee will have another meeting.

The aggregate results of the differing views of the majority are as follows:

Total repeal of tobacco tax.	$30,000,000
Repeal on manufactured tobacco	25,000,000
Total repeal of duty on sugar	56,000,000
Fifty per cent. reduction	28,000,000
Repeal of tax on fruit brandy	1,500,000
Repeal on alcohol used in the arts	6,000,000
Reduction of duty on manufactures caused by equalizations and readjustment	10,000,000

There is also a cut of 50 per cent. on rice, which would add, approximately, $8,000,000.

The maximum reduction proposed is: Repeal of internal taxes, $83,000,000. The minimum reduction proposed is $70,000,000.

It is the reconciliation of these differing views which may consume some days. The general disposition, however, is to permit certain features, such as the amount of reduction on sugar and rice, if any, and tobacco to be determined in open Senate.

Owing to the continued indisposition of Senator Beck, Senator Harris has been selected to prepare the minority report. He informed the committee that it would require several weeks for him to complete the task. There is a very general disposition on the part of the Democrats to enter into a full discussion of the Senate bill, in contrast with the Mills bill. The metal schedule has been prepared in conformity with the views of representative men in the different branches. The reductions are stated by members of the committee as not being material in any case. The unification of iron and steel duties as far as practicable is said to be the most important change, and is claimed not to result in much of a reduction.

The duty on tin plate remains at its present rate of 1 cent a pound. The committee were favorable to the increase required to place that article on a protective basis, but could not see their way clear to such a step when public sentiment has not yet recorded itself on the opposite positions held by the two great parties now marshaling for control of the administration of the Government for the next quadrennial period. Lumber remains at present rates and wool is unchanged, except an increase of 1 cent on the finer grades. Mr. Cramp has had a conference with Chief Constructor Wilson, in which he stated that owing to the floods it was impracticable to extend the ways so as to increase the precautionary measures taken to insure a safe launching of the cruiser Baltimore, next Saturday.

The recent rapid advance in the price of old iron rails, coupled with the cheapness of new steel rails, would seem to present a very favorable opportunity to railroad companies for renewing their tracks. Some of them have taken advantage of this condition of affairs, but the business thus created has by no means assumed the proportions naturally to be expected. In the case of Western railroad companies the reason assigned for their non-action is their inability to raise the necessary cash to purchase new steel rails as a preliminary step toward taking up old iron rails. Here is an opportunity for the intervention of financiers who will advance the purchase-money for new rails and take in payment the old rails and a cash difference to be agreed upon. We are informed that Chicago parties are ready to make such an arrangement with railroad companies of good repute, and there are probably other agencies which would be willing to handle business of this character if application was made to them. The steel-rail manufacturers are anxious for orders, but they cannot afford to engage in financial operations of this sort to a great extent. They would be obliged to search for buyers of old iron rails and would probably be at a disadvantage in this respect when competing with those who make a specialty of the old-rail business. The suggestion herein conveyed may be of benefit to both manufacturers and consumers of steel rails.

Bells in History.

Bells have a large place in history, almost larger than any other object that could be mentioned unless we must except some of the implements of destruction. Their great antiquity, says *Lock and Bell*, is beyond question. An explorer among the ruins of Ninevah, or some other of those vanished Oriental cities, claims the discovery of a bronze bell, and the citizens of Rome came together in their public places at the signal of bells. But the Roman bells were elongated pieces of forging about as musical, it is to be presumed, as a modern cow bell. It was not until mediæval and modern times that the bell ringer became a man of very distinguished duties. Who has not heard of the Sicilian Vesper bells, rung in the year 1282 as a signal for the death of 8000 Frenchmen, slaughtered so that Sicily might be free? Who has not heard again, and shuddered as he listened, of the bells of St. Bartholomew, the signal, it is said, for the death of 100,000 persons? And the 8 o'clock curfew bell that rang through all England at the bidding of William the Conqueror, as a warning to his newly-made slaves to "douse the glim;" has it not echoed in faint and still fainter tones through all the pages of English history down to date? But it has not been the fate of all bells to be made to give the signal for slaughter or oppression. The Philadelphians have their fondly cherished Liberty bell. It is held in such esteem that it was borne half over the continent a few years ago under the escort of a guard of honor to protect it from all injury. It proclaimed once from its brazen lips the birth of a new nation, and hence if it be not made to endure as long as the nation itself it will be because metal is more perishable than the work of the Revolutionary architects.

Curious Guns.—Among the many things to be seen at the United States Museum, at Washington, are two guns which exhibit the most elaborate workmanship. They were presented to Thomas Jefferson, not by the Ahkoond of Swat (he is dead, poor fellow), but by the Emperor of Morocco. The first is a flint-lock musket, 77 inches long, smooth bore; the barrel is of steel, and for half its length is octagon; the remainder is round. The stock is of oak inlaid with arabesque design in gold covering the woodwork. Six bands of gold hold the stock and barrel in place. The flint-lock is of a peculiar pattern, heavily inlaid with gold, also of arabesque pattern. There is no trigger guard. On the butt there is a solid gold plate. The ramrod is ebonized, headed with a gold plate a foot long, altogether a costly and magnificent piece. No. 2 is a Moorish flint-lock musket, smooth bore, steel barrel, in shape octagon the entire length. The whole gun is 5 feet 8 inches long. The barrel and stock are connected with three silver bands. On each side of the stock are double rows of pear-shaped coral ornaments inlaid in solid silver bands. There is a solid gold plate on the butt, which is inlaid with a thick silver plate. The ramrod is coral ornamented with silver. This gun is also a present from the Emperor of Morocco to President Jefferson.

A Capillary-Steam Boiler.

At a recent meeting of the French Society of Civil Engineers, in Paris, M. Serpollet described his new tubular boiler, for which he claims that it cannot possibly explode. The boiler consists simply of a solid-drawn steel tube, which has, with the exception of its two ends, been rolled out flat, so as to leave in it a channel only 0.1 to 0.3 mm. wide. The tube is then coiled spirally, and its inner end is bent up vertically to receive the steam pipe, while the feed-pipe is screwed into the outer end of the spiral. This spiral tube boiler is placed into a furnace, which may be of the slow combustion type, and there is no need for either stop valve, blow-off cocks, gauge glass or safety valve. The feed water, upon entering the capillary channel within the tube, is instantly converted into steam, and issues perfectly dry. The tube of a 1 horse-power boiler is 6 feet 6 inches long, and when flattened out 4 inches wide; its total heating surface is about 5 square feet, and it is said to evaporate 45 pounds of water per hour, with a consumption of 9 pounds of coal. The supply of steam to the engine is regulated by regulating the amount of feed water sent into the boiler, and for this purpose the inventor arranges the regulator of the engine either to act upon the waste cock of the feed pump or upon a sliding block, by which the stroke of the feed pump is altered. There being practically no water in the boiler, the regulation is said to be as precise and quick as with the usual types of engines. To stop the engine it is only necessary to close the cock on the suction-pipe of the pump, or open the waste cock fully. A few days after M. Serpollet had brought this boiler before the Société des Ingénieurs Civils, he showed the application of it to a steam driven tricycle in the streets of Paris. The boiler was carried behind the axle of the main driving wheels, and the engine was fixed under the rider's seat, which also contains a supply of water and fuel. A speed of 6½ miles an hour was attained over roads having 1.5 per cent. grades. The weight of the tricycle in service, but without the rider, is 3¾ cwt.

The plant now employed on the Manchester ship canal includes 98 locomotives, 3221 wagons, 51 steam navvies, 49 steam cranes, and 104 pumping and other engines, with 161 horses and 8568 men and boys. Almost the whole of the land required for the construction of the canal has now been acquired by the company.

An interesting experiment has been made at Toulon, with the object of demonstrating the utility of a captive balloon in observing from a considerable hight the movements of an enemy's fleet. A naval officer seated in the car of a balloon was in telephonic communication with the frigate Indomptable, to the commander of which he signalled, as if in actual warfare, all that he could observe from his elevated position.

Wages at the Edgar Thomson Works.

The Pittsburgh newspapers report the wages earned by the men at the Edgar Thomson steel works of Carnegie Brothers & Co., at Braddock, Pa., for the month of August, on the sliding scale based on a selling price in that month of $31.50. Good machinists now make on an average of $82 per month, or about $2.90 per day. No machinist makes less than $2.50 in 10 hours. For night work they get time-and-half-time, and for Sunday work they are paid double. Machinists' wages, and those of the blacksmiths are the same as they were last year. The latter make $70 a month, or about $2.50 per day. Blacksmiths' helpers' wages range from $1.50 to $1.60 per day of 10 hours.

The converting millmen were even surprised themselves in receiving the amount of money they did for the month of August. It is true that a great many of them work 12 hours, but the amount of money they received in excess of that for any month of 1887 had a tendency to make them feel just so much better on pay day, and they were wholly satisfied. All over the converting mill, from the troughman to the scrappers, the wages are in advance of those of 1887. The latter work 12 hours, and were paid for August $1.62 per 100 tons. In 1887 they got $1.90 per 100 tons. The quantity of steel that can be turned out in 12 hours is so much in excess of that turned out in eight-hour turns that their wages for last month were much bigger than for any month in 1887 before the sliding scale went into effect. Scrappers' wages for the month of August were $212.37, or $8.13 per day.

The foremen of the cupolas were paid $1.40 per 100 tons. They made $184.14 in August, or an average of $7.87 per day. Their helpers are paid $2 per day. The exact earnings of vessel foremen could not be obtained, but their wages are not less than $100 per month. The troughmen got 92 cents per 100 tons, and made $121.20, or an average day's pay of $4.27. The ingot pourers worked eight hours at $1.40 per 100, and made $122.76, an average of $4.25 per day. The pull-arounds were paid $1.10 per 100 tons, worked eight hours and made $96.14, or very nearly $4 per turn. Steel blowers got $1.14 per 100, and made $99.63, or an average day's pay of about the same as the pull-arounds. The pulpit boys got 82 cents per 100 tons. They work 12 hours. Last month their net earnings were $71.66 each, or about $2.80 per day. The bottom-makers in the converting mill made an average day's wages of $5.50 in 12 hours. Their helpers are paid by the day, and receive only ordinary laborers' wages.

The employees of the blooming department made better wages than in any previous month since the erection of the works. Of course they all work 12 hours. The foreman and salaried men's wages are known only to themselves and the firm. The first helpers received $1.39 per 100. They made $157.66, or over $6 per turn. The second helper got $1.02 per 100, and made $126.94, or about $5 a day. The lever boys in this department made $40.25. The men who worked about the shearers got 91 cents per 100. Their month's pay amounted to $103.22, a fraction less than $4 per day. The chippers at the hammer were paid the same as the second helpers in the blooming mill, and the helpers at the hammer received the same as the shearmen. The rollers in the blooming mill are salaried men, and only work eight hours. The table men get $1.13 per 100. Their month's pay footed up $128.17—about $5 per day. In the rail mill there is no distinction made, except with the rail straighteners and gaggers, who work eight hours. All the rest work 12. The amount they get per ton is something less than what they received during 1887; but, by working 12 hours, they were all able to make wages that even excelled those of any month during the year of 1887. The rail mill heaters last month were paid $1.48, and made $153, almost $6 per day. The buggy boys are paid $2 per day. The lever men at the roughing rolls got $2.40 per day; the lever men at the short rolls, $3.50, and the guide setter at the finishing rolls, $3 per day; first helper on hot bed, $2.40; hot bed, second helper, $2. The rail straighteners worked eight hours and got $1.58 per 100 tons, and made, for the month, $113.76, or over $5 per day. Gaggers also work eight hours. Per 100 tons they got 90 cents, and made $64 80, or about $2.50 per turn. Chippers got $2.50 for a day of 12 hours; drillers, $2.50. These men's wages, as well as those for the chippers, are gauged by the rise and fall of the market. Rail loaders got 65 cents per 100, and their net earnings for the month were $100. The cold sawyers got $1.50 per day of 12 hours' work, and the water tenders $2.70 for the same number of hours per day. Engineers' wages range from $1.60 to $1.80 per day, and brakemen's from $1.25 to $1.40.

At the furnaces the only change is that the men work longer hours and make more money. The keepers, whose earnings in 1887 rated at $2.40 per day, last month made, on an average, $2.90. The engineers make $2.53 in 12 hours this year, as against $2.90 in 12 honrs last year. The fillers' wages last month averaged $1.85 per day, as against $1.55 per day, working on eight-hour turns, last year. Keepers' helpers, $2.32; last year, $1.97. The stock-yard laborers receive $1.58 per day, against $1.40 per eight-hour turns last year.

Recent Legal Decisions.

CONSPIRACY TO "BOYCOTT" MANUFACTURER.

P. P. Sherry made shoes, and a difficulty arose between him and a portion of his workmen. These workmen, through the president and secretary of their trade union —the Lasters' Protective Union - caused a banner to be made and to be carried in front of Sherry's factory, upon which was this inscription: "Lasters are requested to keep away from P. P. Sherry's until the present trouble is settled. Per order L. P. U." Sherry filed a bill for an injunction against the president and secretary of the union to restrain such use of the banner, on the ground that its use was part of a scheme to intimidate persons from continuing or entering his employment, which scheme was devised to injure his business. The trial court found that there was a scheme and that the use of the banner was a part of it, and the case—Sherry *vs.* Perkins and Leach—was reported to the Supreme Judicial Court of Massachusetts, where an injunction was granted. Judge William Allen, in the opinion, said: "The illegal scheme has been found to exist by the court below. The act of displaying banners with devices, as a means of threats and intimidation, to prevent persons from entering into or continuing in the employment of the plaintiff was injurious to him, and illegal at common law, and by the statute of this State. We think the plaintiff is not restricted to his remedy by an action at law, but is entitled to relief by injunction. The acts and the injury were continuous. The banners were used more than three months before the filing of the plaintiff's bill, and continued to be used to the time of the hearing. The injury was to the plaintiff's business, and adequate remedy could not be given by damages in a suit at law. The wrong is not, as argued by defendants' counsel, a libel on plaintiff's business. It is not found that the inscriptions upon the banner were false, nor do they appear to have been in disparagement of the plaintiff's business. The scheme, in pursuance of which the banners were displayed and maintained, was to injure the plaintiff's business, not by defaming it to the public, but by intimidating workmen, so as to deter them from keeping or making engagements with the plaintiff. The banner was a standing menace to all who were or wished to be employed by the plaintiff, to deter them from entering his premises. Maintaining it was a continuous and unlawful act, injurious to plaintiff's business and property, and was a nuisance, such as a court of equity will grant relief against."

CONTRACT IN RESTRAINT OF TRADE.

N. owned certain land which contained deposits of sand, and he sold to S. a portion of the property, about half an acre, upon the condition that he would not sell any sand off the premises. The deed contained this covenant. S. conveyed his land to his son R. S., but his deed for it had no reference to the restrictive covenant in N's deed to him. Against the protest of N., R. S. opened a sand pit and began to sell sand, and he sued for an injunction, but his complaint was dismissed on the ground that the covenant was against public policy, and void. N. died, and his executor was substituted as plaintiff. The case, Hodge *vs.* Sloan, was carried to the Court of Appeals of New York, where the plaintiff prevailed. Judge Danforth, in the opinion, said: "The decision below is against our idea of natural justice, for it takes from one party an advantage which he refused to sell, and secures to the other, without price, a privilege which his grantor was unable to buy. The covenant is not against public policy, for if it is in restraint of trade, it is still valid if it imposes no restriction on one party which is not beneficial to the other, and was induced by a reasonable consideration—or, in other words, if it was a proper and useful contract, or such as could not be disregarded without injury to a fair contractor. The covenant also ran with the land and binds R. S. though it is not mentioned in his deed."

Terms Used in Electrolytic Deposition of Metals.—The terms "cathode" and "anode," says an electrical paper, are synonymous with the positive and negative poles of an electric or galvanic battery. Then to measure the volume of electricity passed between these points, the term "ampères" is used as the unit, like feet or cubic feet, for measuring in the usual mechanical sense. For expressing the force with which the volume of electricity is propelled, the term "volt" is used as the unit. The resistance opposed to the electricity is measured by "ohms." The work done in the electrical circuit is expressed by "watts" in the same way that in a steam engine the power developed is expressed by h. p. To put it briefly, thus:

1 ampère x 1 volt = 1 watt.
1 watt x 746 = e. h. p.

These are the electrical terms employed by common consent in all European languages in connection with this science.

In a report to his company the chief engineer of the Engine, Boiler and Employers' Liability Insurance Company, of London, England, proposes the following rule for the safe working pressure for cylindrical furnaces in flues: Safe working pressure $= \frac{50\ t^2}{\sqrt{l\,d}} - \frac{d}{l}$ where t = thickness of plate in thirty-seconds of an inch, l = length of flue in feet, d = diameter in inches.

THE WEEK.

The Senate Finance Committee will begin its hearings on the alleged copper trust to-day.

The Treasury Department has refused to grant the application of Messrs. Snow & Burgess, New York, for a refund of all or part of the duties recently exacted upon the sheathing metal withdrawn in 1886 for use in construction of the ship Corsica, with a rebate authorized by the Tariff Act of 1883, on the ground of the applicants, that the vessel has been confessedly employed in the coasting trade for more than two months during the year ending February 6, 1888, and of the express provision contained in said law that vessels receiving the benefit thereof shall not be allowed to engage in the coastwise trade more than two months in any year, except upon the payment of the duties upon which a rebate is allowed.

A. M. Shannon & Co., of Galveston, are the lowest bidders for the construction of the Government jetty at that port. Their bid is $402,475.

Samuel B. Hale went to Buenos Ayres in 1828 as a banker under the auspices of the Messrs. Lawrence, of Boston, and died a few days ago, leaving a fortune of $15,000,000. He was a pioneer in the South American trade, and of late years became interested in sheep and cattle ranches.

A City of Mexico special to the Boston *Herald* says that the Mexican Central Company have signed a contract with the Government to deepen the bar at Port Tampico, making it the best on the Gulf, and aiming a heavy blow at the supremacy of the port of Vera Cruz.

The probable profits on the big Joggins raft, towed from Nova Scotia to this city, are estimated as follows: The piles are worth 5 cents per foot in New York, or say $2 each. They cost 60 cents each at the point of shipment. An ordinary schooner will carry 500 or more in a cargo at a freight of $1 each stick, or $1.60 laid down in New York. The 22,000 sticks in the raft would afford cargoes to 44 vessels and a freight of $21,000. The actual cost of the piles on the shore is $13,000. They will realize $44,000. That gives a profit of $9000 if shipped by the vessels. Competent authorities say the whole cost of construction and towing will include $10,000, thus leaving a profit of at least $21,000.

The New York Cotton Exchange has issued its first official statement of the cotton crop of the United States. The following is a summary:

	1887–88. Bales.	1886–87. Bales.
Total port receipts	5,612,448	5,301,532
Net overland movement (including to Canada)	1,001,261	820,869
Takings by Southern mills from the interior	433,124	377,184
Total crop	7,046,833	6,499,585

The crop last year was the largest ever grown in America, being 547,248 bales in excess of the previous one and 96,000 greater than the remarkable crop of 1882–83.

The Dominion fisheries is a subject exciting special interest in Canada in the prospect that important disclosures respecting their management will take place at the coming session of Parliament. The report for 1887, only now made public, shows a slight falling off in the catch of last year, as compared with 1886. The total value of the fisheries in 1887 was $18,386,103, divided by provinces as follows: Nova Scotia, $8,379,782; New Brunswick, $3,559,506; British Columbia, $1,974,887; Quebec, $1,773,567; Ontario, $1,531,849; Prince Edward Island, $1,037,425; Manitoba and Northwest Territories, $129,084. As compared with 1886, there was a decrease of $293,184. The total number of men employed in the fisheries was 59,933; number of vessels, 1168, aggregating 44,485 tons and valued at $1,989,840. Altogether there is a capital of $6,748,840 invested in the fishing industry.

The Massachusetts Institute of Technology is expected to have a membership this year of at least 300 students in the freshmen class, against 270 last year.

The Allegheny County Court House, in Pittsburgh, has been completed at a cost of $2,268,000. Norcross Brothers, of Boston, were the contractors. There are 2500 electric lights in the building. The natural gas fire grates number 38. They are of every variety, the imitation logs and tiles being odd and unusual. In the cellar is a battery of 9 boilers to furnish additional heat and manufacture the electricity for light and call bells. The granite used in the walls and tower measures 260,651 feet; the granite ashlars 87,346 feet, the marble wainscoting 8796 feet, 5515 feet of marble carving, and 157,222 feet of foundation stone. There are over 15,000,000 brick in the structure, 28,197 square feet of plate glass, and many hundred tons of iron.

The name of Paso del Norte, the important railway center on the Mexican border, has been changed to City of Juarez. It is now emerging from the adobe period of its history.

The followers of the exiled King Maletoa, in Samoa, are in arms against German domination in that island, to the number of 3000, but resistance is futile. The island is doubtless destined to be the center of German jurisdiction in the Pacific. The exports and imports of the islands through German traders are far greater than those of all other nationalities combined, and the German tonnage also surpasses the aggregate of all other countries.

Howard Potter, of the firm of Brown Brothers, in Wall street, claims one-fourth interest in the Couch estate in Chicago, valued at $4,000,000, and the case is before Judge Gresham.

Western New York promises a great apple crop, Niagara County alone contributing 1,000,000 barrels.

Agriculturists in the United States find that their profits, taken year after year, are narrowing down. The last annual report of the Bureau of Statistics shows the export prices of agricultural products for decennial periods as follows:

	1867.	1877.	1887.
Corn per bushel	$1.00	$0.58	$0.47
Wheat, per bushel	1.27	1.16	.89
Flour, per barrel	8.84	6.48	4.51
Cotton, per pound	.30	.11	.09
Bacon and hams, per pound	.12	.10	.07
Lard, per pound	.14	.10	.07
Pork, salted, per pound	.13	.09	.06
Beef, salted, per pound	.12	.07	.05
Butter, per pound	.24	.20	.15

As concerns grain, low prices may be ascribed to the competition of India and South America. Lard and dairy products have suffered severely from adulteration. Both France and Germany have discriminated against American pork. Another explanation is found in the fact that cheaply run "tramp steamers" scour the globe in search or the cheapest markets. Thus, the ports of Russia, India, South America and Australia are every year brought into closer connection with the main central points of consumption, to the disadvantage of American farmers.

A resident of Turk's Island, West Indies, proposes to build a schooner to make trading voyages between the port of Hayti, San Domingo and Turk's Island and New York. The owner intends to import goods from New York, and receive them at Turk's Island in bond, and thence forward them to such point as may seem desirable.

The brick yards at Haverstraw and other points on the Hudson River were deluged with water, suspending operations.

The exports of machinery from the port of New York during August were valued at $327,876.

Complaints are frequently made to the Treasury Department of alleged erroneous reappraisements of imported merchandise said to be due to the selection as merchant appraisers of persons who are not familiar with the value and character of the merchandise appraised. In order to obviate further complaint on this score the Department has amended the customs regulations so as to require the merchant selected for that service to make oath that he is familiar with the character and value of the merchandise to be appaised.

Yellow fever causes much consternation in some parts of the South. At Jacksonville there is no improvement. At Memphis only mail cars are permitted to enter from the infected cities. Decatur, Ala., is almost depopulated At Montgomery troops are enforcing the quarantine. New York responds liberally to the call from Jacksonville by subscribing some $80,000, besides forwarding large quantities of provisions and general supplies.

A training ship for Philadelphia has been secured for Philadelphia through the influence of prominent business men in that city, and the Government ship Jamestown will be fitted up for instruction in practical navigation. The City Council will be asked to appropriate $11,000 for its maintenance.

In real estate and banking circles in this city a profound sensation was caused by the discovery that Bedell, a long trusted clerk in the law office of Barlow, Laroque & Shipman, had obtained $264,000 on bogus mortgages. The amount is thus apportioned: Farmers' Loan and Trust Company, $109,500; Herman Koob & Co., $17,000; Robert Center, $43,000; J. Egmont Schermerhorn, $58,500; E. Sloan, $30,500, and some other clients of the firm, $6500. These parties expect that the lawers will made their losses good; the lawyers, in turn, will seek reimbursement from the Broadway Bank, on the around that the bank is responsible for money paid on forged indorsements. The bank, in turn, may look to Bedell and the notary, Henry, who is implicated in the various transactions.

On the 17th inst. Charles A. Pillsbury & Co., of Minneapolis, Minn., the largest flour-milling firm in the world, divided $40,000 among their employees, in pursuance of a profit-sharing system adopted four years ago. For two years there were no profits to divide, but the past year witnessed a change, large returns were received and the firm have thus been enabled to show their good faith. Few concerns have ever distributed among their employees a larger gross annual amount as their share of profits.

West Superior, in Wisconsin, is among those cities in the Northwest which aspire to control the course of trade in that direction. She thinks she has gained a point through the construction of the Eastern Railway of Minnesota now nearing completion. The editor of the *Inter-Ocean* says: "That territory in the Northwest, which must eventually divide its business at least between the cities at the head of Lake Superior and the city at the heel of Lake Michigan, is as large in

area as ten Englands, and capable of maintaining without poverty 100,000,000 people. It will, on a moderate estimate, within the next cycle of ten years, contain 6,000,000 of people, capable of supporting with the produce of its own soil the Twin Cities with 500,000 inhabitants, and Twin Cities at the head of Lake Superior with a population of 250,000. Our development will be somewhat retarded at the start by the enormous powers of absorption of St. Paul and Minneapolis. But eventually our growth will astonish and in a large measure supersede theirs."

The sudden collapse of paper money in Peru forms the subject of an interesting communication from Consul Brent. The calamitous termination of the war with Chili so far impaired confidence in the ability of the government to redeem its notes that the purchasing power of paper money dropped to about one-twentieth of that of silver. Nevertheless, up to within a year the absence of other circulating mediums caused the paper to be retained in use, although the fall in its exchangeable value had brought ruin to numbers of people whose means were represented by it. At the present time, however, paper money is virtually repudiated in all business transactions not directly connected with the government. It is of value only in paying duties to the extent of ten per cent. It is estimated that there were 60,000,000 paper sols in circulation or in private hands. This sum was equivalent to 2,000,000 silver sols, and in the course of week was practically lost. Such a blow to a nation in such financial straits as Peru is hardly conceivable abroad. Numbers of families in Callao and Lima for a time were unable to buy the necessaries of life.

The recent report that the Rhode Island coal mines have been purchased by the Worcester Iron Works, of Worcester, Mass., has been confirmed. It is stated that the mines are to be opened once more, new and improved machinery is to be employed in mining, and the purchasers are sanguine that in their hands the enterprise can be made profitable.

D. W. C. Carroll, of Pittsburgh, and Morris and Karttrell, of Chicago, have closed contracts for the building of two iron viaducts for the city of Denver, Col., to cross the railroads in that city. One viaduct is to be 376 feet long and 32 feet high, and the other 785 feet long and 32 feet high. The viaducts are to be made of structural iron, including the approaches. The viaducts cost $97,000 and the approaches $21,000 additional.

The New Orleans *Times-Democrat* says: "The following is the assessment of several Southern States during the census year and for 1887-88. The assessment now being made will show a still larger increase:

	1887-88	1879-80.
Alabama.....	$214,925,869	$117,486,181
Arkansas.....	148,868,206	86,409,364
Florida.....	84,860,534	29,471,618
Georgia	341,504,921	235,650,530
Kentucky.....	483,491,690	318,037,875
Louisiana	221,500,000	158,587,495
Mississippi.....	129,887,254	106,594,708
North Carolina	210,035,453	156,100,202
South Carolina	141,495,056	132,027,986
Tennessee.....	239,750,000	211,768,538
Texas.....	650,412,401	304,493,163
Virginia.....	374,043,338	308,455,135
Total....	$3,240,774,722	$2,164,792,795

Nearly 11,000 tons of henequin have been imported into the United States from Mexico within the last three months.

It is reported that a syndicate has been formed by Governor Gordon, Henry W. Grady, and others, of Atlanta, Ga., and John H. Inman, Calvin Brice, General Samuel Thomas, Dr. Norvin Green, and others of this State, for the purpose of building a city at Rockmart, Ga., and developing the slate and marble quarries there. The slate quarries on which the syndicate have an option are valued at $10,000,000. The property cost the syndicate $400,000 in cash and $4,000,000 in stock.

The Lehigh Valley Transportation Company, of Buffalo, have just contracted for two propellers to be built by the Globe Iron Works, Cleveland, which are to be finished by the opening of navigation next season. Each vessel will be 308 feet over all, 290 feet keel, 40 feet beam and 25½ feet hold. Each will carry four masts and the engines and boilers will be near the middle of the ship.

The port of Beyrout, the financial center of Syria, midway between Smyrna and Port Said, is to be made a harbor of refuge for vessels navigating that part of the Mediterranean under an imperial concession, and the work is to be pushed rapidly to completion. Jetties are to be built which will form an inner harbor of 56 acres, with wharves, storehouses, tramways, &c. The work will cost $1,200,000 and it must be completed within five years.

The steamers plying between New York and Vera Cruz via Havana will shorten their time to 8½ days between the two ports, making the round trip one week less than heretofore, greatly to the advantage of traders.

The Cunard steamer Etruria once more beats the record, having arrived at this port from Liverpool on Saturday, after a passage of 6 days 1 hour and 50 minutes—the best time ever made by a transatlantic vessel. The Etruria had previously held a record of the quickest ocean voyage—6 days 1 hour and 55 minutes. The vessel left Queenstown on Sunday, September 16, at 1.15 p. m. On the first day she made 437 knots; on the second day, with fair weather and a moderate breeze, she covered 465 knots; on the third day, despite a westerly swell, 456 knots were passed, and with moderate winds and fine weather on the fourth day 490 knots were left behind. On the fifth day, despite two hours of fog in the morning, she again covered 490 knots, and on the sixth day, with everything favorable, only 455 knots were placed to her credit. The vessel's average daily run was 460 knots, and per hour she averaged 19.2 knots.

A rapid transit scheme for cattle in palace cars from the Western plains to the seaboard has been inaugurated by a New York company, who promise to deliver stock in the market in less than 120 hours from the Idaho ranges, 2500 miles distant. The animals are fed and watered *en route*.

Traffic between Vera Cruz and the Mexican capital is suspended for at least a fortnight, on account of the destruction by floods.

How Norwegians are able to compete successfully in the trade with the United States and even find profitable employment in the maritime provinces of the Dominion is easily explained. The first cost of a Norwegian vessel is about one-half of the cost of an American vessel, and the crews employed receive about $10 a month. Naturally not a few Norwegian seaman seek to better their condition on this side of the Atlantic.

Trials of Rapid Firing Guns.—A report has just been made to the British War Office upon the experiments recently carried out with the Maxim gun at 600 and 800 yards, in comparison with fire from Martini-Henry rifles. At 600 yards 15 men, all first or second class shots, fired ten volleys and made 52 per cent. of hits in 3 minutes 36 seconds, while the Maxim, firing the same number of rounds at the same targets, made 81.56 per cent. of hits in 2 minutes 36 seconds. At 800 yards the results were: 15 Martini-Henrys, 40.66 per cent. of hits in 3 minutes 40 seconds; Maxim, 80 per cent. in 1 minute 30 seconds. The targets were arranged so that the volleys fired by the men were directed alternately a quarter right and a quarter left, the intervals between the targets being 12 yards; the Maxim fired 15 shots alternately on each target. Further experiments are to be made at unknown distances, and as nearly as possible under service conditions, at ranges between 1000 and 1200 yards; and on this occasion the new service rifle, with dial sight, is to be tested.

Recent Treasury Decisions.

The Secretary of the Treasury has issued the following decisions under the customs laws affecting metals:

DUTY ON "REMELTING STEEL."

On an appeal from assessment of duty at the rate of 45 per cent. ad valorem on certain so-called "remelting steel" claimed to be duitable at 20 per cent. ad valorem, as unwrought metal, or at $\frac{3}{10}$ cent per pound by similitude to pig iron, spiegeleisen, wrought and cast scrap iron and scrap steel, or at not more than 35 per cent. ad valorem, under the provision for iron in slabs, blooms, loops, &c. The Department says: "From the special report of the appraiser, it appears that the merchandise in question consists of the best quality of Bessemer steel slabs or cakes, intended for use in the manufacture of finished steel plates, sheets, or bars, and that it was returned and assessed with duty as steel in slabs, under the provision for 'steel ingots, * * * and slabs, by whatever process made, * * * valued at 4 cents a pound or less.' The assessment of 45 per cent. is affirmed."

COVERED DRESS STEELS.

The appellants claim that the merchandise in question is dutiable either at 3½ cents per pound, as steel strips valued over 10 cents per pound, or at 35 per cent. ad valorem. As the merchandise is admittedly an article composed in part of steel, the Department is of opinion that it was properly classified, imposing duty at the rate of 45 per cent. as manufactures of steel and cotton.

DUTY ON LARDING NEEDLES.

Under a claim of appellants on larding needles dutiable at 20 per cent. ad valorem the Department says: "It appears, from the special report of the appraiser, that the articles in question are in no sense needles, but consist of what are commercially known as 'larding pins,' the same being conical in shape, made wholly of metal, and varying in length from 6½ inches to 9½ inches, each having one of its ends very finely pointed and sharpened and its other end broad and hollow, for the purpose of receiving strips of lard, which, by use of these pins, are passed into and deposited in meats preparatory to cooking, the process being termed 'larding.' In the opinion of the Department these articles, which are used for culinary purposes only, and which are not either commercially or otherwise known as 'needles,' are liable to the rate of duty 45 per cent. ad valorem assessed under the provision for 'manufactures, articles or wares, * * * composed wholly or in part of iron.'"

CHAIN LINKS.

1. Certain links with movable bolts, for the adjustment (by shortening or lengthening) of chains, and which are first forged and then finished by boring, &c., and subsequently japanned or galvanized, are not forgings of iron within the meaning of the tariff, but are dutiable as manufactures of iron not otherwise provided for, under T. I., 216. (Letter to Collector of Customs at New York, September 3, 1888.)

MANUFACTURING.

Iron and Steel.

Operations have been resumed in the socket department of the works of the Pittsburgh Tube Company, at Pittsburgh. As soon as enough stock is secured the balance of the works will resume operations.

Last week there was shipped from the works of the National Tube Works Company, at McKeesport, Pa., the last of a large order for the City Water Works, at Carson City, Nev. The contract required the use of 28 cars to transport the pipe. Most of it was 24 inches in diameter.

The new sheet mill just added to the extensive plant of the Standard Iron Company, at Bridgeport, Ohio, was successfully put into operation on Monday, the 17th inst. The three-high plate mill now in course of construction will be completed and ready for operation about October 1 next. The mills were built by the Lewis Foundry and Machine Company, Limited, of Pittsburgh, Pa.

M. V. Smith, metallurgical engineer, of Pittsburgh, has just been appointed consulting engineer for the Minnesota Car Company, of Duluth, Minn., with headquarters in Pittsburgh. This new company is composed principally of capitalists from Richmond, Va., the president being John Anderson, of the Tredegar Company. The capital is $400,000, all of which has been paid in. The plant will consist of a rolling mill with two trains of rolls, one 10-inch and one 18-inch, machine shops, foundry and car works having a capacity of 30 cars per day. Ground has already been secured, and work on the new buildings will be commenced at an early date. The bulk of the machinery will be supplied by Pittsburgh manufacturers.

The Carrie Furnace Company, of Pittsburgh, have decided to erect another blast furnace at Rankin Station, on the Baltimore and Ohio Railroad, adjacent to their present furnace located at that place. It will be 18 x 80 feet, and will have a capacity of about 200 tons per day. The contract for the erection of the furnace will probably be let the present week, and work will be commenced as soon after as possible.

Charles Huston & Sons, proprietors of the Lukens Rolling Mills, at Coatesville, Pa., have commenced the erection of a building for library purposes in the interest of their workmen and their families. Besides the library apartment it will have two classrooms, in which instruction in sewing will be given to the daughters of the workmen. A small library has been open to the men for some time, and this is now to be enlarged and benefits extended to the families.

The manufacturing industries of the Shenango Valley, Pa., are reported to be in better condition at the present time than for some years past. The following brief statement received from Wheatland, Pa., under date of the 19th inst., gives the condition of the various enterprises on that date, as follows: "Greenville mill in all departments is on double; Sharpesville, with one or two exceptions, all her blast furnaces in full blast; Sharon, P. L. Kimberly & Co.'s mills and furnaces pushed with orders; also the Sharon Iron Works working full with large orders ahead; Stewart Iron Company mill with 13 furnaces making a fine quality of steel and rolled billets, one blast furnace on, the other repairing; foundries all working full; Wheatland still idle, but with bright prospects for a glorious future. At West Middlesex one furnace making an excellent quality of Bessemer iron and the other to be put in operation as soon as possible. The manufacturers say that they have orders enough to keep the mills running full until next fall."

The Helmbacher Forge and Rolling Mills Company have not as yet reorganized since the old board of directors was re-elected at the stockholders' meeting—at any rate they had not up to last Monday. The works were idle during the early part of the week to admit of repairs to engines, &c., and were to restart as soon as these were completed.—*Age of Steel, St. Louis.*

Work on the new blast furnace of the Gadsden Furnace Company, at Gadsden, Ala., is progressing rapidly, and it is expected to be ready for blast by October 1 next. It will have a capacity of 100 tons per day.

The nail factory of the Laughlin Nail Company, at Wheeling, W. Va., continues in constant operation, the company finding a ready market for their product as fast as produced. Their factory is next to the largest in the world, containing 220 nail machines.

In our issue of last week we made mention of the fact that the Wayne Iron and Steel Works, of Brown & Co., at Pittsburgh, were closed down in all departments on account of a labor dispute. The trouble has since been amicably arranged and the plant is again in operation in all departments.

The Lloyd-Booth Company, proprietors of the Falcon Foundry and Machine Works, at Youngstown, Ohio, have purchased the machinery that has already been erected in the partially completed rolling mill at Bowling Green, Ohio, and will remove it to Youngstown and scrap it. The mill was to have been built by parties from Youngstown and others interested in the rolling mill at Portsmouth, part of which was to be used at Bowling Green. The citizens of Bowling Green offered a bonus if the mill was ready to turn out iron at a certain time. Part of the buildings were erected, when a storm blew the structure down. This discouraged the owners, and as they would not rebuild in time to claim the bonus the project fell through. The plant was sold at sheriff's sale:

The steel department of the plant of the Pottsville Iron and Steel Company, at Pottsville, Pa., which has been idle for about two months, has resumed operations, giving employment to about 90 men. All departments of these works, consisting of rolling mill, puddling mill and steel department, are being operated to their utmost capacity.

Clinton Furnace at Pittsburgh, formerly owned by Graff, Bennett & Co., and which has been idle since the suspension of that firm in the early part of the year, was blown in again on Monday the 17th inst. The syndicate of creditors which purchased the plant of the firm will operate it as soon as a sufficient supply of pig iron is obtained. The Clinton Rolling Mill, situated in close proximity to the furnace, will also be started up. The resumption of operations by this furnace leaves but three idle blast furnaces in Allegheny County at the present time, all of which are undergoing repairs. There are the Edith of the Edith Furnace Company, Lucy No. 2 of Carnegie Brothers & Co., Limited, and Soho of the Moorhead-McCleane Company.

One of the Musconetcong furnaces at Stanhope, N. J., went into blast on the 17th inst

On Monday, the 17th inst., the heaviest casting ever made by the Pittsburgh Steel Casting Company was successfully run at the works of that company in Pittsburgh. This was the pouring of the stem post of the warship Maine, now in course of construction at the Brooklyn Navy Yard. It is an L-shaped affair, the two arms measuring respectively 26 and 13 feet, portions of the casting being 42 inches thick. This heaviest portion is to act as a ram when upon the bow of the Maine. To fill the mold, 11 tons of steel were required, and the finished casting will weigh about 18,000 pounds. The length of the longest arm of the casting is 26 feet, that of the shortest is 13 feet 10 inches. It is 18 inches in width, and varies from a little over an inch to 42 inches in thickness. It must stand a Government test of 60,000 pounds tensile strength to the square inch, and an elongation of 10 per cent. in 8 inches. A piece of the cold metal an inch square must be bent at an angle of 90 degrees without fracture. The casting will be removed from the mold the present week, and will then be placed in an annealing furnace. A Government test will be made shortly afterward, and if it proves satisfactory it will then be delivered to the Government. The stern post and rudder for the Maine will also be cast by this firm in the course of a few weeks. The former will weigh but little less than the stem post, while the rudder will weigh about 14,000 pounds.

Machinery.

The Wheelock Engine Company, of Worcester, Mass., have been compelled to operate their works night and day to keep pace with their orders. Among their recent shipments are a 200 horse-power engine to the Linseed Oil Works, Sioux City, Iowa, and one of the same size to the Gleason Knitting and Mfg. Company, Seneca Falls, N. Y., and 150 horse-power engine to the B. Shoninger Company, New Haven, Conn. They are engaged on a large amount of repair work, including a good order for the Agawam Paper Company, Miltineague, Mass

The plant of the New Process Twist Drill Company, at Taunton, Mass., has been bought by P. H. Corr and others, who will assume all liabilities and form a new company. The price paid was $5000. It is stated that the new company will at once proceed to put the works in operation again.

The Ranken & Fritsch Foundry and Machine Company have filed articles of incorporation in the recorder's office, at St. Louis, with a capital of $150,000. The new company are composed principally of the old stockholders of the Smith, Beggs & Ranken Machine Company, whose failure was noted some months ago.

The Standard Underground Cable Company, of Pittsburgh, have closed two large contracts for electric-light cables for Chicago. One contract was made with Prof. J. P. Barrett, superintendent of the Electrical Department of Chicago, for 5 miles of electric light cable, which will connect with the municipal light station of that city and distribute the current to 65 arc lamps, each having a lighting capacity of 2000 candle-power. The other contract is to furnish 50,000 feet of cable for the Consumers' Electric Cable Company, of the West Side, Chicago. The incandescent electric light will be used in the latter place, and the Westinghouse Electric Company have secured the contract for furnishing the lamps.

The Phœnix Iron Works, of Meadville, Pa., under date of the 17th inst., writes us as follows: "We are building an addition to our machine shop building 100 x 40 feet, in which will be located our blacksmith shop and erecting shop, all of the present building, including space now occupied by blacksmith shop and office, will be thrown into the machine shop proper. We have been obliged to get more room and put in additional machinery to keep up with our orders for our new

automatic cut-off engine. We expect also to increase our boiler shop facilities in the near future, as we are now crowded beyond our present facilities. We are also building a new office and drafting-room, said building will be 25 x 50. All the above will be substantial brick buildings."

The Wilson Mfg. Company was recently incorporated at Chicago, with a capital of $300,000, for the purpose of manufacturing automatic regulating valves, faucets, &c. The incorporators are E. F. Brown, Jr, Robert W. Clarke and F. C. Rutan. Also, the Oregon Foundry Company, Oregon, Ill., with a capital of $3000, by Frederick G. Jones, Benjamin F. Sheets and R. A. Austin.

The Hughes Steam Pump Co., of Cleveland, Ohio, have just completed the boilers and pumping machinery for the Salisbury Water Company, of Salisbury, Md. The pumping engine is of the compound duplex non-condensing type and has a capacity of 500,000 gallons per diem.

The Jeffrey Mfg. Company, of Columbus, Ohio, have made shipments of their Coal Mining Machinery and Power Coal Drills, recently, as follows: Reinecke Coal Co., Madisonville, Ky., One Power Drill; Cherokee & Pittsburgh Coal Mining Co., Pittsburgh, Kansas, Two Mining machines and One Power Drill; Canon City Coal Co., Brookside, Col., One Power Drill; Coal Bluff Mining Co., Clay City, Ind., One Mining Machine; Union Pacific Coal Co., Rock Springs, Wy. Ty., Four Mining Machines. (These are in addition to the eight now in use at their mine, No. 4.) Sunnyside Coal Co., Evansville, Ind., Three Coal Drills; San Pedro Coal and Coke Co., Carthage, New Mexico, Two Power Drills; Sand Coulee Coal Co., Great Falls, Montana, Two Mining Machines; Spring Valley Coal Co., Spring Valley, Ill., Two Mining Machines.

The Hill Clutch Works of Cleveland, Ohio; report recent sales to E. P. Allis & Co., Brush Electric Company, Niles Tool Works, Walker Mfg. Company, Wm. Tod & Co., Geo. V. Cresson, Lane & Bodley and Fraser & Chalmers. They have also in hand complete power plants for the Oakland Electric Light Company, Cal.; Huntington Electric Light Company, W. Va.; St. Paul Gas Company, Electric Light Company, Helena, Mon. These companies report that they are working to the utmost limit of their capacity night and day, and are constantly enlarging their facilities to keep pace with their increasing trade.

Among the new factories being put up in the South is one under construction known as the Eufaula Cotton Mills, at Eufaula, Ala. It is to contain about 8000 spindles and 240 looms. The machinery is being constructed by the Lowell Machine Shop, of Lowell, Mass., and the belting will be supplied by the Page Belting Company of Concord, N. H.

The Washburn & Moen Mfg. Company shipped recently to the North Hudson County Railway Company at Hoboken, N. J., 13,000 feet of 1½-inch steel rope on one reel. The rope weighed 50,144 pounds.

Hardware.

Besides the introduction of Crude Oil as a fuel in their works, the St. Louis Shovel Company, St. Louis, Mo., have put in additional machinery which will give them an increased product, making their daily output 200 dozen Shovels, Spades and Scoops.

The Syracuse Forging and Gun Company, Syracuse, N. Y., whose works were partially destroyed June 2 by fire, have restored the works and are again in active operation, having had a delay in the progress of the business of about two months. The wheel plant of this company, which sustained severe damage by the fire mentioned, is again in running order, and the company are now prepared to receive orders and to supply the large demand which they had established before the fire.

Jewett & Hatheway, Bridgeport, Conn., have begun the manufacture of sheet metal goods, patented novelties, light hardware, wood and metal patterns, dies, &c., corner of South avenue and Water street.

The Perkins Specialty Lock, Cleveland, Ohio, referring to the fact that the increasing demand for their goods has necessitated the extension of their manufacturing facilities, state that their company will hereafter be known as the Perkins Lock Mfg. Company, and aliude to their increased capital and enlarged manufacturing facilities.

The Hollenbeck Lock and Knob Company, until June last in Syracuse, have completed new works in Jordan, N. Y., to which they have removed, and where they will continue the manufacture of hardware specialties. The new plant embraces a four-story structure, 70 x 50 feet, and adjoining foundry, 40 x 70 feet, with an annex for japanning purposes, 30 x 20 feet. The first floor includes the offices, sample and shipping department, as well as machine and iron rooms. The second floor is occupied as a brass foundry, and assembling stock and pattern shops; the third floor being used for wood-working and varnishing, and the basement for polishing, coloring and lacquering. These works are located on the stream known as the outlet of Skaneateles Lake, which furnishes a never-failing supply of power.

Henry Seymour Cutlery Company, Holyoke, Mass., have recently erected an addition to their factory, 120 x 30 feet, to accommodate their increasing business. They report that sales for eight months of the year 1888 show an increase of 10 per cent. over corresponding time last year, with an increase also in export trade. They refer to the ruling of the Secretary of the Treasury, placing sheep shears under manufactures of cutlery and 35 per cent. duty, instead of keeping them as they have been heretofore as manufactures of steel at a duty of 45 per cent., as affecting the sale of the goods largely the past season.

Miscellaneous.

A certificate of incorporation has been issued to the Rush Run Coal and Coke Company. The principal office is to be at Staunton, Va. The sum of $20,000 has been subscribed to the capital stock, $2000 of which have been paid in. The privilege of increasing the stock to $500,000 is reserved. Shares are $100 each and are held by F. Harrold, Fayette county; J. F. Effinger, W. P. Tames, A. S. Lara, Staunton, Va.; E. C. Best, Ronceverte, West Va., and C. M. Liggett, Lexington, Va.

A charter has been granted to the Pittsburgh Reduction Company, of Pittsburgh, with a capital stock of $20,000. It is formed for the purpose of reducing bronzes and commercial alloys and manufacturing the same. The shareholders are: Alfred Hunt, H. W. Lash, Robert Scott and Millard Hunsicker, of Pittsburgh; George H. Clapp, of Edgeworth, and W. S. Sample, of Sewickley.

The new coaches in use on the New York and New England's Boston trains from this city are as handsome and comfortable cars as any run out of Providence. They are mounted on the Brunswick spoke wheels, have double windows, which keep out cold and dust, and Pullman curtains. The ceiling finish is in wood, and five double burners in each car give plenty of illumination. The Hale & Kilburn shifting seat, with cherry frame, is used, upholstered in the ordinary coaches with plush, and in the smokers with rattan. Floors, sides and roof are filled with mineral wool which deadens the noise. The road has recently put on fifteen of these new cars.

The Rhode Island Locomotive Works have recently delivered nine ten-wheeled engines to the Chicago, Milwaukee and St. Paul Railway, two more were sent to-day, and four more remain before the order is filled. These are of the same style as others built for the St. Paul. This one railway alone have in use more than 200 locomotives from the Rhode Island Works.

Among recently authorized corporations in Illinois are the following: The Darby Lead Mining and Smelting Company, of East St. Louis; capital, $500,000; incorporators, John C. Nial, George Frey, C. M. Sharpe and Walter H. Darby. The Peoria Cordage Company, at Peoria; capital $200,000; incorporators, Martin Kingman, E. C. Heidrich, Charles A. Jamison and G. H. Schimpff. The Merchants' Arc Light and Power Company, of Chicago; capital, $30,000; incorporators, William H. Collins, Joel W. Stevens and Benjamin Keigher. The Wills Horsenail Company, of Chicago; capital, $12,000; incorporators John H. Purdy, Harry A. Wills and Edward Williams. The American Gear Forging Company, of East St. Louis; capital, $100,000; incorporators, O. Navins, Arthur W. Billings and William S. Long. The Clinton Electric Light, Heat and Power Company, of Clinton; capital, $25,000; incorporators, Vespasian Warner, Clifton H. Moore, John Warner, Abner R. Phares, and Richard Butler. The Anchor Iron Car Roofing Company, of East St. Louis; capital, $50,000; incorporators, H. D. Sexton, Henry O'Hara, and Royal J. Westney. The Galena Electric Light Company, of Galena; capital, $10,000; incorporators, John A. Mensell, August Reid, and Benjamin Franklin Mensell.

Aerial Photography.—M. Arthur Batut, of Enlaure, Tarn, writes to *La Nature* that he has succeeded in taking aerial photographs by means of a kite. He finds that a kite 6 feet 6 inches high by 4 feet 7 inches wide will easily carry a photographic apparatus weighing 2.2 pounds. Our contemporary states that two photos taken by M. Batut at altitudes of about 250 and 330 feet respectively, although faint, give a plan of the house and farm at Enlaure, and may be looked upon as very successful first attempts.

It is rumored that the Argentine Government contemplates placing with our manufacturers contracts for 50 locomotives of various classes, and has already entered into agreements for the purchase of rails and coaches.

Paper pasted, gummed, or glued on to metal, especially if it has a bright surface, usually comes off on the slightest provocation, leaving the adhesive material on the back of the paper, with a surface bright and slippery as ice. The cheaper description of clock dials are printed on paper and then stuck on zinc, but for years the difficulty was to get the paper and metal to adhere. It is, however, said to be now overcome by dipping the metal into a strong and hot solution of washing soda, afterward scrubbing perfectly dry with a clean rag. Onion juice is then applied to the surface of the metal, and the label pasted and fixed in the ordinary way. It is said to be almost impossible to separate paper and metal thus joined. Probably metal show tablets might be successfully treated in the same manner.

TRADE REPORT.

Chicago.

Office of *The Iron Age*, 95 and 97 Washington St., CHICAGO, September 24, 1888.

Pig Iron.—The volume of business continues to shrink, most dealers reporting a very quiet week. A few of them are enjoying a steady demand for lots of 50 to 100 tons from small consumers, and one sale of a round lot of Lake Superior Charcoal Pig was made at $21, four months. A demand for Charcoal, for Car-Wheel purposes, is among the possibilites of the near future, as Car-Wheel manufacturers are sounding the market in anticipation of orders for cars which are expected to be placed very shortly. Their inquiries run largely to high numbers, showing that Old Car-Wheels are scarce, and that consequently a greater proportion of Pig will be needed than usual. It is rumored that some of the Coke furnaces are soliciting business with more vigor than has been the case for several weeks, but this is alleged to be a canard put forth by buyers who hesitate to pay the advanced prices now ruling, and hope to work back to something like the old rates. Furnace companies using Lake Superior Ores state that higher prices for Pig are more likely to be realized than lower figures, because Ore is dearer and Coke seems strongly inclined to mount upward also. Agents for Southern Coke furnaces have been doing very little here of late, the high prices now asked interfering with new business. They fear that deliveries on old contracts which are now being made will be checked by the advance of yellow fever toward the Alabama Iron districts. Cash quotations, f.o.b. Chicago, are as follows: Lake Superior Charcoal all numbers, $19.50 @ $20.50; Alabama Car-Wheel, $26.25; Jackson County Softeners, No. 1, $18 @ $18.50; Hocking Valley Soft Foundry, No. 1, $17.50 @ $18; American Scotch (Blackband) No 1, $19 @ $20; other Ohio Scotch Irons, No. 1, $18 @ $19; Lake Superior Coke, No. 1, $17.50 @ $19; No. 2, $16.50 @ $17; No. 3, $15.50 @ $16; Southern Coke, No. 2, $17.75 @ $18; No. 2½ and Open Bright, $17.25 @ $17.50; No. 3, $16.75; No. 1, Mill, $16.50.

Bar and Structural Iron.—A very light demand is experienced for Bar Iron, but considerable business is expected shortly from car builders, who report increased inquiry from railroad companies. The mills are generally well filled with orders and little anxiety is manifested by their agents for new business. The usual quotation for mill lots of Common Iron is now 1.80¢, half extras, f.o.b. Chicago, and it would take very favorable specifications to shade this to any extent. For small lots from store jobbers are endeavoring to get 2¢, with 1.90¢ named as bottom to best buyers. Mill lots of Structural Iron are quoted as follows, f.o.b. Chicago: Angles, 2.25¢; Universal Plates, 2.25¢ @ 2.30¢; Tees, 2.50¢ @ 2.55¢; Beams and Channels, 3.40¢. Store prices of Angles are 2.40¢ @ 2.50¢; Tees, 2.60¢ @ 2.70; Beams, 3.80¢.

Plates, Tubes, &c.—Business continues fair but little change occurring in volume or character. Heavy Sheets are firmer, and higher prices are asked in some cases, but Plates are without change. Tubes are hardly being maintained at the discount recently agreed upon. Quotations from store are as follows: Heavy Sheets Nos. 10 to 14, 2.65¢ @ 2.70¢; Tank Iron, 2.55¢; Tank Steel, 2.80¢; Shell Iron, 3¢; Shell Steel, 3.25¢; Flange Iron and Steel, 4¢; Fire-Box Steel, 4.75¢ @ 5.75¢; Boiler Rivets, 4¢ @ 4.25¢; Ulster Iron, 3.75¢; Boiler Tubes, 62½ % off.

Sheet Iron.—A few inquiries are noted for mill lots, but it is very difficult to find a manufacturer able to make any deliveries this year. It is claimed that a market could be found here for a great deal more Sheet Iron if a supply was available. Manufacturers' agents state that the consumption for Roofing has grown enormously of late, and they believe that hereafter the Sheet-Iron trade will be more evenly distributed through the year. Some mills are quoting 3¢ @ 3.10¢, f.o.b. mill, for No. 27 for such deliveries as they can make, the higher rate being for earliest shipments. For December 3.10¢, Chicago, is named by a few mills to their regular customers. Jobbers' prices from store are 3.20¢ for No. 24, 3.30¢ for Nos. 25 and 26 and 3.40¢ for No. 27.

Galvanized Iron.—The activity in this branch is more pronounced than ever the past week, showing a decided gain in the volume of business transacted by manufacturers' agents. The demand covers all classes of consumers, but runs more particularly to high-grade material. Prices are firmer, and on some standard brands an advance of 5 % has been made. Jobbers still quote small lots at 60 % off for Juniata, and 60 % and 5 % off for Charcoal.

Merchant Steel.—The demand is irregular, some houses reporting a good business, while others have suffered a period of dullness. Combination prices from store are continued, as follows: Bessemer Bars, 2.30¢ @ 2.40¢; Tool Steel, 8½¢ @ 9½¢; Specials, 13¢ @ 25¢; Crucible Spring, 4.40¢; Open-Hearth Spring, 2.90¢; Open-Hearth Machinery, 2.75¢ @ 3¢; Crucible Sheet Steel, 7¢ @ 10¢. Some of these prices are being shaded by works not in the combination.

Steel Rails.—Nothing has happened during the week to enliven business A few railroad companies are talking of placing orders for 5000 to 10,000 tons, and some even ask quotations for next year's delivery, but they are slow to come to terms. The North Chicago Rolling Mill Company have resumed operations, but the Union Steel Company will shut down in a few days for lack of work. The Joliet Steel Company started up later than the others last spring, and will run longer before they clean up their order book. Quotations are nominally $30 @ $31.

Old Rails and Wheels.—Very few transactions in Old Iron Rails have come to light. One sale is reported at $24, and another $23.50. The exact condition of the Old Rail market is difficult to ascertain, but the impression is quite general that for the present, at least, the upward movement has culminated, though some of those interested are still talking higher prices. The supply has now overtaken the demand, and unless other markets advance it seems reasonable to expect a decline here to some extent. Short ends of Old Steel Rails have been sold at $16.50, but long lengths are worth $19 @ $20. Old Car-wheels are very quiet, with $19 @ $19.50 nominal quotations.

Scrap.—Increasing inquiry for Wrought has run up the price, but this again has checked business, as consumers are indisposed to pay the advance asked by dealers. Steel Scrap is looking up a little, but Cast is still quiet. Quotations for carefully selected are as follows, ℔ ton of 2000 lb: No. 1 Forge or Railroad Shop, $20.50 @ $21; Track, $20; No. 1 Mill, $16; Tank and Pipe, $13; Sheet, $9.50; Horseshoes, $20; Axles, $26; Cast Machinery, $15; Stove Plate, $12; Cast Borings, $9.50; Wrought Turnings, $12.50; Axle Turnings, $14.50; Coil and Leaf Steel, $16 @ $17; Locomotive Tires, $17. Dealers offer $14 for Mixed Country Scrap.

Hardware.—Continued improvement is reported in Heavy Hardware, but reports vary as before with regard to Shelf Hardware, some houses stating that business is even dull, while others are having a most excellent trade. With Western agriculture in its present prosperous condition the general demand for Hardware ought to improve very soon, unless the influence of last year's failure of the crops is so far-reaching as to yet seriously affect the farming interest. Manufacturing consumers of Heavy Hardware are purchasing more freely. Wagon-makers' prospects are particularly bright, and wagon material is correspondingly active and firm. Nuts and Bolts are firmer in sympathy with dearer Iron. The market is bare of Stove Boards, and the jobbers are pushing the manufacturers vigorously for more rapid deliveries, meanwhile borrowing from one another. Prices are now firm at 50 % and 10 % off for Crystallized from store, and other kinds in proportion. In consequence of the advance in manufacturer's price of Zinc, full casks are now held at 6½¢, and smaller quantities at 6¾¢ @ 7¢. Shot has been marked up to $1.45 per bag, and strictly half-and-half Solder to 18¢ ℔ lb., in consequence of the higher price of Lead and Tin.

Nails.—Little is being done in large quantities, or even in carloads, but jobbers are having a good demand for sort-up lots. Nearly every order for Hardware now has Nails in it. Small lots are quoted from store at $2.10 for Steel and $2.65 for Wire, but these prices are being shaded to some extent. The project for the formation of a pool among the manufacturers of Cut Nails is reported to be progressing very favorably, and the signatures of but few more manufacturers are needed to make it operative. If they are not secured by the 1st of October every effort is to be made to have them by the 1st of November. Much importance is being attached to this scheme on account of the high character of the men who are promoting it, and the commanding influence of the works which they control. It is very certain that if the organization is perfected prices of Cut Nails will be marked up.

Barb Wire.—No change has occurred to brighten the prospect. Orders are small and prices are unremunerative. The nominal quotations are 3¢ for Painted and 3.75¢ for Galvanized, but concessions are made even for small lots.

Pig Lead.—The market is in the hands of speculators, who have run up the price from 4.80¢ to 4.90¢. These high prices are bringing out stocks from consumers, who have made sales of several hundred tons at about 4.85¢.

Philadelphia.

Office of *The Iron Age*, 220 South Fourth St. PHILADELPHIA, Pa., September 25, 1888.

Pig Iron.—A very decided feeling of strength has been apparent during the past three weeks, and is daily becoming more general. Prices have scored a clean advance of 50¢ ℔ ton, although there are some who are still supplying their regular trade at the old figures, but should the improvement continue it is quite evident the advance would become general. As to the future course of the market it is difficult to pass an opinion, although the feeling at the moment is one of undoubted strength. There is some evidence of a slight hesitancy in purchasing at the advance, and if sellers will be satisfied with the present improvement in prices it is liable to prove a permanent one, and any further pressure toward higher figures, for the present at least, is almost sure to result disastrously, consequently a conservative course is the one to be followed, and will probably be adopted. Overproduction is one of the greatest evils to be avoided, and if this is successfully done the future of the market is in a measure assured. At

the present time the demand averages pretty well up to the supply. Meanwhile sales are being made on the basis of $18.50 @ $19 for No. 1 Foundry, $17.50 @ $18 for No. 2 and $16.50 for Gray Forge, although choice brands in some cases command a trifle more money.

Foreign Iron.—No transactions to report; prices are nominally as follows: $20 @ $20.50, c.i.f. duty paid, for Bessemer and $26 @ $26.50 for 20 % Spiegel.

Blooms.—A fair amount of business is being transacted and prices are firm at about the following quotations: Nail Slabs, $29 @ $29.50; Billets from $30 to $35, f.o.b. cars at mill, according to analysis; Charcoal Blooms, $52 @ $54; Run-out Anthracite $42 @ $44; Scrap Blooms, $33 @ $35 ℔ "bloom" ton of 2464 lb. Foreign at tide, c.i.f., duty paid, $29.50 @ $30.50 for Nail Slabs; $32.50 @ $34 for 4 x 4 Billets, and $35 @ $39 for Siemens-Martin, price according to analysis, &c.

Muck Bars.—Quite a large trade is being done at about $29 @ $29.50 delivered. Inquiries are numerous, although generally at a little less than sellers are willing to take, consequently a number of orders are being held in abeyance, but holders do not seem inclined to shade their figures to any extent.

Bar Iron.—Trade in this department has been very large during the past two or three weeks, and the mills have been able to book a number of large and desirable orders, while some are well filled up to the end of November. Early deliveries are not obtainable except at full quoted rates, say 1.9¢ @ 1.95¢; although for good-sized orders 1.87½¢ might be accepted. Skelp has been somewhat active during the past week at 1.87½¢ @ 1.9¢, although bids are on the market at 1.85¢, but are not very anxiously sought after by sellers. The price of Bar Iron from store has been advanced from 1.9¢ to 2¢ per pound.

Plate and Tank Iron.—The mills all report a good business and indications point to a continuance for the next two months at least. Prices while not higher are quoted firm at about as follows: Ordinary Plate and Tank Iron, 2.05¢ @ 2.15¢; Shell, 2.4¢ @ 2.5¢; Flange, 3.5¢; Fire-Box, 4¢; Steel Plates, Tank and Ship Plate, 2.3¢ @ 2.4¢; Shell, 2.7¢; Flange, 3¢ @ 3½¢; Fire-Box, 3½¢ @ 4½¢.

Structural Iron.—Trade is somewhat slow in this department, but mills are, to a certain extent, well filled with old contracts, and, with such small orders as are received daily, are able to work pretty well up to their capacity. Prices show no change and are quoted as follows: 2.10¢ @ 2.15¢ for Bridge Plate; 2¢ @ 2.10¢ for Angles; 2.6¢ @ 2.7¢ for Tees, and 3.3¢ for Beams and Channels, Iron or Steel.

Sheet Iron.—The demand is a little slow, but stocks are not allowed to accumulate to any great extent, as mills are generally able to market what they make up without any serious trouble. Prices remain as last quoted—viz.:

Best Refined, Nos. 26, 27 and 28	3¼ @ 3½¢
Best Refined, Nos. 18 to 25	3 @ 3¼¢
Common, ¼¢ less than the above.	
Best Bloom Sheets, Nos. 26 to 28	4½ @ 4⅝¢
Best Bloom Sheets, Nos. 22 to 25	4 @ 4¼¢
Best Bloom Sheets, Nos. 16 to 21	3½ @ 3¾¢
Blue Annealed	2.8 @ 3 ¢
Best Bloom, Galvanized, discount	62½ %
Common, discount	67½ %

Merchant Steel.—The increased demand for the better grades of Steel continues to be the only feature. Prices remain unchanged, as follows: Tool Steel, 8½¢; Machinery, 2.6¢; Crucible Spring, 4½¢; Open-Hearth Ordinary Spring, 2.7¢ @ 2.9¢; Crucible Machinery, 5¢; Best Sheet Steel, 10¢; Ordinary Sheet, 8¢.

Steel Rails.—There is no improvement of any kind in this department. Orders are scarce, but mills are kept fairly busy on outside specialties. Prices are nominally $29, at mill, but it is intimated that this figure could be shaded on good sized orders.

Old Rails.—No sales of any consequence to note. There are a number of Rails held in store here, but holders do not seem anxious to name figures—at least not for the present—although bids are on the market at from $23 to $23.50, which, however, is somewhat less than holders expect to realize.

Scrap Iron.—Occasionally orders for good round lots are heard of, but the bulk of the trade at the moment seems to be in small-sized orders at about the following figures, say $20.50 @ $21 for cargo lots; $21.50 @ $22 for carload lots, delivered, or for choice $22.50 @ $23; No. 2 do., $14 @ $15; Turnings, $13 @ $14; Old Steel Rails, $20 @ $21; Cast Scrap, $15 @ $16; do. Borings, $9 @ $10; Old Fish Plates, $25 @ $26. Old Car-Wheels, $17 @ $18, Philadelphia, or its equivalent.

Wrought-Iron Pipe.—Mills are all busy and are well filled up with orders, although prices, for some unknown reason, continue weak and drooping. Discounts are quoted as follows: Black Butt-Welded, 55 %; on Galvanized do., 45 %; on Black Lap-Welded, 65 %; on Galvanized do., 52½ %; on Boiler Tubes, 60 %.

Nails.—It is very difficult to find anything of interest either as regards amount of business or prices. Only a limited number of Nails are being sold, and on account of the extreme competition from outside points it is difficult to sell at a figure that pays for the handling. Lots from store are quoted at $2, with the usual discount on carload lots.

Cincinnati.

Office of *The Iron Age*, Fourth and Main Sts.
CINCINNATI, September 24, 1888.

Pig Iron.—The market for Pig Iron here preserves its strength well, the recently published statistics fortifying producers in their positions. As was surmised a week ago, official statements for the month of August show a reduction of about 42,000 tons in stocks of Coke Iron and about 9000 tons in stocks of Charcoal Iron at the furnaces, and this reduction of stocks occurs at the same time that there has been an increased production of 10,000 tons, which is equivalent to an increased consumption of upward of 50,000 to 55,000 tons during the past nine months. But the fact that increased consumption is the rule at this season deprives the showing of much force which it might otherwise have. While the local market has been strong during the week the volume of business has been less; this is in part due to the retirement of a number of furnaces from the market, but at the same time buyers have not been importunate, yet inquiries have been frequent, the pulse, temperature and respiration of the market being accurately taken by all concerned. No very large sales have been recorded and the aggregate of small transactions has been less. Among the larger sales may be noted 2600 tons Southern Car-Wheel Iron at $25, four months; 1000 tons No. 2 Southern Coke Foundry at $16.50; 600 tons do. at the same rate, and 500 tons No. 2 Southern Forge at $14.50. No. 1 Southern Forge has been sold at $15.25 @ $15.50, and about 600 tons Mottled Iron equivalent to $13.50, cash, here. The following are the approximate quotations for the local market, cash, f.o.b. Cincinnati:

Hot-Blast Foundry.

Southern Coke, No. 1	$17.50 @ $18.50
Southern Coke, No. 2	16.50 @ 17.50
Southern Coke, No. 3	15.50 @ 16.00
Ohio Soft Stone Coal, No. 1	17.00 @ 17.50
Ohio Soft Stone Coal, No. 2	15.50 @ 16.00
Mahoning and Shenango Valley	17.50 @ 18.50
Hanging Rock Charcoal, No. 1	20.50 @ 22.50
Hanging Rock Charcoal, No. 2	19.50 @ 22.00
Tennessee and Alabama Charcoal, No. 1	18.50 @ 19.50
Tennessee and Alabama Charcoal, No. 2	17.00 @ 18.00

Forge.

Strong Neutral Coke	14.75 @ 15.25
Mottled Neutral Coke	13.50 @ 14.00
No. 1. Mill Coke	15.00 @ 15.50
No. 2 Mill Coke	14.50 @ 15.00

Car-Wheel and Malleable Irons.

Southern Car-Wheel	20.00 @ 23.00
Hanging Rock, Cold Blast	22.00 @ 25.00
Lake Superior Car-Wheel and Malleable	20.50 @ 21.50

Manufactured Iron.—The volume of business has been fair during the week, some new orders of moment being booked, and a firm tone has prevailed. Common Bar Iron, 1.90¢; Charcoal Bar Iron, 2.90¢ @ 3¢; Sheet Iron, Boiled, Nos. 10 to 27, 2.50¢ @ 3.25¢; Sheet Iron, Charcoal, Nos. 15 to 25, 3½¢ @ 4½¢ ℔ lb.

Nails.—There has been a fair jobbing demand, which has been readily met at previous range of prices, but there has been some change in the discount allowed. Jobbing prices are based upon 12d @ 40d, which sell at $2.10 ℔ keg, with 10¢ rebate in carload lots, at mills. Steel Nails sell at $2.10 and Steel Wire Nails at $2.75 ℔ keg.

Old Material.—The market has apparently come to a halt. It is in a congested state, sellers having accumulated considerable stock at different points and demanding prices in excess of buyers' limits, have stopped the movement in this vicinity at least. Old Rails would probably sell at $24, while sellers are not disposed to accept even $25. Old Wheels are dull and nominally quotable at $22, spot.

Cleveland.

CLEVELAND, September 24, 1888.

Iron Ore.—Sales of Bessemer Ore are reported at an average advance of 50¢ per ton over midsummer quotations. Transportation rates to lower lake ports have crept up to $1.40 from Escanaba, $1.60 from Marquette and $1.85 from Ashland and Two Harbors. The tone of the market is certainly very firm at the advanced quotations, which are fully justified by the increased lake freights. The demand is excellent and many dealers report having declined orders that were thought to be in excess of the output of their mines. With the vessel interests steadily clamoring for higher carrying rates, mine owners have been even stronger than they would otherwise have been in their determination not to be driven into the position of having on hand, near the close of the season, large quantities of Ore already sold and obliged to be forwarded regardless of excessive freights. Scattering sales of Gogebic Bessemers have occurred during the past week at prices equivalent to $5.35 @ $5.45, f.o.b. cars Cleveland. Menominee Bessemers have sold at about $5.40 and Red Hematites at $5.25. The shipments for the season closely aggregate 3,250,000 tons, with a fair prospect of the output for 1888 reaching 4,000,000 tons.

Pig Iron.—The market is very active and the volume of business for the past week is probably quite equal to that of any preceding six days in August or September. Dealers would not, however, be surprised if business should be a little quiet for a month or six weeks. Producers of Bessemer Irons are not only well sold up, but have anticipated their output to such an extent that they will have practically nothing more to offer before the middle of November. Buyers, too, have purchased ahead of their immediate needs, and not very much is to be expected of them for a month or two. The situation is the natural result of the activity which has characterized the market since August 1st. The market

has as yet lost none of its encouraging features, and numerous sales of No. 1 Strong Foundry Bessemers, and of both Neutral and Red Short Mill Irons are reported at the 50¢ advance noted last week and at a clear advance of $1.50 over the prices prevailing a few months ago. At the beginning of the new week Gray Forge Iron seems in the best demand at $16.70 @ $17.20, Cleveland, four months. Lake Superior Charcoals are weak, but there is no weakening in prices.

Scrap Iron.—Old American Rails are weak at $25 ℔ ton, and a sale of a lot containing a few Steel Rails and much light material is reported at $22 75.

Manufactured Iron.—Bars are in good demand at $1.70. Sheets are eagerly taken at $2.90 for No. 24 and $3.10 for No. 27.

Chattanooga.

Office of *The Iron Age*, Carter and 9th Sts., CHATTANOOGA, September 24, 1888.

Much inconvenience and falling off in general business have occurred with the houses whose transactions are at points affected by the yellow fever; the embargoes that are being laid by many Southern towns are extremely annoying, not to say senseless, but frost, it is to be hoped, will soon end the trouble.

Pig Iron.—There is no falling off either in demand or prices. Inquiries are as frequent and urgent as they have been at any time during the past month or two, and no quotations are being made at prices that show any concession; $12.25 was offered for 1000 tons No. 2 Mill, spot cash, at the furnace, free from all commissions, but the offer was declined from the fact that the Iron was going into the hands of a speculator, and the producer concluded that if there was any speculation in it the furnace ought to have the benefit of it instead of the buyer. At the present time, for immediate delivery, there is more demand for good Foundry grades than there is ability of the furnaces to produce, and consequently the yards are well cleared up in this kind of Iron. There is now very little disposition on the part of producers to contract for long-time deliveries, although some furnaces are doing this, but as a general thing these transactions are not in favor. Freights now to Baltimore, Md., from this city are $3.67 ℔ long ton, but to points on the Ohio and beyond they have been advanced 15¢, to take effect October 1, making a basis of $2.40 to Cincinnati and Louisville and $2.90 from Birmingham and $3.15 from Chattanooga to St. Louis and $3.40 from Birmingham.

Louisville.

LOUISVILLE, KY., September 24, 1888.

The prices remain firm and a fair number of orders has been booked during the last week. Rates of freight from Southern furnaces advance 15¢ ℔ ton, taking effect October 1, and consumers will have to stand this, as furnaces are in shape to place all the Iron they have to offer for delivery during the balance of the year, without any concessions. It is thought that prices will advance slightly during the coming week, in sympathy with the New York market, which is undoubtedly stronger than the West, and sales have been made by Louisville houses in the East, during the past week, at prices 50¢ ℔ ton higher than can be obtained here. There is a strong demand for Old Rails and Wheels, and prices remain firm at $24 and $21. We quote as follows:

Southern Coke, No. 1 Foundry	$17.00 @ $18.00
" No. 2 "	16.00 @ 16.50
" No. 2½ "	15.50 @ 16.00
Hanging Rock Coke, No. 1 Foundry	17.25 @ 17.75
Hanging Rock Charcoal, No. 1 Foundry	21.00 @ 23.25
Southern Charcoal, No. 1 Foundry	18.00 @ 18.50
Silver Gray, different grades	14.50 @ 15.25
Southern Coke, No. 1 Mill, Neutral	14.75 @ 15.25
" No. 2 " "	13.75 @ 14.75
" No. 1 " Cold Short	14.25 @ 14.75
" Charcoal, No. 1 Mill	15.75 @ 16.50
White and Mottled, different grades	13.50 @ 13.75
Southern Car-Wheel, standard brands	23.00 @ 24.00
Southern Car-Wheel, other brands	19.25 @ 21.25
Hanging Rock, Cold Blast	22.25 @ 25.25
Hanging Rock, Warm Blast	19.25 @ 20.25

Pittsburgh.

Office of *The Iron Age*, 77 Fourth Ave., PITTSBURGH, September 25, 1888.

The market has quieted down somewhat; there is no falling off in actual business, the volume of which is possibly as large as it has been at any time yet, but the speculative feeling which obtained for a time has to a considerable extent died out, and actual legitimate business is in as good condition as it has been at any time since the improvement in July was inaugurated. There is a very fair and increasing demand for the products, but prices as yet have not got up to those of the raw material. A good many works will be closed during the first half of the present week, to give the men an opportunity to take part in the Centennial of Allegheny County. As might be expected, the people here feel very proud of the progress made by Pittsburgh and vicinity in that time. There were a great many people here from a distance, some of whom made a point to visit some of our large manufacturing establishments. Some former Pittsburghers who had not been here for a good many years were much surprised at the progress made. The growth of the Iron and Steel industries in this immediate vicinity is really wonderful, and it is not strange that the average Pittsburgher takes considerable pride in detailing the same.

Pig Iron.—Demand has fallen off, but this was to be expected, in view of many consumers having largely covered their wants during the remainder of the present year. Moreover, a large proportion of the Iron sold during the past couple of months was bought at prices considerably below those now current, and this being the case it is by no means strange that there has been a falling off in the inquiry for the raw material; and then a still more important cause for the same is that thus far it has been impossible to get the prices of of the products up to correspond with increased cost of the raw article. However, it is well to bear in mind that furnacemen are well sold up, hence there is no pressure to sell, and not in any event likely to be during the remainder of the present year. The market, therefore, while quiet, is in a good, healthy condition, and there is nothing likely to occur to disturb its present equanimity unless speculators should commence to realize, but it it is not probable that all the Iron they have would have much, if any, influence on the market, even if they were disposed to realize. This being the situation, there is every reason to believe that we shall have a fairly active and steady market during the remainder of the present year. We quote prices as follows:

Neutral Gray Forge	$15.75 @	$16.50,	cash.
All Ore Mill	16.75 @	17.25,	"
White and Mottled	16.00 @	16.00	"
No. 1 Foundry	18.00 @	18.50,	"
No. 2 Foundry	17.00 @	17.50,	"
No. 1 Charcoal Foundry	24.00 @	24.50,	"
Cold Blast Charcoal	25.00 @	27.00,	"
Bessemer Iron	18.00 @	....	"

Included in the sales were 1000 tons White Bessemer at $16.25, four months, and 1000 tons No. 1 Gray Forge at $16.50, cash, with some smaller lots, not so good Iron, down as low as $15.85, cash. There are plenty of good Irons offering at $16 @ $16.25, cash.

Muck Bar.—There is not the demand there was a few weeks ago, and, while the market is easier, there has been no quotable change in prices. Sales reported at $28.75 @ $29, cash, which may be regarded as the ruling rates.

Manufactured Iron.—There is a continued good degree of activity, but as yet prices have not got up to correspond with the enhanced cost of Pig Iron. The mills generally are pretty well employed. Those making a specialty of Skelp Iron have about all they can do. Bars are quoted at 1.80¢ @ 1.85¢; Plate, 2.10¢ @ 2.25¢; No. 24 Sheet, 2.80¢ @ 2.85¢; Skelp, Grooved, 1.80¢ @ 1.85¢; Sheared, 2¢ @ 2.10¢. There is a very good demand reported for Sheet, and the general Bar trade is very fair.

Nails.—A meeting of the Western Association took place in this city last Wednesday, which was pretty well attended. Prices were advanced; there was no change made in the card, but sales were being made away below the card, so that really there was an advance of 10¢ @ 15¢ ℔ keg. Pittsburgh manufacturers refused to sell at any time below card rates, but buyers were able to do considerably better elsewhere, and as a consequence there was very little business here. Now that all have the same price, or have agreed to stand by the card rates, there is reason to expect that Pittsburgh will get her share of the business. Moreover, even at full card rates there is but little margin for profit, and it is certain that Pittsburgh will not cut; they prefer to let their machines stand idle to running them at a loss. We continue to quote at $1.90, 60 days, 2 % off for cash, which but little more than covers the cost of the Nail Plate.

Wrought Iron Pipe.—There is a continued good demand for smaller sizes; some of the mills have about all they can do, and the prices quoted in our last are very generally adhered to. Large pipe continues dull, owing to the fact that there is but little Pipe being put down by the natural gas companies. Discounts on Black Butt-Welded Pipe, 55 %; on Galvanized do., 50 %; on Black Lap-Welded, 65 %; on Galvanized do., 55 %; 5⅛ inch casing, 40¢ ℔ foot net; 2-inch tubing, 13¢; Boiler Tubes, 65 % off, large lots.

Old Rails.—The most important sale reported was 6000 tons sold by the Erie Railroad to Pittsburgh and Youngstown consumers at $25.25 delivered at points in question; also sales of 1000 tons at $25 and 2000 tons at $25.25. Consumers hereabouts have been buying pretty freely of late, and it is evident are pretty well stocked, and the probability is that, as in the case of Pig Iron, there will be a falling off in demand. The railroads centering here have but few to sell, and the market may be reported steady at $25 @ $25.25 for American Tees.

Billets, &c.—Bessemer Steel Billets are quoted at $29 @ $29.50, cash, at seller's mill; sales 1500 tons reported, at $29.25. Nail Slabs remain unchanged at $29. Domestic Rail and Bloom Ends remain unchanged at $19; Steel Rails are quoted at $30, cash, for heavy sections.

Merchant Steel.—There is a fair business at unchanged prices. Tool Steel, 8½¢ for standard brands; Crucible Spring, 4½¢; Crucible Machinery, 5¢; Open Hearth do., 2½¢.

Old Material.—There is a continued good demand, and prices, as a rule, are steady. Sales No. 1 Wrought Scrap, $21, net ton; Car Axles, $26; Cast Scrap, $16, gross; Wrought Turnings, $14.50 @ $15, net ton; Old Wheels, $20, gross. Sales short pieces of Old Steel Rails at $18.50 @ $19, gross.

A. H. Childs, Iron and Steel broker, of Pittsburgh, has removed from No. 83 Fourth avenue to Room No. 507, in the Hamilton Building, in that city.

Detroit.

WILLIAM F. JARVIS & Co., under date of September 24, report as follows: There has been very little change in the market during the past week. Considerable business has been transacted, and no concessions have been made in any case. Prices have been very firm at the advance recently reported. The confidence that prices will be higher in the future is shown by the number of buyers that desire to purchase who are not consumers of Iron. This is further demonstrated by the action of some large consumers, who placed orders about 60 days ago for their wants during the next six or eight months, but who have purchased during the past week an additional quantity almost equal to the original purchases. We quote for the present as follows:

Lake Superior Charcoal, all numbers	$20.00 @ $20.50
Lake Superior Coke, all ore	19.75 @ 20.25
Lake Superior Coke, cinder mixed	18.50 @ 19.00
Standard Ohio Black Band	19.75 @ 20.25
Southern No. 2	17.75 @ 18.25
Southern Gray Forge	16.25 @ 16.75
Southern Silvery	17.00 @ 17.50
Jackson County (Ohio) Silvery	18.50 @ 19.00
Old Wheels	20.50 @ 21.50

New York.

Office of *The Iron Age*, 66 and 68 Duane street, NEW YORK, September 26, 1888.

American Pig.—Representatives of Southern Pig Iron producers have been watching with some solicitude the reports of the yellow fever scare in the South, and news from Birmingham particularly has been closely scanned. Until now no traces of the epidemic in that town have been reported, and the latest advices are encouraging. Any outbreak there followed by a panic would very seriously influence the Pig Iron markets of the whole country. Every day successfully passed lessens the danger, as we are approaching the first frost. Still the trade should closely scan the reports from that section for the next week or two. Our market has been quite active, the notable event being the sale by the Thomas Iron Company during the latter part of last week of Mill and Forge Irons to the aggregate of about 20,000 tons, to rolling mills, Pipe founders, Stove manufacturers, and engine and machine builders at the season prices, for delivery during the balance of year. Through these sales the output of the Thomas Iron Company must now be pretty well provided for. We hear of a purchase of 1400 tons of Southern No. 1 at $18.10, though the majority of representatives hold at $18.50 @ $19 for moderate lots. A 500-ton lot of Southern No. 2 Foundry has been offered at $16.50, tidewater. In Mill Iron we hear of a small sale of Northern Iron at a shade under $16. The Southern furnace companies have generally agreed to the following change in the grading, which some have been working under for some time past. This new grading is to go into effect on October 1:

New Grade.	Old Grade.
No. 1 Foundry	No. 2 Foundry.
No. 2 Foundry	No. 2½ Foundry.
No. 3 Foundry	No. 1 Mill.
No. 1 Soft	Open Bright.
No. 2 Soft	Close Bright.
Silver Gray	Silver Gray.
Gray Forge	No. 2 Mill.
	Mottled.
	White.

This will do away with a good deal of confusion and will be welcomed by Southern furnace managers. We quote standard brands: No. 1 Northern Foundry, which is scarce, $18 @ $19; No. 2, which is more plentiful, $17 @ $17.50, and Gray Forge, $16 @ $16.50.

Scotch Pig.—High prices are checking the demand. We quote for moderate lots: Coltness, $21.75 @ $22, nominally; Shotts, $20.50 @ $21; Langloan, $20.50 @ $20.75, and Dalmellington, $20.25 @ $20.50.

Spiegeleisen.—Some sales are reported for Western delivery at private terms. The market has advanced, and importers are now asking $27.75 @ $28 for English, steamer shipments, although no business has been done at these figures. Foreign Ferromanganese is held at $54 @ $54.50 nominally.

Plates.—An important circular has been issued by Carnegie, Phipps & Co., through their Eastern agent, H. L. Waterman, Mills Building, this city. The announcement is made that as Soft Steel Plate is taking the place of Iron for bridges, ship, tank and structural work generally they have decided to make prices for Sheared and Universal Rolled Plate of these grades as low as are quoted for Iron Plates for similar purposes. We quote Iron Tank, 2.1¢ @ 2.2¢; Shell, 2.3¢ @ 2.4¢; Steel Tank, 2.2¢ @ 2.3¢; Shell, 2.4¢ @ 2.5¢; Flange, 2.65¢ @ 2.75¢, and Fire-box, 3.5¢ @ 4¢.

Structural Iron.—The majority of manufacturers are fully employed, though current orders are for small quantities mainly. We quote Sheared Plates, 2¢ @ 2.1¢; Universal Mill Plates, 2.1¢ @ 2.2¢; Angles, 2.1¢ @ 2.15¢; Tees, 2.5¢ @ 2.6¢, and Channels and Beams, 3.3¢.

Steel Rails.—Sales during the week by Eastern and Western mills foot up to about 18,000 tons in the aggregate, the bulk of the business being done by Western mills for Western roads. Inquiries are in the market almost exclusively by Western roads for winter and spring work, aggregating about 75,000 tons, 30,000 tons thereof being for one system. A part of them, probably, are in the nature of feelers; others are from roads which usually buy early and decide promptly whenever they have entered the market. It is not likely that the Eastern mills will touch any of this business, because relatively prices in Chicago are lower at $30 there than $28, which is the usual price now at Eastern mills. The first step must therefore be that the Western mills fill their order books at least partly. Some uncertainty exists among Rail-makers as to next year's business. All of them have worked off accumulations of cheap raw material pretty well and could not now replace Ore Pig, Spiegeleisen or Coke at the same low prices, although that point has not been seriously tested except in a few isolated cases. These circumstances would point to higher prices. On the other hand, many manufacturers are usually willing in order to secure a start on their order books to accept early contracts at close figures. An error crept into our report last week in regard to sales thus far for 1889. Up to September 1st, according to the official report the sales had aggregated 26,430 gross tons. We quote $28 @ $28,50, with rumors of sales for winter delivery at a shade under.

Blooms and Billets—Very little is doing in Foreign which are quoted $30.50 @ $31 for sailer shipment, and $31.50 @ $31.75 for steamer shipment.

Wire Rods.—The market is dull at $39.50 @ $40 for small lots and no demand for large quantities.

Old Rails.—The position remains strong, the stock here having now dwindled down to less than 5000 tons, held by three strong parties. We note a sale of 2000 tons of T's from an American road at $26.25, Pittsburgh, and of 6000 sold by an Eastern road at $25.50, delivered at Ohio mills. A correspondent in Louisville writes of a sale of 1500 tons at $24, spot cash, f.o.b. cars Cincinnati or East St. Louis, as the buyers may elect. The majority of the Eastern roads have now disposed of their holdings, and what little there is here now could be swept away by one buyer. Holders ask $25 for T's and $26 for Double Heads. C.i.f. prices, by private cables, make foreign T's 70/ and Double Heads 75/, which would be equivalent to the figures quoted.

Old Steel Rails.—We note a sale of 1200 tons of Old Steel Rails delivered at Ohio points at $20.

Scrap.—The market is quiet, holders asking $21 for No. 1 from yard. We note a sale of 300 tons R.R. at $23.50 delivered at Cleveland, and 100 tons of Axles at $28.

Swedish Iron.—The market is quiet. We quote Rough Bars $56. Store assortment, $60 @ $61, and Wire Rods $53.50 @ $54.

Fastenings.—Manufacturers are asking $2.25, delivered, for Spikes. Dilworth, Porter & Co., are expected to resume on October 15th. Angle Bars are 2.05¢ @ 2.10¢.

Axles.—We quote Scrap Axles 2.15¢ @ 2.25¢, and Muck and Steel Axles 2.4¢ @ 2 5¢.

Financial.

While complaints come from some quarters that the fall trade is backward and hardly equal to expectations, there has been a general agreement that the business situation is satisfactory. Within the last few days, however, the Southern scourge has assumed a more threatening appearance, completely suspending traffic on important thoroughfares, until now it is reported New Orleans is not accessible by interior routes with any degree of certainty, except by way of Montgomery in Alabama, and even that route is threatened. Business in consequence is prostrated through a large section of country. It is inevitable therefore that traffic for a month or two must be seriously interrupted, until frost shall check the progress of disease. Several Northern railroads already refuse to receive freights from points below Charleston, and a telegram from Atlanta says it is probable the Memphis and New Orleans trains will be discontinued. Ex-President Norton, of the Louisville and Nashville Railroad Company, expresses the opinion that with the return of frost matters will soon resume their normal condition, and that Southern roads will suffer no material loss through the epidemic. Turning to the more cheerful aspects of the situation the important fact is announced by authority that an unprecedented corn crop is secured, equal to the enormous aggregate of 2,015,000,000 bushels; an increase of 559,000,000 bushels, or over 38 %, compared with 1887, and for the seven surplus States a gain of 520,000,000 bushels, or 66 %, the latter a gain of 60,000,000 bushels for the same group of States compared with the previous largest production in 1885. After a temporary decline of prices for wheat, in the absence of an export demand, wheat in Chicago touched the dollar mark, and millers at Duluth on Monday marked up wheat 4¢ ₱ bushel, New York following with an advance. Wheat in this market again jumped on Tuesday, cash wheat or what is termed No. 2 Red selling at $1.02, and flour again advanced, the best Minnesota selling at $6.25¢ @ $6.40¢. Corn was weak. Provisions were lower on yellow fever reports. Lard was excessively dull. Oil advanced sharply on buying orders. Cotton quiet at steady prices for spot stock. Advices from the Liverpool Exchange were that cotton-sheeted bales would be accepted as good delivery. Grocery jobbers reported that the early fall trade was the largest for some years. Coffee is disturbed by speculation. Sugars are firmly held.

The Stock Exchange market was subject to varying phases, following the extraordin-

ary depression in St. Paul and reports that English shareholders were attempting to control the road. On Thursday it was announced that the Interstate Commerce Commission had decided that it cannot order the Burlington and Northern to advance its rates, even though they are unremunerative. The Chicago, St. Paul and Kansas City Road is also prohibited from further violating the fourth section of the Interstate law. On Friday a break occured in Louisville and Nashville owing to free selling on the reports from the South of the spread of yellow fever. On Saturday there was more liberal selling of the grangers and the coal shares, but in the late trade the market partially recovered. On Monday there was again a lower tendency. On Tuesday the market was dull, closing firm.

United States bonds are quoted as follows:

U. S. 4½s, 1891, registered	107⅝
U. S. 4½s, 1891, coupon	107⅝
U. S. 4s, 1907, registered	128⅝
U. S. 4s, 1907, coupon	129⅝
U. S. currency 6s	121

The weekly bank statement showed a loss of nearly $500,000 in surplus reserve, which now stands at $11,943,625, against $5,816,725 at the corresponding time last year, and $9,079,875 in the second week of September, 1886. In loans there was a contraction of $492,200. Specie showed an increase of $826,400 and legal tenders decreased $1,626,100, reflecting the continued movement of currency to interior points. Deposits decreased $1,279,400. The large purchases of bonds by the Treasurer of late supplied the banks with all needed funds. The total amount of bonds purchased to date under the circular of April 17 is $53,266,800, of which $35,400,850 are 4s, and $17,865,950 are 4½ per cents. The cost of the 4s was $45,315,268, and of the 4½s $19,183,895, making the total cost $64,499,163. Notwithstanding these purchases there is still an excess in the receipts over the expenditures since the 1st inst. of $15,000,000. Treasury purchases, together with heavy interest disbursments October 1 and Congressional appropriations, will go far toward providing money to meet the usual autumn demand. Money on call averages about 2 %. The rates on time loans, most of which were made by trust companies and out-of-town institutions, were 4½ to 5½ % for four to six months. Commercial paper was in abundant supply, and the demand was light. Rates were for 60 to 90 days' indorsed bills receivable 5½ to 6 %, for first-class four months' commission house names 5½ to 6½ % and longer dates 6 @ 7½ %.

Sterling exchange was lower; actual rates, $4.84 @ $4.88. With free cotton exports later in the season, the receipt of gold from Europe is not improbable.

The clearings of 38 cities for the week ending September 22 were $1,113,797,755, against $991,174,669 last year, an increase of 12.4 %. Outside of New York the gain was 5.9 %. New York increased 13.5; Boston, 2.3; Philadelphia, 4.3; Chicago, 13.9; St. Louis, 19.8; Kansas City, 12.5; Louisville, 24.7; Omaha, 13; Minneapolis, 7.7; Denver, 36.1, and Duluth, 36.6 %. Cincinnati decreased 3.2; Milwaukee, 3.9; St. Paul, 7.7; Memphis, 36.9; Wichita, 24.4, and Norfolk, 23.8 %.

The gross earnings of 81 railroads from January 1 to July 31 show an increase of $10,225,660, or 4 %. The weekly reports for September indicate an increase varying from 2 to 3 %.

The exports of specie from this port during the week were $535,000, and the imports $150,000. Since January 1 the amounts, respectively, are $28,225,000 and $6,589,000.

The imports of merchandise at this port during the week were valued at $8,271,000, of which $2,000,000 represents dry goods. The total since January 1 is $343,646,000, as compared with $345,115,000 for the same time last year and $318,872,000 in 1886. Exports for the week were $6,773,000; total since January 1 $211,940,000 as compared with $225,795,000, for the same time last year.

The new bank organized by the hat trade in New York with a capital of $250,000 is named the Empire State Bank. James W. Conrow was elected president.

The Philadelphia mint during the fiscal year ended June 30 struck off coinage pieces in numbers exceeding 88,000,000 and in value $25,982,957.52, and the operations of the establishment yielded a profit of $5,236,000 above the working expenses and exclusive of the profit on silver bullion purchased.

Imports.

The imports of Iron and Steel, Hardware, &c., at this port from September 17 to September 23, inclusive, and from January 1 to September 23, inclusive, were as follows:

Iron and Steel.

	Sept. 17 to Sept. 23. Tons.	Jan. 1 to Sept. 23. Tons.
Iron Ore: Bowering & A.	1,000	1,000
Pig Iron: James Williamson & Co.	100	4,000
G. W. Stetson & Co.	400	12,450
Crocker Bros	200	8,273
N. S. Bartlett	100	4,300
R. Crooks & Co.	50	50
Richard Irving & Co.	50	50
Spiegeleisen: Naylor & Co.	800	8,019

Coal Market.

The Anthracite Coal market is easier, and it is not probable the heavy business done of late will be continued in October. The large operators already show some disposition to curtail production, the output from the three mining districts having dropped during the week ended September 22 to 869,136 tons, which is a decrease of 66,000 compared with the previous week, Wyoming alone falling off nearly 50,000 tons. Nevertheless, the amount of Coal passing into consumers' hands is extraordinary as the companies as a rule have no large accumulations. Compared with the corresponding week last year, the output now reported is 256,000 tons larger, and since January 1 the excess is upward of 2,000,000 tons. The comparison by weeks since the climax of the season is as follows:

Week ended August 18	920,922
Week ended August 25	832,058
Week ended September 1	844,665
Week ended September 8	881,802
Week ended September 15	935,523
Week ended September 22	869,136

Broken Coal is accumulating, and the smallest Steam sizes are in excess, but for sizes most in demand prices are said to be firmly held. Quotations are as follows:

	Broken.	Egg.	Stove.	C'nut.
Hard white ash	$4.15	$4.40	$4.65	$4.55
Free white ash	3.95	4.30	4.65	4.55

Pea is quoted $2.75, but can be bought much lower, and fancy grades range about $4.50 @ $5. Lehigh, f.o.b. at loading ports: Lump, $4.50; Broken, $4 25; Egg and Stove, $4.60; Chestnut, $4.70.

The official Coal figures for August show a production of 4,097,009 tons, and 898,000 tons increase over August, 1887. This is the heaviest August output known, and, notwithstanding the great produc-

tion, the stock of Coal at tide decreased 307,000 tons during the month, showing that the market absorbed about 4,405,000 tons.

Bituminous Coal is being delivered freely on contracts, and business is done on the pool basis of $3.50, alongside. Cumberland reports 70,000 tons for the week, and Clearfield 61,863 tons, which is an increase of 15,000 in shipments from these sources, compared with the same time last year.

Metal Market.

Copper.—At the time of our last report spot Chili Bars stood £95 in London, giving way to £94 the next day, but recovering to £100 yesterday, since when there is no change. Futures meanwhile temporarily gave way from £79 to £78. 15/, but are now £79 once more. Best Selected has been £80. 10/. Good merchantable brands improved from £77. 2/6 to £78. 5/ to-day. Total sales 1600 tons. Here very little has transpired. Consumers that may stand in need of Copper are supplied by the syndicate at 16½¢, while bears, to cover outstanding futures, have to pay 17½¢, which is also the figure for December delivery. There is some agitation in and out of Congress to put Ingot Copper on the free list. Whether anything will be done in that direction seems to us doubtful. The total output of ten Lake mines is given as under for the first eight months :

	1888. Tons.	1887. Tons.
Calumet and Hecla	19,313	20,688
Tamarack	5,001	2,737
Quincy	2,630	1,821
Atlantic	1,850	1,634
Osceola	1,667	1,327
Franklin	1,463	1,607
Huron	949	487
Central	723	765
Copper Falls	487	360
Kearsage	72	...
Totals	34,155	31,426

The export of domestic Copper during the first seven months has been 22,740,924 lb, against same time last year, 8,247,368. The London *Economist*, in its last issue, prints an article which we reproduce in full:

THE PROFITS OF THE FRENCH SYNDICATE.—A correspondent, who writes with an intimate knowledge of the Copper market, has favored us with the subjoined estimate of the financial results, to the 1st inst., of the operations of the French syndicate. He thinks "they will prove rather a revelation to the public, who imagine that the profits of the syndicate are already very large." His calculation is:

Estimated Quantity of English and Foreign Copper Held by the French Syndicate.

	Tons.	Tons.
On September 1 (Chili Bars)	50,000	
(other Copper)	50,000	
		100,000
On January 1		35,000
Increase in stock in eight months		65,000

Total Import of Copper into England and France, Including Pyrites.

	Tons.	Tons.
January 1 to September 1		95,000
Gone into consumption		30,000
Estimated quantity of Copper delivered by other holders than the syndicate	10,000	
Sold by the syndicate	20,000	
		30,000

Cost of 100,000 Tons Copper held on September 1.

	Per ton.
50,000 tons Chili Bars, at	£71
25,000 tons taken over from Société des Métaux, January 1, at	64
25,000 tons since purchased, at average price of	78
50,000 tons other copper, at contract price of 13/ per unit	£70 for best select.
Average price	77 for best select, 1st Jan. to 1st Sep.
Profit	£7

No Chili bars sold during this period to consumers.

Profit on 20,000 tons sold by the syndicate at £7 per ton	140,000
Interest on estimated average quantity held by syndicate during eight months—viz., 70,000 tons at £70 per ton, or £4,900,000 at 4 per cent. per annum for eight months	130,000
Present interest per annum on 100,000 tons, at £70 per ton, or £7,000,000, at 4 per cent. per annum	280,000

To this must be added brokerages, bank commission, rents, charges, &c.

In this connection reference may be made to a statement in the *Journal des Mines*, to the effect that a new contract has been entered into between the syndicate and Copper producers, to take effect on the expiry of the current three years' agreement. The terms of this new contract are thus set forth: "According to the arrangements at present in force the syndicate takes the production of the mines at a minimum of £62. 10/ ℔ ton in the case of the Rio Tinto, of £64 for the Calumet and Hecla, of £65 for the Mason and Barry, and of £70 for the Tharsis and the Cape Copper Companies. Further, the syndicate pays the cost of storage, insurance, &c., and after receiving £5 ℔ ton on account of its services shares all excess profits with the companies. According to the new combination the syndicate binds itself to take all the Copper produced by all the companies, at a uniform price of about £72. 10/ ℔ ton. It further abandons its claim for £5 ℔ ton in excess of the minimum price, and shares equally with the companies in the profits remaining after all expenses have been paid." It would thus appear that the syndicate in their efforts to maintain their position have been compelled to assume much heavier obligations than before.

Rio Tinto shares improved, at Paris, 51¼ francs, there being quite a revival in Copper-mining share speculation over there.

Tin.—The fluctuations in the London market have been comparatively unimportant. From £103. 10/, spot, the price improved temporarily to £103. 17/, and is now £103.15, after touching £103. 10/ yesterday. Futures gave way from £104 to £102. 15/ and are to-day £103. Jobbers have been getting 23¼¢, and, in a speculative way, the price has ruled at 23.25¢ September, 23.20¢ @ 23.40¢ October and 23¢ November, but trifling lots changing hands, the general feeling being one of apathy. The Banca sale in Holland came off at 63 guilders per 50 piculs. During the first seven months there were shipped from the Straits Settlements to the United States 16,520 piculs of Tin, against the following amounts in preceding years: 1887, 46,858; 1886, 40,706; 1885, 16,471; 1884, 37,408, and 1883, 67,119; the import into the United States was simultaneously 19,386,874 lb, against 16,524,743 in 1887, while the re-export was 113,614 and 102,484 lb respectively. At the Metal Exchange 10 tons October Tin brought 23.45¢ to-day. *Tin Plates.*—There has been a fair demand for Plates, both spot and futures, although there is not much inducement now to buy the latter, as the present price approximates very closely to spot stocks. The advances noted in our last still hold. Liverpool is firm at 14/ for Cokes, makers being well booked for two months ahead. The import into the United States during the first seven months has been 388,521,775 lb, against 377,523,392 lb same time last year, while the re-export has respectively been 649,896 and 972,911. We quote at the close, large lnes, ℔ box: Siemens-Martin Steel, Charcoal finish, $5.25 @ $5.75; Coke finish, $4.75; Ternes, $4.30 @ $4.40; Bessemer Cokes, $4.65, and Wasters, $4.30.

Lead.—There changed hands on the Metal Exchange since our last report, altogether, 212 tons of Lead at 4.95¢ @ 5¢, both September and October. Consumers now and then buy a small lot and pay 5¢, which is the price to-day; yesterday they paid 5.05¢ for 50 tons of an extra brand. At Chicago and St. Louis the price has risen from 4.80¢ to 4.90¢. In London Soft Spanish improved from £14.7/6 to £14.12/6, while English Pig rules at £14.17/6.

Spelter—The demand here has been moderate at 5.10¢ @ 5.15¢ for near delivery and October, but Silesian, now worth £19 in London, cannot be had for less than 5.90¢.

Antimony.—Is quite strong at 12¾¢ @ 13¢ for Cookson, and 10¼¢ Hallett, the stock being light, and the demand good. London remains steady at £39 for the latter.

New York Metal Exchange.

The following sales are reported:

THURSDAY, September 20.

25,000 lbs. Lake Copper, November	17.50¢
116 tons Lead, October	5.00¢

FRIDAY, September 21.

50,000 lbs. Lake Copper, January	17.55¢
25,000 lb Lake Copper, January	17.50¢

SATURDAY, September 22.

10 tons Tin, October	23.20¢
32 tons Lead, September	4.95¢
16 tons Lead, October	4.97½¢

MONDAY, September 24.

10 tons Tin, November	23.00¢

TUESDAY, September 25.

25,000 lb Copper, December	17.50¢
48 tons Lead, October	5.00¢

WEDNESDAY, September 26.

10 tons Tin, October	23.45¢
10 tons Tin, October	23.40¢
16 tons Lead, October	5.02½¢

British Iron and Metal Markets.

[*Special Cable Dispatch to The Iron Age.*]

LONDON, WEDNESDAY, Sept. 26, 1888.

There have been no important developments in the market for Copper or Block Tin. Both commodities are, apparently, in practically the same position that they were a week ago, and, apart from a sharp rise on Chili Bar prompts, due mainly to purchases for cornering "short" sales, the fluctuations of prices have been unimportant. The local stock of Tin is very moderate, and the available supply afloat is small as well. The opportunity is thus afforded for running prices up prior to the arrival of fresh supplies from the Straits, but as yet evidences are wanting of any contemplated movement in that direction. Speculation in Copper has been spiritless and consumers' purchases small, with outside brands substituted as far as practicable for Chili Bars.

The demand for Tin Plate, particularly from the American market, is checked more or less by the continued upward tendency of prices for all varieties. Makers are, however, so well supplied with orders that they accept new business only at their own prices. The report has circulation that prominent parties are negotiating for the erection of no less than four new works of considerable capacity.

Nearly all branches of the Steel trade continue active. Shipbuilding sorts and Rails figure most prominently, large orders having been placed the past week in both branches. Prices are very firm all through.

The Pig Iron market has displayed scarcely the degree of buoyancy that prevailed the preceding fortnight. Still, the amount of stock taken up by consumers and for export has been considerable and prices show scarcely any reaction from the highest point, except in the instance of warrants, which are a fraction off.

Scotch Pig.—There has been a fairly active trade in makers' Iron, and the market retains a firm tone :

No. 1 Coltness, f.o.b. Glasgow	51/
No. 1 Summerlee, " "	52/
No. 1 Gartsherrie, " "	48/6

No. 1 Langloan,	"	"	50/3
No. 1 Carnbroe,	"	"	44/
No. 1 Shotts,	"	at Leith	49/
No. 1 Glengarnock,	"	Ardrossan	47/
No. 1 Dalmellington,	"	"	43/6
No. 1 Eglinton,	"	"	42/6

Steamer freights, Glasgow to New York, 10/ Liverpool to New York, 10/.

Cleveland Pig.—Business in this line not so large, but still of good total and at full prices. No. 1 Middlesboro', G.M.B., 37/6; No. 3 do., 35/.

Bessemer Pig.—The demand has continued brisk, and values remain firm. West Coast brands, mixed numbers, 45/9 @ 46/, f.o.b. shipping point.

Spiegeleisen.—Sellers are very firm and report a good demand. English 20 % quoted 77/6, f.o.b. N. W. England shipping point.

Steel Rails.—The market continues strong and active. Standard sections quoted at £4.1/3 @ £4. 2/6, f.o.b. at N. W. England shipping point.

Steel Blooms.—Demand is good and the market very firm. We quote £4 for 7 x 7, f.o.b. at N. W. England shipping point.

Steel Billets.—A fairly active business reported, with prices very firm. Bessemer, 2½ x 2½ inch, £4. 1/3, f.o.b. at N. W. England shipping point.

Steel Wire Rods.—Demand somewhat better, but prices without change. Mild Steel No. 6 quoted at £5. 18/6 and No. 5 at £5. 17/, f.o.b. at N. W. England shipping point.

Steel Slabs.—A fair business passing, at firm prices. Bessemer, £4, f.o.b. at N. W. England shipping point.

Old Rails.—The market remains very firm, with demand fair. Tees quoted at £2. 17/6, and Double Heads £3, f.o.b.

Scrap Iron.—A moderate business, but prices firm. Heavy Wrought quoted at £2. 7/6 @ £2. 10/, f.o.b.

Crop Ends.—Demand runs fair and prices remain firm. Bessemer quoted £2. 7/6 @ £2. 10/, f.o.b.

Manufactured Iron.—Business in all branches is still brisk, and prices are strong. We quote, f.o.b. Liverpool:

	£	s.	d.		£	s.	d.
Staff. Ord. Marked Bars	....			@	7	12	6
" Common "	....			@	5	0	0
" Bl'k Sheet, singles	....			@	7	0	0
'Velsh Bars (f.o.b. Wales)	....			@	4	17	6

Tin Plate.—There is still a good demand, but the high prices asked check business. We quote, f.o.b. Liverpool:

IC Charcoal, Allaway grade.....15/3 @ 15/9
IC Bessemer steel, Coke finish.. ..... 13/9 @ 14/
IC Siemens " " " .. .. ..14/ @ 14/3
IC Coke, B. V. grade.....13/6 @ 13/9
Charcoal Terne, Dean grade.....13/ @ 13/6

Tin.—The dealings moderate and prices irregular. Straits quoted at £103. 10/, spot, and £103 @ £103. 5/ for three months' futures.

Copper.—There is no material change in the condition of the market. Chili Bars, £95 @ £100, spot, and £78. 10/ @ £79, hree months' futures. Best Selected, £79.

Lead.—The market strong and fairly active. Soft Spanish, £14. 10/ @ £14. 12/6.

Spelter.—Transactions only fair, but prices firm. Silesian, ordinary, £18. 15/ @ £19.

Mr. J. F. Robinson, of the iron brokerage firm of Robinson & Orr, has returned from a brief trip to Europe. Mr. Orr made the trip in the summer of 1887.

BRAZIL.

PARA, September 21, 1888.—*India Rubber.*—In response to the advance in Fine at Liverpool to 35d, the market here exhibits great strength. The amount shipped to New York so far this month does not exceed 240 tons, by two steamers.—*Per cable direct.*

CHILI.

VALPARAISO, July 20, 1888.—*Copper.*—There has been some activity in three months' futures, 11,600 quintals being taken at $29.45 @ $29.60 ℔ quintal, which equals £75. 5/11 ℔ ton to England, with 27/6 steam freight. *Nitrate.*—In spite of the decline in Europe and America, makers have remained firm, getting $2.70 for 95 % on the spot and $2.75 @ $2.77½ futures, which is above foreign parity. Sales aggregate 227,000 quintals; $2.70 equals 8/3¾ in England with 28/9 freight. The June shipments amounted to 794,534 quintals.

Shipments During the First Six Months:

	1888. Quintals.	1887. Quintals.	1886. Quintals.
To Northern Europe	4,930,680	4,031,205	2,547,518
To the Mediterranean	103,334	156,538	92,312
To the United States on the Atlantic	826,268	976,923	944,264
To the United States on the Pacific	90,938	142,296	118,069
Totals	5,951,220	5,306,962	3,702,163

The fortnight's charters have been 29,200 tons for Europe. *Coal.*—The last two days Coal on the spot, has dropped from 56/ for New Castle to 46/. Afloats are also lower, May sail being quoted 40/, and June, 37/; Australian July sail, 37/. *Exchange*, 90 days' bank bills, 26d. —*Weber & Co.*

EAST INDIES.

SINGAPORE, August 3, 1888.—*Tin*—Receded during the week to $33.50 ℔ picul, but subsequently recovered to $34.50, in order to close at $34.25. During the first seven months there have been shipped to England 94,256 piculs, against 32,401 during the corresponding period of last year, and 33,917 in 1886; to the Continent, respectively, 9129, 18,880 and 15,691, and to the United States, 15,907, against 34,654 and 22,695. *Gum Damar* has sold in a small way at $14 ℔ picul Siam, and $21 fair Palembang. *Gutta Percha* is scarce, and wanted at a slight improvement. We quote Prime, $90 @ $110; Medium, $50 @ $75, and White, $17 @ $40 ℔ picul. *Exchange* on London, four months' bank, 3/0¾.—*Gilfillan, Wood & Co.*

SINGAPORE, September 19, 1888.—*Tin.*—During the first half of the month there have been shipped from the Straits Settlements to the United States 400 tons, against same time last year, 200; since January 1, 1850, against 3750; to England, September 1 to 15, 800, against 400; January 1 to September 15, 13,200, against 9200.—*Gilfillan, Wood & Co., per cable to Charles Nordhaus, 89 Water street, New York.*

MANILA, September 17, 1888.—*Hemp.*—Our market has been quiet at $9.87½, against same date last year $10, equaling ℔ ton, cost and freight, £32. 17/6, against £35. 17/3. Since our last cable there have been no clearances for the United States; since January they amount to 125,000 bales, against 150,000 last year, and there are still loading 50,000, against 50,000 in 1887. Clearances for England since January 1 aggregate 246,000 bales, against 156,000 in 1887; there remain loading 8000, against none; cleared for all other ports 53,000, against 30,000; receipts at all ports since last cable, 12,000, against 10,000; ditto. since January 1, 439,000 bales, against 354,000 last year, and 289,000 in 1886. *Freight*, $6, against $5.50. *Exchange*, 3/5¼, against 3/9.—*Ker & Co. to Charles Nordhaus, New York, per cable*

ITALY.

GENOA.—September 12, 1888.—*Hardware.*—The import of Hardware and Brass Goods into Italy is chiefly, nay, almost exclusively, from Germany. *Agricultural Machinery and Implements.*—We import from England owing to the credit system which has been introduced in this branch, enabling the landed proprietor to pay for the machines in installments spread over three years. *Machinery for Manufacturing Purposes*—We receive from France, because it combines good qualities with cheapness. *Smaller Machines*—Germany supplies, because they are cheap on the one hand, and they can be sold on credit on the other. *Sewing Machines*—We import from Vienna. In *Fire Arms*—Belgium, Germany, Austria and France all compete for the Italian trade. Belgium sells, however, by far the bulk, owing to good quality combined with cheapness.—*La Patria.*

HOLLAND.

ROTTERDAM, September 12, 1888.—*Tin.*—The Tin movement in Holland in August has been as follows:

	Banca. 1888. July 31.	1888. Aug. 31.	1887. Aug. 31.
Stock on warrants in Company's hands, slabs	31,854	20,108	15,871
Billiton. Stock here and in Amsterdam	14,643	13,468	14,333
Totals	46,497	33,576	30,204
Deliveries of Banca tin	8,600	11,746	15,125
Deliveries of Billiton tin	10,370	8,375	9,550
Totals	18,970	20,121	24,675
Deliveries of Banca since January 1.	80,846	92,592	96,601
Deliveries of Billiton since Jan. 1.	50,811	59,186	65,537
Banca afloat	4,000	4,000	2,900
Banca in comp'y's hands for coming sales	118,455	126,922	73,299
Billiton afloat	47,200	46,000	46,975
Price of Banca	£55	£58¾	£62½
Price of Billiton	54	57½	62½

Since the beginning of the month Banca has advanced to 63 for spot and September sale, and Billiton to 61.50 guilders.—*Koch & Vlierboom.*

GERMANY.

HAMBURG, September 15, 1888.—*Iron.*—The Rhenish-Westphalian Iron market has, on the whole, been dull and unaltered during the week. Spiegel is quoted at 53 marks ℔ ton for 10 % @ 12 % Manganese. It is stated there is a good demand in England for American account for high grade Spiegel and it is hoped that American purchases may also increase in Westphalia. Forge Pig has been firmer at Siegen and sales to the close of the year are reported. Bessemer is neglected; Thomas in request. A larger output of Foundry Pig has been absorbed without difficulty. English Bessemer is bringing 45. Finished Iron sells tolerably well for domestic consumption, but the export trade is still slack therein; this is a weak point. Structural continues doing very well. The activity in Boiler Plates is as great as ever; the price of 170 marks for 5.5 mm. is currently paid, and 150 for Tank Plates. Thin Sheets are looking up. Machine shops, foundries and car works are all busily and remuneratively engaged to the extent of their capacity. The International Steel-Rail syndicate is in a fair way of resuscitation. During the first seven months Germany shipped 71,331 tons of Steel Rails, against 98,900 last year, and England, 597,429, against 556,915. The chief shipments made from both countries were distributed as follows:

	From Germany. 1888. tons.	1887. tons.	From England. 1888. tons.	1887. tons.
To Russia	74	52	3,017	8,548
To Scandinavia	886	1,184	13,075	20,677
To Spain	264	608	8,383	5,107
To Italy	845	5,406	2,017	12,015
To Japan	...	1,030	37,562	7,725
To the United States	2,270	10,396	39,723	92,941
To Mexico	....	.....	11,049	4,811
To the Argentine Republic	4,715	1,125	140,088	37,555
To British India	....	...	183,499	187,244
To Australia	5,129	9,647	48,677	65,366
Totals	14,183	29,448	487,090	441,989

Germany's Steel Rail exportation has, according to the foregoing figures, dwindled down to a comparatively unimportant amount. It is desirable, therefore, to have the syndicate renewed. After this question is solved the one of the price which the Prussian Government railroads are to pay in the future for Steel Rails will have to be considered. *Metals.*—It is asserted that the Spanish Lead mines are ready to join the proposed European convention of producers, the plans for which were laid down at Paris, on June 29 last, but this piece of news still lacks confirmation. Lead is rising and all Metals are firm.—*Borsenhalle.*

Hardware.

Trade continues in fair volume and without special features of importance. The effect of the yellow fever is being felt in Southern trade, and the result will doubtless be a temporary curtailment of business in that section. Prices remain unchanged except in a few cases.

Barb Wire.

The New York Barb-Wire market has the same general features as were indicated in our last report, but instead of the nominal prices then prevailing lower quotations are now openly made. The understanding between the Eastern manufacturers, by which prices were so satisfactorily maintained last season, having terminated, the manufacturers are now in an open market, and this fact will probably have its influence in the direction of lower prices than have prevailed the past season. The present price may be quoted as 3.6 cents to 3.75 cents for Four-Point Galvanized, with only a moderate business. With the concessions that might be obtained for a large order, it is thought by some well-advised parties that Barb Wire would be a safe purchase.

Cut Nails.

There has been no change in the volume of the business being done, or in the tone of the market, quotations remaining $1.85 to $1.90 for carload lots, and $1.90 to $2 for small lots from store. Little confidence is felt here in the ability of the Western makers to organize the proposed pool.

Wire Nails.

The factories are reported to be generally well supplied with orders, and but little complaint is made of irregularities in price. The fact that a leading Western company is not associated with the other manufacturers in the arrangement for the control of prices does not appear to have any influence in breaking the market, as the company in question are understood to be maintaining prices on the basis agreed upon by the other manufacturers.

Miscellaneous Prices.

The Victor Mfg. Company, Newburyport, Mass., issued a circular relating to the Victor Elastic Cement, which is used for bedding slate, pointing up and preventing leaks in metallic roofs, around chimneys, Copings, Skylights, Gutters, &c. It is described as adhering to all substances, not cracking or peeling off, never becoming brittle, but remaining elastic, hardening into a leather like substance, very durable. It is claimed that Tin, Shingle and Slate roofs can be made permanently water-tight by means of it. The company offer it as a desirable addition to the line handled by Hardware merchants, as well as Lumber Dealers and Dealers in Paints and Building Materials. It is sold at the following prices:

2½ pound cans, per pound	5½ cents.
5 pound cans, per pound	5 cents.
Tubs, 20 to 125 pounds, per cwt	$4.50
Barrels, per cwt	4.50

Besides the prices on Apple Parers which are given in another column, the New Scott Mfg. Co., Baltimore, Md., announce the following quotations on goods of their manufacture:

Hopper Cherry Seeder, per dozen	$3

Melting Ladles, per dozen.

1	2	3	4	5	6
$1.40	2.00	9.00	12.00	14.40	16.00

Arctic Ice Creepers, per gross	$24
Safety Ice Creepers, per gross	15

The following goods are listed as named, and subject to a discount of 20 per cent.:

Deacon Can Opener:	
Japanned, per gross	$36.00
Nickeled, per gross	60.00
Coppered, per gross	36.00
New Idea Can Opener, per gross	15.00
Rotary Can Opener, per gross	20.00
Universal Can Opener, per gross	20.00
Fruit Press:	
2 quart, per dozen	2.25
4 quart, per dozen	3.00
Mammoth Egg Beater, per dozen	50.00
Medallion Egg Beater:	
Regular, per gross	12.00
Medium, per gross	15.00
Victoria Egg Beater, per gross	12.00
Diamond Vegetable Grater, per gross	5.00
Cyclone Roach Traps, per gross	4.00
Peach Pitting Spoon:	
Milled, per gross	36.00
Regular Ground, per gross	24.00

The Axe manufacturers have been in session, but no action in the matter of prices is reported.

A slight advance has been made in the price of Trace and Fancy Chains, the lowest prices made having been withdrawn. Coil Chain is also held with firmness, without quotable change.

There has been a decline of ¼ cent per pound in the price of Sisal Rope, which is now quoted at the following prices for large lots, with a discount of 1½ per cent. for cash in 10 days:

	per pound.
Sisal, ½ inch and larger	9½¢
Sisal, ⅜ inch	10 ¢
Sisal, ¼ and 5-16 inch	10½¢
Sisal, Hay Rope	9½¢
Sisal, Tarred Rope	9 ¢
Sisal, Medium Lath Yarn	8½¢

This reduction of price has been made owing to competition among the manufacturers, notwithstanding the fact that Hemp continues scarce and the factories are generally well supplied with orders. Manila Rope continues firm.

The National Association of Spring Manufacturers met last week in Cincinnati, there being a fair representation of the manufacturers. The business transacted was principally of a routine character. E. H. Bourne, of Cleveland, presided, and G. S. Smith, Fort Plain, N. Y., acted as secretary.

Apple Parers.

There is comparatively little new in this line, the Parers put on the market being substantially the same as last year, with a few improvements. We give below the names of the machines of the different makers, and the prices at which they are sold:

L. A. Sayre, Newark, N. J., makes the following quotations on Parers of his manufacture:

	Per dozen.
Monarch Peach and Apple Parer	$13.50
Waverly Apple Parer	4.50
Ideal Apple Parer, Corer and Slicer	4.75

C. E. Hudson, Leominster, Mass., is putting on the market this season the following Apple Parers, which are quoted at the prices named:

	Per dozen.
Rocking Table	$6 00
Little Star Parer, Corer and Slicer	5.00
Hudson's New '88 Parer, Corer and Slicer.	3.75

Since last season an improvement has been made in the Little Star Parer, by which the slicing knife is made stronger, thus, it is claimed, materially improving the machine, as it is less liable to break or get out of order.

The Reading Hardware Company, Reading, Pa., and 81 Reade street, New York, manufacture the following Apple Parers, which are sold at the prices named:

72	$4.25
Baldwin	5.25
Gem	5.25
76	5.75
78	6.50
Champion	7.75
Advance	4.75

The New Scott Mfg. Company, Baltimore, Md., quote the following prices on their line of Parers:

Rotary Family Peach Parer,	per dozen.	$13.50
Mammoth Peach Parer,	"	6.75
Oriole Parer, Corer and Slicer,	"	4.00
Victor Parer, Corer and Slicer,	"	13.50
Gold Medal Parer,	"	4.00

The Penn Hardware Company, Reading, Pa., as mentioned in our report last week, are making the following machines:

	Per doz.
Penn Apple Parer, Corer and Slicer	$4.00
Perfection Apple Parer, Corer and Slicer.	4.00

The Goodell Company, Antrim, N. H., make the following Parers, which are quoted as below:

Pomona, per doz	$4.00
Turntable, per doz	4.50
New Lightning, per doz	5.50
White Mountain Potato Parer, per doz	4.50
White Mountain Apple Paring, Coring and Slicing Machine, per doz	4.50
Antrim Combination Apple Parer, Corer and Slicer and Potato Parer, per doz	5.50
Family Bay State Apple Paring, Coring and Slicing Machine, per doz	12.00
Improved Bay State Apple Paring, Coring and Slicing Machine, per doz	30.00
Eureka 1888 Hand or Power Paring, Coring and Slicing Machine, each	17.00

The last-named machine is the Eureka 1886, changed and improved somewhat in construction, and called the Eureka 1888.

In addition to the above machines the Henry C. Hart Mfg Company, Detroit, Mich., make the Standard Apple Parer, which has been on the market for several years.

D. H. Whittemore, who can be addressed care Occidental Hotel, New York, advises us that he is making a large or mammoth Champion for use in evaporating factories, hotels, &c., which is sold at $6, subject to a discount of 25 per cent.

Items.

We understand that no sale has yet been made of the factory and business of William A. Ives & Co., Hamden, Conn., which are offered for sale by the executors of Mr. Ives, as per announcement on page 47. In view of the fact that this business is long established and well known the opportunity thus offered to manufacturers desiring to carry on the enterprise is referred to as one deserving their favorable consideration.

Holmes & Edwards Silver Company, Bridgeport, Conn., allude to the success of their Mexican Silver Flatware, which they put on the market about three years ago to meet the demand for a line of unplated goods of superior quality, and state that trade has steadily increased on this better grade, while the demand for Silver Metal has also been continued, there being a market for both grades.

The Morley Respirator Company, East Saginaw, Mich., refer to the utility of their Respirator for use in blacking Stoves and have received a letter from a merchant, in which it is highly commended for this use.

The Underhill Edge Tool Company, Nashua, N. H., for whom Sise, Gibson & Co. are agents, 100 Chamber street, New York, have issued a new catalogue of their goods, which represents their well-known list of Axes and Hatchets, Washoe Picks and Mattocks, Bush Hooks, &c., illustrations being given of the different goods, with list prices.

Thomas Devlin & Co., Philadelphia, Pa., have issued a new price list and illustrated catalogue, in which their line of Butts, Hinges, Latches, Hooks, Brackets, Carriage and Harness Hardware and other manufactures are represented.

By the announcement on page 47, it will be seen that the Commercial Exchange, Des Moines, Iowa, are making efforts to secure the establishment of factories in their city, and allude to the advantages of the location. Some particulars are given which are worthy of consideration.

The trade will observe a Special Notice on page 48, in which a Hardwareman announces his desire for a position in a manufacturing, jobbing or commission Hardware business, and alludes to his experience in office, factory and on the road. His extensive acquaintance with the jobbing trade East and West is also referred to.

Bradlee & Co., Philadelphia, Pa., issue a circular in regard to the care and use of Chain, giving valuable suggestions and

information which will be of service to those for whom they are designed. A table is given of pitch, breaking, proof and working strains, and another giving dimensions of Chain Links.

The well-known Hardware house of Bolles, Kimball & Wilde, 93 Pearl street, Boston, Mass., report a very good demand for the full line of Sargent's Hardware, of which they carry a complete stock, and also the latest specialties in the Hardware trade. Mr. Bolles was for many years partner and buyer for B. Callender & Co., and is regarded as fully posted as to the wants of the retail Hardware trade.

At an exhibition given at the store of John H. Graham & Co., 113 Chambers street, New York, the operation of the Crown Meat Cutter, manufactured by the American Machine Company, Philadelphia, Pa., for whom they are agents, was shown, and its wide range of application indicated, as it was used successively upon a large variety of different substances, including crackers, raw meat, cooked meat, cabbages, potatoes, salt codfish, &c.

The Alford & Berkele Company, 77 Chambers street, New York, have issued a postal relating to the Fish Hooks of the American Needle and Fish Hook Company. They state that the company make no Hooks but File-pointed, which are referred to as sold for much less than any imported made in a similar manner. They allude to the manufacture as follows:

They are carefully inspected before being packed, and have no competition in price except what are called English Dubs, the points of which are ground and of a very inferior quality. We guarantee our Hooks equal, if not superior, in make and temper to any manufactured. These superfine Hooks are made of extra double refined Spring Steel Wire by the most elaborate automatic machine ever constructed. Having made extensive improvements in our machinery and in the process of tempering during the last year we feel perfect confidence in recommending our goods to the public as being superior in manufacture and temper to any other make, and our facilities for manufacturing enable us to undersell the world.

They also state that the new management having determined to control the trade in Fish Hooks in this country are prepared to make prices much below anything before attempted, and so low that importers will not be able to compete with them.

A. H. Reid, Thirtieth and Market streets, Philadelphia, Pa., is manufacturing a line of Dairy Fixtures, besides dealing in general creamery supplies. His circular illustrates his Reid's Square Can Creamery Churn, Butter Worker, the Gauging Butter Printer, Improved Butter Shipping Box, Round Can Creamery, Round Can and Peerless Creameries. The Lightning Brace is referred to as having an increasing sale, while he has also had an unusually large demand for the Butter Shipping Boxes, on which he has made a number of improvements, consisting of malleable iron corners for the protection of the bottom, while the construction of the tray for holding the butter has also been improved.

Humphrey Tool Company, Warren, Mass., issue a circular and price list illustrating their various Hardware specialties, including their Cavity Plane, Circle Gauge, Telescoping Panel Gauge, Pinch Dogs, &c.

Horton, Gilmore, McWilliams & Co., Chicago, Ill., under date September, 22, issue a price-current in which a variety of miscellaneous goods, many of which are seasonable articles, are illustrated. Lanterns, Lamps and Parker & Whipple Clocks are also given a prominent place.

Exports.

We give below abstracts from recent manifests showing the exports in Hardware and related lines which have recently been made to Austrialia and South Africa:

PER BARK BRAZIL, SEPTEMBER 13, FOR PORT NATAL, AFRICA.

By Coombs, Crosby & Eddy.—1 dozen Plows, 6 dozen Saws, 8 dozen Edge Tools, 6 dozen Brooms, 10 dozen Edge Tools, 39 dozen Handles, 304 Plows, 320 Plows, 306 sets Plow Parts, 2 dozen Hardware, 50 sets Plow Parts, 1 dozen Wheelbarrows, 6 Trucks, 6 Plows, 3 Scrapers, 12 dozen Brooms, 1 gross Handles, 200 pounds Nails, 8 dozen Handles, 10 Scales, 4 crates Wash-Machinery, 3 Lawn Mowers, 4 sets Axles, 1 case Oil Stoves, 9 dozen Hoes, 9 cases Hardware, 1 gross Rakes, 16 sets of Axles, 4 Scales, 45 dozen Handles, 650 Spokes, 12 dozen Edge Tools, 28 dozen Tools, 4 Carriages, 4 Carriages, 3 dozen Agricultural Implements, 6 Plows, 6 Trucks, 1 dozen Wheelbarrows, 3 Scrapers, 1 gross Handles, 20 dozen Brooms, 250 pounds Nails, 6 Mangles, 8 dozen Handles, 14 dozen Edge Tools, 5 crates Wash-Machinery, 35 dozen Hardware, 3 Lawn Mowers, 6 dozen Hoes, 70 pounds Oil Stoves, 4 dozen Iron Articles, 9 dozen Pitch Forks, 20 dozen Hardware, 4 Scales, 48 dozen Handles, 11 gross Hardware, 2 dozen Forks, 32 dozen Tools, 1 dozen Organs, 6 Orguinettes, 60 dozen Brooms, 20 gross Blacking, 20 dozen Brooms, 288 Handles, 5 dozen Axles, 12 dozen Handles, 500 feet Cord, 6 dozen Washboards, 10 dozen Woodenware, 2 gross Shoe Blacking, 3 dozen Rakes, 1 dozen Sad Irons.

By Marcial & Co.—10 dozen Slates.

By H. W. Peabody & Co.—11 packages Agricultural Implements, 4 crates Woodenware.

By Arkell & Douglas.—1 Organ, 8 dozen Pumps.

By John Norton & Son.—2 cases Brooms, 7 bundles Handles.

By W. H. Crossman & Co.—3 gross Blacking, 1 case Pumps, 1 bundle Pipes, 25 dozen Shovels, 200 Plows.

PER BARK T. L. SWEET, SEPTEMBER 13, FOR BRISBANE, AUSTRALIA.

By H. W. Peabody & Co.—½ dozen Money Drawers, 408 packages of Hardware, 118 packages Carriage Ware, 71 packages Woodenware, 303 packages Ranges and Stoves, 2 dozen Pumps, 280 boxes Nails, 93 Wringers, 6¼ gross Grease, 342 dozen Handles, 250 Sewing Machines, 6 packages Agricultural Implements, 1 case Clocks, 13 dozen Blacking, 3 cases Perambulators, 40 packages Lampware, 56 cases Windmills, 15 cases Hardware, 310 dozen Handles, 10 dozen Shovels, 140 packages Hardware, 31 packages Agricultural Implements, 36 dozen Shovels, 360 dozen Handles, 4 cases Machinery, 30 packages Carriage Ware, 70 cases Edge Tools, 80 dozen Shovels, 24 crates Stoves, 6 packages Agricultural Implements, 50 boxes Woodenware, ¾ dozen Wringers, 240 dozen Crayons, 22 cases Hardware, 100 dozen Handles, 12 dozen Blacking, 1⅜ gross Grease, 221 Packages Hardware, 4 cases Perambulators, 1 case Oilers, 52 packages Lampware, 16 coils Hose, 116 packages Woodenware, 110 dozen Shovels, 19 packages Agricultural Implements, 546 pounds Nails, 11 packages Fire Arms, 469 1-5 dozen Handles, 86 crates Stoves and Ranges, 4 cases Plated Ware, 2 cases Type-Writers, 4 cases Machinery, 1 case Hardware, 3 cases Plated Ware, 19 cases Perambulators, 36 packages Woodenware, 5 cases Axes, 16⅜ gross Grease.

By A. Field & Co.—9 Lamps, 9 cases Machinery, 5⅛ gross Glass Jars, 4 Perambulators, 6 dozen Presses, 6 dozen Dust-Pans, 7 dozen Choppers, 6 dozen Banks and Knives, 1 gross Rat Traps, 15 Lawn Mowers, 35 dozen Lamp Goods, 72 dozen Butts, 2½ dozen Meat Cutters, ½ gross Hat Racks, 11 dozen Burners, 9 gross Shade Rollers, 33 dozen Egg Beaters, 5 gross Rat Traps, 4 dozen Oil Stoves, 5 dozen Lamps, 3 dozen Sewing Machine Goods, 8 bundles Barrows.

By W. H. Crossman & Co.—1 dozen Carriage Tops, 1 dozen Dashers, 3 cases Hardware, 2 cases Harness, 43 sets Wheels, 3 cases Hardware, 20 dozen Axes, 9 cases Hardware.

By Coombs, Crosby & Eddy.—39 Stoves, 6 Wagon Parts, 11 Velocipedes, 8 dozen House-Furnishing Goods, 4 dozen Carpenters' Tools.

By Meriden Brittannia Company.—2065 pounds Plated Ware.

By Winchester Repeating Arms Company.—1450 pounds Empty Paper Cartridge Cases, 21 Guns, 2000 Cartridges, 27 pounds Tools.

By Fairbanks & Co.—5602 pounds Scales.

By D. C. Pratt.—120 dozen School Slates.

By McLean Bros. & Rigg.—18 dozen Axes, 26 dozen Hatchets.

By Rumsey & Co.—1780 pounds Grain Drills.

By Richmond Cedar Works.—1 case Woodware samples, 1 case Broom samples.

THE ALFORD & BERKELE COMPANY,

77 Chambers street, New York, issue a comprehensive 36-page illustrated price list of Guns, Pistols, Ammunition and related goods, of which a large variety is shown. Descriptions and list prices are also given. It is accompanied by the following discount sheet, which is subject to an additional discount of 2 per cent. for cash in 10 days:

Trade.

From Louisville our advices under date September 22 are to the following effect:

The Hardware trade of Louisville, Ky., is subject just now to one great disturbing factor. The yellow fever scourge has almost brought business to a standstill in certain sections of several states. Various reports are made by the different dealers, depending on just what trade they reach for, some saying that trade is good, and others giving instances of large orders being canceled. Many customers who were enjoying the festivities of the city were suddenly called home to prevent being kept out by quarantines. Except for this great calamity trade is excellent, and the larger jobbers, who are already behind in filling orders, are adding to their forces of traveling men. Bar Iron is in good demand from the mills, which ought to put them in fair shape. As a fact, they have no reason to complain, as they get all material at very low prices. Cut Nails are quiet, the pool not having materialized as yet, but more firmness is maintained. Wire Nails pursue the even tenor of their way, not being disturbed, but firmly held at full prices. Some jobbers simply to hold certain trade are selling at below mills' prices; this will soon be evened up. Barbed Wire is now considered good property at last low figures, the dealers expecting another advance because the mills say so, but not seeing why there should be at the end of the season, and all the mills running. The demand from store is good.

Principles Applied to the Protection of Trade-Marks.

We reported in a late issue the case of the Russia Cement Company against William N. LePage, in which it was decided that "LePage's Liquid Glue" passed under an assignment which Mr. LePage (as a member of a copartnership) made in 1882 to the Russia Cement Company of the right to use the trade-marks belonging to or in use by said copartnership at that time. The defendant contended that "LePage," being his own name, was not a trade mark, and that in fact he had never assigned his name. He claimed that the name was only a subordinate part of the trade-mark labels attached to the goods, and since these labels had not been in the least imitated, he had a right to use the descriptive phrase "LePage's Liquid Glue," which, in fact it was, to describe his goods. The court said no; but in order that it might not be misunderstood, it added: "While the plaintiff has not sought to prevent the defendant from manufacturing Glue, in order to avoid misunderstanding we add that while the defendant cannot use the words adopted as a trade-name for the article manufactured by him, we do not decide that he may not use the words "Liquid Glue," or other appropriate words to describe his product, or to state in that connection that he is himself the manufacturer of it."

The corporation with which Mr. LePage is connected, and which had done business as the "LePage's Liquid Glue and Cement Company," at once changed its name to "The LePage Glue and Cement Company," and changed its labels to read "W. N. LePage's Improved Process Family Glue," because Mr. LePage had obtained a patent for an improved process of making the Glue. They thought that if Mr. LePage could say that he was the manufacturer he could as well say, "Wm. N. LePage's" as "manufactured by Wm. N. LePage." Both phrases certainly indicate that the Glue is Wm. N. LePage's Glue. The Russia Cement Company objected, however, to the change and brought suit against the company (which was brought to trial September 21, at Boston), saying that the company was bound by the former decision against LePage, and that he was not entitled to use this particular collocation of words, viz., William N. LePage's Family Glue.

The court in this last suit said that the defendant could say Liquid Glue manufactured by William N. LePage, or Liquid Glue manufactured by the company, but that they could not say William N. LePage's Liquid Glue.

This decision is of great importance to manufacturers who use their own names in the possessive case. It was not formerly thought that such names were good trade marks—*e. g.*, it was said by Judge Gray, now of the Supreme Court of the United States, while a Massachusetts judge (Gilman *vs.* Hunnewell, 122 Mass.), that "Hunnewell's Pills" was not a trade-

mark. In many other cases the same idea has been expressed. The same court now seems to have changed its position. The labels of these rival manufacturers of Glue have been shown in their advertisements in this paper and merit comparison. No damages were asked against the LePage Glue and Cement Company, and none were awarded. The company has appealed, and the decision of the highest court of the State will be awaited with much interest.

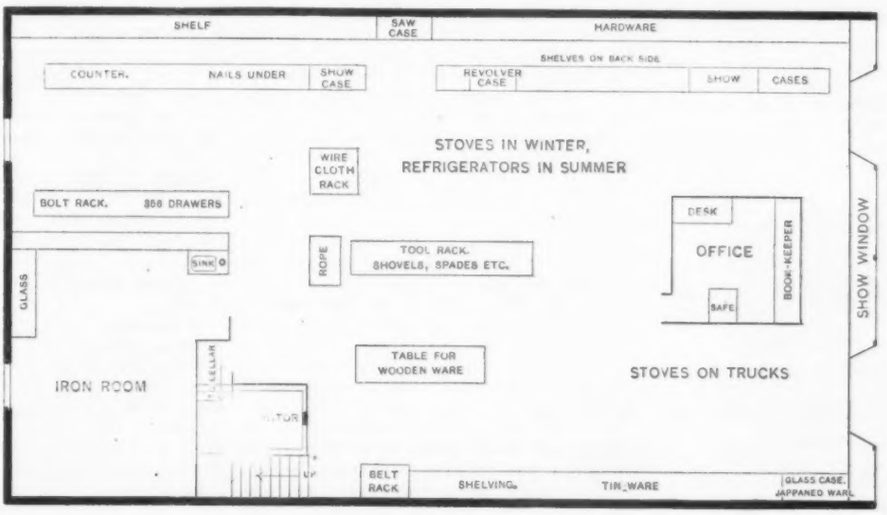

Fig. 270.—Store of Stebbins & Co., Rochester, Minn.

Arrangement of Stores.

Stebbins & Co., Rochester, Minn., furnish us with material for a description of their store, the general arrangement of which is shown in Fig. 270. The office

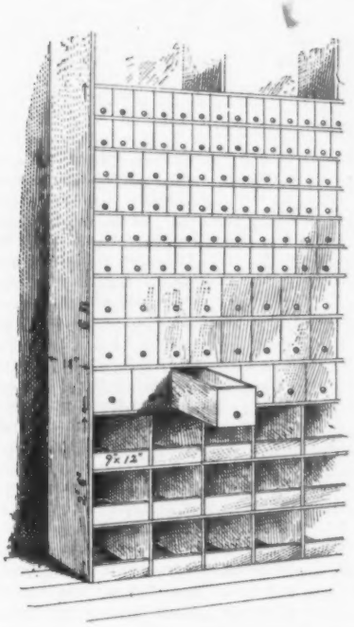

Fig. 271.—Bolt Rack.

occupies, it will be seen, a prominent position in the front of the store, and is referred to as giving a view of the customers as they enter and of what is going on in the store. It is enclosed as high as the standing desk, with a wire railing on top. The elevator is boxed in and is so located that comparatively little space is occupied by it, the stairs going round it, as indicated. Their Bolt rack, Fig. 271, is alluded to as one of the best. There are drawers for 356 sizes of Bolts, with Seat Springs are accommodated, with Barn-Door Hangers underneath. Their Tool rack, Fig. 272, is stationary, with a shelf high enough to stand Shovels, Spades and D-Handled Forks under and Long-Handled Forks and Shovels on the shelf. This rack is built permanently between two posts in the middle of the store and is very satisfactory. It is about 10 feet long. Both sides are utilized. Five dozen Stove Trucks are used in displaying Stoves, so that each Stove has a truck, permitting it to be moved where it will show to the best advantage. Bird Cages, Sleigh Bells, Coal Hods and numerous other bulky articles are hung on rods suspended from the ceiling. Fig. 273 shows the shelving devoted to Wire Cloth. It is a movable rack of shelves 3½ feet long and 6 feet high, the shelves being far enough apart to admit a roll of Cloth. Next to this, Fig. 274, they have another movable rack of shelves of pigeon-holes for Axe and

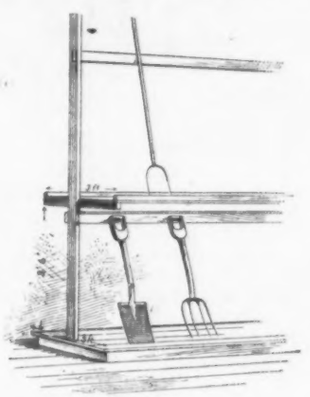

Fig. 272.—Shovel and Fork Rack.

Pick Handles, Hay Knives and Whiffletrees, both ironed and in the rough. Their method of accommodating Belting is shown in Fig. 275. This rack is the same hight as the shelving, and stands out from the wall, as shown in the cut, with iron braces by which it is steadied. This rack accommodates three tiers of Belting. Each roll of Belting has a frame made of 1-inch stuff, with a maple roller with an iron pin through it for the Belt to turn on. One of these frames, it will be observed, is shown separate from the rack. These frames fit in the rack, which is made of 2-inch stuff, and are fastened in by hinged strips across the top and bottom of each section. In the basement Nails, Horseshoes, Barbed Wire, Oils, &c., are stored. The tin shop is on the second floor, and runs across the rear. The balance of the second story is used for storage. The arrangements for supplying the building with water, and the methods adopted for

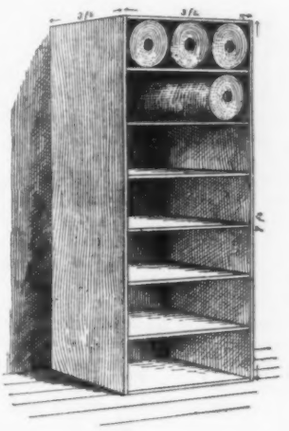

Fig. 273.—Wire Cloth Rack.

keeping it, are also deserving of mention. There is a cistern with force pump and sink behind the door in the Ironroom, and by this water is forced into the tin shop for the sink there. There is also a warehouse 24 x 60 feet for Wagon Stock, and 150 feet of open sheds for Hardwood Lumber, thus giving, it will be observed, together with the Ironroom in the rear of the main store, a complete and convenient arrangement for the business of this enterprising house. A large coal stove is used in the store in cold weather, the tin shop being heated with a furnace in the rear of basement, connected with which is a register in the store, which is sufficient for fall and spring requirements. The smoke-pipe from the furnace runs the whole length of the basement, and is jacketed, with a register from the jacket into the office. Thus, with the furnace, it is pointed out, the shop, basement and office are heated, while it is of use also in

heating the store when necessary. The Oils are kept near the furnace, and thus run freely all winter. The further advantage of this arrangement is that their tinners have no fire to build or look after, no wash water to carry, and no excuse for not attending to business.

The Art of Selling Goods.

By KNARF.

Why we are in the habit of treating persons we are brought in contact with so differently from the treatment we would like to receive ourselves, or the treatment we know would be the most persuasive with us, is an unknown quantity. We say things to them which we expect will produce the results we desire, to make them think as we wish them to

Fig. 274.—Rack for Axe and Pick Handles, Hay Knives, &c.

and see things as we wish them to be seen by them. We know the same things said to us would have an opposite effect, even to making us angry. To deal with people successfully we must be a judge of human nature, and the better judge we are the more successful will we be in our dealings.

Selling goods is a faculty, whether natural or acquired. Some people are good salesmen, others never can be. To dicker is natural to some nations as nations. Yankees have the reputation of being the keenest dealers we have. Get acquainted with your customers and then you will know how to take them. The early drummers were, as a rule, the more successful according to the stock and raciness of their stories, but with the increase of the species, frequency of their visits, rush and competition of business, this accomplishment has fallen into disuse; it does not produce the required results. After a thorough acquaintance with the peculiarities of the person you have to deal with, a knowledge of the goods is indispensable. Their uses, strength and desirable qualities, the purposes for which they are used, can be explained, especially if there is any hesitation on the part of the buyer. The customer will be interested in the purchase very much in proportion as the salesman is. To lay down the article called for on the counter for the customer to examine and employ yourself looking out of the door and whistling will invariably lose you the sale. It will not do, however, to go to the other extreme and be too officious, telling the customers you know it is what they want when they are of the opinion it will not suit. Very few people will stand this.

While it is not well to confuse them by showing too great a variety of the same article, a disposition to sell them what they will afterward consider the best value for their money will be apt to make them buy of you again. An article which suits them after they get home and answers the purpose required, leaves in their mind a favorable impression of the stock and place of business. Never be so smart as to get ahead of your customer; you will be the loser in the end. It is as a rule better to make a concession than to lose a customer, and to do it in a pleasant manner. There are chronic kickers whom no one can please. While retaining a customer, it is well always to have in mind that you, the salesman, are on the inside of the counter and the one you are dealing with on the other side; that you have the advantage of knowing the cost of the article and the regular selling price. Also that the customer has come in unsolicited to buy, and expects to pay your price if it can be bought for no less.

Confidence in your mode of doing business is created in the purchaser's mind if he realizes you are firm in your price and believe the article is worth what you ask for it. Don't lose your grip and be afraid to ask what you consider a fair price for the goods—it is demoralizing. A firm, courteous refusal to cut the price will seldom lose you a sale. Telling a customer the cost of an article does not often help the matter, as there is always a doubt in his mind as to the truth of your statement. Competition is so great that many resort to selling goods almost at cost to close customers, intending to make the profits from those who are not so well posted or so close in their dealings. In fact, honest, equitable dealing between salesman and purchaser is

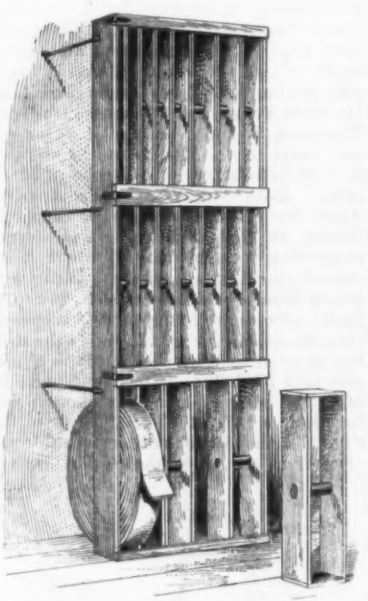

Fig. 275.—Belting Rack.

becoming rare, however much the fact is to be regretted. Short weights or measure, deception in quality or direct falsehood, are too often the rule. While such dealing usually insures short life to the firm practicing it, for the time being it is an injury to the trade.

When unemployed the position of the salesman should be on his feet and near the door. A customer does not like to walk the length of the store to hunt for a salesman—we use the word hunt advisedly—nor should he be expected to. Being near the entrance, your visitor can be taken by the hand, with some commonplace remark about weather, or self or family, and as soon as you see he is ready for business make it easy for him by inquiring what you can show or sell. An abrupt "What will you have," as soon as you have set eyes on each other, is not pleasant for your customer; it usually comes in anything but a pleasant tone of voice when shot at him in this way Now that you have him at your mercy exercise your judgment, and treat him as his disposition requires. After you have sold what he asked for do not let him leave the store without the stereotyped question "Will that be all?" In most cases it will recall something he has forgotten, and thus increase the sales. That is what you are there for, do not forget that. Use all legitimate means to sell each one all you can. When he leaves the store, send him away with a "Thank you," "call again," or some benediction. He must not entertain the feeling you care only for what you have got out of him. Have him carry a good impression away, that, coupled with the pleasant reception and fair dealing, will tend to make that store a popular place to trade, not only for him but his friends. This idea of friends of well-treated and satisfied customers extends to a greater distance than we are apt to think.

It is a poor plan to begin waiting on one customer and leaving him to wait on another. The temptation may be great to hold both when help is short, but it is unsatisfactory to the two customers and yourself. If a party comes in merely to price goods or get information, take time to chat when the desired information has been given; he will find you pleasant and favor you with his trade when he needs anything in your line.

It is poor economy to have a poorly lighted store, or a cold one in winter. Try and have it warm, even in front by the door—it will cause customers to linger. We don't mean loaf, for you haven't any room for loafers. But a warm room is conducive to trade, and a cold, uncomfortable one is not. There are certain people whom you dislike, and one is apt to show it, unconsciously it may be, in your dealings with them. Particular care should be taken to be especially polite and courteous, and thus any dislike may be covered. Their dollars are as good as any one's.

Care must be taken to have the goods clean, and shown in an attractive, orderly manner. A show-window full of dead flies, goods piled in indiscriminately, Fly-Traps and Foot-Warmers, Tin Fruit Cans and Stove Boards, does not show attention to business. A show-case arranged in much the same manner does not show the goods. A stock kept up in assortment will fill the wants of your trade much better than a broken stock, or than the same amount of money put largely in a few articles. If people come to your place of business frequently and find you out of goods you are supposed to keep, they receive the impression that your stock is run down or incomplete and will trade elsewhere. These few hints will awaken in the mind of the reader other improvements in method of conducting his business which will be helpful, or at least these suggestions can be adapted to his local needs.

The *Master Mechanic* in a recent issue very appropriately says: "While there is a general call for a class of engineers who will control their engines by means of the reverse lever, is it not well to ask why some one does not call in a still louder voice for a class of locomotive builders who will put more notches in the quadrants? It is safe to say that, while locomotives have only one-third of the notches in the quadrant that it is possible to easily put there, engineers will use the throttle as a governor, if for no other reason than that they are more or less compelled to do so if the regulation is to be at all even. It is difficult to make an intelligent engineer comprehend the importance of following a method which is allowed to appear to be unworthy of the small outlay for a few notches

Improvement in Locks.

The Nashua Lock Co., Nashua, N. H., of whom C. F. Guyon & Co., 99 Reade street, New York, are agents, are calling attention to improvements which they have recently made in their line of locks. Among these they refer to the Nashua N. system of attaching spindles or knobs for use with roses only, or rose escutcheon combined; Nashua new steel swivel spindles, and reversible spindle hubs; reversible anti-friction latch, and K system of night work adjustment. We illustrate below two of these specialties. In addition to the customary methods of attaching knobs to spindles the company have perfected and applied for a patent on a plan of their own, which they designate as the N system. In this system the knobs are made with longer shanks than usual and are $1\frac{1}{16}$-inch diameter, so as to go through the rose or rose and escutcheon combined, and rest on each side of the lock case. One knob being riveted to the spindle is intended to be used on the outside of the door. The other knob is fastened by a screw which goes through one side of the shank and through the spindle and is secured firmly by a thread cut in the other side of the shank. The N system is illustrated in the accompanying cut, Fig. 1. The N system of knobs for inside doors have $\frac{5}{16}$-inch straight spindles, while those designed for outside doors have $\frac{5}{16}$-inch swivel spindles, which are described as made so that they will work equally well in a solid hub. Among the advantages claimed for the N system are the following: That pulling on the knob made in this way has no tendency to separate or open the lock; that as one knob is always riveted to the spindle, such knob can always be on the outside and would preclude its being taken off and possibly the lock opened; that the N knobs can be kept in place without the least dependence on the roses, thus lessening the friction between knobs, shanks and roses, and enabling one to use roses only with equal advantage as rose and escutcheon combined, and that as the knob screws go entirely through one side of the shank and into the opposite side of the shank they will under no circumstances work loose.

Fig. 2 represents the new steel swivel spindle, $\frac{5}{16}$ inch, with reversible hub, which the company offer as an important improvement in front-door locks. The pin is to prevent any clandestine opening of the door from the outside by pushing the spindle through the hub after removing the knob, as is liable to be done with the old-fashioned swivel spindle knobs. It is also to be noticed that locks supplied with this patent swivel-spindle hub are made reversible by turning over the latch bolt and both parts of the hub, and, the hub being made to fit $\frac{5}{16}$-inch spindles, enables the dealer to trim to suit his customers with any size of knobs he carries in stock. This is regarded as a feature of considerable importance, tending as it does to make an ordinary stock of locks and knobs more than usually available. Any of the company's knobs can be furnished with this new spindle.

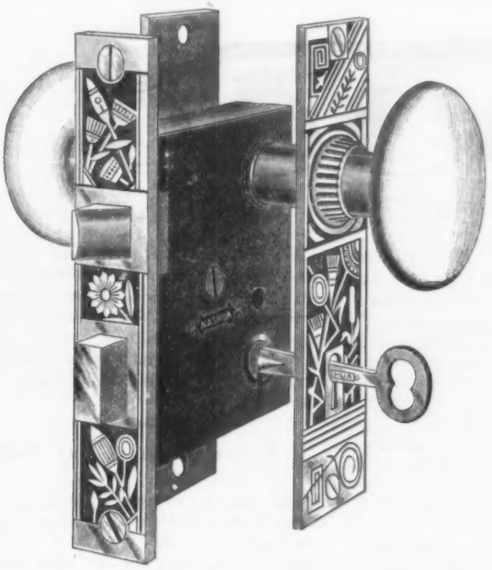

Fig. 1.—Nashua N. System of Knobs.

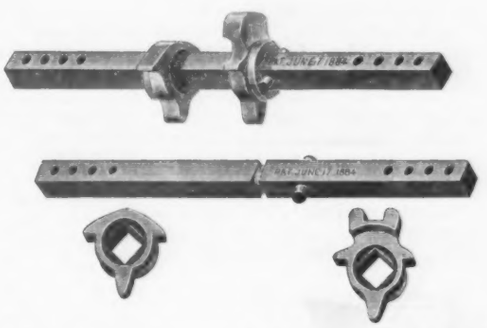

Fig. 2.—Steel Swivel Spindle 5-16 Inch, with Reversible Hub.

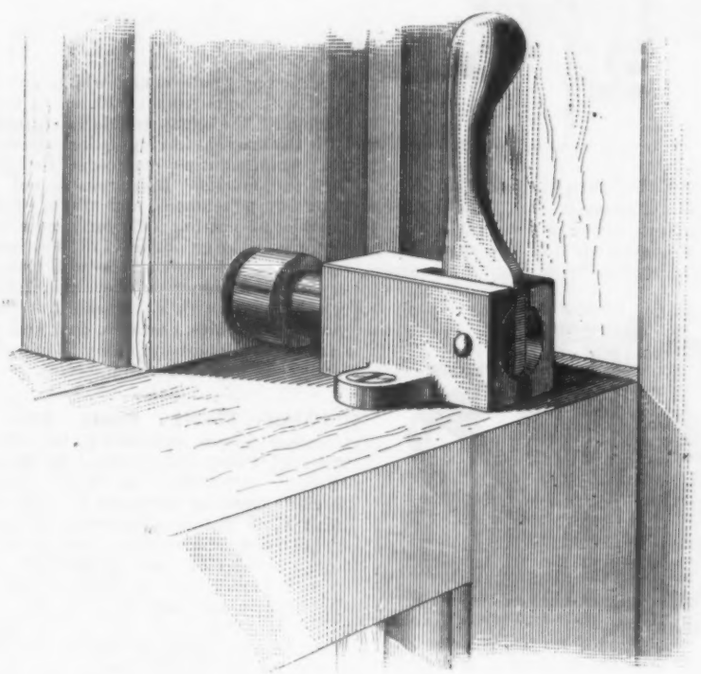
Post's Window Fastener.

The accompanying illustration represents a simple and efficient device which has been patented by A. J. Post, of E. L. Post & Co., 10 Peck Slip, New York, by whom it is manufactured and put on the market. It is represented in the cut as attached to the top of the lower sash, and its use will be understood as fastening the sashes and preventing them from rattling. The fastener consists of a bolt with a rubber end, such bolt being operated by a lever attached to a cam, thus giving the desired pressure with comparatively little power, easily applied. This simple device is so efficient in operation that it is described by the manufacturers as fastening windows securely so that they cannot be moved without releasing the pressure of the bolt. The rubber end is screwed on instead of being one solid piece, making the fastener adjustable, so that the bolt can be lengthened by slightly unscrewing the rubber end. This fastener is made in bronze, nickle-plate and brass. Its simplicity, efficiency of operation, durability, strength and neatness of appearance, as well as the ease with which it is applied, are the points which are made in regard to it. The low price at which it can be offered is also referred to.

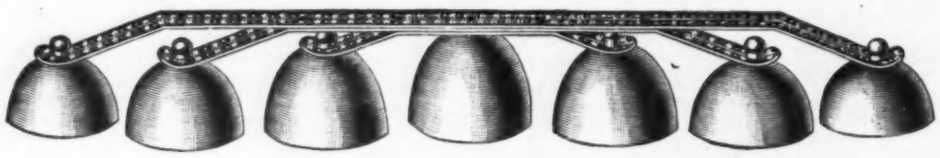


Post's Window Fastener.

A large iron reservoir is to go up in Malden, Mass. The city has made a contract with the Cunningham Iron Works Company, of Boston, for the sum of $20,940, to build a wrought-iron reservoir to contain 1,158,000 gallons of water. It will be 75 feet in diameter and 35 feet high, and built of plate iron $\frac{3}{4}$ inch in thickness and of a tensile strain of 50,000 pounds per square inch of section. This reservoir will contain 4344 tons of water when full, and is the largest iron reservoir on this continent.

Musical Pole Chime.

The illustration given below represents one of the new styles of Swiss Tuned Pole Chimes put on the market by the Chapman Mfg. Company, Meriden, Conn. It will be observed that the chime is so arranged that the bells are free from the shaft or pole, giving them a chance to retain the vibration. The cut represents a chime of seven bells, but the chimes are made with three or four bells for a single horse on the same principle. The chimes are described as finished in nickel, gold, silver or brass plated, and attuned to the chord of E, and as having a melodious and resonant sound which is very pleasing.



Swiss Tuned Pole Chime.

The Crown Meat Cutter.

The illustrations given below represent a new meat cutter, which is being put on the market by the American Machine Company, Philadelphia, Pa., for whom John H. Graham & Co., 113 Chambers street, New York, are agents. Fig. 1 gives a general view of the machine in position for use, while Fig. 2 represents the parts of which the machine consists. From these illustrations it will be seen that the machine is attached to the table or other fixture by means of clamps, and that the essential parts of the machine are the hopper frame with feeder, the cutting screw, the cone and the crank.

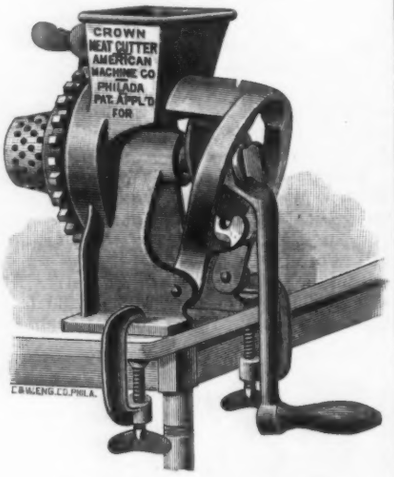


Fig. 1.—The Crown Meat Cutter.

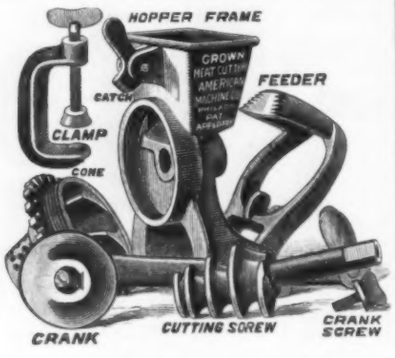

Fig. 2.—Parts of the Crown Meat Cutter.

An interesting feature of this machine is the feeder and the manner in which it operates, it being so constructed that the turning of the crank by means of the eccentric shown moves the feeder in and out, thus forcing into the cutting screw such meat or other substance as is to be operated upon by the machine. The form and construction of the cone are also specially alluded to as embodying new features, in connection with which there are important advantages. The following instructions for operating the machine will further indicate its special features.

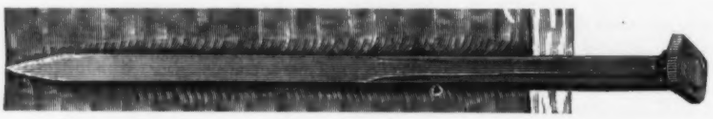
For operation, fasten frame firmly to the table; see that the cone is screwed moderately tight upon the cutting screw, then drop catch in notch to hold it there; the cam part of the crank must lay in the notch of the feeder, and the thumbscrew holds crank in its place on the screw shaft. Drop pieces to be cut, one after the other, in the hopper, and by the turning of the crank these will be pushed forward by the feeder, so that the heel of the screw will catch and force them forward in the cone, where they will be cut between the sharp edges of the revolving screw and those of the stationary oblique knives in the cone (as between the blades of a pair of scissors) and finally be reduced to a uniform size by a further cutting in passing through the holes at the end of the cone.

The manufacturers point out that the work of cutting is thus advantageously divided, and all the unnecessary friction and waste of power avoided. The desired degree of fineness is obtained by the use of different grade cones, which are supplied with holes from $\frac{1}{4}$-inch up to $\frac{5}{8}$-inch diameter, the cone regularly furnished with the machine having $\frac{3}{16}$-inch diameter. The manufacturers emphasize the point that the machine thus constructed has important advantages, and allude to it as capable of cutting efficiently and satisfactorily a large variety of substances, some of which cannot be as well managed in other machines. They state that it can be used with equal ease for fruits, meats, vegetables, crackers, &c., and refer to its strength and simplicity as important features in its construction.

China's Foreign Trade.—Some interesting figures concerning the foreign trade of China are supplied by Minister Denby. According to these, Chinese foreign commerce increased in value during 1887 to the very important extent of $28,000,000, the customs revenue showing an increase of nearly $6,500,000. The exports were greater by $10,400,000 and the imports increased $17,740,215. The decrease of trade with the United States is noteworthy, although we are not alone in this respect, for Mr. Denby says that at the 19 treaty ports the imports of English and American drills fell off from 416,699 pieces and 620,803 pieces, respectively, in 1886, to 288,511 pieces and 464,731 pieces, respectively, in 1887. The value of the imports from the United States in 1886 was 4,647,333 taels and in 1887 3,398,390 taels, a decrease of over 1,000,000 taels, or more than $5,000,000. This is accounted for to some extent also by the decrease in the imports of petroleum. The exports to the United States were valued in 1886 at 11,928,404 taels and in 1887 at 11,545,406 taels. The total trade with the United States was 14,677,487 taels in 1886 and 12,314,310 taels in 1887. Thus it will be seen that our exports to China are falling off, while our imports from that country remain substantially unchanged. The balance of trade last year was slightly in our favor—about $1,000,000—but the anti-Chinese agitation in this country may serve to prejudice the Chinese against buying our products, and as a result we may be deprived of a market in which for a number of years we have been making very fair headway.

A New Form of Cut Nail.

The accompanying illustration represents a new steel cut nail, of which at present the Calumet Iron and Steel Company, of Chicago, are the sole manufacturers. Its sides are parallel, it has a chisel point, and it is cut so light as to run about the same number to the pound as the wire nail. The manufacturers claim a number of advantages for this new form of nail over both the old style of cut nail and the wire nail. The old-style cut nail with a blunt point necessarily break the fiber of the wood into which it is driven, while the parallel chisel-pointed nail cuts, separates and deflects the fiber slightly downward compactly on the side of the nail, thus causing the wood to fit tightly about it, and excluding moisture to rot the wood, and in time loosen the nail. Being also rough, and of uniform width throughout its length, instead of smooth and wedge-shaped like the old style of cut nail, it naturally has greater holding power. Actual tests are reported by the manufacturers as showing 30 to 75 per cent. more holding power than the old cut nail, and 50 to 100 per cent. more than the wire nail, according to the character of the wood. The new nails are also claimed to drive in hard wood without bending, where the wire nail cannot be used without first boring holes. Being of about the same weight as wire nails, they commend themselves to those who desire light, strong nails at a lower price. They are sold at a slight advance above the price of the ordinary steel cut nail and are branded "P. C. P."



The "P. C. P." Nail.

An alloy, the electrical resistance of which diminishes with increase of temperature, has recently been discovered by Mr. Edward Weston. It is composed of copper, manganese and nickel. Another alloy due to the same investigator, the resistance of which is practically independent of the temperature, consists of 70 parts of copper combined with 30 of ferromanganese.

CURRENT HARDWARE PRICES.

SEPTEMBER 26, 1888.

Note.—The quotations given below represent the Current Hardware Prices which prevail in the market at large. They are not given as manufacturers' prices, and manufacturers should not be held responsible for them. In cases where goods are quoted at lower figures than the manufacturers name, it is not stated that the manufacturers are selling at the prices quoted, but simply that the goods are being sold, perhaps by the manufacturers, perhaps by the jobbers at the figures named.

BARB WIRE COMPANY,
SUCCESSORS TO
THORN WIRE HEDGE CO.

ONLY SAFE BARB WIRE FOR HORSES.

A YIELDING BARB ROD to the POUND.

Sold only to One Dealer in a Place.

The great advantage of this style of barb is, that when an animal is pricked the barb will turn just enough to let him off without *tearing out the flesh.* It costs but little more per rod than the *hide-ripping wire usually sold. The Paint is warranted* to be as durable as galvanizing.

Country Merchants will find it to their advantage in securing the agency on a class of goods that is in demand and that has no competitor of its kind. We also make both *Two* and *Four-Point Wire Barbs.*

A MAN OF SAMPLES.
Something About the Men he Met "On The Road."
BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.
Sent postpaid, on receipt of the price, 75 cents, by
DAVID WILLIAMS,
66 and 68 Duane Street, New York.

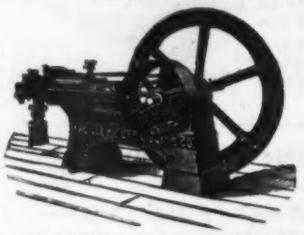
THE CLERK GAS ENGINE.

Highest Award for Gas Engines at American Institute Fair, New York, 1883.



Makes an ignition at every revolution of the Fly Wheel. Is started with ease, and gives full power immediately. No danger from fire; no extra insurance nor skilled engineer required. Runs perfectly steady; only uses gas when required. Workmanship of the best description and guaranteed. Indicated power considerably larger than in any other Gas Engine of the same size, each Engine giving from 1 H.-P. to 4 H.-P. more than named. Is unsurpassed by any other Gas Engine for running any kind of machinery or electric light, arc or incandescent. Has means for regulating to suit any coal or water gas.

No Boiler, Coal, Ashes or Engineer. Made in Sizes of 4, 8, 10, 15 and 25 H.-P.

THE CLERK GAS ENGINE CO., 1012-1016 Filbert St., Philadelphia.

MANUFACTURED BY

W. P. DUNCAN & CO.

BELLEFONTE, PA.

HIGH-SPEED POWER TRAVELING CRANES.

We are now prepared to build **High-Speed Power Traveling Cranes** for any capacity of load, any length of runway and any width of span, with one or with two trolleys on the bridge, these trolleys to work either slow or fast, together or independently, in like or in opposite directions, horizontally or vertically, while the bridge can be traversing slow or fast at the same time in either direction. The speeds of bridge on runway are 100 *feet and* 200 *feet per minute;* the speeds of trolleys on bridge are 50 *feet and* 100 *feet per minute;* and there are four hoisting speeds of 5, 10, 20 *and* 40 *feet per minute;* all can be varied quickly without the least shock or jar from zero to maximum or to any intermediate speed. *The load is always automatically sustained, thus avoiding absolutely the great danger and anxiety which are inseparable from the use of those cranes which require the operator to apply the brake.* We have had one of these Cranes of 26 tons capacity in constant use in our foundry for nearly two years, and we offer them with full confidence for the greatest range of service. We invite the correspondence of parties interested in the subject. WM. SELLERS & CO., Incorporated,

July, 1887. Philadelphia, Pa.

PATENT PORTABLE

ROPE HOIST.

ONE MAN SUFFICIENT.

The Best Quick Lift Hoist Made.

WILL HOLD A LOAD AT ANY POINT.

Ropes weigh less than chain. Can be used for long or short lifts. Without touching hand rope, the load may be quickly lowered by a slight steady pull on brake cord. Load rope can be pulled up or down by hand instead of pulling on hand rope to raise or lower empty hook. Send for descriptive circulars of specialties.

BELDEN'S

Upright Power Hammer.

This Hammer possesses advantages superior to any other in the market. It has neither cylinders, valves nor piston rods, consequently repairs are trifling. It takes up less space, less power to drive, strikes much harder and truer blows than hammers with double the weight of ram.

It can be worked to strike good alternate blows on a ¾-inch and ⅝-inch bar, and a 1500 pound hammer is used and does better work to a far greater advantage than any other hammer known. Manufactured by the

Sent, postpaid, on receipt of price, by DAVID WILLIAMS, Publisher and Bookseller, 66 & 68 Duane Street New York.

CAUTION.

We desire to call your attention to the fact that the great reputation and popularity of our Machines have induced a concern to attempt an exact imitation thereof; also, issuing a fac-simile copy of our late catalogue. We find they have bought a full line of our Champion Lever Blowers, Champion Lever Forges and Eureka Tire Benders, taken them apart and used them as patterns, regardless of our "Patents." We simply wish to make the above facts known and warn all trespassers on our rights of our intention to prosecute.

IRON ORE PROPERTY.

For Sale or Lease, situate within three miles of the C. & O. Ry., at White Sulphur Springs, W. Va., about 3000 Acres, under and near surface by a persistent seam of red oxide iron ore from 10 to 60 feet in thickness. Numerous analyses show

61 per cent. Metallic Iron.
.07 per cent. Phos.
.05 per cent Sulphur.

Six miles of outcrop have been proved by a number of openings. The helderberg limestones, more than 300 feet thick, are exposed at many points, and the hills containing the New River coking coals are within sight. There are good sites for furnace plants in the immediate vicinity, and ample water for all purposes. For further particulars, apply to

GENL. JOSEPH R. ANDERSON,
Pres. Tredegar Co., Richmond, Va.
or
WM. N. PAGE, C. and M. E.,
Powelton, W. Va.

FOR SALE.—A good, clean stock of HEAVY AND SHELF HARDWARE, Stoves, Tinners' Stock, Tools, &c., in one of the best towns in Iowa; 2500 inhabitants. Three railroads; seat of division of one. Business established 20 years; best corner location in town. Store, 22 x 85, two stories. Warehouse, 22 x 30, two stories in rear. Does a large and paying business, which is increasing; fine point for jobbing. Stock will invoice from $10,000 to $12,000. No trade.

Address

W. L. HAY & SON,
Iowa Falls, Iowa.

To Stockholders of the Sutro Tunnel Company who have not assented to the Plans of Reorganization:

A guarantee syndicate having been formed, stock-holders who have not assented heretofore to the plans of reorganization, but wish to protect their stock from being rendered valueless through foreclosure, must forthwith deposit their shares with the Union Trust Company, No. 73 Broadway, New York, pay the sum of 55 cents per share, and receive therefor the Trust Company's negotiable receipts, which will entitle the holder, after completion of the reorganization, to the same number of shares of stock as now deposited by him, and new first mortgage income 4 per cent. bonds in the proportion of $1.00 for each 55 cents cash now paid.

The time for depositing stock and payment of subscriptions expires on July 11, 1888, 3 P. M.

Payments should be made by check on New York to the Union Trust Company, and should be accompanied by the stock duly endorsed in blank, and an authorization to the Union Trust Company; blank forms for this authorization and copies of circulars can be obtained upon application at the Union Trust Co.'s office, or at Room 19, 7th floor, Mills Building. Interest at the rate of 4% will be allowed on subscriptions from the date of payment.

For the Reorganization Committee,

H. R. BALTZER, Chairman,

NEW YORK, June 21, 1888.

PROPOSALS FOR STEEL FOR USE IN THE CONSTRUCTION OF THE UNITED STATES ARMORED BATTLE-SHIP "TEXAS," AT THE NAVY YARD, PORTSMOUTH, VIRGINIA.—NAVY DEPARTMENT, Washington, D. C., June 21, 1888. Under authority conferred by an act of Congress entitled "An act to increase the naval establishment," approved August 3 1886, (24 Statutes at Large, page 215,) sealed proposals are hereby invited, and will be received at this Department until 12 o'clock noon, on Monday, the 3d day of July, 1888, for furnishing the following classes of material for use in the construction of said ship: CLASS A.—*Steel plates.*—About nine hundred and twenty (920) tons of steel plates from 2½ to 25 pounds per square foot. CLASS B.—*Steel shapes.*—About five hundred and three (503) tons of steel shapes, as follows: About two hundred and seventy (270) tons of angle-bars of various sizes; about one hundred and thirty-two (132) tons of angle and T bulb beams with proper curvature, from 11 to 24½ pounds per lineal foot; about ten (10) tons of T-bars, of 8 pounds per lineal foot; about ninety one (91) tons of channel-bars, of 10, 15 and 25 pounds per lineal foot. CLASS C.—*Steel rivets.*—About one hundred (100) tons steel rivets, from ⅝ inch to 1¼ inch diameter. CLASS D.—*Steel castings.*—About one hundred and twenty (120) tons of steel castings, of various shapes, including stem, stern post, hawse-pipes, riding and mooring bitts, chain-pipes etc. The tons of material herein called for to be of 2,240 pounds each. All said material to be of such detailed dimensions, weights and shapes as may be required in the construction of the vessel, and to be delivered at such place or places in the Navy Yard, Portsmouth, Virginia, as may be designated by the Commandant of said Yard. Deliveries to commence within thirty (30) days from the date of contract, and to be completed within six (6) months from such date: the material to be delivered promptly, in accordance with a detailed schedule prepared by the Assistant Naval Constructor at said Navy Yard, and in the order required to carry on the work to the best interests of the Government. All material to be of domestic manufacture, and to be accepted only after passing such tests as may be prescribed therefor by the Secretary of the Navy. Proposals must be in accordance with forms which will be furnished on application to the Bureau of Construction and Repair, and may be for one or more of the classes designated, but no bid for a portion of any class will be considered. Each proposal must be accompanied by satisfactory evidence that the bidder is able to furnish and deliver the material for which he bids. Each proposal must be accompanied by a certified check, payable to the order of the Secretary of the Navy, for an amount equal to five per cent. of the bid. The check received from the successful bidder will be returned to him on his entering into a formal contract for the due performance of the work, and giving bond for the same with satisfactory surety, in a penal sum equal to twenty-five per cent. of the amount of his bid; but in case he shall fail to enter into such contract and to give such bond within twenty days after notice of the acceptance of his proposal, the check accompanying such proposal shall become the property of the United States. All checks accompanying proposals which are not accepted will be returned immediately after the award shall have been made. Information relative to the dimensions and shapes of material, and all other information essential to bidders, will be furnished on personal application to the Bureau of Construction and Repair, Navy Department. Proposals must be made in duplicate, and enclosed in envelopes marked "Proposals for Steel for the Armored Battle-ship 'Texas,'" and addressed to the Secretary of the Navy, Navy Department Washington, D. C. Each class of materials will be bid for separately, and the Secretary of the Navy reserves the right to reject any or all bids, or the bids on any class or classes, as, in his judgment, the interests of the Government may require.

D. B. HARMONY, *Acting Secretary of the Navy.*

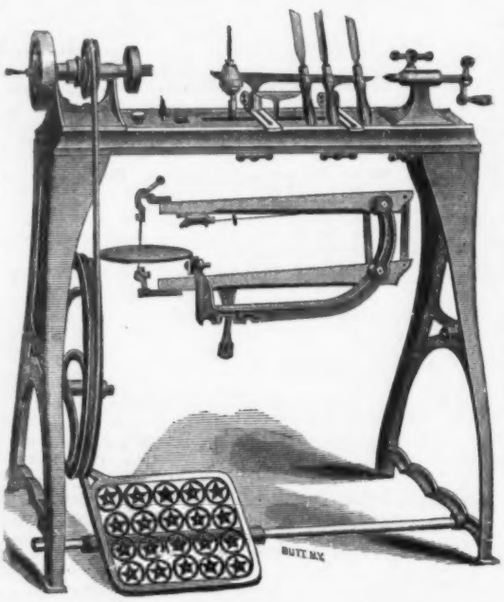
GOODELL LATHE.



Many kinds of Scroll Saws have been put on the market by ourselves and other manufacturers during the past twelve years. Of these only a few have proved good enough to remain in demand. The call now is for a well-made, practical machine, and all second-class ones are of slow sale.

Those who want a good Lathe with Scroll-Sawing Attachment and all Tools and Improvements to the very latest moment will buy the Goodell Lathe.

Those who want only a Scroll Saw with Drilling Attachment, Rubber Blower and Lever Clamp will prefer the Rogers Saw.

These two machines are taking the place of all others, and are now the most in demand throughout the world.

No dealer can make a mistake by laying in a stock of them. About Christmas time they are wanted in every town, and will make business lively at this otherwise dull season.

We also keep a full stock of Designs, Wood, and all other Scroll Sawing goods.

Price of Goodell Lathe, complete, $12.00.

Price of Rogers Saw, complete, $3.50.

MILLERS FALLS CO.,

HARDWARE, TOOLS, &c.,

89 to 95 So. CLINTON ST., CHICAGO.

WE illustrate a few of the later patterns of Knobs made by us. We have full lines of hardware in many of these patterns and can always furnish designs which will harmonize with them. We call special attention to our Patent Screwless Spindle, which ensures better adjustment and more secure attachment of knob to spindle than any device yet invented. We shall be glad to submit tenders to the trade for furnishing houses or buildings of any size with locks and hardware throughout. The prices of many of our goods are low, but never so low as to cause us to lower the quality of the goods.

THE NEW BAKER.

The Gun for the Hardware Trade.

MOST SYMMETRICAL, BEST BALANCED, NEATEST LOOKING GUN of its class ever offered to the "SHOOTING" PUBLIC.

PRICE, $30.00.

We do not expect to equal Guns selling at $100 and upward in perfection of outside finish, but *we do give our customers a Well-Proportioned, Well-Balanced, Well-Finished Gun* with Walnut Stock, Checkered Pistol Grip, as shown in cut, Rubber Butt Plate, English Twist Barrels, Extension Rib, Top Snap Action, Rebounding Locks, Compensating Fore-End, Low Circular Hammers, Interchangeable Parts, Solid Strikers and Top Rib finished with a Corrugated Matting. *In fact, including every modern improvement.*

The "NEW BAKER" cannot be excelled for Close, Hard, Long-Range Shooting in the Field or at the Trap by any Gun made, no matter what the price.

OUR GUARANTEE.

We agree to replace at our Factory all parts that fail through defects of material or workmanship without charge to our customers whether the Gun is purchased direct from us or through dealers. The NEW BAKER is made in both 10 and 12 Gauges. The 10 Gauge Barrels being 30 or 32 inches long, and weighing from 8 to 11 pounds. The 12 Gauge are made 28, 30 and 32 inches long, weighing from 7½ to 9 pounds. All Guns being Full Choked or one Barrel Choked, and the other Cylinder or modified Choke as ordered without extra charge.

INDENTATIONS PATENTED MAY 27TH, 1884. MARCH 29TH, 1887.

PETERS' CARTRIDGES.

THE PERFECTION OF SHOT GUN AMMUNITION.

Loaded by the most rapid, accurate and scientific cartridge loader in existence. Capacity of each machine 4000 per hour: run by steam, entirely automatic The elastic wool felt cut several sizes large render the keeping of extra cartridges for Smith, LeFevre and Parker Guns unnecessary. The charge being fastened by the Peters Patent indentation give greatly improved Pattern and Penetration with light recoil, and leaves the gun clean. The results are wonderfully uniform. Ask for Price List and Discounts. For sale everywhere.

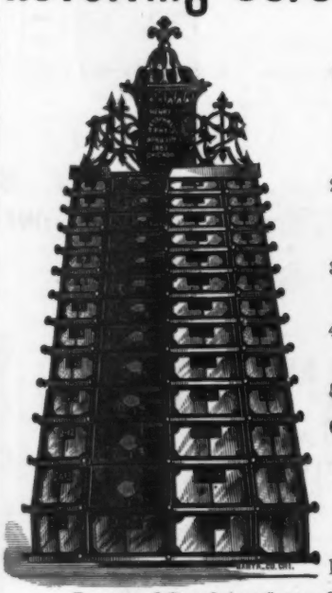
WESTPHAL'S IMPROVED

Revolving Screw Bolt & Shot Cases.



Improved Revolving Screw Case. Made Entirely From Iron and Glass.

Advantages in Using.

1st—It is impossible to mix the different sizes of screws, bolts or shot. This is *a very important point*, and cannot be claimed in any other construction for holding these goods.

2nd—Only those behind the counter have access to the contents of the cases, thus preventing customers from helping themselves.

3rd—The condition and amount of stock is shown at a glance.

4th—They will save much space and many feet of shelving in any store.

5th—Any size can be found instantly.

6th—In addition to their great usefulness, they will ornament the counters of any store, for in these cases, utility, strength and beauty are combined.

Those who have used them say they would not part with them for many times their cost.

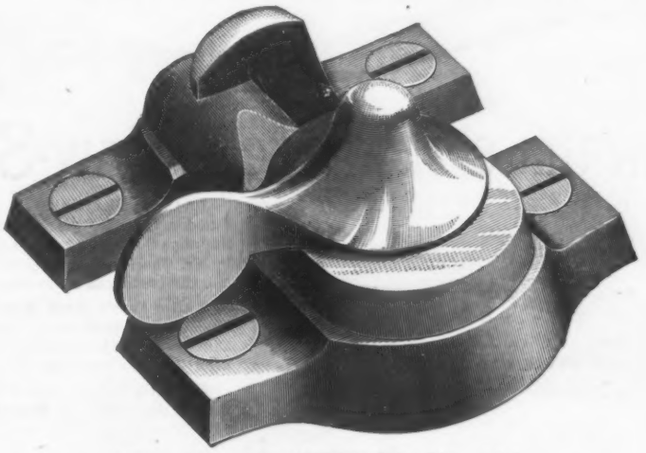
THE IVES PATENTED

SASH LOCKS AND MORTISE BOLTS

A very important feature of the IVES SASH LOCK, is in its securely locking when closed and simultaneously drawing the meeting rails closely together All the movements are accomplished by cams without the instrumentality of springs, thus avoiding the possibility of getting out of order.



IVES' PATENT BURGLAR PROOF SASH LOCKS AND MORTISE BOLTS are made under TWELVE PATENTS, but are no more expensive than many of the more common bolts and sash fasteners now on the market.

ARE MANUFACTURED IN ALL

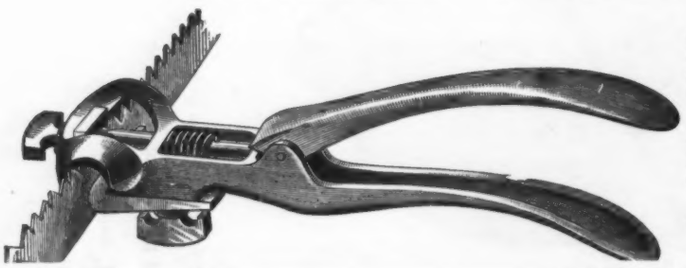
Established by DANIEL B. KING, 1829.

MORRILL'S PERFECT SAW-SETS.



On the application by the administratrix of the estate of the late Asa Farr, for the appointment of a receiver, the New York Supreme Court decided that the business in saw-sets carried on by Mr. Charles Morrill, at 64 College Place, since the death o Mr. Farr, belonged to the Farr estate—the court saying:

"After Farr's death Morrill could not seize upon the books office and assets of Farr's businessand by an usurpation of owner ship undertake to substitute himself in Farr's place in the busi ness the latter had built up."

Under the instructions of the court I shall continue the manufacture and sale of the Morrill saw-set.

CHAUNCEY S. TRUAX, Receiver in FARR vs. MORRILL,
64 College Place, New York City.

Cronk's Patent Wire Cutter and Bender.

8 in. per doz. pair, - - - - - - - - $15.00
10 in. " " - - - - - - - - - - 21.00

This surpasses any Plier in the market for Cutting and Bending Wire, and can also be used in place of Hill's Hog Ringer. Is especially adapted to farmers' use in building Wire Fence, &c.

Our reasons for claiming that we have the best Pliers in the Market are :

FIRST.—We use the best Tool Steel and they are nicely finished.

SECOND.—We combine both Flat and Round-Nosed Pliers in one, the concave and convex circles between the handles are used for bending wire in any desired shape.

THIRD.—The cupping in the Nose is used for pulling tacks, Brads or nails, and can also be used in place of Hill's Hog Ringer.

FOURTH.—We can cut Barb Wire, Barb Belt or any kind of Wire used for Fencing purposes. We also claim that we have the only Plier made that the Cutting Jaws cannot be broken.

By passing the Wire through the Pliers it makes a very handy cut and also holds the Wire after it is cut.

Lane's Measuring Faucet.

LANE'S PATENT STEEL DOOR HANGER.

The most perfect Anti-Friction Hanger in the Market, because

It is made of steel throughout, except the wheel, which has a steel axle. It will not break. It is practically free from wear. It is almost noiseless in action. It requires no oil. It has a broad bearing on the door, and keeps in line. It is by far the most durable. It may be used with any track. It is always in order. **LANE'S PATENT TRACK** is made of steel and is easily put in position. Catches and holds no snow or ice. Door hung thereon cannot jump the track. Is not subject to decay. Requires no fitting, but is ready at once. May be used with hangers of other manufacture. Send for circulars.

TOWER & LYON, GENERAL AGENTS, 95 CHAMBERS STREET, NEW YORK.

WIGGER'S

PATENT SASH LIFTERS

A simple contrivance designed to facilitate the Raising and Lowering of

ONE-LIGHT SASHES.

Nearly all modern buildings are constructed with single-light sashes, the raising and lowering of which is attended with difficulty.

The adjustment of the lower sash is especially inconvenient when screens are used.

These Sash Lifters will be found indispensable in overcoming this constant annoyance.

Latching is facilitated, window sticks and hooks done away with, springing the sash and loosening the glass prevented, &c.

Made of a strip of concave-convex metal, with knobs pressed up, and fitting over the bead on the side rail of sashes.

Made in any size from 28 to 44 inches in length.

Sample Cards, Price Lists and Circulars on application.

THE GIANT PAD LOCK.

Centennial Award. "Superior in Every Respect.

This is one of the best selling locks in the market, and affords the dealer a large profit. It is thoroughly and strongly made—of the best material—very handsome in appearance, and every Lock is warranted. Orders solicited.

THE GIANT METAL SASH CHAIN

is a substitute for cord in hanging weights to windows. It is manufactured by us only, and by automatic machinery, patented and owned exclusively by ourselves, and whereby we secure uniformity of construction and quality. We have been to great expense in producing a metal having all the qualities and conditions requisite for making suitable chain for this purpose, and to prevent other chain of the same pattern of link and of the same general appearance, but made from an inferior metal, being offered as the same thing, we patented the word "Giant" as a Trade-Mark, as applied to either metal or chain. Trade-Mark Registered April 16, 1878, and October 22, 1878, and our metal is therefore known in the market as "Giant Metal," and our chain as "Giant Metal Sash Chain."

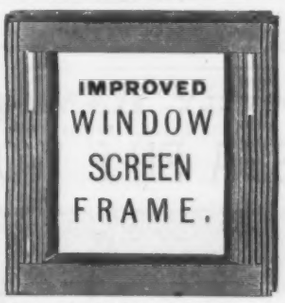
Reihers' Improved Transom Lifters

Best in the market. Send for Catalogue.

F. A. REIHER, Mfgr.,
11 and 13 S. Canal St., - CHICAGO, ILL

This is a new departure in adjustable screens and is free from many objections found in others. It is **the only double** face screen, and equally well finished on both sides. It has a box panel, and can be adjusted without the friction noticeable in all other adjustable screens.



The Side Sticks are ⅞ x 2 inches. End ⅞ x 1 inch. Stained Imitation Black Walnut.

Each Set is composed of Frame Slide and Strips to tack over wire.

These Frames are beaded and are slit 6 inches on one end to facilitate fitting to any window, by cutting if necessary.

These Sides are grooved the entire length, doing away with necessity of cutting grooves in end of top and bottom sticks as in other makes.

THE STRONGEST GLUE IN THE WORLD.

2 GOLD MEDALS AWARDED LONDON 1883 NEW ORLEANS 1885.

RUSSIA CEMENT CO. Gloucester, Mass.

SOMETHING NEW

THE PATENT ADJUSTABLE BRUSH.

Our new Patent Can can be carried in the pocket and used without danger of soiling from the can or brush; all superfluous glue is removed on wiper. This style is made in three sizes, half pint, gill and half gill. Our regular cans are half pint, pint, quart, two quart and gallon. Bottles, two sizes as heretofore.

At the New Orleans Exposition (where a Gold Medal was awarded) a piece of Georgia pine butted, one inch square, on a Testing Machine, registered 1620 lbs. before parting.

Does not set quickly like the old style Glues, and has FOUR TIMES the strength.

No Heating required.

No other Glues have the RECORD of 1620 lbs. to the square inch.

The fact that the sales of

LEPAGE'S THE ONLY GENUINE LIQUID GLUE

has greatly increased during the past year, so that we have been unable to manufacture the goods as fast as called for is the best proof that the public appreciates A GOOD THING.

To meet this demand we have recently greatly increased the capacity of our works, and have now the most scientifically arranged glue plant in the world, no expense having been spared which would in any way contribute toward the ABSOLUTE PERFECTION of the products.

THE WIDE AWAKE DEALER is not slow to see that it pays him to keep in stock those goods which are sure of QUICK SALES. Don't be cajoled into buying the various Liquid Glues now in the market for which claims are made that cannot be substantiated.

That the Dealer and Public may be sure that they are not deceived in making their purchases we have commenced putting the autograph below on all the Genuine LePage Glues.

Russia Cement Co.
GLOUCESTER, MASS.

These Glues are used in the Smithsonian Institute, at Washington for all its works of mounting specimens, by the Government Arsenals and Department Buildings, by the Pullman Palace Car Co., Mason & Hamlin Organ and Piano Co., and by thousands of first-class manufacturers and mechanics throughout the world, for all kinds of fine work.

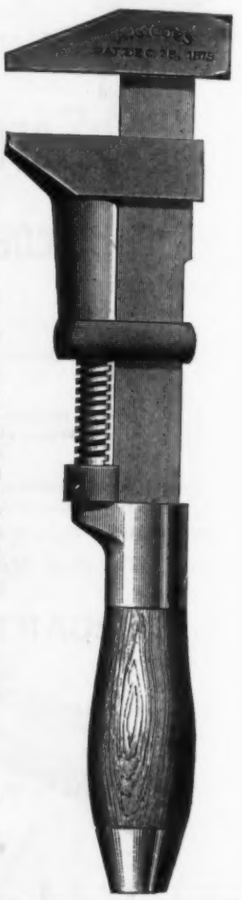
Coes Wrench Co.,

WORCESTER MASS.,
MANUFACTURERS OF
A. G. COES'
PATENT
SCREW WRENCHES,



The Strongest Wrench made, and the only successful re-enforced bar.

The Ferrule is firmly secured in place by a nut screwed on the bar.

Particular attention is called to the way in which the handle is made and fastened to the shank.

This Handle is made better and stronger than heretofore by using our new Cup Tip at the end which encloses the wood and keeps it from splitting. This is the only wrench which has the wood handle firmly secured and held together at each end, and it will stand more rough usage and last longer than any now made. It is not affected heat, cold or moisture.

None Genuine unless Stamped,

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This Wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

BEMIS & CALL HARDWARE & TOOL COMPANY, Springfield, Mass.

Lightning Post-Hole Auger.

Unquestionably the best Post-Hole Auger on the market. It is easily handled, the dirt is readily removed without clogging, and BORES FASTER than any Auger on sale. It does perfect work in ALL KINDS OF GROUND, gravel or clay, wet or dry. We make two sizes. The largest cuts a nine-inch hole, the smallest a four and one-half inch hole. The latter size is in especial demand where posts are driven without tamping.

ALSO THE

FAVORITE POST-HOLE DIGGER.

LIGHTNING HAY KNIVES

WEYMOUTH'S PATENT.

This Knife is the **BEST IN USE** for cutting down hay and straw in mow and stack cutting fine feed from bale, cutting corn stalks for feed, cutting peat & ditching marshes. The blade is **Best Cast Steel**, spring temper, easily sharpened, and is giving *universal* satisfaction. A few moments' trial will show its merits, and parties once using it are unwilling to do without it. Its sales are fast increasing for export as well as home trade, and it seems destined to take the place of all other Hay Knives. They are nicely packed in boxes, 1 dozen each of 60 pounds weight, suitable for shipping by land or water to any part of the world.

Manufactured only by

HIRAM HOLT & CO. **EAST WILTON, Franklin Co., MAINE.**

For sale by the Hardware trade generally.

CAUTION.

We are informed that various parties are infringing upon the widely-known Letters Patent granted originally to GEORGE F. WEYMOUTH for an improved Hay Knife. The invention patented to GEORGE F. WEYMOUTH is embodied in a sword-shaped blade provided with operating handles for working the same, the edge of the sword-blade being furnished with knife-edged serrations or teeth. ☞ **It is our purpose to PROSECUTE ALL INFRINGEMENTS**, and to hold responsible to the full extent of our ability and of the law all parties who manufacture any knife infringing upon the patent, or who deal in the same. Several suits are now pending in the U. S. Courts. ☞ **All manufacturers and dealers are hereby warned** of our rights, and **the public are cautioned** against purchasing any Hay Knives, made as described above, which are not of our *genuine* manufacture.

EAST WILTON, Sept. 1, 1866.

ECLIPSE POST HOLE DIGGER

The *Greatest* LABOR-SAVING tool ever invented for digging holes in the ground. This machine works on a NEW PRINCIPLE, and is UNLIKE ANYTHING in the market.

One man can dig from *two* to *three hundred* holes two feet deep in ordinary ground in one day.

It will dig holes any *size* or *depth* required, and will work successfully in *very hard* or *rough* ground.

You stand up straight while using it, consequently no back-breaking work.

Great inducement to Hardware Dealers. Send for circular and price list to **LAGONDA MFG. CO.**, Successors to P. J. COLE & CO., Box 187 N., Springfield, Ohio.

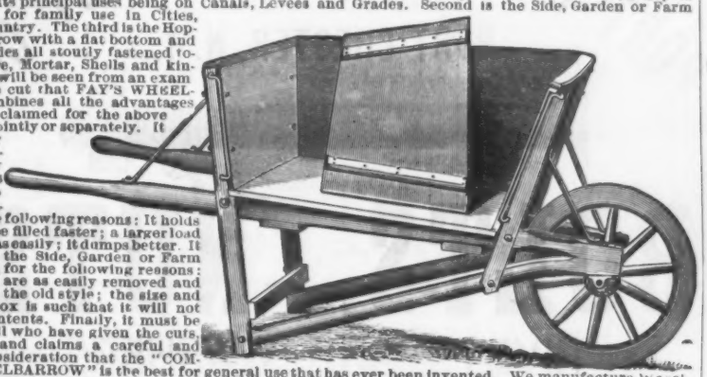
FAY'S COMBINED TRAY AND SIDE, BRACED AND BOLTED WHEELBARROW.

Classifying Wheelbarrows from the shape of that part which holds the load, there have been but three kinds which have come into general use. We may mention as the most important the Railroad, Dump or Tray Barrow, its principal uses being on Canals, Levees and Grades. Second is the Side, Garden or Farm Wheelbarrow for family use in Cities, Towns and Country. The third is the Hopper Wheelbarrow with a flat bottom and four flaring sides all stoutly fastened together, for Ore, Mortar, Shells and kindred uses. It will be seen from an examination of the cut that FAY'S WHEELBARROW combines all the advantages that may be claimed for the above styles, either jointly or separately. It has a larger range of usefulness than any of the old styles. It is superior to the tray wheelbarrow for the following reasons: It holds more; it can be filled faster; a larger load can be moved as easily; it dumps better. It is superior to the Side, Garden or Farm Wheelbarrow, for the following reasons: Its sideboards are as easily removed and replaced as in the old style; the size and shape of the box is such that it will not scatter the contents. Finally, it must be apparent to all who have given the cuts, explanations and claims a careful and thoughtful consideration that the "COMBINED WHEELBARROW" is the best for general use that has ever been invented. We manufacture Wheelbarrows of every description. If you are interested, we shall be pleased to send you our complete Catalogue and quote you prices.



THE BRYAN MFG. CO. Bryan Ohio.

"RIVAL"

PATENT

Lawn Sprinkler.

Cheapest and Best in Use.

Agents Wanted. Liberal discount to jobbers.

The Spray from it covers upwards of 1000 *sq. feet of lawn.* It is the only patent adjustable Sprinkler which is adaptable to any water pressure. Being made of brass, and having no revolving parts to wear out, or small openings to clog up it can be operated with sandy or muddy water as well as clear, and will last for years. To operate, screw Sprinkler on end of hose, stick the rod into the ground in a vertical position, adjust the acorn to suit pressure and spray wanted and it is ready for use. It may be so regulated as to throw a spray *as coarse as rain* or *as fine as mist*, and will make one of the most beautiful fountains imaginable. It is unequaled in merit, requires no attention and is sold at a less price than any sprinkler in the market. Remember, the RIVAL is the only Sprinkler made by which the coarseness of the spray and the area to be wet can be regulated. They are packed 1 doz. in a box, and finished either plain or nickel-plated.

FULL SIZE.

¾ Inch Regular Hydrant Thread, $7.50
(or Pipe Thread to order) per doz.
1 In. or 1¼ Gas Pipe Thread, 12.00
Sample Sprinkler sent prepaid on receipt of 60 cents.

THE DETROIT TOOLS

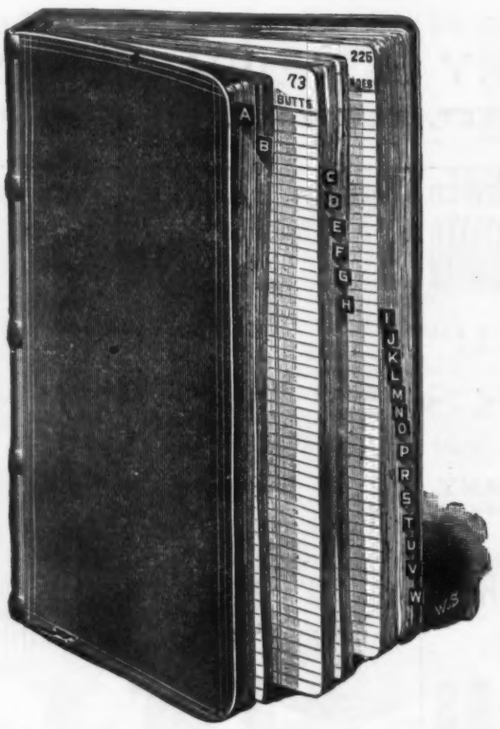
LAMBERSON'S
HARDWARE PRICE BOOKS.

POCKET EDITION,

4 x 7 inches, 250 pages.

BOUND IN LEATHER.

PRICE, · $4.00.



LARGE SIZE,

FOR

OFFICE USE.

6 x 9½ inches, 500 pages.

BOUND IN LEATHER,

PRICE, · $8.00.

THE illustration serves to show the general appearance of the Large Price Book. Dealers who have copies of the first edition will observe that the old classification is abandoned and the alphabetical arrangement adopted in its place. The names of different articles are printed at the upper corner of each page. The index cut on the front edge of the book gives a ready reference to the beginning of each letter, and by turning the corners of the pages any item desired in that division can be very quickly found.

On the first page opened to by the index letter will be found a list of articles beginning with that particular letter, arranged with two spaces after each item for additions of other goods in proper alphabetical order.

Sizes of leading lines are printed, and in case of Rules and Planes comparative numbers are given. Lists are omitted for the obvious reason that they are liable to change, but forms are arranged so that lists may be added with pencil. Useful tables are inserted on Strap Hinges, Nuts, Washers, Wire, Rivets, Stocks and Dies, Rope and Nails. The book is intended primarily for ***Salesmen,*** but it is no less useful to ***Buyers*** or ***Stock*** and ***Entry Clerks,*** and can be adapted to any purpose for which a price book may be desired. The general plan of the Pocket Edition is the same as in the large book, but the ruling and printing are on a smaller scale. The book is small enough to be carried in the pocket without inconvenience, but the arrangement is so perfect that it will cover a very complete line of hardware.

Chisels, *Manufacturer of.*
Buck Bros., Millbury, Mass.
Jennings C. E., 79 Reade N. Y.

Chucks.
Smith & Egge Mfg. Co., Bridgeport.
Union Mfg. Co., 103 Chambers, N. Y.
D. E. Whiton Mach. Co., New London, Conn.

Clamps.
Hammer & Co., Branford, Conn.

Clippers.
Lee, Jesse & Son, Philadelphia, Pa.

Clothes Dryers.
Empire Wringer Co., Auburn, N. Y

Coal.
Borden & Lovell, 70 West N. Y.
Pardee A. & Co., 111 Broadway, N. Y.

Coat and Hat Hooks.
Hamilton & Russell Mfg., Co., Worcester, Mass.

Coffee and Spice Mills.
Enterprise Mfg. Co., Philadelphia.
Lane Bros., Poughkeepsie, N. Y.

Coke.
Connellsville Coke & Iron Co., Phila.
Schoonmaker J. M., Pittsburgh.

Commission Merchants, Iron, Steel, &c.
Howard Childs & Co., Pittsburgh.
Knapp & Hague, 52 Fulton, N. Y.

Copper.
New Haven Copper Co., Pearl, N. Y.
Rome Brass and Copper Works, Rome, N. Y.

Cordage.
Elizabethport Steam Cordage Co., 46 South, N. Y.

Corrugated Iron.
Moseley Iron Bridge & Roof Co., 5 Dey, N. Y.
Sagendorph Iron Roofing and Corrugating Co., Cincinnati, Ohio.
Standard Iron Co., Bridgeport, Ohio.

Corrugated Tubing.
Wainwright Mfg. Co., Boston, Mass.

Countersinks.
Syracuse Twist Drill Co., Syracuse, N. Y.

Coverings, Boiler and Pipe.
Chalmers-Spence Co., 419 8th, N. Y.
Shields & Brown Co., Chicago, Ill.

Cranes.
Sellers, Wm. & Co., Philadelphia, Pa.
Yale & Towne Mfg. Co., Stamford, Conn.

Curry Combs
Clark W. J. & Co., Salem, O.
Southington Cutlery Co., Southington, Conn.

Cutlery, *Importers of.*
Clatworthy F. & W., N. Y
Field, Alfred & Co., N. Y.
Gurney, F. B., 116 Chambers St., N. Y.

Cutlery, *Manufacturers of.*
Bingham, W. & Co., Cleveland, Ohio.
Canton Novelty Cutlery Co., Canton, O.
Goodell Co., Antrim, N. H.
Healy, C. J. & Co., 26 Warren, New York.
R. Wallace & Sons Mfg. Co., 21 Park Place, N. Y.
Wilson, John, Sheffield, England.

Cutting Tools.
Higganum Hdw. Co., Higganum, Conn.

Dampers.
Shepard Hardware Co., Buffalo, N. Y.

Dog Collars.
Manhattan Leather Works, 298 Broadway, N. Y.

Door Checks.
Bardsley, J., 59 Elm St., New York.

Door Hangers, House and Barn.
Lane Bros., Poughkeepsie, N. Y.
Moore Mfg. Co., Chicago, Ill.
Stearns, E. C. & Co., Syracuse, N. Y.
Terry Mfg. Co., Horseheads, N. Y.
Victor Mfg. Co., Newburyport, Mass.

Door Knobs.
Boston Knob Co., Boston, Mass.

Door Springs
Paine, A. W., Peaboy, Mass.

Drilling Machines.
Dallett Thos. H. & Co., Philadelphia
Dwight Slate Machine Co., Hartford Conn.
Herrick & Cowell, New Haven, Conn.
Illinois Iron & Bolt Co., Carpentersville, Ill.
Millers Falls Co., 93 Reade, N. Y.
Sigourney Tool Co., Hartford, Conn.
Wiley & Russell Mfg. Co., Greenfield, Mass.
Universal Radial Drill Co., Cinn.

Drills, Upright.
Currier & Snyder Worcester, Mass.
Prentice Bros., Worcester, Mass.

Drop Forgings.
Beecher & Peck, New Haven, Conn.
Billings & Spencer Co., Hartford, Ct.
Boone, W. C. & Son, Brooklyn, N. Y.
Merrill Bros., 26 First, Brooklyn, E. D.
Philadelphia Drop Forge Co, Phila.

Bradley's HEATING FORGES

Established 1832

Pat. Aug. 30, 1887

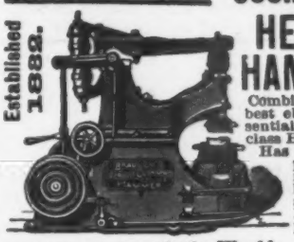
With a manufacturing experience of over half a century, we recommend these machines to be the best, simplest, most durable and combining all the essential elements.

For hard coal or coke. Indispensable in all shops to keep Bradley's Cushioned Hammers and men fully employed and reduces cost of production.

BRADLEY & CO., Syracuse, N. Y.

BRADLEY'S UPRIGHT CUSHIONED HELVE HAMMER

Established 1882.



Combines all the best elements essential in a first-class Hammer. Has more good points, does more and better work and costs less for repairs than any other Hammer in the World.

BRADLEY & CO. Syracuse, N.Y.

GATE CITY STONE FILTER CO.,

46 Murray St., New York.

☞ Fine China and Gray Stone-ware Jars to hold the Water.

☞ A NATURAL STONE for a Filtering Medium.

☞ Fitted with separate Patent Ice Chambers to cool the water.

☞ As easily cleaned a Water Pitcher.

☞ No objectionable material used in the construction of this Filter

All water is filled with impurities during the rainy season.

☞ This Filter will ABSOLUTELY CLEAN IT.

Address as above for Descriptive Price List. Mention *The Iron Age.*

Open Cut shows Filter Disc used in our Filters, and Separate Patent Ice Chamber.

NEW YORK SAFETY DUMB WAITER FIXTURES

Patented United States, April 19th, 1887; in Canada, May 18th, 1887.

The MOST COMPLETE, SIMPLE and ABSOLUTELY SAFE WAITER made. Provided with SAFETY ROPE, AVOIDING ACCIDENT. ENTIRELY NOISELESS, and moves with perfect ease.

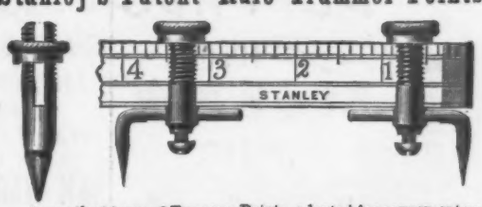
Stanley's Patent Rule Trammel Points.



A practical form of Trammel Points adapted for convenient use on a Carpenters' Rule. They can be attached to Folding Rules of any ordinary width; and on many kinds of work will take the place of regular Trammel Points, Calipers or Dividers

A complete set, consists of two Brass Trammel Heads with movable Steel Points, and one Head with a Pencil Socket

No. 99. Rule Trammel Points, per set of three, in a box..... $0 50

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.

Sent, postpaid, on receipt of the price, 75 cents, by

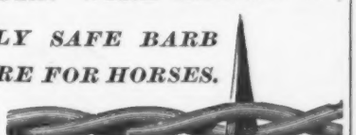
KELLY
BARB WIRE COMPANY,
SUCCESSORS TO
THORN WIRE HEDGE CO.,
ONLY SAFE BARB WIRE FOR HORSES.



A YIELDING BARB ROD to the POUND.
Sold only to One Dealer in a Place.
The great advantage of this style of barb is, that when an animal is pricked the barb will turn just enough to let him off without *tearing out the flesh.* It costs but little more per rod than the *hide-ripping wire usually sold. The Paint is warranted* to be as durable as galvanizing.
Country Merchants will find it to their advantage in securing the agency on a class of goods that is in demand and that has no competitor of its kind. We also make both *Two* and *Four-Point Wire Barbs.*

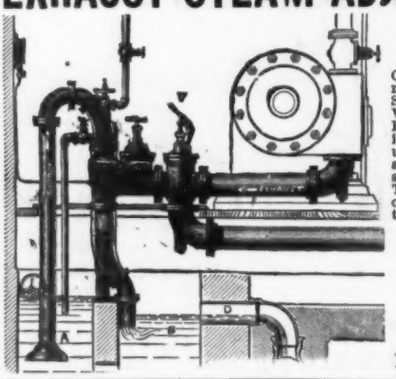
THE KORTING

EXHAUST-STEAM-ADJUSTABLE-CONDENSER,

FOR STEAM ENGINES AND PUMPS



This CONDENSER requires no Tank, no Pump, no Water Column of Thirty-four feet, or Hot Well, nor does it need any Foundation, and there is no continual waste of Steam to operate Air Pumps. It provides for its own Water Supply, whether lifting or from a fall of water. It will lift water Twenty Feet, and when a fall of water is available, only One Foot head is required. The means used to accomplish this is the exhaust Steam Velocity, as it comes from Steam Engine Cylinder. The best results can be obtained without any cost of maintenance. The Price is lower than any other Condenser. There is considerable saving in the use of Steam, and Twenty-five to Thirty per cent. increase in the Power of Engine.

Several Hundred of these Condensers are now in use.

SEND FOR COMPLETE ILLUSTRATED CIRCULAR.

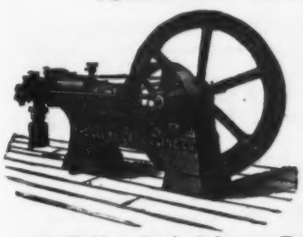
THE CLERK GAS ENGINE.

Highest Award for Gas Engines at American Institute Fair, New York, 1883.



Makes an ignition at every revolution of the Fly Wheel. Is started with ease, and gives full power immediately. No danger from fire; no extra insurance nor skilled engineer required. Runs perfectly steady; only uses gas when required. Workmanship of the best description and guaranteed. Indicated power considerably larger than in any other Gas Engine of the same size, each Engine giving from 1 H.-P. to 4 H.-P. more than named. Is unsurpassed by any other Gas Engine for running any kind of machinery or electric light, arc or incandescent. Has means for regulating to suit any coal or water gas.

No Boiler, Coal, Ashes or Engineer. Made in Sizes of 4, 8, 10, 15 and 25 H.-P.

HIGH-SPEED POWER TRAVELING CRANES.

We are now prepared to build **High-Speed Power Traveling Cranes** for any capacity of load, any length of runway and any width of span, with one or with two trolleys on the bridge, these trolleys to work either slow or fast, together or independently, in like or in opposite directions, horizontally or vertically, while the bridge can be traversing slow or fast at the same time in either direction. The speeds of bridge on runway are 100 *feet and* 200 *feet per minute;* the speeds of trolleys on bridge are 50 *feet and* 100 *feet per minute;* and there are four hoisting speeds of 5, 10, 20 *and* 40 *feet per minute;* all can be varied quickly without the least shock or jar from zero to maximum or to any intermediate speed. *The load is always automatically sustained, thus avoiding absolutely the great danger and anxiety which are inseparable from the use of those cranes which require the operator to apply the brake.* We have had one of these Cranes of 26 tons capacity in constant use in our foundry for nearly two years, and we offer them with full confidence for the greatest range of service. We invite the correspondence of parties interested in the subject. WM. SELLERS & CO., Incorporated,

July, 1887. Philadelphia, Pa.

BELDEN'S
Upright Power Hammer.

This Hammer possesses advantages superior to any other in the market. It has neither crank, wrist nor piston rods, consequently but few parts to break. It takes up little room, can be set up anywhere. It is as easy to drive, strikes much harder and truer blows than hammers with double the weight of ram.
It can be worked to strike good alternate blows on a ¾-inch and ⅝-inch bar when a 100-pound hammer is used, and can be used on die work to a far greater advantage than any other hammer known. Manufactured by the
R. A. BELDEN COMPANY, Danbury, Conn.
Cut of 60 lb. Hammer.

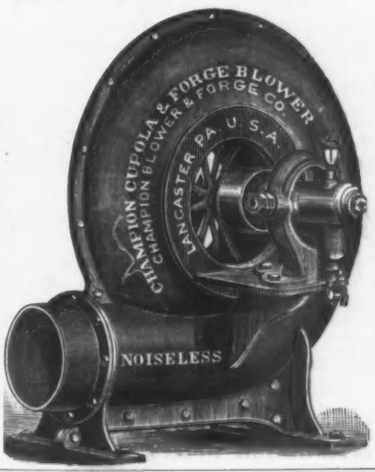
MANUFACTURERS OF THE

Champion Steel Pressure Blowers, Fan Blowers, Exhaust Fans,

To suit every Possible Situation and Kind of Work.

ALSO A FULL LINE OF

Lever and Crank Blowers, Portable Forges, Stationary Forges, Blacksmiths' Drills, Tire Benders, Tuyere Irons, &c., &c., &c.



CAUTION.

We desire to call your attention to the fact that the great reputation and popularity of our Machines have induced a concern to attempt an exact imitation thereof; also, issuing a facsimile copy of our late catalogue. We find they have bought a full line of our Champion Lever Blowers, Champion Lever Forges and Eureka Tire Benders, taken them apart, and used them as patterns, regardless of our "Patents."

We simply wish to make the above facts known and warn all trespassers on our rights of our intention to prosecute.

NOTICE.—The valuable feature of our Power Fan Blowers and Steel Pressure Blowers is our Champion Journal Box. It has a universal adjustment whereby it comes readily into perfect line with the shafts.

REMEMBER

our goods are sold strictly on their merits, and each and every article sold is guaranteed to give entire satisfaction. Write for our 64-page catalogue

IRON ORE PROPERTY.

For Sale or Lease, situate within three miles of the C. & O. Ry., at White Sulphur Springs, W. Va., about 3000 Acres, underlaid near surface by a persistent seam of red oxide iron ore from 10 to 60 feet in thickness. Numerous analyses show

61 per cent. Metallic Iron.
.07 per cent. Phos.
.05 per cent. Sulphur.

Six miles of outcrop have been proved by a number of openings. The helderberg limestones, more than 300 feet thick, are exposed at many points, and the hills containing the New River coking coals are within sight. There are good sites for furnace plants in the immediate vicinity, and ample water for all purposes. For further particulars, apply to

PROPOSALS FOR STEEL FOR USE IN THE CONSTRUCTION OF THE UNITED STATES ARMORED BATTLE-SHIP "TEXAS," AT THE NAVY YARD, PORTSMOUTH, VIRGINIA.—NAVY DEPARTMENT, Washington, D. C., June 21, 1888.—Under authority conferred by an act of Congress, entitled "An act to increase the naval establishment," approved August 3, 1886, (24 Statutes at Large, page 215,) sealed proposals are hereby invited, and will be received at this Department until 12 o'clock noon, on Monday, the 23d day of July, 1888, for furnishing the following classes of material for use in the construction of said ship: CLASS A.—*Steel plates.*—About nine hundred and twenty (920) tons of steel plates from 2⅛ to 25 pounds per square foot. CLASS B.—*Steel shapes.*—About five hundred and three (503) tons of steel shapes, as follows: About two hundred and seventy (270) tons of angle-bars of various sizes; about one hundred and thirty-two (132) tons of angle and T-bulb beams, with proper curvature, from 11 to 24½ pounds per lineal foot; about ten (10) tons of T-bars, of 8 pounds per lineal foot; about ninety-one (91) tons of channel-bars, of 10, 15 and 25 pounds per lineal foot. CLASS C.—*Steel rivets.*—About one hundred (100) tons steel rivets, from ⅜ inch to 1¼ inch diameter. CLASS D.—*Steel castings.*—About one hundred and twenty (120) tons of steel castings, of various shapes, including stem, stern-post, hawse-pipes, riding and mooring bitts, chain-pipes etc. The tons of material herein called for to be of 2,240 pounds each. All said material to be of such detailed dimensions, weights and shapes as may be required in the construction of the vessel, and to be delivered at such place or places in the Navy Yard, Portsmouth, Virginia, as may be designated by the Commandant of said Yard. Deliveries to commence within thirty (30) days from the date of contract, and to be completed within six (6) months from such date: the material to be delivered promptly, in accordance with a detailed schedule prepared by the Assistant Naval Constructor at said Navy Yard, and in the order required to carry on the work to the best interests of the Government. All material to be of domestic manufacture, and to be accepted only after passing such tests as may be prescribed therefor by the Secretary of the Navy. Proposals must be in accordance with forms which will be furnished on application to the Bureau of Construction and Repair, and may be for one or more of the classes designated, but no bid for a portion of any class will be considered. Each proposal must be accompanied by satisfactory evidence that the bidder is able to furnish and deliver the material for which he bids. Each proposal must be accompanied by a certified check, payable to the order of the Secretary of the Navy, for an amount equal to five per cent. of the bid. The check received from the successful bidder will be returned to him on his entering into a formal contract for the due performance of the work, and giving bond for the same, with satisfactory surety, in a penal sum equal to twenty-five per cent. of the amount of his bid; but in case he shall fail to enter into such contract and to give such bond within twenty days after notice of the acceptance of his proposal, the check accompanying such proposal shall become the property of the United States. All checks accompanying proposals which are not accepted will be returned immediately after the award shall have been made. Information relative to the dimensions and shapes of material, and all other information essential to bidders, will be furnished on personal application to the Bureau of Construction and Repair, Navy Department. Proposals must be made in duplicate, and enclosed in envelopes marked "Proposals for Steel for the Armored Battle-ship 'Texas'," and addressed to the Secretary of the Navy, Navy Department Washington, D. C. Each class of materials will be bid for separately, and the Secretary of the Navy reserves the right to reject any or all bids, or the bids on any class or classes, as, in his judgment, the interests of the Government may require.

DIAMOND MACHINE CO.,
Providence, R. I.

PROPOSALS FOR STEEL PLATES, &c.—June 30, 1888.—Sealed proposals endorsed "Proposals for Steel Plates, &c.," will be received from manufacturers or regular dealers only, at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., until 11 o'clock A. M., July 24, 1888, and opened immediately thereafter in the presence of bidders, for the supply, at the Navy Yard, Washington, D. C., of 32 steel plates, 57,680 pounds; 16 angle-bars, 1,840 pounds; and 8 deck-beams, 624 pounds. Physical character of metal to be: Tensile strength, 70 000 pounds; elongation, 20 per cent.; contraction 35 per cent.; length of specimen (working part) equal to four times the diameter. Time of delivery, on or before August 30, 1888. Tie bids decided by lot. The above articles must pass the usual naval inspection, and a reservation of 20 per cent. will be withheld from the amount of each delivery until the completion of the contract. Bidders are referred to the Commandant at the Washington Navy Yard for specifications, forms of offer, and all information relative to the articles required. The proposals must be made in duplicate on the proper blank forms *and filled out as indicated by the blank.* The Department reserves the right to reject any proposal not considered advantageous to the Government.

JAMES FULTON, *Paymaster General, U.S. Navy.*

A GOOD HARDWARE BUSINESS FOR SALE.

Wishing to retire from all active business, the undersigned offer for sale their valuable and thoroughly established business. The stock is clean and well selected. Waverly, New York, is a growing place, with considerable manufacturing, and surrounded by a good farming country; has good water, gas works and sewers, also five railroads radiating from it. The location of the store building is central, with every convenience, including hydraulic elevator, &c. The business has been conducted successfully as wholesale and retail; can be continued as we have conducted it, or else we can soon reduce the stock, and it can be conducted as a retail alone.
In negotiating sale, reference given and required.
MERRIAM BROS., Waverly, N. Y.

To Stockholders of the Sutro Tunnel Company who have not assented to the Plans of Reorganization:

A guarantee syndicate having been formed, stockholders who have not assented heretofore to the plans of reorganization, but wish to protect their stock from being rendered valueless through foreclosure, must forthwith deposit their shares with the Union Trust Company, No. 73 Broadway, New York, pay the sum of 55 cents per share, and receive therefor the Trust Company's negotiable receipts, which will entitle the holder, after completion of the reorganization, to the same number of shares of stock as now deposited by him and new first mortgage income 4 per cent. bonds in the proportion of $1.00 for each 55 cents cash now paid.

The time for depositing stock and payment of subscriptions expires on July 11, 1888, 3 P. M.

Payments should be made by check on New York to the Union Trust Company, and should be accompanied by the stock duly endorsed in blank, and an authorization to the Union Trust Company; blank forms for this authorization and copies of circulars can be obtained upon application at the Union Trust Co.'s office, or at Room 19, 7th floor, Mills Building. Interest at the rate of 4% will be allowed on subscriptions from the date of payment.

For the Reorganization Committee,

H. R. BALTZER, Chairman,

NEW YORK, June 21, 1888.

REFERRING TO ABOVE ADVERTISEMENT THE REORGANIZATION COMMITTEE HEREBY GIVE NOTICE THAT THE TIME FOR SUBSCRIBING TO THE NEW BONDS IS EXTENDED TO JULY 25TH, 3 P. M

H. R. BALTZER, Chairman.

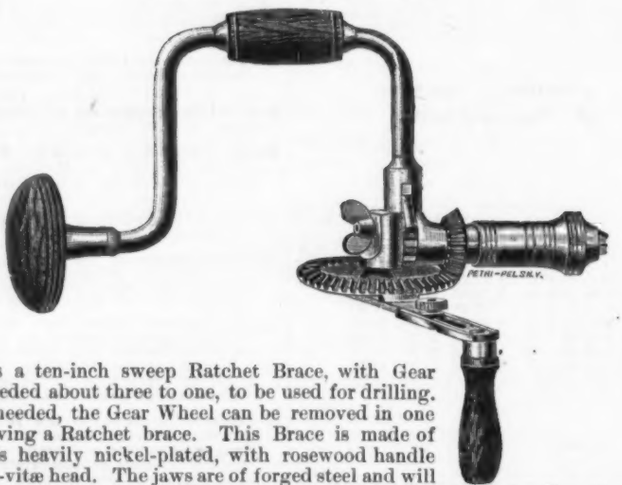
DRILL BRACE,

ANTI-FRICTION COLLAR.

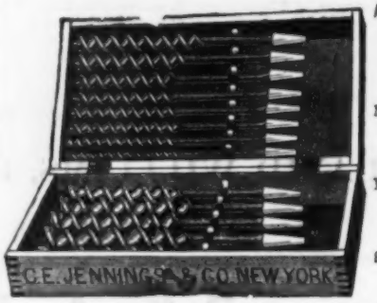


This is a ten-inch sweep Ratchet Brace, with Gear Wheels speeded about three to one, to be used for drilling. When not needed, the Gear Wheel can be removed in one second, leaving a Ratchet brace. This Brace is made of steel and is heavily nickel-plated, with rosewood handle and lignum-vitæ head. The jaws are of forged steel and will center and hold firmly round twist drills from $\frac{1}{8}$ to $\frac{7}{16}$ of an inch in diameter. Also square shank Bits and Drills of all sizes; also square and flat Screw-driver Bits; in fact, it will hold perfectly tool shanks of any size or shape. There is no other chuck in existence which will do this. It is our purpose to furnish everything in the line of Bit Braces and Breast and Hand Drills of a style and quality superior to anything else in the market. With each Drill Brace we send an extra set of Forged Steel Jaws, mainly to be used for round twist drills less than one-eighth of an inch in diameter. As will be noticed in the cut, the large gear wheel has an extension handle to give it more power when needed.

Price of Drill Brace, complete, per doz., $36 00. Same discount as Breast Drills.

MILLERS FALLS CO., 93 Reade St., New York.

C. E. Jennings & Co.'s Extra Quality Auger Bits.



All our Auger Bits are made of Solid Cast Steel and warranted

This illustration represents our Auger Bits put up in Fancy Wood Boxes with rack to hold one Auger Bit of each size

No. 10 Set. C. E. Jennings & Co.'s Extension Lip Auger Bits: 13 Bits, 32½ Quarters, one each as follows: 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16-16ths of an inch, per set..... $5.00

No. 30 Set. C. E. Jennings & Co.'s Extra Double Spur Augur Bits: 13 Bits, 32½ Quarters, per set..... $3.50

Sold by all first-class Hardware dealers. If you fail to obtain them we will forward on receipt of price.

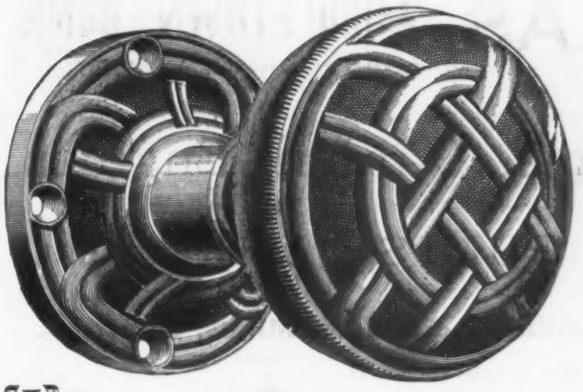
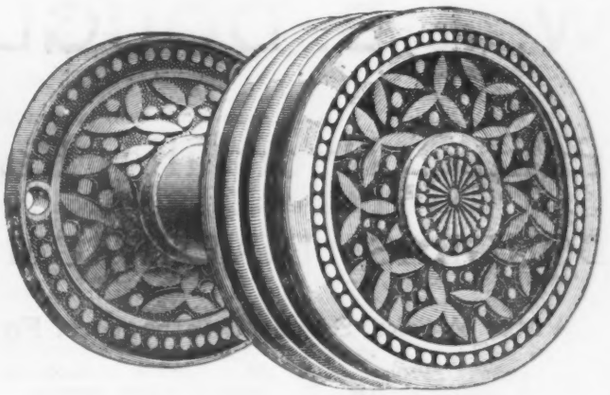
VAUGHAN & BUSHNELL MFG. CO.,

MANUFACTURERS OF

HARDWARE, TOOLS, &c.,

89 to 95 So. CLINTON ST., CHICAGO.





WE illustrate a few of the later patterns of Knobs made by us. We have full lines of hardware in many of these patterns and can always furnish designs which will harmonize with them. We call special attention to our Patent Screwless Spindle, which ensures better adjustment and more secure attachment of knob to spindle than any device yet invented. We shall be glad to submit tenders to the trade for furnishing houses or buildings of any size with locks and hardware throughout. The prices of many of our goods are low, but never so low as to cause us to lower the quality of the goods.

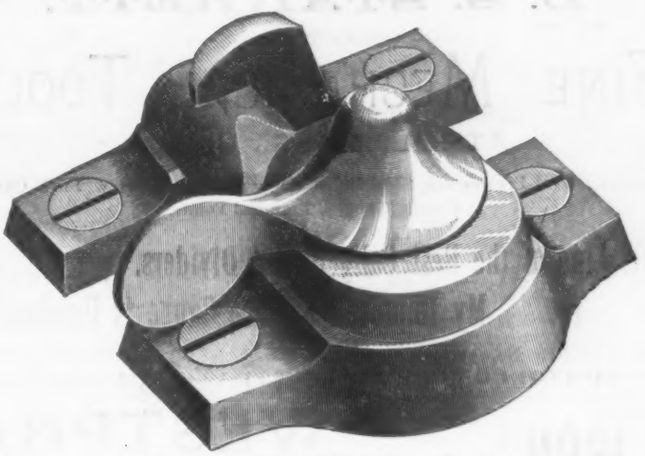
Owned and Manufactured by DECATUR COFFIN CO., Decatur, Ill.

No. 1 $1.25 No. 2 $1.50

THE IVES PATENTED

SASH LOCKS AND MORTISE BOLTS

A very important feature of the Ives Sash Lock, is in its securely locking when closed and simultaneously drawing the meeting rails closely together. All the movements are accomplished by cams without the instrumentality of springs, thus avoiding the possibility of getting out of order.



Ives' Patent Burglar Proof Sash Locks and Mortise Bolts are made under Twelve Patents, but are no more expensive than many of the more common bolts and sash fasteners now on the market.

ARE MANUFACTURED IN ALL

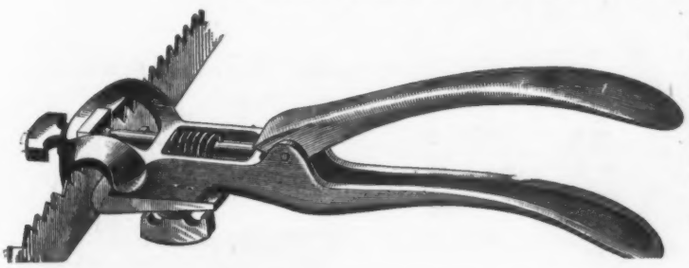
Price List on Application.

MORRILL'S PERFECT SAW-SETS.



On the application by the administratrix of the estate of the late Asa Farr, for the appointment of a receiver, the New York Supreme Court decided that the business in saw-sets carried on by Mr. Charles Morrill, at 64 College Place, since the death o Mr. Farr, belonged to the Farr estate—the court saying:

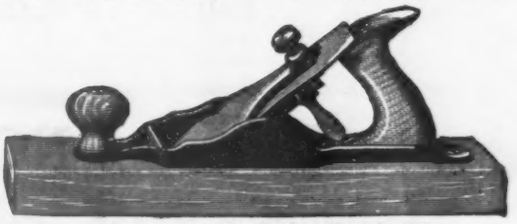
"After Farr's death Morrill could not seize upon the books office and assets of Farr's businessand by an usurpation of owner ship undertake to substitute himself in Farr's place in the busi ness the latter had built up."

Under the instructions of the court I shall continue the manufacture and sale of the Morrill saw-set.

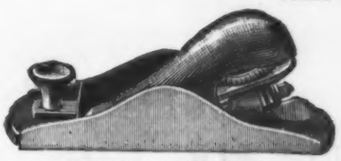
CHAUNCEY S. TRUAX, Receiver in FARR vs. MORRILL,
64 College Place, New York City.

CHAPLIN'S PATENT IRON AND WOOD BOTTOM PLANES.

Jacks and Jointers.



Jack Plane.—Nos. 77, 78.



Nos. 20 and 30 Blocks.

These planes (*with a smooth face*) have been in the market for many years, obtaining a steadily increasing trade as they have become known. We claim for them the utmost simplicity of construction, prompt adjustment and superior beauty of style and finish.

The clamp plate and lever are nickel-plated; the handle is of checkered rubber, which is stronger than any wood handle, and affords an easy, firm grip—also made with nickled iron handle.

Corrugated face.	Smooth face.	
	No. 202, Iron Smooth Plane, 7x1¾ in. Cutter	$3.00
	No. 203, Do., do., 8x1¾ in. do	3.52
	No. 204, Do., do., 9x1¾ in. do	3.35
No. 1205	No. 205, Do., do., 9x2 in. do	3.50
	No. 206 Iron Jack Plane, 12x2	3.85
No. 1207	No. 207, Iron Jack Plane, 15x2⅜	4.25
No. 1208	No. 208, Iron Fore Plane, 18x2¼	5.00
No. 1210	No. 210, Iron Joiner Plane, 22x2⅝	5.75

Smooth Plane, Corrugated Bottom.

This Cut shows the surface of our new Corrugated Iron Planes. The corrugations afford ample air spaces, and reduce the traction and friction to the minimum. Same price as smooth face.

Corrugated face.	Smooth face.	
	No. 211, Iron Joiner Plane, 24x2⅝	$6.75
	With Adjustable Throat.	
	No. 233, Iron Smooth Plane, 8x1¾	3.50
No. 1255	No. 255, Iron Smooth Plane, 9x2	3.75

All of these Planes are nickel-plated finish.

No. 20, Block Plane, Japanned, 6½x1⅝ in. Cutter	1.40
No. 30, Block Plane, Nickel-Plated, 6½x1⅝ Cutter	1.65

OUR NEW WOOD BOTTOM PLANES.

The Clamping Plate and Lever are nickel-plated; the Beechwood has been thoroughly seasoned and is a thicker block than usual, though the Plane is no heavier than those already in the market.

No. 72.	Smooth Plane, 7 x1¾ inch Cutter,	$2.00
" 73.	" " 8 x1¾ " "	2.00
" 74.	" " 8½x2 " "	2.00
" 75.	Handled Smooth Plane, 9x2 in. Cutter,	2.50
" 76.	" " " 10x2⅜ "	2.75
" 77.	Jack Plane, 15x2¼ inch Cutter,	2.35
" 78.	" " 15x2¾ " "	2.60
" 79.	Fore Plane, 18x2¾ inch Cutter,	2.75
" 80.	" " 20x2⅜ " "	2.75
" 81.	Jointer Plane, 22x2⅜ inch Cutter,	3.00
" 82.	" " 24x2¼ " "	3.10
" 83.	" " 26x2⅜ " "	3.25
" 84.	" " 28x2⅜ " "	3.25

The Adjustable Mouth Smooth Plane is a new feature, and meets with a great deal of favor.

Lane's Measuring Faucet.

LANE'S PATENT STEEL DOOR HANGER.

The most perfect Anti-Friction Hanger in the Market, because

It is made of steel throughout, except the wheel, which has a steel axle. It will not break. It is practically free from wear. It is almost noiseless in action. It requires no oil. It has a broad bearing on the door, and keeps in line. It is by far the most durable. It may be used with any track. It is always in order. **LANE'S PATENT TRACK** is made ofsteel and is easily put in position. Catches and holds no snow or ice. Door hung thereon cannot jump the track. Is not subject to decay. Requires no fitting, but is ready at once. May be used with hangers of other manufacture. Send for circulars.

TOWER & LYON, GENERAL AGENTS, 95 CHAMBERS STREET, NEW YORK.

WIGGER'S

PATENT SASH LIFTERS

A simple contrivance designed to facilitate the Raising and Lowering of

ONE-LIGHT SASHES.

Nearly all modern buildings are constructed with single-light sashes, the raising and lowering of which is attended with difficulty.

The adjustment of the lower sash is especially inconvenient when screens are used.

These Sash Lifters will be found indispensable in overcoming this constant annoyance.

Latching is facilitated, window sticks and hooks done away with, springing the sash and loosening the glass prevented, &c.

Made of a strip of concave-convex metal, with knobs pressed up, and fitting over the bead on the side rail of sashes.

Made in any size from 28 to 44 inches in length.

Sample Cards, Price Lists and Circulars on application.

BRAINERD & CO.

THE BOSTON KNOB CO.,

MANUFACTURERS OF FINE DOOR KNOBS,

No. 169 HIGH STREET,

GEO. F. WHITING, (FORT HILL SQUARE.)

President and Manager.

THE peculiar qualities of the Knobs made by the Boston Knob Company are, their great *strength, beauty* and *durability.*

Unlike all others, they improve in appearance, while bronze, brass or wooden knobs commence to depreciate as soon as used. The Knobs manufactured by this Company do not require cleaning or polishing.

They are furnished in a variety of colors to harmonize with the finish or decoration of rooms.

They are warranted to wear as long as any knob made. This Company use the *New Boston Spindle.*

Send to the office of the Company for prices, or to any leading wholesale hardware dealer.

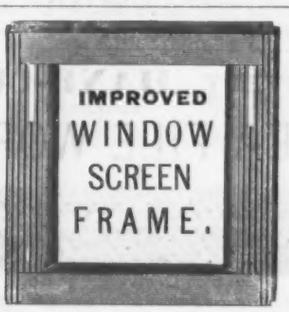
11 and 13 S. Canal St., - CHICAGO, ILL

This is a new departure in adjustable screens and is free from many objections found in others. It is **the only double** face screen, and equally well finished on both sides. It has a box panel, and can be adjusted without the friction noticeable in all other adjustable screens.



The Side Sticks are ⅞ x 2 inches. End 1⅞ x 1 inch. Stained Imitation Black Walnut.

Each Set is composed of Frame Slide and Strips to tack over wire.

These Frames are beaded and are slit 6 inches on one end to facilitate fitting to any window, by cutting if necessary.

These Sides are grooved the entire length, doing away with necessity of cutting grooves in end of top and bottom sticks as in other makes.

THE ROYAL DAUBER.

WITH MUD SCRAPER ATTACHED.

Patented April 26, and September 27, 1887.

An entirely new thing in Blacking Brushes, consisting solely of TINNED MALLEABLE IRON and PURE BRISTLES. **SOLID, ROUND-FACED, INDESTRUCTIBLE.**

SOLID.—Not bored and drawn, nor secured with pitch or cement. Not several small knots, but ONE SOLID KNOT OF PURE BRISTLES. NO HORSEHAIR.

ROUND-FACED.—Takes Blacking from the box on its centre instead of its edges, and will therefore spread it evener, smoother and thinner, ensuring a better polish than any flat-faced brush.

INDESTRUCTIBLE.—Because the only materials used are tin-coated iron and bristles, put together to stay, the knot of bristles being held IN ONE SOLID MASS, BY COMPRESSION, IN A GRIP OF IRON, and fastened with an iron rivet. Warranted not to "spread" or "clog" with blacking.

WILL OUTLAST A DOZEN OF ANY OTHER KIND.

This DAUBING BRUSH is made WITH A SCRAPER FOR REMOVING MUD FROM THE CREVICES OF THE SHOES. The utility of this is too apparent to need a word of commendation.

THE STRONGEST GLUE IN THE WORLD.

2 GOLD MEDALS AWARDED

LONDON 1883. NEW ORLEANS 1885.

RUSSIA CEMENT CO.

Gloucester, Mass.

SOMETHING NEW

THE PATENT ADJUSTABLE BRUSH.

Our new Patent Can can be carried in the pocket and used without danger of soiling from the can or brush; all superfluous glue is removed on wiper. This style is made in three sizes, half pint, gill and half gill. Our regular cans are half pint, pint, quart, two quart and gallon. Bottles, two sizes as heretofore.

At the New Orleans Exposition (where a Gold Medal was awarded) a piece of Georgia pine butted, one inch square, on a Testing Machine, registered 1620 lbs. before parting.

Does not set quickly like the old style Glues, and has FOUR TIMES the strength.

No Heating required.

No other Glues have the RECORD of 1620 lbs. to the square inch.

The fact that the sales of

LEPAGE'S
THE ONLY GENUINE
LIQUID GLUE

has greatly increased during the past year, so that we have been unable to manufacture the goods as fast as called for is the best proof that the public appreciates A GOOD THING.

To meet this demand we have recently greatly increased the capacity of our works, and have now the most scientifically arranged glue plant in the world, no expense having been spared which would in any way contribute toward the

ABSOLUTE PERFECTION

of the products.

THE WIDE AWAKE DEALER

is not slow to see that it pays him to keep in stock those goods which are sure of QUICK SALES. Don't be cajoled into buying the various Liquid Glues now in the market for which claims are made that cannot be substantiated.

That the Dealer and Public may be sure that they are not deceived in making their purchases we have commenced putting the autograph below on all the Genuine LePage Glues.

Russia Cement Co.

GLOUCESTER, MASS.

These Glues are used in the Smithsonian Institute, at Washington for all its works of mounting specimens, by the Government Arsenals and Department Buildings, by the Pullman Palace Car Co., Mason & Hamlin Organ and Piano Co., and by thousands of first-class manufacturers and mechanics throughout the world, for all kinds of fine work.

MANUFACTURED ONLY BY THE

Coes Wrench Co.,

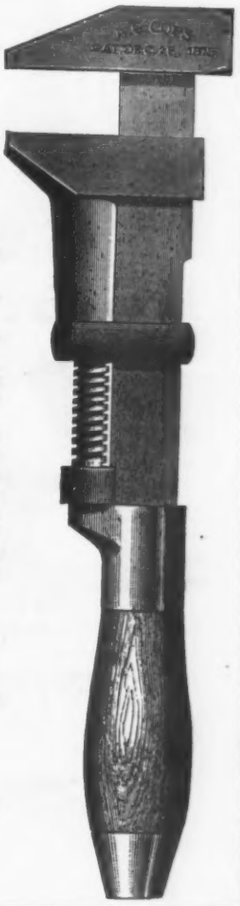
WORCESTER MASS.,

MANUFACTURERS OF

A. G. COES'

PATENT

SCREW WRENCHES,



The Strongest Wrench made, and the only successful re-enforced bar.

The Ferrule is firmly secured in place by a nut screwed on the bar.

Particular attention is called to the way in which the handle is made and fastened to the shank.

This Handle is made better and stronger than heretofore by using our new Cup Tip at the end which encloses the wood and keeps it from splitting. This is the only wrench which has the wood handle firmly secured and held together at each end, and it will stand more rough usage and last longer than any now made. It is not affected heat, cold or moisture.

None Genuine unless Stamped,

Bemis & Call Hardware & Tool Co.

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This Wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the wrench was new.

For Circulars and Price List, address

LIGHTNING HAY KNIVES

WEYMOUTH'S PATENT.

This Knife is the **BEST IN USE** for cutting down hay and straw in mow and stack, cutting fine feed from bale, cutting corn stalks for feed, cutting peat & ditching marshes. The blade is **Best Cast Steel**, spring temper, easily sharpened, and is giving *universal* satisfaction. A few moments' trial will show its merits, and parties once using it are unwilling to do without it. Its sales are fast increasing for export as well as home trade, and it seems destined to take the place of all other Hay Knives. They are nicely packed in boxes, 1 dozen each of 60 pounds weight, suitable for shipping by land or water to any part of the world.

Manufactured only by

HIRAM HOLT & CO. **EAST WILTON, Franklin Co., MAINE.**

For sale by the Hardware trade generally.

CAUTION.

We are informed that various parties are infringing upon the widely-known Letters Patent granted originally to GEORGE F. WEYMOUTH for an improved Hay Knife. The invention patented to GEORGE F. WEYMOUTH is embodied in a sword-shaped blade provided with operating handles for working the same, the edge of the sword-blade being furnished with knife-edged serrations or teeth. ☞ **It is our purpose to PROSECUTE ALL INFRINGEMENTS**, and to hold responsible to the full extent of our ability and of the law all parties who manufacture any knife infringing upon the patent, or who deal in the same. Several suits are now pending in the U. S. Courts. ☞ **All manufacturers and dealers are hereby warned** of our rights, and **the public are cautioned** against purchasing any Hay Knives, made as described above, which are not of our *genuine* manufacture.

EAST WILTON, Sept. 1, 1868.

JOBBERS!

We desire *One* Jobber in every city to handle our goods—your traveling men can pay all their expenses and net a handsome profit in addition by representing our goods on the road. Bradley's HEATING FORGES

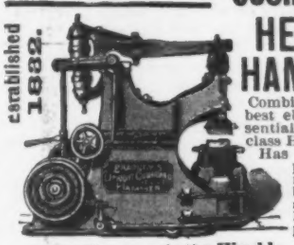
With a manufacturing experience of over half a century, we recommend these machines to be the best, simplest, most durable and combining all the essential elements.

For hard coal or coke. Indispensable in all shops to keep Bradley's Cushioned Hammers and men fully employed and reduces cost of production.

BRADLEY & CO., Syracuse, N. Y.

BRADLEY'S UPRIGHT CUSHIONED HELVE HAMMER

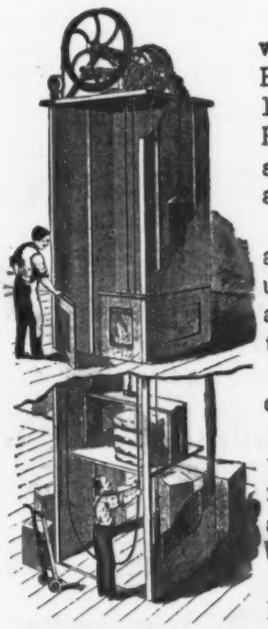


Combines all the best elements essential in a first-class Hammer. Has more good points, does more and better work and costs less for repairs than ...y other **Hammer** in the **World.**

BRADLEY & CO. Syracuse, N.Y.

THE HUMPHREY PONY HAND ELEVATOR.

(Patent Applied for.)



For light Store and Factory work, Hospitals and Public Buildings. For Trunk and Invalid lifts. For carrying Coal, Flour, Ashes and other heavy substances in Tenements, Flats and Private Dwellings.

So simple in construction, and price so low that it can be used in many places instead of a dumb waiter, and has many times the lifting capacity.

Capacity 500 pounds. Price of fixtures, $36 per set.

We are also manufacturers of the New York Safety Dumb Waiter fixtures, the most complete, simple and absolutely safe Dumb Waiter fixtures ever made.

Send for Descriptive Catalogue.

THE EDWARD STORM SPRING CO., Limited, Poughkeepsie, N. Y.

or JOHN H. GRAHAM & CO., Sole Mfrs.' Agents, 113 Chambers Street, New York.

WEST'S MOULDERS' TEXT BOOK

BEING PART II. OF AMERICAN FOUNDRY PRACTICE,

Giving the best methods and rules for obtaining good castings, with detailed description for making moulds. A thoroughly practical book that should be in the hands of every moulder.

PRICE, - Cloth, - 460 Pages, - - $2.50.

Sent, post-paid, on receipt of price by

DAVID WILLIAMS, Bookseller and Pulisher, 66 and 68 Duane St., New York.

IMPROVED
Labor-Saving
CARPENTERS' TOOLS.

STANLEY
RULE & LEVEL CO.
New Britain, Conn.

☞ The "Woodworker's Guide" mailed free, on application.

Stanley's Adjustable Chisel Gauge.

A principal use of this simple device will be found in finishing work, where Blind-Nailing is required. It can also be used for inlaying wood strips in ornamental surface work.

By attaching the Gauge to a ¼ inch Chisel (with beveled edge up) a shaving of any thickness can be raised with precision; and when glued down again, this shaving will fit its recess perfectly.

No. 96. Chisel Gauge, Steel Stock,..... .....$0 20

GATE CITY STONE FILTER CO.,

46 Murray St., New York.

☞ Fine China and Gray Stone-ware Jars to hold the Water.

☞ A NATURAL STONE for a Filtering Medium.

☞ Fitted with separate Patent Ice Chambers to cool the water.

☞ As easily cleaned a Water Pitcher.

☞ No objectionable material used in the construction of this Filter

All water is filled with impurities during the rainy season.

☞ This Filter will ABSOLUTELY CLEAN IT.

Open Cut shows Filter Disc used in our Filters, and Separate Patent Ice Chamber.

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.

Sent, postpaid, on receipt of the price, 75 cents, by

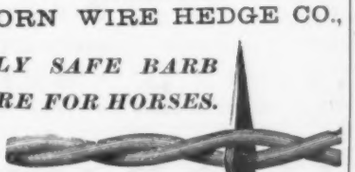
KELLY
BARB WIRE COMPANY,
SUCCESSORS TO
THORN WIRE HEDGE CO.,

ONLY SAFE BARB WIRE FOR HORSES.



A YIELDING BARB ROD to the POUND.

Sold only to One Dealer in a Place.

The great advantage of this style of barb is, that when an animal is pricked the barb will turn just enough to let him off without *tearing out the flesh.* It costs but little more per rod than the *hide-ripping wire usually sold. The Point is warranted* to be as durable as galvanizing.

Country Merchants will find it to their advantage in securing the agency on a class of goods that is in demand and that has no competitor of its kind. We also make both *Two* and *Four-Point Wire Barbs.*

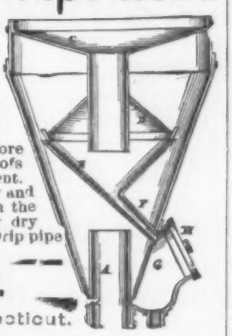
LYMAN

Steam Condensing Exhaust Pipe Head

For the protection of Roofs and Walls of Buildings from the Hot and Greasy Condensation emitted from Exhaust Pipes.



The water of Condensation from Exhaust Pipes of Steam Engines when discharged above roofs and alongside of walls will, in a short time, cause considerable damage in the rotting of roofs and also wash away the mortar in brick walls, as the condensation is always hot and therefore very destructive. This Exhaust Pipe Head will effectually keep the roofs and walls entirely dry and avoid the repairs on roofs formerly so frequent. Another advantage in the use of this Head is in protecting the passers-by and sidewalks from a shower of greasy water which invariably happens when the exhaust pipe is exposed near the street. The escape steam is perfectly dry and noiseless, and there is no back pressure on the Exhaust pipe. The Drip pipe conveys away the condensation wherever desired. Send for Circulars.

THE CLERK GAS ENGINE.

Highest Award for Gas Engines at American Institute Fair, New York, 1883.

Makes an ignition at every revolution of the Fly Wheel. Is started with ease, and gives full power immediately. No danger from fire; no extra insurance nor skilled engineer required. Runs perfectly steady; only uses gas when required. Workmanship of the best description and guaranteed. Indicated power considerably larger than in any other Gas Engine of the same size, each Engine giving from 1 H.-P. to 4 H.-P. more than named. Is unsurpassed by any other Gas Engine for running any kind of machinery or electric light, arc or incandescent. Has means for regulating to suit any coal or water gas.

No Boiler, Coal, Ashes or Engineer. Made in Sizes of 4, 8, 10, 15 and 25 H.-P.

HIGH-SPEED POWER TRAVELING CRANES.

We are now prepared to build **High-Speed Power Traveling Cranes** for any capacity of load, any length of runway and any width of span, with one or with two trolleys on the bridge, these trolleys to work either slow or fast, together or independently, in like or in opposite directions, horizontally or vertically, while the bridge can be traversing slow or fast at the same time in either direction. The speeds of bridge on runway are 100 *feet and* 200 *feet per minute;* the speeds of trolleys on bridge are 50 *feet and* 100 *feet per minute;* and there are four hoisting speeds of 5, 10, 20 *and* 40 *feet per minute;* all can be varied quickly without the least shock or jar from zero to maximum or to any intermediate speed. *The load is always automatically sustained, thus avoiding absolutely the great danger and anxiety which are inseparable from the use of those cranes which require the operator to apply the brake.* We have had one of these Cranes of 26 tons capacity in constant use in our foundry for nearly two years, and we offer them with full confidence for the greatest range of service. We invite the correspondence of parties interested in the subject.

July, 1887. WM. SELLERS & CO., Incorporated,
Philadelphia, Pa.

PATENT PORTABLE
ROPE HOIST.
ONE MAN SUFFICIENT.

The Best Quick Lift Hoist Made.

WILL HOLD A LOAD AT ANY POINT.

Ropes weigh less than chain. Can be used for long or short lifts. Without touching hand rope, the load may be quickly lowered by a slight steady pull on brake cord. Load rope can be pulled up or down by hand instead of pulling on hand rope to raise or lower empty hook. Send for descriptive circulars of specialties.

Screw Hoists.
18,000 in use.

Many have done hard continuous duty 5 years without a single part being renewed. This is the key of our success. They have built up a reputation themselves that cannot be approached Our improved
Radial Drills
are also assuming the same standard.

EDWIN HARRINGTON, SON & CO.,

ESTABLISHED 1867.
Cor. North 15th St. and Penna. Ave.,
PHILADELPHIA, PA.,

Branches: 115 Liberty St., New York; 31 N. Canal St., Chicago.

BELDEN'S
Upright Power Hammer.

This Hammer possesses advantages superior to any other in the market. It has neither cylinders, valves nor piston rods, consequently repairs are trifling. It takes up less space, less power to drive, strikes much harder and truer blows than hammers with double the weight of ram.

It can be worked to strike good alternate blows on a ½-inch and ¾-inch bar when a 100-pound hammer is used, and can be used on die work to a far greater advantage than any other hammer known. Manufactured by the

R. A. BELDEN COMPANY, Danbury, Conn.

Cut of 60 lb. Hammer.

CAUTION.

We desire to call your attention to the fact that the great reputation and popularity of our Machines have induced a concern to attempt an exact imitation thereof; also, issuing a fac-simile copy of our late catalogue. We find they have bought a full line of our Champion Lever Blowers, Champion Lever Forges and Eureka Tire Benders, taken them apart and used them as patterns, regardless of our "Patents." We simply wish to make the above facts known and warn all trespassers on our rights of our intention to prosecute.

IRON ORE PROPERTY.

For Sale or Lease, situate within three miles of the C. & O. Ry., at White Sulphur Springs, W. Va., about 3000 Acres, underlaid near surface by a persistent seam of red oxide iron ore from 10 to 60 feet in thickness. Numerous analyses show

61 per cent. Metallic Iron.
.07 per cent. Phos.
.05 per cent. Sulphur.

Six miles of outcrop have been proved by a number of openings. The helderberg limestones, more than 300 feet thick, are exposed at many points, and the hills containing the New River coking coals are within sight. There are good sites for furnace plants in the immediate vicinity, and ample water for all purposes. For further particulars, apply to

PROPOSALS FOR STEEL FOR USE IN THE CONSTRUCTION OF THE UNITED STATES ARMORED BATTLE-SHIP "TEXAS," AT THE NAVY YARD, PORTSMOUTH, VIRGINIA.—NAVY DEPARTMENT, Washington, D. C., June 21, 1888.—Under authority conferred by an act of Congress entitled "An act to increase the naval establishment," approved August 3 1886, (24 Statutes at Large, page 215,) sealed proposals are hereby invited, and will be received at this Department until 12 o'clock noon, on Monday, the 23d day of July, 1888, for furnishing the following classes of material for use in the construction of said ship: CLASS A.—*Steel plates.*—About nine hundred and twenty (920) tons of steel plates from 2½ to 25 pounds per square foot. CLASS B.—*Steel shapes.*—About five hundred and three (503) tons of steel shapes, as follows: About two hundred and seventy (270) tons of angle-bars of various sizes; about one hundred and thirty-two (132) tons of angle and T bulb beams with proper curvature, from 11 to 24½ pounds per lineal foot; about ten (10) tons of T-bars, of 8 pounds per lineal foot; about ninety-one (91) tons of channel-bars, of 10, 15 and 25 pounds per lineal foot. CLASS C.—*Steel rivets.*—About one hundred (100) tons steel rivets, from ⅜ inch to 1¼ inch diameter. CLASS D.—*Steel castings.*—About one hundred and twenty (120) tons of steel castings, of various shapes, including stem, stern-post, hawse-pipes, riding and mooring bitts, chain-pipes etc. The tons of material herein called for to be of 2,240 pounds each. All said material to be of such detailed dimensions, weights and shapes as may be required in the construction of the vessel, and to be delivered at such place or places in the Navy Yard, Portsmouth, Virginia, as may be designated by the Commandant of said Yard. Deliveries to commence within thirty (30) days from the date of contract, and to be completed within six (6) months from such date: the material to be delivered promptly, in accordance with a detailed schedule prepared by the Assistant Naval Constructor at said Navy Yard, and in the order required to carry on the work to the best interests of the Government. All material to be of domestic manufacture, and to be accepted only after passing such tests as may be prescribed therefor by the Secretary of the Navy. Proposals must be in accordance with forms which will be furnished on application to the Bureau of Construction and Repair, and may be for one or more of the classes designated, but no bid for a portion of any class will be considered. Each proposal must be accompanied by satisfactory evidence that the bidder is able to furnish and deliver the material for which he bids. Each proposal must be accompanied by a certified check, payable to the order of the Secretary of the Navy, for an amount equal to five per cent. of the bid. The check received from the successful bidder will be returned to him on his entering into a formal contract for the due performance of the work, and giving bond for the same, with satisfactory surety, in a penal sum equal to twenty-five per cent. of the amount of his bid; but in case he shall fail to enter into such contract and to give such bond within twenty days after notice of the acceptance of his proposal, the check accompanying such proposal shall become the property of the United States. All checks accompanying proposals which are not accepted will be returned immediately after the award shall have been made. Information relative to the dimensions and shapes of material, and all other information essential to bidders, will be furnished on personal application to the Bureau of Construction and Repair, Navy Department. Proposals must be made in duplicate, and enclosed in envelopes marked "Proposals for Steel for the Armored Battle-ship 'Texas'," and addressed to the Secretary of the Navy, Navy Department, Washington, D. C. Each class of materials will be bid for separately, and the Secretary of the Navy reserves the right to reject any or all bids, or the bids on any class or classes, as, in his judgment, the interests of the Government may require.

PROPOSALS FOR STEEL PLATES, &c.—June 30, 1888.—Sealed proposals endorsed "Proposals for Steel Plates, &c.," will be received from manufacturers or regular dealers only, at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., until 11 o'clock A. M., July 24, 1888, and opened immediately thereafter in the presence of bidders, for the supply, at the Navy Yard Washington, D. C., of 32 steel plates, 57,680 pounds; 16 angle-bars, 1,840 pounds; and 8 deck-beams, 624 pounds. Physical character of metal to be: Tensile strength, 70 000 pounds; elongation, 20 per cent.; contraction 35 per cent.; length of specimen (working part) equal to four times the diameter. Time of delivery, on or before August 30, 1888. Tie bids decided by lot. The above articles must pass the usual naval inspection, and a reservation of 20 per cent. will be withheld from the amount of each delivery until the completion of the contract. Bidders are referred to the Commandant at the Washington Navy Yard for specifications, forms of offer, and all information relative to the articles required. The proposals must be made in duplicate on the proper blank forms *and filled out as indicated by the blank.* The Department reserves the right to reject any proposal not considered advantageous to the Government.

JAMES FULTON, *Paymaster General, U.S. Navy.*

A GOOD HARDWARE BUSINESS FOR SALE.

Wishing to retire from all active business, the undersigned offer for sale their valuable and thoroughly established business. The stock is clean and well selected. Waverly, New York, is a growing place, with considerable manufacturing, and surrounded by a good farming country; has good water, gas works and sewers, also five railroads radiating from it. The location of the store building is central, with every convenience, including hydraulic elevator, &c. The business has been conducted successfully as wholesale and retail; can be continued as we have conducted it, or else we can soon reduce the stock, and it can be conducted as a retail alone.

In negotiating sale, reference given and required.

MERRIAM BROS., Waverly, N. Y.

Journal of the Society of Telegraph Engineers and Electricians. No. 71. With Papers on Alternate-Current Transformers, by G. Kapp.—Distribution of Electricity by means of Secondary Generators or Transformers, by J. K. D. Mackenzie—Formulæ for Converters, by Prof. Geo. Forbes. 8vo, paper.....$1.40

Tables for Calculating the Cubic Contents of Excavations and Embankments. Volume 2. By J. R. Hudson.....$1.00

Mechanics of Materials; a Treatise on the Elasticity and Strength of Beams, Columns, Arches, &c., for Students of Engineering. By Irving P. Church.....$3.00

Kinematics and Dynamics; an Elementary Treatise. By Ja. Gordon Macgregor.....$2.60

Treatise upon Cable or Rope Traction, as applied to the working of street and other railways. Revised and enlarged from *Engineering*. London. 4to. By J. Buchnall Smith.....$2.50

Tabulated Weights of Angles, Tees and Plates in Iron and Steel, for the use of shipbuilders, manufacturers, &c. By J. S. Capstaff.....$1.00

Treatise on Building and Buildings, Building Contracts, Leases, Easements and Liens. By A. P. Lloyd.....$5.00

Power in Motion: horse power, wheel gearing, driving bands and angular forces. Third edition, By J. Armour.....$0.80

Food Adulteration and its Detection, with photomicrographic plates and a bibliographical appendix. J. P. Battershall.....$3.50

Steam Boiler Explosions in Theory and Practice. By R. H. Thurston.....$1.50

Modern Theories of Chemistry. By Dr. Lothair Meyer. Translated from the German (5th edition), by P. Phillips Bedson and W. Carleton Williams, London.....$5.50

Journal of the Society of Telegraph Engineers and Electricians. No. 68.....$1.20

The Development of the Mercurial Air-Pump Reprinted with additions from Journal of the Society of Arts. Paper. By Prof. S. P. Thompson. $0.60

Spons' Engineers' Price Book. Giving tables for estimating cost of materials and labor on current prices (English) and many useful formulæ for the use of engineers and shipbuilders. Together with a list of members of the various engineering societies throughout the United Kingdom....$3.00

A Practical Treatise on the Steam Engine, containing plans and arrangements of details for fixed steam engines, with essays on the principles involved in design and construction. Illustrated with engravings and 96 plates. By Arthur Rigg.....$10.00

A Pocket-Book of Electrical Rules and Tables for use of Electricians and Engineers. Fifth edition, revised. 32mo, roan. By J. Munro and A. Jamieson.....$2.50

Architectural Drawing. With 9 colored and 15 plain plates. By R. P. Speirs. Preface to the American edition by W. R. Ware. 4-to.....$5.00

Voltaic Electricit . By T. F. Treglohan....$0.40

Elements of Dynamics; an introduction to the study of motion and rest in solid and fluid bodies. Part I. Kinematic, Book 4 and appendix. By W. R. Clifford.....$1.75

A B C Five-figure Logarithms. Differences on a new and simple plan. By C. J. Woodware..$1.00

Dictionary of Terms used in the Practice of Mechanical Engineering, embracing those current in the Drawing-office, Pattern-Shop, Foundry, Fitting, Turning, Smiths' and Boiler-Shops, &c., comprising upwards of 6000 definitions. Edited by a Foreman Pattern-maker. London. 1887.....$3.00

Lessons in Elementary Practical Physics. Volume II. Electricity and magnetism. By B. Stewart and W. V. H. Gee.....$2.25

Organic Analysis: A Manual of the Descriptive and Analytical Chemistry of certain Carbon Compounds in common use. For the Qualitative and Quantitative Analysis of Organic Materials; Commercial and Pharmaceutical Assays; The Estimation of Impurities under Authorized Standards—Forensic Examinations for Poisons; and Elementary Organic Analysis. By A. B. Prescott..$5.00

The Testing of Materials of Construction, embracing the description of testing machinery and apparatus auxiliary to mechanical testing, and an account of the most important researches on the strength of materials. By Wm. C. Unwin....$7.00

A New Basis for Chemistry. By Thomas Sterry Hunt.....$2.00

Principles of Dynamo-Electric Machines and practical directions for designing and constructing dynamos. With an appendix containing several articles on allied subjects, and a table of equivalents of units of measurement. 279 pages, with engravings. 12mo, cloth. By Carl Hering, $2.50

A History of Photography, written as a practical guide and an introduction to its latest developments. By W. J. Harrison.....$1.00

Pocket Book of Useful Formulæ and Memoranda for Civil and Mechanical Engineers. 22d edition, revised and enlarged. By G. L. Molesworth.... $2.00

Journal of the Society of Telegraph Engineers and Electricians. No. 69.....$0.80

Handbook of Modern Chemistry, Inorganic and Organic. Second edition, revised. London. By C. M. Tidy.....$5.50

Treatise on Navigation and Nautical Astronomy. By W. R. Martin.....$6.50

The Relative Proportions of the SteamEngine; a Course of Lectures. Third edition, revised and enlarged. Illustrated. By W. D. Marks....$3.00

Papers Literary, Scientific, &c. By Fleeming Jenkin, Edited by Sidney Colvin and J. A. Ewing, with a Memoir by R. L. Stevenson. 2 vols. Portrait and Diagrams. London.....$10.50

Astronomy for Amateurs. A practical manual of Telescopic Research in all latitudes adapted to the powers of moderate instruments. Illustrated. By J. A. W. Oliver.....$2.25

Practical and Analytical Chemistry. Third edition, revised, enlarged and illustrated. By J. Muter.....$2.00

Management of Accumulators, and Private Electric Light Installations. Third edition, revised and enlarged. London. By Sir D. Salomons. $1.20

Useful Hints to Sea-Going Engineers, and how to repair and avoid "Breakdowns".....$0.75

Locomotive-Engine Running and Management. A Practical Treatise on the Locomotive Engines, showing their performance in running different kinds of trains with economy and dispatch. Also directions regarding the care, management and repairs of Locomotives and all their connections. Illustrated by numerous engravings. 8th edition. By Angus Sinclair, M.E.....$2.00

Manual of the Sextant; containing instructions for its uses in determining time, latitude, longitude, and the variation of the compass. By C. W. Thompson.....$2.40

A Practical Manual of Minerals, Mines and Mining; comprising suggestions as to the localities and associations of all the useful minerals. With 171 engravings. By Prof. H. S. Osborn. $4.50

Turning Lathes; a manual for Technical Schools and Apprentices. A guide to Turning, Screw-Cutting, Metal Spinning, &c. With illustrations. By Jas. Lukin.....$1.00

Color. A scientific and technical manual, treating of the optical principles, artistic laws, and technical details governing the useful colors in various arts. Illustrations. By A. H. Church.....$1.00

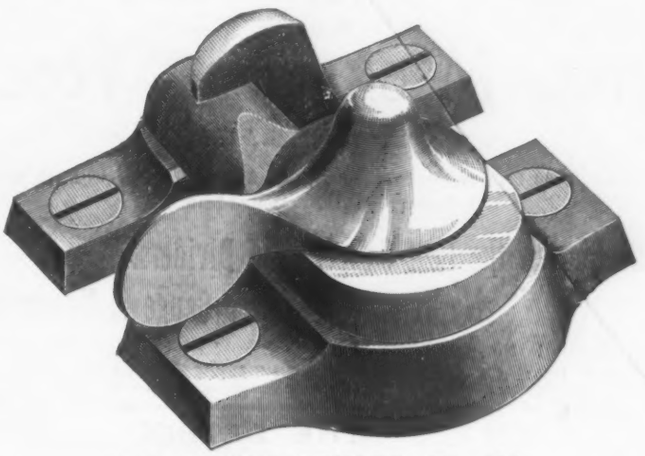
HARRINGTON & RICHARDSON ARMS CO., Worcester, Mass., U.S.A.

THE IVES PATENTED

SASH LOCKS AND MORTISE BOLTS

A very important feature of the IVES SASH LOCK, is in its securely locking when closed and simultaneously drawing the meeting rails closely together All the movements are accomplished by cams without the instrumentality of springs, thus avoiding the possibility of getting out of order.



IVES' PATENT BURGLAR PROOF SASH LOCKS AND MORTISE BOLTS are made under TWELVE PATENTS, but are no more expensive than many of the more common bolts and sash fasteners now on the market.

ARE MANUFACTURED IN ALL

STYLES OF FINISH.

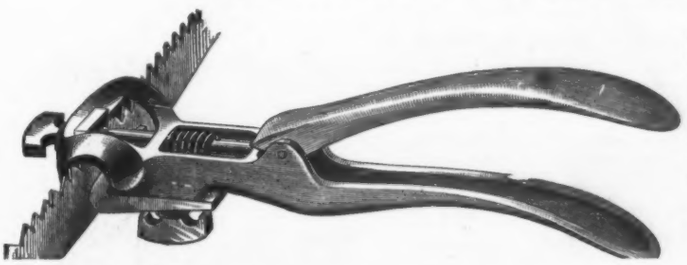
MORRILL'S PERFECT SAW-SETS.



On the application by the administratrix of the estate of the late Asa Farr, for the appointment of a receiver, the New York Supreme Court decided that the business in saw-sets carried on by Mr. Charles Morrill, at 64 College Place, since the death o Mr. Farr, belonged to the Farr estate—the court saying:

"After Farr's death Morrill could not seize upon the books office and assets of Farr's businessand by an usurpation of owner ship undertake to substitute himself in Farr's place in the busi ness the latter had built up."

Under the instructions of the court I shall continue the manufacture and sale of the Morrill saw-set.

CHAUNCEY S. TRUAX, Receiver in FARR *vs.* MORRILL.

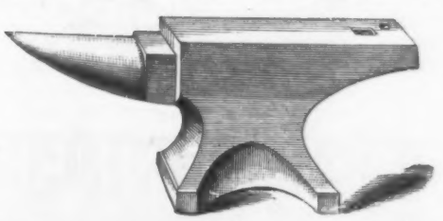
Peter Wright's Patent Solid Wrought Anvil.

PETER WRIGHT PATENT SOLID WROUGHT

Fac-simile of Trade Mark.



Fac-simile of Green Label.

By Royal Letters Patent. V. R.

PETER WRIGHT'S SOLID WROUGHT **ANVIL**

Made of Best Scrap Iron!

THE BICK FACE AND END ALL IN ONE SOLID PIECE!

The high reputation attained by these Anvils has led makers of an inferior anvil to imitate the brand, with the view of thereby more readily marketing their goods. The trade is cautioned in buying to see that each anvil is stamped with the full trade mark on one side and has the green label affixed to the other; fac-similes of both are shown above.

Lane's Measuring Faucet.

LANE'S PATENT STEEL DOOR HANGER.

The most perfect Anti-Friction Hanger in the Market, because

It is made of steel throughout, except the wheel, which has a steel axle. It will not break. It is practically free from wear. It is almost noiseless in action. It requires no oil. It has a broad bearing on the door, and keeps in line. It is by far the most durable. It may be used with any track. It is always in order. **LANE'S PATENT TRACK** is made of steel and is easily put in position. Catches and holds no snow or ice. Door hung thereon cannot jump the track. Is not subject to decay. Requires no fitting, but is ready at once. May be used with hangers of other manufacture. Send for circulars.

Manufactured by LANE BROS., Poughkeepsie, N. Y.

WIGGER'S

PATENT SASH LIFTERS

A simple contrivance designed to facilitate the Raising and Lowering of

ONE-LIGHT SASHES.

Nearly all modern buildings are constructed with single-light sashes, the raising and lowering of which is attended with difficulty

The adjustment of the lower sash is especially inconvenient when screens are used.

These Sash Lifters will be found indispensable in overcoming this constant annoyance.

Latching is facilitated, window sticks and hooks done away with, springing the sash and loosening the glass prevented, &c.

Made of a strip of concave-convex metal, with knobs pressed up, and fitting over the bead on the side rail of sashes.

Made in any size from 28 to 44 inches in length.

Sample Cards, Price Lists and Circulars on application.

Anti-Friction

Steel Door Hanger and Rail

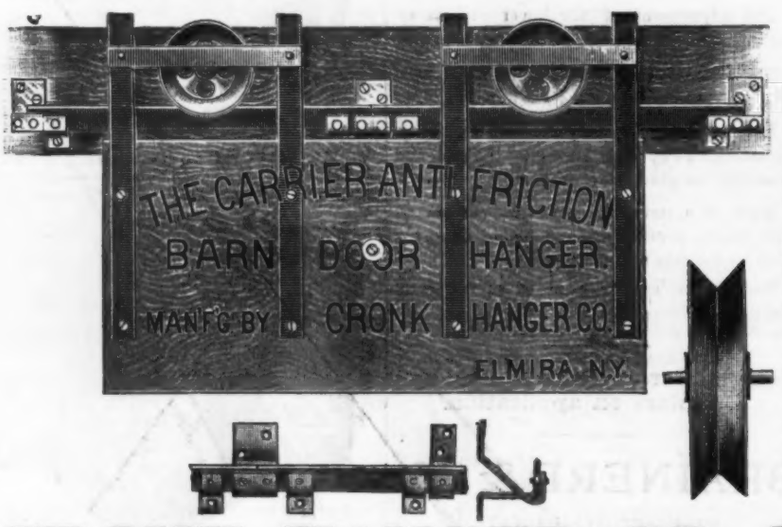
COMPACT. SIMPLE.
CHEAP. DURABLE.

Send for Catalogue.

Dealers using bracket track are requested to try our Steel Moody Hanger and Rail, it being cheaper and as good as any Hanger of this class.

VICTOR MFG. CO..

NEWBURYPORT, MASS.



Carrier's Anti-Friction Steel Barn-Door Hanger.

This hanger is made entirely of Steel (with exception of wheels), which have Steel axles.

The wheels are V shape, thereby preventing any friction, for the reason that the side of the groove cannot touch the track and grind on the edges, as a straight groove would do.

IT CANNOT BE THROWN FROM THE TRACK.

If for any reason the door should be raised, the wheels remain on the track and ready to receive the door when falling back. No oil required—never screeches or grinds, and guaranteed to work easier than any Hanger on the market.

We call special attention to our Double Braced Steel Track (as shown in cut), and which has commended itself to all who have examined its merits, and must become the universal favorite. Can be put up with 1 in. No. 9 screws, each bracket (which are 15 inches apart) sustaining over 1000 lbs. weight, thereby carrying heavy doors with perfect ease.

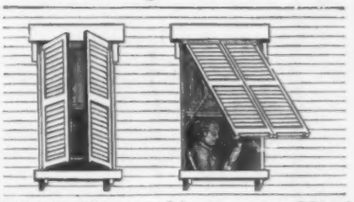
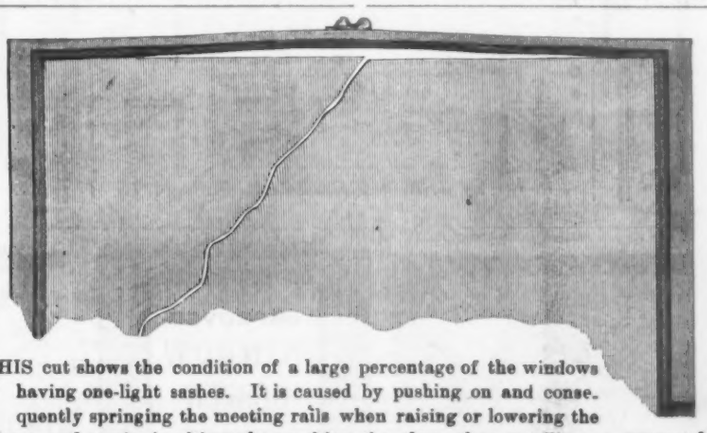
The "AUTOMATIC" Blind Awning Fixture.



Attachable to old or new blinds. They ventilate and cool the room, giving free circulation of air and refreshing shade, and do not interfere with the ordinary use of the blinds. Sold by the hardware trade.



THIS cut shows the condition of a large percentage of the windows having one-light sashes. It is caused by pushing on and consequently springing the meeting rails when raising or lowering the windows, and results in ultimately cracking the glass, thus entailing an expense for repairs greater than the cost of applying Wigger's Patent Sash Lifters. These Sash Lifters obviate this trouble and also prove a great convenience in operating this class of windows, as previously described in the columns of *The Iron Age*.

The steadily increasing demand for these goods proves their utility, and also that both Architects and their Clients appreciate their merits, and that many Architects have specified them on buildings to be completed this fall. We shall be pleased, therefore, to send samples, sample cards and circulars (with blank space for dealers' name), on application, as the goods will be supplied exclusively through the Builders' Hardware Trade.

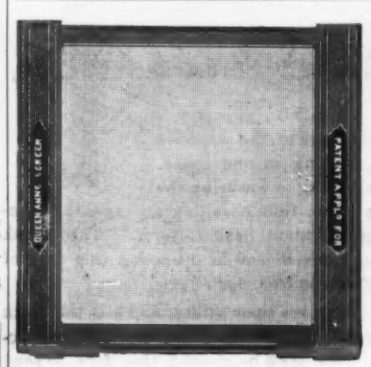
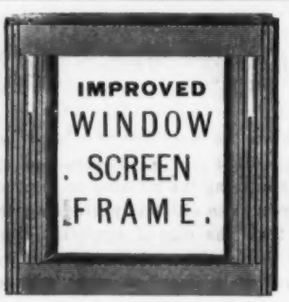
84	4 "	"	0.80
85	5 "	"	0.90

by J. F. WOLLENSAK, Chicago, Ill.



This is a new departure in adjustable screens and is free from many objections found in others. It is **the only double** face screen, and equally well finished on both sides. It has a box panel, and can be adjusted without the friction noticeable in all other adjustable screens.



The Side Sticks are ⅞ x 2 inches. End ⅞ x 1 inch. Stained Imitation Black Walnut.

Each Set is composed of Frame Slide and Strips to tack over wire.

These Frames are beaded and are slit 6 inches on one end to facilitate fitting to any window, by cutting if necessary.

These Sides are grooved the entire length, doing away with necessity of cutting grooves in end of top and bottom sticks as in other makes.

THE STRONGEST GLUE IN THE WORLD.

2 GOLD MEDALS AWARDED LONDON 1883 NEW ORLEANS 1885.

RUSSIA CEMENT CO. Gloucester, Mass.

SOMETHING NEW THE PATENT ADJUSTABLE BRUSH.

Our new Patent Can can be carried in the pocket and used without danger of soiling from the can or brush; all superfluous glue is removed on wiper. This style is made in three sizes, half pint, gill and half gill. Our regular cans are half pint, pint, quart, two quart and gallon. Bottles, two sizes as heretofore.

At the New Orleans Exposition (where a Gold Medal was awarded) a piece of Georgia pine butted, one inch square, on a Testing Machine, registered 1620 lbs. before parting.

Does not set quickly like the old style Glues, and has FOUR TIMES the strength.

No Heating required.

No other Glues have the RECORD of 1620 lbs. to the square inch.

The fact that the sales of

LEPAGE'S

THE ONLY GENUINE

LIQUID GLUE

has greatly increased during the past year, so that we have been unable to manufacture the goods as fast as called for is the best proof that the public appreciates A GOOD THING.

To meet this demand we have recently greatly increased the capacity of our works, and have now the most scientifically arranged glue plant in the world, no expense having been spared which would in any way contribute toward the ABSOLUTE PERFECTION of the products.

THE WIDE AWAKE DEALER is not slow to see that it pays him to keep in stock those goods which are sure of QUICK SALES. Don't be cajoled into buying the various Liquid Glues now in the market for which claims are made that cannot be substantiated.

That the Dealer and Public may be sure that they are not deceived in making their purchases we have commenced putting the autograph below on all the Genuine LePage Glues.

Russia Cement Co.
GLOUCESTER, MASS.

These Glues are used in the Smithsonian Institute, at Washington for all its works of mounting specimens, by the Government Arsenals and Department Buildings, by the Pullman Palace Car Co., Mason & Hamlin Organ and Piano Co., and by thousands of first-class manufacturers and mechanics throughout the world, for all kinds of fine work.

MANUFACTURED ONLY BY THE RUSSIA CEMENT CO., GLOUCESTER, MASS.

Coes Wrench Co.,

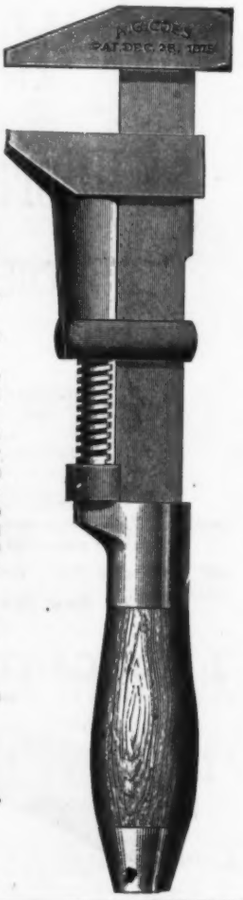
WORCESTER MASS.,

MANUFACTURERS OF

A. G. COES'

PATENT

SCREW WRENCHES,



The Strongest Wrench made, and the only successful re-enforced bar.

The Ferrule is firmly secured in place by a nut screwed on the bar.

Particular attention is called to the way in which the handle is made and fastened to the shank.

This Handle is made better and stronger than heretofore by using our new Cup Tip at the end which encloses the wood and keeps it from splitting. This is the only wrench which has the wood handle firmly secured and held together at each end, and it will stand more rough usage and last longer than any now made. It is not affected heat, cold or moisture.

None Genuine unless Stamped,

A. G. COES & CO.

Warehouse:

Bemis & Call Hardware & Tool Co.

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This Wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

ECLIPSE POST HOLE DIGGER

The *Greatest* LABOR-SAVING tool ever invented for digging holes in the ground. This machine works on a NEW PRINCIPLE, and is UNLIKE ANYTHING in the market.

One man can dig from *two* to *three hundred* holes two feet deep in ordinary ground in one day.

It will dig holes any *size* or *depth* required, and will work successfully in *very hard* or *rough* ground.

You stand up straight while using it, consequently no back-breaking work.

Great inducement to Hardware Dealers. Send for circular and price list to **LAGONDA MFG. CO.**, Successors to P. J. COLE & CO., Box 187 N., Springfield, Ohio.

THE NEW EASY LAWN MOWER

The leading mower in the market.

Front Cut. Steel. Open Roller Traction. Easy and Noiseless in Operation

The only mower that will cut *Wet Grass, Narrow Borders*, and close to walls and fences. Warranted in every particular.

Manufactured by **BLAIR MFG. CO.,** Springfield, Mass.

MEDIUM SIZE "NEW EASY."

LIGHTNING HAY KNIVES

WEYMOUTH'S PATENT.

This Knife is the **BEST IN USE** for cutting down hay and straw in mow and stack, cutting fine feed from bale, cutting corn stalks for feed, cutting peat & ditching marshes. The blade is **Best Cast Steel**, spring temper, easily sharpened, and is giving *universal* satisfaction. A few moments' trial will show its merits, and parties once using it are unwilling to do without it. Its sales are fast increasing for export as well as home trade, and it seems destined to take the place of all other Hay Knives. They are nicely packed in boxes, 1 dozen each of 60 pounds weight, suitable for shipping by land or water to any part of the world.

Manufactured only by

HIRAM HOLT & CO. **EAST WILTON, Franklin Co., MAINE.**

For sale by the Hardware trade generally.

CAUTION.

We are informed that various parties are infringing upon the widely-known **Letters Patent** granted originally to GEORGE F. WEYMOUTH for an improved Hay Knife. The invention patented to GEORGE F. WEYMOUTH is embodied in a sword-shaped blade provided with operating handles for working the same, the edge of the sword-blade being furnished with knife-edged serrations or teeth. **☞ It is our purpose to PROSECUTE ALL INFRINGEMENTS,** and to hold responsible to the full extent of our ability and of the law all parties who manufacture any knife infringing upon the patent, or who deal in the same. Several suits are now pending in the U. S Courts. **☞ All manufacturers and dealers are hereby warned of our rights, and the public are cautioned against purchasing any Hay Knives, made as described above, which are not of our *genuine* manufacture.**

EAST WILTON, Sept. 1, 1886.

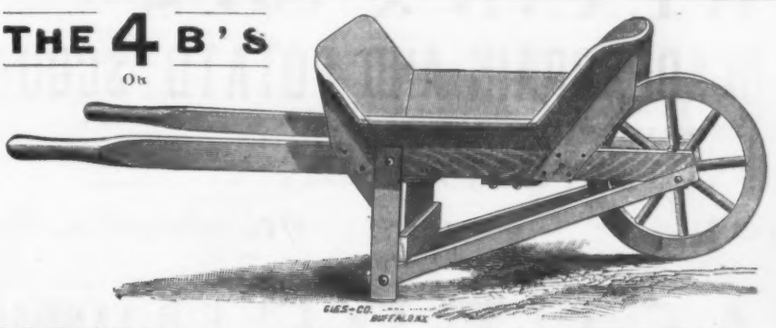
THE 4 B'S

On



BRONSON'S BEST BOLTED BARROW.

Full size, bent tray, planed, well finished and bolted. The legs and braces are bolted in such a manner as to form a very substantial frame. This wheelbarrow has all the merits of the so-called bolted barrows, but is not the equal of the Champion, Champion, Jr., or Champion King, these being the styles which have given the Bolted Wheelbarrow a world-wide reputation.

It is wonderful how good you can make even a cheap article when you apply earnest, active thought and nimble fingers. The above cut represents a cheap wheelbarrow, and yet it is so good that it surprises all

If you want to see the newest and best selling wheelbarrow that was ever made, write for our catalogue and examine the different sizes of Fay's Combined Tray and Side Wheelbarrow. We make wheelbarrows of every description. Let us figure with you before you place your order.

"RIVAL"

PATENT

Lawn Sprinkler.

Cheapest and Best in Use.

The Spray from it covers upwards of 1000 sq. feet of lawn. It is the only patent adjustable Sprinkler which is adaptable to any water pressure. Being made of brass, and having no revolving parts to wear out, or small openings to clog up it can be operated with sandy or muddy water as well as clear, and will last for years. To operate, screw Sprinkler on end of hose, stick the rod into the ground in a vertical position, adjust the acorn to suit pressure and spray wanted and it is ready for use. It may be so regulated as to throw a spray *as coarse as rain* or *as fine as mist*, and will make one of the most beautiful fountains imaginable. It is unequaled in merit, requires no attention and is sold at a less price than any sprinkler in the market. Remember, the RIVAL is the only Sprinkler made by which the coarseness of the spray and the area to be wet can be regulated. They are packed 1 doz. in a box, and finished either plain or nickel-plated.

ROOT'S HANDY CLOTH-BOUND HARDWARE PRICE CARDS.

COPYRIGHTED 1885.

THESE cards cover the lines having a large variety of sizes or numbers, save marking each package or article, in Retail stores, and are convenient for use in Wholesale Sample Rooms. They secure correct and uniform selling prices, for large and small buyers, save time, and are intended for years of constant use. Hence, no hardware dealer can afford to do without them, or spend the time to write and rule out cards by hand. They are printed in distinct type on the best paper, appropriately ruled with blue cross lines and red down rulings, for noting in pencil—List, Cost, Jobbing and Selling prices—as in specimen headings, shown herewith. Card A is mounted one side and B the other side of a tough, heavy card board, especially adapted for this use, protected on the edges by being *cloth-bound*, which saves framing. Two-thirds of them are 3 x 13½ inches. This size has been found convenient for hanging on a pilaster finish, or on any narrow surface, without hiding the goods. To hang or chain up each card, there is firmly inserted through the nickel-plated eyelet about 9/64 inch inside diameter. The comparative numbers of the different makers of cabinet and padlocks, rules, levels, etc., have been carefully corrected to the date of issue and many numbers added. Most houses require 6 to 12 cards extra, of each Nos. 32 and 33, to price lines not covered by the other numbers.

Graham, Jno. H & Co., 113 Chambers St., New York.
Ives H. B. & Co., New Haven, Conn.

Sash Pulleys.
Empire Portable Forge Co., Cohoes, N. Y.
Palmer Hardware Mfg. Co, Troy, N. Y.

Saws, *Makers of.*
Atkins, E. C. & Co., Indianapolis, Ind.
Blake & Johnson, Waterbury Ct.
Wheeler, Madden & Clemson Mfg. Co., Middletown, N. Y.

Saw Sets.
Truax, Chauncey S., 64 College Place N. Y.

Scales, *Manufacturers of.*
Buffalo Scale Co., Buffalo, N. Y.
Chatillon John & Sons, Cliff, N. Y
Howe Scale Co., Rutland, Vt.
Riehlé Bros., Philadelphia.
Troemner, Henry.

Screw Cutting Machinery.
Wells Bros. & Co., Greenfield, Mass
Wiley & Russell Mfg. Co., Greenfield, Mass.

Screw Drivers.
Brown, R. H. & Co., New Haven, Ct.
Kilrich Hdw. Mfg. Co., Plantsville, Conn.

Screw Plate and Pipe Cutter.
Jarecki Mfg. Co., Erie, Pa.

Screws, *Makers of.*
Wm. H. Haskell Co., Pawtucket.
Miles F. S., 205 Quarry, Philadelphia
Worcester Machine Screw Co., Worcester, Mass.

Scroll Saws.
Seneca Falls Mfg. Co., Seneca Falls N. Y

Scythe Stones and Whetstones
A. F. Pike Mfg. Co., Pike Stat'n, N.H.
Cleveland Stone Co., Cleveland, O.
Lake Huron Stone Co., Detroit and Chicago.

Shafting, *Makers of.*
Cresson Geo. V., Philadelphia, Pa.
Pierson & Co 24 to 27 West, N. Y.
Wood, Thos. & Co., Phila., Pa.

Shears, Iron.
E. W. Bliss Co., Brooklyn, N. Y.

Shears and Scissors.
Acme Shear Co., Bridgeport, Conn.
Henry Seymour Cutlery Co., N. Y.
Schollhorn & Co., New Haven, Ct.

Sheep Shears.
Henry Seymour Cutlery Co., N. Y.

Shovels, Spades and Scoops.
Hussey, Binns & Co., Pittsburgh, Pa.
Rowlands Sons, T., Philadelphia, Pa.
Sanford Fork and Tool Co., Terre Haute, Ind.

Shutter Worker.
Dodd Shutter Worker Co., 26 Church, N. Y.

Sinks.
Douglas W. & B., Middletown, Conn.

Smelting Works.
Reeves Paul S., 760 S. Broad, Phila.

Speaking Tubes.
Ostrander W. R. & Co., N. Y.
Walsh Owen, 105 Walker, N. Y.
Wollensak, J. F., Chicago, Ill.

Sporting Goods.
Field, J. B. & Co., Detroit, Mich.
Shields, Jno. & Co., Brookline, Mass.

Spelter.
Manning & Squier, 111 Liberty, N. Y.

Springs.
Dunbar Bros., Bristol, Conn.

Bradley's HEATING FORGES

Established 1832

Pat. Aug. 30, 1887

With a manufacturing experience of over half a century, we recommend these machines to be the best, simplest, most durable and combining all the essential elements.

For hard coal or coke. Indispensable in all shops to keep Bradley's Cushioned Hammers and men fully employed and reduces cost of production.

BRADLEY & CO., Syracuse, N. Y.

BRADLEY'S UPRIGHT CUSHIONED HELVE HAMMER

established 1882.

Combines all the best elements essential in a first-class Hammer. Has more good points, does more and better work and costs less for repairs than any other Hammer in the World.

BRADLEY & CO. Syracuse, N.Y.

GATE CITY STONE FILTER CO.,

46 Murray St., New York.

- Fine China and Gray Stone-ware Jars to hold the Water.
- A NATURAL STONE for a Filtering Medium.
- Fitted with separate Patent Ice Chambers to cool the water.
- As easily cleaned a Water Pitcher.
- No objectionable material used in the construction of this Filter

All water is filled with impurities during the rainy season.

- This Filter will ABSOLUTELY CLEAN IT!

Address as above for Descriptive Price List. Mention *The Iron Age.*

Open Cut shows Filter Disc used in our Filters, and Separate Patent Ice Chamber.

Cannon's Diamond Point Nail Sets have now been on the market long enough to prove true the many merits we claim for them, and they are to-day the best known, the most largely used, and universally popular Nail Set ever made. They can be bought from all Jobbers in Hardware in the United States, and are also sold in Canada, England, Germany, Australia, New Zealand and Mexico. For catalogue and price address the manufacturers,

THE EDWARD STORM SPRING CO., Limited, Poughkeepsie, N. Y.

or, JOHN H. GRAHAM & CO., Sole Mf'rs Agents, 113 Chambers St., New York.

This Plane will do perfect chamfer or stop chamfer work. For Beading, Reeding or Moulding a chamfer, an additional section is furnished (price $1.00) with six cutters, sharpened at both ends, including a large variety of ornamental forms.

No. 72. Chamfer Plane, 9 inches in length, 1⅝ inch Cutter...$2 00
No. 72½. Chamfer Plane, with Beading Attachment..... 3 00

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.

Sent, postpaid, on receipt of the price, 75 cents, by

DAVID WILLIAMS
66 and 68 Duane Street, New York.

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.

Sent postpaid, on receipt of the price, 75 cents, by

DAVID WILLIAMS,

66 and 68 Duane Street, New York.

THE CLERK GAS ENGINE.

Highest Award for Gas Engines at American Institute Fair, New York, 1883.

Makes an ignition at every revolution of the Fly Wheel. Is started with ease, and gives full power immediately. No danger from fire; no extra insurance nor skilled engineer required. Runs perfectly steady; only uses gas when required. Workmanship of the best description and guaranteed. Indicated power considerably larger than in any other Gas Engine of the same size, each Engine giving from 1 H.-P. to 4 H.-P. more than named. Is unsurpassed by any other Gas Engine for running any kind of machinery or electric light, arc or incandescent. Has means for regulating to suit any coal or water gas.

No Boiler, Coal, Ashes or Engineer. Made in Sizes of 4, 8, 10, 15 and 25 H.-P.

THE CLERK GAS ENGINE CO., 1012-1016 Filbert St., Philadelphia.

HIGH-SPEED POWER TRAVELING CRANES.

We are now prepared to build **High-Speed Power Traveling Cranes** for any capacity of load, any length of runway and any width of span, with one or with two trolleys on the bridge, these trolleys to work either slow or fast, together or independently, in like or in opposite directions, horizontally or vertically, while the bridge can be traversing slow or fast at the same time in either direction. The speeds of bridge on runway are 100 *feet and* 200 *feet per minute;* the speeds of trolleys on bridge are 50 *feet and* 100 *feet per minute;* and there are four hoisting speeds of 5, 10, 20 *and* 40 *feet per minute;* all can be varied quickly without the least shock or jar from zero to maximum or to any intermediate speed. *The load is always automatically sustained, thus avoiding absolutely the great danger and anxiety which are inseparable from the use of those cranes which require the operator to apply the brake.* We have had one of these Cranes of 26 tons capacity in constant use in our foundry for nearly two years, and we offer them with full confidence for the greatest range of service. We invite the correspondence of parties interested in the subject. WM. SELLERS & CO., Incorporated,

July, 1887. Philadelphia, Pa.

PATENT PORTABLE

ROPE HOIST.

ONE MAN SUFFICIENT.

The Best Quick Lift Hoist Made.

WILL HOLD A LOAD AT ANY POINT.

Ropes weigh less than chain. Can be used for long or short lifts. Without touching hand rope, the load may be quickly lowered by a slight steady pull on brake cord. Load rope can be pulled up or down by hand instead of pulling on hand rope to raise or lower empty hook. Send for descriptive circulars of specialties.

BELDEN'S
Upright Power Hammer.

This Hammer possesses advantages superior to any other in the market. It has neither cylinders, valves nor piston rods; consequently repairs are trifling. It takes up less space, less power to drive, strikes much harder and truer blows than hammers with double the weight of ram.
It can be worked to strike good alternate blows on a ½-inch and ⅝-inch bar when a 100-pound hammer is used, and can be used on die work to a greater advantage than any other hammer known. Manufactured by the
R. A. BELDEN COMPANY, Danbury, Conn.
Cut of 60 lb. Hammer.

HIGGINSVILLE, Mo., July 1, 1887.

Hooker-Colville Steam Pump Co., St. Louis, Mo.:

GENTLEMEN:—We have been using one of your No. 4 Piston Pumps for nearly a year to our entire satisfaction. We have not had any trouble with it since it started. We are more than pleased with the Pump, it is **always ready** and does its work to perfection, and we unhesitatingly recommend it to any one needing Steam Pumps.

Very respectfully,
THE HIGGINSVILLE MILLING CO.,
L. T. LAND, Manager.

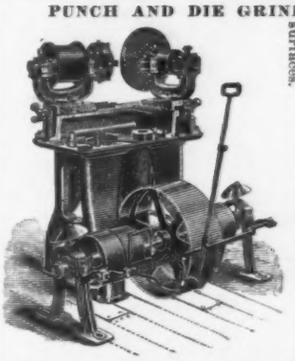
No. 3.—Surface Grinding Machine,

and No. 3 Column with Countershaft and Patent Belt Shifter combined.

A good all-around tool; complete in every detail; surface plate folds back out of the way when not used for surfacing; arranged for on bench or plain columns, with overhead counter, or counter on columns together as shown; 3 sizes; has large sale.

PUNCH AND DIE GRINDER.



This machine is used for grinding punches and dies, such as are used in making Bolts, Rivets, Screws and a large variety of square or circular pieces requiring one or more finished faces. It works equally well on hard steel, chilled iron or softer metals. It can be arranged to grind convex, concave or flat surfaces.

Work can be ground to any desired thickness or several pieces ground to the same thickness.

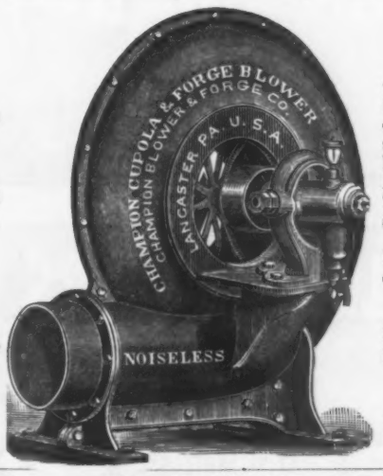
Champion Steel Pressure Blowers, Fan Blowers, Exhaust Fans,

To suit every Possible Situation and Kind of Work.

ALSO A FULL LINE OF

Lever and Crank Blowers, Portable Forges, Stationary Forges, Blacksmiths' Drills, Tire Benders, Tuyere Irons, &c., &c., &c.



CAUTION.

We desire to call your attention to the fact that the great reputation and popularity of our Machines have induced a concern to attempt an exact imitation thereof; also, issuing a facsimile copy of our late catalogue. We find they have bought a full line of our Champion Lever Blowers, Champion Lever Forges and Eureka Tire Benders, taken them apart, and used them as patterns, regardless of our "Patents."

We simply wish to make the above facts known and warn all trespassers on our rights of our intention to prosecute.

NOTICE.—The valuable feature of our Power Fan Blowers and Steel Pressure Blowers is our Champion Journal Box. It has a universal adjustment whereby it comes readily into perfect line with the shaft.

REMEMBER

our goods are sold strictly on their merits, and each and every article sold is guaranteed to give entire satisfaction. Write for our 64-page catalogue.

IRON ORE PROPERTY.

For Sale or Lease, situate within three miles of the C. & O. Ry., at White Sulphur Springs, W. Va., about 3000 Acres, underlaid near surface by a persistent seam of red oxide iron ore from 10 to 60 feet in thickness. Numerous analyses show

61 per cent. Metallic Iron.
.07 per cent. Phos.
.05 per cent. Sulphur.

Six miles of outcrop have been proved by a number of openings. The helderberg limestones, more than 300 feet thick, are exposed at many points, and the hills containing the New River coking coals are within sight. There are good sites for furnace plants in the immediate vicinity, and ample water for all purposes. For further particulars, apply to

DIAMOND MACHINE CO.,
Providence, R. I.

A GOOD HARDWARE BUSINESS FOR SALE.

Wishing to retire from all active business, the undersigned offer for sale their valuable and thoroughly established business. The stock is clean and well selected. Waverly, New York, is a growing place, with considerable manufacturing, and surrounded by a good farming country; has good water, gas works and sewers, also five railroads radiating from it. The location of the store building is central, with every convenience, including hydraulic elevator, &c. The business has been conducted successfully as wholesale and retail; can be continued as we have conducted it, or else we can soon reduce the stock, and it can be conducted as a retail alone.

In negotiating sale, reference given and required.

MERRIAM BROS., Waverly, N. Y.

FOR SALE.

AN UNUSUAL OFFER.

An old established Hardware Business doing the leading wholesale and retail trade in one of the best towns in Minnesota. This is an opportunity seldom offered. Reason for sale, death of proprietor. Address

ASSIGNEE'S SALE.

Smith, Beggs & Ranken Machine Company Property!

Embracing nearly an **Entire Block of City Real Estate** described as follows: The **whole Main Street front of City Block No. 29**, being 240 feet on West side of said street, with a frontage of **160 feet on East side of Second Street; 300 feet on South side of Monroe Street** (entire block front), by **150 feet on North side of Clinton Street**; being Lots Nos. 34, 35, 36, 62 and 63 of said Block; also all the improvements, machinery, fixtures, tools and patterns on the above described premises.

This property (being one of the largest and most complete establishments of the kind in the Western Country) will be sold by the undersigned, by order of Court, at Auction, on the premises, to the highest bidder, for cash, subject to a mortgage of about $60,000, on Tuesday, the 21st day of August, 1888, between the hours of 12 o'clock noon and 2 o'clock p. m. of said day.

WM. H. THOMSON, ASSIGNEE,
at Boatmen's Saving Bank,
St. Louis, Mo., July 9th, 1888.

PROPOSALS FOR STEEL PLATES, &c.—June 30, 1888.—Sealed proposals endorsed "Proposals for Steel Plates, &c.," will be received from manufacturers or regular dealers only, at the Bureau of Provisions and Clothing, Navy Department, Washington, D. C., until 11 o'clock A. M., July 24, 1888, and opened immediately thereafter in the presence of bidders, for the supply, at the Navy Yard, Washington, D. C., of 32 steel plates, 57,680 pounds; 16 angle-bars, 1,840 pounds; and 8 deck-beams, 624 pounds. Physical character of metal to be: Tensile strength, 70 000 pounds; elongation, 20 per cent.; contraction 35 per cent.; length of specimen (working part) equal to four times the diameter. Time of delivery, on or before August 30, 1888. Tie bids decided by lot. The above articles must pass the usual naval inspection, and a reservation of 20 per cent. will be withheld from the amount of each delivery until the completion of the contract. Bidders are referred to the Commandant at the Washington Navy Yard for specifications, forms of offer, and all information relative to the articles required. The proposals must be made in duplicate on the proper blank forms *and filled out as indicated by the blank.* The Department reserves the right to reject any proposal not considered advantageous to the Government.

JAMES FULTON, *Paymaster General, U.S. Navy.*

IRON ORE PROPERTY.

For Sale or Lease, situate within three miles of the C. & O. Ry., at White Sulphur Springs, W. Va., about 3000 Acres, underlaid near surface by a persistent seam of red oxide iron ore from 10 to 60 feet in thickness. Numerous analyses show

61 per cent. Metallic Iron.
.07 per cent. Phos.
.05 per cent. Sulphur.

Six miles of outcrop have been proved by a number of openings. The helderberg limestones, more than 300 feet thick, are exposed at many points, and the hills containing the New River coking coals are within sight. There are good sites for furnace plants in the immediate vicinity, and ample water for all purposes. For further particulars, apply to

The Peabody Door Spring.

THE ONLY LOW PRICED SCIENTIFIC DOOR SPRING MADE.

The reason for this is that it has its greatest power at the latch, which is entirely opposite from all other springs, thus keeping the door not only closed, but latched, and preventing the slamming of the door to a great extent. *Send for Circular.*

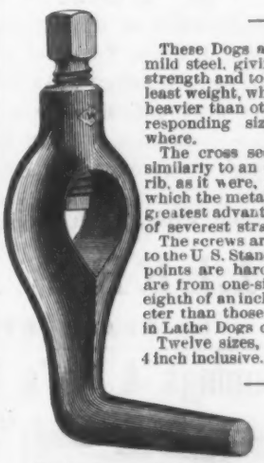
DROP-FORGED
STEEL LATHE DOGS.



These Dogs are forged from mild steel, giving the greatest strength and toughness for the least weight, while they are also heavier than other Dogs of corresponding sizes made elsewhere.
The cross section is shaped similarly to an ogee, forming a rib, as it were, on the back, by which the metal is utilized to its greatest advantage at the point of severest strain.
The screws are made of steel to the U. S. Standard Gauge; the points are hardened, and they are from one-sixteenth to one-eighth of an inch larger in diameter than those generally used in Lathe Dogs offered for sale.
Twelve sizes, from ⅜ inch to 4 inch inclusive.

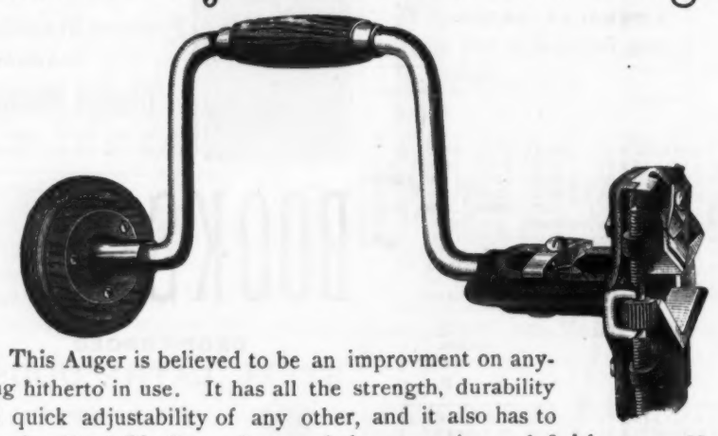
GOODELL'S
Patent Adjustable Hollow Auger.



This Auger is believed to be an improvment on anything hitherto in use. It has all the strength, durability and quick adjustability of any other, and it also has to drive it a Steel Bit Brace Sweep of the same size and finish as our No. 10 Brace—to wit, 14 inch sweep As the Brace Sweep is fitted to the Auger it must always work entirely true, which is not the case when used in an ordinary Brace. Besides, it often happens that the Bit Brace on hand is not large enough to drive a spoke Auger. Adjustable to Cut from ¼ to 1¼ inches.

Price, each, with Sweep, - - $4.00.

MILLERS FALLS CO.,
93 READE ST., NEW YORK.

C. E. Jennings & Co.'s Extra Quality Auger Bits.

89 to 95 So. CLINTON ST., CHICAGO.

HAND ELEVATORS.

To meet the demand for a compact and efficient hoist, to be used for handling light loads in stores and other places, and to be operated by hand, we offer the Weston Patent Safety Double Lift. These machines have been well and favorably known for many years, and, like all the Weston machines, are fitted with a self-acting brake which holds the load suspended at any point, it being necessary to pull the hand rope in order to lower, the load coming to rest as soon as the pulling ceases. The illustration shows the hoist attached to a light cage, but it may be used either with or without a cage. These hoists are not designed for passenger service at all, but are recommended for handling loads up to one ton. They are made in four capacities, viz.: 500 lbs., 1000 lbs, 1500 lbs., and 2000 lbs. If a cage is used the weight of the cage should be added to the load to be lifted. And it is most economical and satisfactory to use a machine of a nominal capacity greater than the maximum load intended to be lifted. A catalogue and any further information will be furnished on application.

UNION SPIRAL SPRING HINGES.

We beg to call the attention of Architects, Builders, Dealers, and all interested parties, to our Spiral Spring Hinge, knowing it to be an effectual and durable one, neat in appearance, easy to put on, and not liable to get out of order. The Springs are made from wire made expressly for us and for this particular purpose, with the view of great elasticity, durability and power. They produce a continuance pressure from the point where the door is wide open until it is closed, and then hold it perfectly in position. It has a solid pintal in connection with short hollow ones, causing little or no friction, the whole power of the Spring being exerted in swinging the door. It is Fast Joint, and can be used for either right or left hand, allowing the dealer to carry less stock, and the builder will never get the wrong hand.

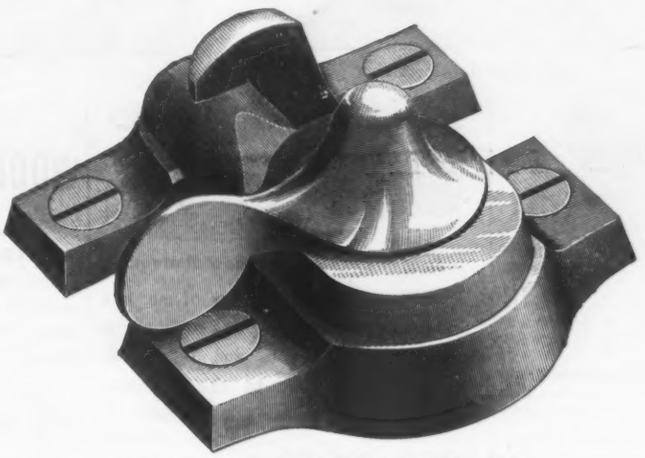
THE IVES PATENTED

SASH LOCKS AND MORTISE BOLTS

A very important feature of the IVES SASH LOCK, is in its securely locking when closed and simultaneously drawing the meeting rails closely together All the movements are accomplished by cams without the instrumentality of springs, thus avoiding the possiblity of getting out of order.



IVES' PATENT BURGLAR PROOF SASH LOCKS AND MORTISE BOLTS are made under TWELVE PATENTS, but are no more expensive than many of the more common bolts and sash fasteners now on the market.

ARE MANUFACTURED IN ALL

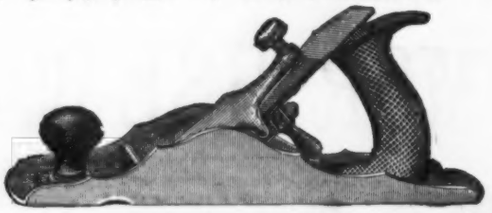
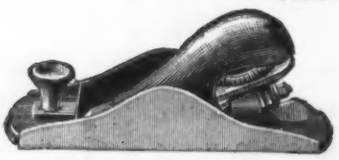
CHAPLIN'S PATENT IRON AND WOOD BOTTOM PLANES.



Jacks and Jointers.

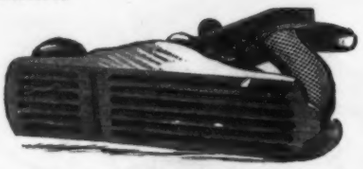
Jack Plane.—Nos. 77, 78.



Nos. 20 and 30 Blocks.

These planes (*with a smooth face*) have been in the market for many years, obtaining a steadily increasing trade as they have become known. We claim for them the utmost simplicity of construction, prompt adjustment and superior beauty of style and finish.

The clamp plate and lever are nickel-plated; the handle is of checkered rubber, which is stronger than any wood handle, and affords an easy, firm grip—also made with nickled iron handle.



Smooth Plane, Corrugated Bottom.

This Cut shows the surface of our new Corrugated Iron Planes. The corrugations afford ample air spaces, and reduce the traction and friction to the minimum. Same price as smooth face.

Corrugated face.	Smooth face.	
	No. 202, Iron Smooth Plane, 7x1¾ in. Cutter	$3.00
	No. 203, Do., do., 8x1¾ in. do.	3.52
	No. 204, Do., do., 9x1¾ in. do.	3.85

No. 1208	No 208, Iron Fore Plane, 18x2¼	5.00
No. 1210	No. 210, Iron Joiner Plane, 22x2¼	5.75

Corrugated face.	Smooth face.	
	No. 211, Iron Joiner Plane, 24x2⅜	$6.75
	With Adjustable Throat.	
	No. 233, Iron Smooth Plane, 8x1¾	3.50
No. 1255	No. 255, Iron Smooth Plane, 9x2	3.75
	All of these Planes are nickel plated finish.	
	No. 20, Block Plane, Japanned, 6⅛x1¾ in. Cutter	1.40
	No. 30, Block Plane, Nickel Plated, 6⅛x1⅝ Cutter	1.65

OUR NEW

WOOD BOTTOM PLANES.

The Clamping Plate and Lever are nickel-plated; the Beechwood has been thoroughly seasoned and is a thicker block than usual, though the Plane is no heavier than those already in the market.

No. 72.	Smooth Plane, 7 x1¾ inch Cutter,	$2.00
" 73.	" " 8 x1¾ " "	2.00
" 74.	" " 8½ 2 " "	2.00

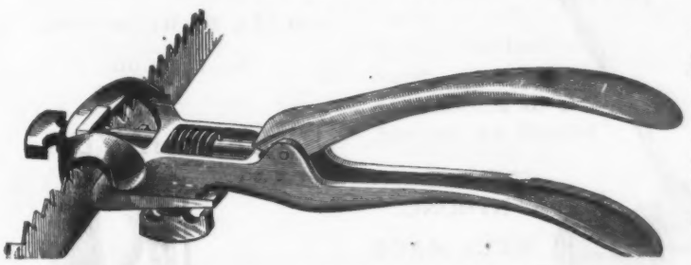
Established by DANIEL B. KING, 1829.

MORRILL'S PERFECT SAW-SETS.



On the application by the administratrix of the estate of the late Asa Farr, for the appointment of a receiver, the New York Supreme Court decided that the business in saw-sets carried on by Mr. Charles Morrill, at 64 College Place, since the death o Mr. Farr, belonged to the Farr estate—the court saying:

"After Farr's death Morrill could not seize upon the books office and assets of Farr's businessand by an usurpation of owner ship undertake to substitute himself in Farr's place in the busi ness the latter had built up."

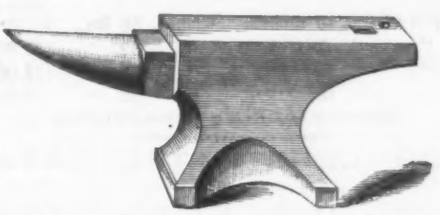
Under the instructions of the court I shall continue the manufacture and sale of the Morrill saw-set.

CHAUNCEY S. TRUAX, Receiver in FARR *vs.* MORRILL,
64 College Place, New York City.

Peter Wright's Patent Solid Wrought Anvil.

PETER WRIGHT PATENT SOLID WROUGHT

Fac-simile of Trade Mark.



Fac-simile of Green Label.

By Royal Letters Patent.

V. R.

PETER WRIGHT'S
SOLID WROUGHT
ANVIL
Made of Best Scrap Iron!
THE SICK FACE AND END ALL IN ONE SOLID PIECE!

The high reputation attained by these Anvils has led makers of an inferior anvil to imitate the brand, with the view of thereby more readily marketing their goods. The trade is cautioned in buying to see that each anvil is stamped with the full trade mark on one side and has the green label affixed to the other; fac-similes of both are shown above.

TOWER & LYON, GENERAL AGENTS, 95 CHAMBERS STREET, NEW YORK.

WIGGER'S
PATENT SASH LIFTERS

A simple contrivance designed to facilitate the Raising and Lowering of

ONE-LIGHT SASHES.

Nearly all modern buildings are constructed with single light sashes, the raising and lowering of which is attended with difficulty

The adjustment of the lower sash is especially inconvenient when screens are used.

These Sash Lifters will be found indispensable in overcoming this constant annoyance.

Latching is facilitated, window sticks and hooks done away with, springing the sash and loosening the glass prevented, &c.

Made of a strip of concave-convex metal, with knobs pressed up, and fitting over the bead on the side rail of sashes.

Made in any size from 28 to 44 inches in length.

Sample Cards, Price Lists and Circulars on application.

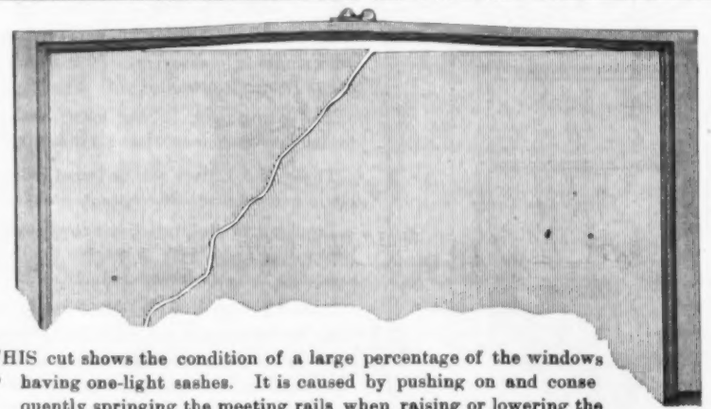
SOLE PROPRIETORS AND MANUFACTURERS,

276 DEVONSHIRE STREET, BOSTON, MASS.

W. H. JACOBUS & CO., 90 Chambers St., New York. MARKLEY, ALLING & CO., Chicago, Ill.



THIS cut shows the condition of a large percentage of the windows having one-light sashes. It is caused by pushing on and consequently springing the meeting rails when raising or lowering the windows, and results in ultimately cracking the glass, thus entailing an expense for repairs greater than the cost of applying Wigger's Patent Sash Lifters. These Sash Lifters obviate this trouble and also prove a great convenience in operating this class of windows, as previously described in the columns of *The Iron Age*.

The steadily increasing demand for these goods proves their utility, and also that both Architects and their Clients appreciate their merits, and that many Architects have specified them on buildings to be completed this fall. We shall be pleased, therefore, to send samples, sample cards and circulars (with blank space for dealers' name), on application, as the goods will be supplied exclusively through the Builders' Hardware Trade.

THE STRONGEST GLUE IN THE WORLD.

2 GOLD MEDALS AWARDED

LONDON 1883. NEW ORLEANS 1885.

RUSSIA CEMENT CO.

Gloucester, Mass.

SOMETHING NEW

THE PATENT ADJUSTABLE BRUSH.

Our new Patent Can can be carried in the pocket and used without danger of soiling from the can or brush; all superfluous glue is removed on wiper. This style is made in three sizes, half pint, gill and half gill. Our regular cans are half pint, pint, quart, two quart and gallon. Bottles, two sizes as heretofore.

At the New Orleans Exposition (where a Gold Medal was awarded) a piece of Georgia pine butted, one inch square, on a Testing Machine, registered 1620 lbs. before parting.

Does not set quickly like the old style Glues, and has FOUR TIMES the strength.

No Heating required.

No other Glues have the RECORD of 1620 lbs. to the square inch.

The fact that the sales of

LEPAGE'S THE ONLY GENUINE LIQUID GLUE

has greatly increased during the past year, so that we have been unable to manufacture the goods as fast as called for is the best proof that the public appreciates A GOOD THING.

To meet this demand we have recently greatly increased the capacity of our works, and have now the most scientifically arranged glue plant in the world, no expense having been spared which would in any way contribute toward the ABSOLUTE PERFECTION of the products.

THE WIDE AWAKE DEALER is not slow to see that it pays him to keep in stock those goods which are sure of QUICK SALES. Don't be cajoled into buying the various Liquid Glues now in the market for which claims are made that cannot be substantiated.

That the Dealer and Public may be sure that they are not deceived in making their purchases we have commenced putting the autograph below on all the Genuine LePage Glues.

Russia Cement Co.
GLOUCESTER, MASS.

These Glues are used in the Smithsonian Institute, at Washington for all its works of mounting specimens, by the Government Arsenals and Department Buildings, by the Pullman Palace Car Co., Mason & Hamlin Organ and Piano Co., and by thousands of first-class manufacturers and mechanics throughout the world, for all kinds of fine work.

Coes Wrench Co.,

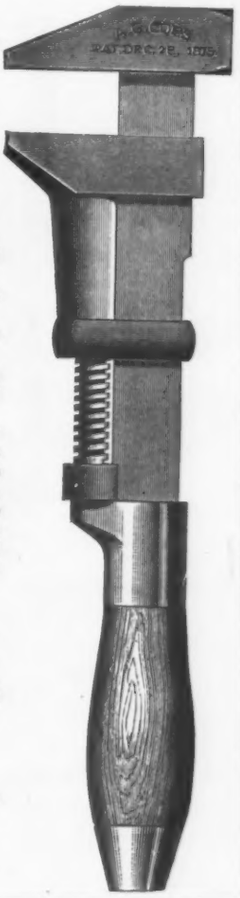
WORCESTER MASS.,

MANUFACTURERS OF

A. G. COES'

PATENT

SCREW WRENCHES,



The Strongest Wrench made, and the only successful re-enforced bar.

The Ferrule is firmly secured in place by a nut screwed on the bar.

Particular attention is called to the way in which the handle is made and fastened to the shank.

This Handle is made better and stronger than heretofore by using our new Cup Tip at the end which encloses the wood and keeps it from splitting. This is the only wrench which has the wood handle firmly secured and held together at each end, and it will stand more rough usage and last longer than any now made. It is not affected heat, cold or moisture.

None Genuine unless Stamped,

Bemis & Call Hardware & Tool Co.

PATENT COMBINATION WRENCH.

Case-Hardened Throughout. Parts Interchangeable.

This Wrench not only combines the superior qualities of a Gas Pipe Wrench but also all the requisite combinations of a regular Nut Wrench, thus making a combination which has no equal.

No. 3 PATENT PIPE WRENCH.

The serrated jaws of the Wrench are interchangeable; that is, the same serrated plate may be used for either the stationary or sliding jaw, so that if one plate is broken another can be furnished adapted to either jaw without express designation. The slides, nuts and various parts are also interchangeable, thus easily repairing the Wrench at very small expense, and with as perfect practicability for further use as when the Wrench was new.

For Circulars and Price List, address

BEMIS & CALL HARDWARE & TOOL COMPANY, Springfield Mass.

This Wrench can be Furnished with Long Nut or Sleeve.

THE ROYAL DAUBER.

WITH MUD SCRAPER ATTACHED.

Patented April 26, and September 27, 1887.

An entirely new thing in Blacking Brushes, consisting solely of TINNED MALLEABLE IRON and PURE BRISTLES. **SOLID, ROUND-FACED, INDESTRUCTIBLE.**

SOLID.—Not bored and drawn, nor secured with pitch or cement. Not several small knots, but ONE SOLID KNOT OF PURE BRISTLES. NO HORSEHAIR.

ROUND-FACED.—Takes Blacking from the box on its centre instead of its edges, and will therefore spread it evener, smoother and thinner, ensuring a better polish than any flat-faced brush.

INDESTRUCTIBLE.—Because the only materials used are tin-coated iron and bristles, put together to stay, the knot of bristles being held IN ONE SOLID MASS, BY COMPRESSION, IN A GRIP OF IRON, and fastened with an iron rivet. Warranted not to "spread" or "clog" with blacking.

WILL OUTLAST A DOZEN OF ANY OTHER KIND.

This DAUBING BRUSH is made WITH A SCRAPER FOR REMOVING MUD FROM THE CREVICES OF THE SHOES. The utility of this is too apparent to need a word of commendation.

Manufactured by **BLAIR MFG. CO.,** Springfield, Mass.

MEDIUM SIZE "NEW EASY."

LIGHTNING HAY KNIVES

WEYMOUTH'S PATENT.

This Knife is the **BEST IN USE** for cutting down hay and straw in mow and stack, cutting fine feed from bale, cutting corn stalks for feed, cutting peat & ditching marshes. The blade is **Best Cast Steel**, spring temper, easily sharpened, and is giving *universal* satisfaction. A few moments' trial will show its merits, and parties once using it are unwilling to do without it. Its sales are fast increasing for export as well as home trade, and it seems destined to take the place of all other Hay Knives. They are nicely packed in boxes, 1 dozen each of 60 pounds weight, suitable for shipping by land or water to any part of the world.

Manufactured only by

HIRAM HOLT & CO. **EAST WILTON, Franklin Co., MAINE.**

For sale by the Hardware trade generally.

CAUTION.

We are informed that various parties are infringing upon the widely-known **Letters Patent** granted originally to GEORGE F. WEYMOUTH for an improved Hay Knife. The invention patented to GEORGE F. WEYMOUTH is embodied in a sword-shaped blade provided with operating handles for working the same, the edge of the sword-blade being furnished with knife-edged serrations or teeth. ☞ **It is our purpose to PROSECUTE ALL INFRINGEMENTS,** and to hold responsible to the full extent of our ability and of the law all parties who manufacture any knife infringing upon the patent, or who deal in the same. Several suits are now pending in the U. S Courts. ☞ **All manufacturers and dealers are hereby warned** of our rights, and **the public are cautioned** against purchasing any Hay Knives, made as described above, which are not of our *genuine* manufacture.

EAST WILTON, Sept. 1, 1886.

JOBBERS!

We desire *One* Jobber in every city to handle our goods—your traveling men can pay all their expenses and net a handsome profit in addition by representing our goods on the road. They are ready sellers. We supply a handsome Morocco, plush and satin lined, Sample Case, 6 x 10 inches; full directions accompany each. Write for terms and additional particulars.

Bradley's HEATING FORGES

Established 1832

Pat. Aug. 30, 1887

With a manufacturing experience of over half a century, we recommend these machines to be the best, simplest, most durable and combining all the essential elements.

For ha[illegible]al or coke. Indispensable in all shops to keep Bradley's Cushioned Hammers and men fully employed and reduces cost of production.

BRADLEY & CO., Syracuse, N. Y.

BRADLEY'S UPRIGHT CUSHIONED HELVE HAMMER

Established 1882.

Combines all the best elements essential in a first-class Hammer. Has more good points, does more and better work and costs less for repairs than [illegible]y other Hammer in the World.

BRADLEY & CO. Syracuse, N.Y.

GATE CITY STONE FILTER CO.,

46 Murray St., New York.

☞ Fine China and Gray Stone-ware Jars to hold the Water.
☞ A NATURAL STONE for a Filtering Medium.
☞ Fitted with separate Patent Ice Chambers to cool the water.
☞ As easily cleaned a Water Pitcher.
☞ No objectionable material used in the construction of this Filter

All water is filled with impurities during the rainy season.

☞ This Filter will ABSOLUTELY CLEAN IT.

Address as above for Descriptive Price List. Mention *The Iron Age.*

Open Cut shows Filter Disc used in our Filters, and Separate Patent Ice Chamber.

NEW YORK SAFETY DUMB WAITER FIXTURES

Patented United States, April 19th, 1887; in Canada, May 18th, 1887.

The MOST COMPLETE, SIMPLE and ABSOLUTELY SAFE WAITER made. Provided with SAFETY ROPE, AVOIDING ACCIDENT. ENTIRELY NOISELESS, and moves with perfect ease.

FIXTURES ONE SIZE ONLY, adapted to any size waiter. Can be adjusted by any CARPENTER or MECHANIC. DIAGRAM and FULL DIRECTIONS ACCOMPANY EACH SET.

HANDSOMELY BRONZED, and packed ONE SET in a BOX. Sold by the Hardware trade.

PRICE, 15.00.

For catalogue address the manufacturers.

WEST'S MOULDERS' TEXT BOOK

BEING PART II. OF AMERICAN FOUNDRY PRACTICE,

Giving the best methods and rules for obtaining good castings, with detailed description for making moulds. A thoroughly practical book that should be in the hands of every moulder.

PRICE, - Cloth, - 460 Pages, - - $2.50.

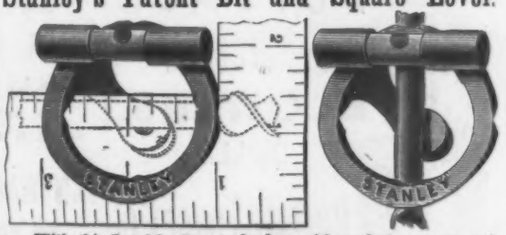
Sent, post-paid, on receipt of price by

DAVID WILLIAMS, Bookseller and Publisher, 66 and 68 Duane St., New York.

IMPROVED
Labor-Saving
CARPENTERS'
TOOLS.
STANLEY
RULE & LEVEL CO.
New Britain, Conn.

☞ The "Woodworker's Guide" mailed free, on application.

Stanley's Patent Bit and Square Level.



With this Level boring can be done with perfect accuracy as to perpendicular, horizontal, or angle of forty-five degrees, by observing the bubble-glass, while turning the bit.

It can also be attached to the horizontal leg of a Carpenter's Square, thus making it an accurate Spirit-level; and the upright leg of the square will indicate an exact Plumb-line.

No. 44. Bit and Square Level, Brass Frame.....$0 30

A MAN OF SAMPLES.

Something About the Men he Met "On The Road."

BY WM. H. MAHER.

Should be read by every business man in the country.

It is a book full of keen points about business men and business methods, from the pen of a successful merchant who has not only been "on the road" but has been book-keeper, buyer and head of a house doing a large trade.

The merchant who stays at home can see how men work on the road.

The book-keeper can learn how his letters and drafts are looked upon by the men he writes to.

The stock clerk can get some points about shipping goods and filling orders.

Those who advertise can learn from one of the best advertisers in the United States.

Actual names of men and houses are given, but not a line in the book has been paid for in any way.

If men were complimented, it was because the author felt that they deserved it, and others are condemned fearlessly.

IT IS A BRAINY BOOK.

Sent, postpaid, on receipt of the price, 75 cents, by

DAVID WILLIAMS
66 and 68 Duane Street New York.

TUBAL SMELTING WORKS,

760 and 762 South Broad Street, - PHILADELPHIA.
